#	ARTICLE	IF	CITATIONS
1	Sensory perception and food neophobia drive liking of functional plant-based food enriched with winemaking by-products. <i>Journal of Sensory Studies</i> , 2022, 37, e12710.	0.8	8
2	Combined influence of TAS2R38 genotype and PROP phenotype on the intensity of basic tastes, astringency and pungency in the Italian taste project. <i>Food Quality and Preference</i> , 2022, 95, 104361.	2.3	15
3	Attentional bias for vegetables is negatively associated with acceptability and is related to sensory properties. <i>Food Quality and Preference</i> , 2022, 96, 104429.	2.3	9
4	Remote testing: Sensory test during Covid-19 pandemic and beyond. <i>Food Quality and Preference</i> , 2022, 96, 104437.	2.3	27
5	Development of an emoji-based self-report measurement tool to measure emotions elicited by foods in preadolescents. <i>Food Quality and Preference</i> , 2022, , 104585.	2.3	5
6	An olfactory self-test effectively screens for COVID-19. <i>Communications Medicine</i> , 2022, 2, .	1.9	10
7	Relationships between Intensity and Liking for Chemosensory Stimuli in Food Models: A Large-Scale Consumer Segmentation. <i>Foods</i> , 2022, 11, 5.	1.9	6
8	Exploring the association between oral tactile sensitivity measures and phenotypic markers of oral responsiveness. <i>Journal of Texture Studies</i> , 2022, , .	1.1	2
9	Individual differences in responsiveness to oral sensations and odours with chemesthetic activity: Relationships between sensory modalities and impact on the hedonic response. <i>Food Quality and Preference</i> , 2021, 88, 104112.	2.3	14
10	Phenol-Rich Food Acceptability: The Influence of Variations in Sweetness Optima and Sensory-Liking Patterns. <i>Nutrients</i> , 2021, 13, 866.	1.7	9
11	Does Responsiveness to Basic Tastes Influence Preadolescents'™ Food Liking? Investigating Taste Responsiveness Segment on Bitter-Sour-Sweet and Salty-Umami Model Food Samples. <i>Nutrients</i> , 2021, 13, 2721.	1.7	11
12	The relationship between disgust sensitivity and BMI: Is the food disgusting or am I?. <i>Food Quality and Preference</i> , 2021, 92, 104222.	2.3	4
13	Assessing the extent and timing of chemosensory impairments during COVID-19 pandemic. <i>Scientific Reports</i> , 2021, 11, 17504.	1.6	23
14	The combined use of temporal dominance of sensations (TDS) and discrete time-intensity (DTI) to describe the dynamic sensory profile of alcoholic cocktails. <i>Food Quality and Preference</i> , 2021, 93, 104281.	2.3	11
15	The role of sour and bitter perception in liking, familiarity and choice for phenol-rich plant-based foods. <i>Food Quality and Preference</i> , 2021, 93, 104250.	2.3	25
16	Impact of a nudging intervention and factors associated with vegetable dish choice among European adolescents. <i>European Journal of Nutrition</i> , 2020, 59, 231-247.	1.8	20
17	Smell and taste changes are early indicators of the COVID-19 pandemic and political decision effectiveness. <i>Nature Communications</i> , 2020, 11, 5152.	5.8	74
18	Winemaking Byproducts as Source of Antioxidant Components: Consumers'™ Acceptance and Expectations of Phenol-Enriched Plant-Based Food. <i>Antioxidants</i> , 2020, 9, 661.	2.2	12

#	ARTICLE	IF	CITATIONS
19	Profiling Individual Differences in Alcoholic Beverage Preference and Consumption: New Insights from a Large-Scale Study. <i>Foods</i> , 2020, 9, 1131.	1.9	18
20	Gender Differences in Fat-Rich Meat Choice: Influence of Personality and Attitudes. <i>Nutrients</i> , 2020, 12, 1374.	1.7	15
21	Sensory acceptability and personality traits both determine which contexts are preferred for consumption of alcoholic cocktails. <i>Food Quality and Preference</i> , 2020, 85, 103978.	2.3	5
22	Gender, Age, Geographical Area, Food Neophobia and Their Relationships with the Adherence to the Mediterranean Diet: New Insights from a Large Population Cross-Sectional Study. <i>Nutrients</i> , 2020, 12, 1778.	1.7	41
23	Liking patterns moderate the relationship between sensory, emotional and context appropriateness profiles: Evidences from a Global Profile study on alcoholic cocktails. <i>Food Quality and Preference</i> , 2020, 83, 103904.	2.3	11
24	Functional and sensory properties of phenolic compounds from unripe grapes in vegetable food prototypes. <i>Food Chemistry</i> , 2020, 315, 126291.	4.2	31
25	Children's selection of emojis to express food-elicited emotions in varied eating contexts. <i>Food Quality and Preference</i> , 2020, 85, 103953.	2.3	28
26	Relationship Between Odor Intensity Estimates and COVID-19 Prevalence Prediction in a Swedish Population. <i>Chemical Senses</i> , 2020, 45, 449-456.	1.1	53
27	Attitudes to Food in Italy: Evidence from the Italian Taste Project. , 2020, , 1381-1405.		2
28	Enhanced utilisation of nonmarketable fish: physical, nutritional and sensory properties of "clean label" fish burgers. <i>International Journal of Food Science and Technology</i> , 2019, 54, 593-601.	1.3	8
29	Individual variation in fungiform papillae density with different sizes and relevant associations with responsiveness to oral stimuli. <i>Food Quality and Preference</i> , 2019, 78, 103729.	2.3	13
30	Influences of Psychological Traits and PROP Taster Status on Familiarity with and Choice of Phenol-Rich Foods and Beverages. <i>Nutrients</i> , 2019, 11, 1329.	1.7	35
31	Individual differences in perceived complexity are associated with different affective responses to alcoholic cocktails. <i>Food Quality and Preference</i> , 2019, 76, 47-59.	2.3	21
32	Global Profile: Going beyond liking to better understand product experience. <i>Food Research International</i> , 2019, 121, 205-216.	2.9	37
33	Consumer categorization of plant-based dishes: Implications for promoting vegetable consumption. <i>Food Quality and Preference</i> , 2019, 76, 133-145.	2.3	9
34	When are "Dish of the Day" nudges most effective to increase vegetable selection?. <i>Food Policy</i> , 2019, 85, 15-27.	2.8	34
35	Sensory and chemical profile of a phenolic extract from olive mill waste waters in plant-base food with varied macro-composition. <i>Food Research International</i> , 2019, 119, 236-243.	2.9	21
36	Liking and consumption of vegetables with more appealing and less appealing sensory properties: Associations with attitudes, food neophobia and food choice motivations in European adolescents. <i>Food Quality and Preference</i> , 2019, 75, 179-186.	2.3	42

#	ARTICLE	IF	CITATIONS
37	Measuring consumers attitudes towards health and taste and their association with food-related life-styles and preferences. <i>Food Quality and Preference</i> , 2019, 73, 25-37.	2.3	67
38	Promotion of novel plant-based dishes among older consumers using the "dish of the day"™ as a nudging strategy in 4 EU countries. <i>Food Quality and Preference</i> , 2019, 75, 260-272.	2.3	30
39	Personality traits and gender influence liking and choice of food pungency. <i>Food Quality and Preference</i> , 2018, 66, 113-126.	2.3	73
40	Associations between human fungiform papillae and responsiveness to oral stimuli: effects of individual variability, population characteristics, and methods for papillae quantification. <i>Chemical Senses</i> , 2018, 43, 313-327.	1.1	25
41	Associations between food neophobia and responsiveness to "warning"•chemosensory sensations in food products in a large population sample. <i>Food Quality and Preference</i> , 2018, 68, 113-124.	2.3	100
42	The influence of psychological traits, beliefs and taste responsiveness on implicit attitudes toward plant- and animal-based dishes among vegetarians, flexitarians and omnivores. <i>Food Quality and Preference</i> , 2018, 68, 276-291.	2.3	85
43	Nudging using the "dish of the day"™ strategy does not work for plant-based meals in a <scp>D</scp>anish sample of adolescent and older people. <i>International Journal of Consumer Studies</i> , 2018, 42, 327-334.	7.2	14
44	Individual Variation in PROP Status, Fungiform Papillae Density, and Responsiveness to Taste Stimuli in a Large Population Sample. <i>Chemical Senses</i> , 2018, 43, 697-710.	1.1	45
45	Exploring influences on food choice in a large population sample: The Italian Taste project. <i>Food Quality and Preference</i> , 2017, 59, 123-140.	2.3	128
46	Investigating preferred coffee consumption contexts using open-ended questions. <i>Food Quality and Preference</i> , 2017, 61, 63-73.	2.3	42
47	Comparing Manual Counting to Automated Image Analysis for the Assessment of Fungiform Papillae Density on Human Tongue. <i>Chemical Senses</i> , 2017, 42, 553-561.	1.1	12
48	Exploring salient dimensions in a free sorting task: A cross-country study within the elderly population. <i>Food Quality and Preference</i> , 2017, 60, 19-30.	2.3	14
49	Inclusion of <i>Hermetia illucens</i> larvae meal on rainbow trout (<i>Oncorhynchus mykiss</i>) feed: effect on sensory profile according to static and dynamic evaluations. <i>Journal of the Science of Food and Agriculture</i> , 2017, 97, 3402-3411.	1.7	82
50	Danish adolescents like their vegetables fresh rather than frozen or canned. <i>International Journal of Gastronomy and Food Science</i> , 2017, 9, 29-33.	1.3	10
51	Consumption of a High Quantity and a Wide Variety of Vegetables Are Predicted by Different Food Choice Motives in Older Adults from France, Italy and the UK. <i>Nutrients</i> , 2017, 9, 923.	1.7	35
52	Comparison of three nudge interventions (priming, default option, and perceived variety) to promote vegetable consumption in a self-service buffet setting. <i>PLoS ONE</i> , 2017, 12, e0176028.	1.1	66
53	Sensory determinants of stated liking for vegetable names and actual liking for canned vegetables: A cross-country study among European adolescents. <i>Appetite</i> , 2016, 107, 339-347.	1.8	46
54	Influence of pig genetic type on sensory properties and consumer acceptance of Parma, San Daniele and Toscano dry-cured hams. <i>Journal of the Science of Food and Agriculture</i> , 2016, 96, 798-806.	1.7	9

#	ARTICLE	IF	CITATIONS
55	Increasing vegetable intakes: rationale and systematic review of published interventions. <i>European Journal of Nutrition</i> , 2016, 55, 869-896.	1.8	193
56	Caffeine metabolism rate influences coffee perception, preferences and intake. <i>Food Quality and Preference</i> , 2016, 53, 97-104.	2.3	20
57	A sensory- and consumer-based approach to optimize cheese enrichment with grape skin powders. <i>Journal of Dairy Science</i> , 2016, 99, 194-204.	1.4	38
58	The impact of individual variations in taste sensitivity on coffee perceptions and preferences. <i>Physiology and Behavior</i> , 2015, 138, 219-226.	1.0	91
59	How does it make you feel? A new approach to measuring emotions in food product experience. <i>Food Quality and Preference</i> , 2014, 37, 109-122.	2.3	192
60	An exploratory study of sensory attributes and consumer traits underlying liking for and perceptions of freshness for ready to eat mixed salad leaves in Italy. <i>Food Research International</i> , 2014, 59, 108-116.	2.9	40
61	Projective Mapping for interpreting wine aroma differences as perceived by naïve and experienced assessors. <i>Food Quality and Preference</i> , 2013, 29, 6-15.	2.3	93
62	Sensory Properties of Under-Roasted Coffee Beverages. <i>Journal of Food Science</i> , 2013, 78, S1290-300.	1.5	22
63	A new approach in TDS data analysis: A case study on sweetened coffee. <i>Food Quality and Preference</i> , 2013, 30, 33-46.	2.3	67
64	Grape seed proteins: a new fining agent for astringency reduction in red wine. <i>Australian Journal of Grape and Wine Research</i> , 2013, 19, 153-160.	1.0	20
65	Consumer Perception of Dry-Cured Ham – A Cross-Cultural Study in Italy, Norway and Spain. <i>Journal of Sensory Studies</i> , 2013, 28, 450-466.	0.8	18
66	Sensory functionality of extra-virgin olive oil in vegetable foods assessed by Temporal Dominance of Sensations and Descriptive Analysis. <i>Food Quality and Preference</i> , 2012, 26, 141-150.	2.3	69
67	Individual astringency responsiveness affects the acceptance of phenol-rich foods. <i>Appetite</i> , 2011, 56, 633-642.	1.8	81
68	Astringency Perception and Heritability Among Young Finnish Twins. <i>Chemosensory Perception</i> , 2011, 4, 134-144.	0.7	14
69	Temporary Modification of Salivary Protein Profile and Individual Responses to Repeated Phenolic Astringent Stimuli. <i>Chemical Senses</i> , 2010, 35, 75-85.	1.1	76
70	Saliva Characteristics and Individual Sensitivity to Phenolic Astringent Stimuli. <i>Chemical Senses</i> , 2009, 34, 295-304.	1.1	97
71	Prediction of grape polyphenol astringency by means of a fluorimetric micro-plate assay. <i>Food Chemistry</i> , 2009, 113, 325-330.	4.2	17
72	Italian meals. , 2009, , 359-376.		3

#	ARTICLE	IF	CITATIONS
73	Bioaccessibility and Antioxidant Activity Stability of Phenolic Compounds from Extra-Virgin Olive Oils during <i>in Vitro</i> Digestion. <i>Journal of Agricultural and Food Chemistry</i> , 2007, 55, 8423-8429.	2.4	48
74	PERCEIVED ASTRINGENCY IN WINE: A PREDICTIVE MODEL. <i>Acta Horticulturae</i> , 2007, , 523-532.	0.1	4
75	Prediction of perceived astringency induced by phenolic compounds II: Criteria for panel selection and preliminary application on wine samples. <i>Food Quality and Preference</i> , 2006, 17, 96-107.	2.3	70
76	INFLUENCES OF RIPENING STAGE ON QUALITY INDEXES IN APRICOT FOR FRESH MARKET AND PROCESSING. <i>Acta Horticulturae</i> , 2006, , 523-528.	0.1	6
77	Prediction of perceived astringency induced by phenolic compounds. <i>Food Quality and Preference</i> , 2004, 15, 761-769.	2.3	111
78	The use of enzymes for thermal process monitoring: modification of milk alkaline phosphatase heat resistance by means of an immobilization technique. <i>Food Control</i> , 2004, 15, 427-433.	2.8	17
79	Spectrophotometric assay using o-phthaldialdehyde for the determination of transglutaminase activity on casein. <i>Food Chemistry</i> , 2002, 78, 363-368.	4.2	56
80	Pectolytic enzymes co-immobilization on γ -alumina spheres via organophosphate compounds. <i>Process Biochemistry</i> , 1997, 32, 715-722.	1.8	13
81	Core-shell functional microspheres by dispersion polymerization: 2. Synthesis and characterization. <i>Polymer</i> , 1996, 37, 343-347.	1.8	23
82	Pectin degradation in UF-membrane reactors with commercial pectinases. <i>Progress in Biotechnology</i> , 1996, , 439-449.	0.2	5
83	Immobilised pectinase efficiency in the depolymerisation of pectin in a model solution and apple juice. <i>Progress in Biotechnology</i> , 1996, , 971-978.	0.2	2
84	Preparation and properties of an immobilized soluble-insoluble pectinlyase. <i>Process Biochemistry</i> , 1995, 30, 151-157.	1.8	22
85	Fresh plant tissue softening by means of an immobilized soluble-insoluble endopectinlyase. <i>International Journal of Food Science and Technology</i> , 1995, 30, 391-396.	1.3	3
86	Immobilization and reactivity of enzymes on functional particles prepared by dispersion polymerization. <i>Macromolecular Rapid Communications</i> , 1994, 15, 909-915.	2.0	3
87	Immobilization of an endopectinlyase on γ -alumina: Study of factors influencing the biocatalytic matrix stability. <i>Journal of Chemical Technology and Biotechnology</i> , 1994, 59, 237-241.	1.6	9
88	Quantification of polyamine losses during manipulation and assay procedures. <i>Phytochemical Analysis</i> , 1992, 3, 110-116.	1.2	3
