citing authors

#	ARTICLE	IF	CITATIONS
1	The contribution of surprise to the prediction based modulation of fMRI responses. <i>Neuropsychologia</i> , 2016, 84, 105-112.	1.6	31
2	Does surprise enhancement or repetition suppression explain visual mismatch negativity?. <i>European Journal of Neuroscience</i> , 2016, 43, 1590-1600.	2.6	28
3	Advancing research on unconscious priming: When can scientists claim an indirect task advantage?. <i>Journal of Experimental Psychology: General</i> , 2022, 151, 65-81.	2.1	20
4	TMS of the occipital face area modulates cross-domain identity priming. <i>Brain Structure and Function</i> , 2019, 224, 149-157.	2.3	15
5	Neuroimaging results suggest the role of prediction in cross-domain priming. <i>Scientific Reports</i> , 2018, 8, 10356.	3.3	12
6	Number processing outside awareness? Systematically testing sensitivities of direct and indirect measures of consciousness. <i>Attention, Perception, and Psychophysics</i> , 2021, 83, 2510-2529.	1.3	11
7	Repetition Suppression for Noisy and Intact Faces in the Occipito-Temporal Cortex. <i>Frontiers in Psychology</i> , 2019, 10, 1348.	2.1	10
8	Measures of repetition suppression in the fusiform face area are inflated by co-occurring effects of statistically learned visual associations. <i>Cortex</i> , 2020, 131, 123-136.	2.4	9
9	Visual mismatch negativity indicates automatic, task-independent detection of artistic image composition in abstract artworks. <i>Biological Psychology</i> , 2018, 136, 76-86.	2.2	8
10	Visual mismatch response and fMRI signal adaptation correlate in the occipital-temporal cortex. <i>Behavioural Brain Research</i> , 2018, 347, 77-87.	2.2	2
11	Similar Expectation Effects for Immediate and Delayed Stimulus Repetitions. <i>Frontiers in Neuroscience</i> , 2019, 13, 1379.	2.8	0
12	Re-analyzing unconscious priming: Is there really an indirect task advantage?. <i>Journal of Vision</i> , 2019, 19, 275b.	0.3	0
13	Is there evidence for unconscious processing of digits?. <i>Journal of Vision</i> , 2019, 19, 275c.	0.3	0
