

Majid Alam

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5164082/majid-alam-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

22
papers

321

#	Paper	IF	Citations
22	Neurokinin 1 Receptor Antagonists for Pruritus. <i>Drugs</i> , 2021 , 81, 621-634	12.1	0
21	Interleukin-31: The "itchy" cytokine in inflammation and therapy. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2021 , 76, 2982-2997	9.3	18
20	Topical odorant application of the specific olfactory receptor OR2AT4 agonist, Sandalore , improves telogen effluvium-associated parameters. <i>Journal of Cosmetic Dermatology</i> , 2021 , 20, 784-791	2.5	8
19	Hair Follicle Chemosensation: TRPM5 Signaling Is Required for Anagen Maintenance. <i>Journal of Investigative Dermatology</i> , 2021 , 141, 2300-2303	4.3	1
18	Peroxisome proliferator-activated receptor- β signalling protects hair follicle stem cells from chemotherapy-induced apoptosis and epithelial-mesenchymal transition. <i>British Journal of Dermatology</i> , 2021 ,	4	3
17	Hair transplantation: Basic overview. <i>Journal of the American Academy of Dermatology</i> , 2021 , 85, 803-814	4.5	5
16	Exosomes: Emerging Diagnostic and Therapeutic Targets in Cutaneous Diseases. <i>International Journal of Molecular Sciences</i> , 2020 , 21,	6.3	7
15	Mitochondrial energy metabolism is negatively regulated by cannabinoid receptor 1 in intact human epidermis. <i>Experimental Dermatology</i> , 2020 , 29, 616-622	4	3
14	Role of neuroimmune circuits and pruritus in psoriasis. <i>Experimental Dermatology</i> , 2020 , 29, 414-426	4	21
13	An osteopontin-derived peptide inhibits human hair growth at least in part by decreasing fibroblast growth factor-7 production in outer root sheath keratinocytes. <i>British Journal of Dermatology</i> , 2020 , 182, 1404-1414	4	4
12	Preclinical evidence that the PPAR γ modulator, N-Acetyl-GED-0507-34-Levo, may protect human hair follicle epithelial stem cells against lichen planopilaris-associated damage. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2020 , 34, e195-e197	4.6	5
11	Deciphering the molecular morphology of the human hair cycle: Wnt signalling during the telogen-anagen transformation. <i>British Journal of Dermatology</i> , 2020 , 182, 1184-1193	4	29
10	Growth Hormone Operates as a Neuroendocrine Regulator of Human Hair Growth Ex Vivo. <i>Journal of Investigative Dermatology</i> , 2019 , 139, 1593-1596	4.3	3
9	Interplay of MicroRNA-21 and SATB1 in Epidermal Keratinocytes during Skin Aging. <i>Journal of Investigative Dermatology</i> , 2019 , 139, 2538-2542.e2	4.3	7
8	Transepidermal UV radiation of scalp skin ex vivo induces hair follicle damage that is alleviated by the topical treatment with caffeine. <i>International Journal of Cosmetic Science</i> , 2019 , 41, 164-182	2.7	17
7	Distinct Patterns of Hair Graft Survival After Transplantation Into 2 Nonhealing Ulcers: Is Location Everything?. <i>Dermatologic Surgery</i> , 2019 , 45, 557-565	1.7	7
6	Peroxisome Proliferator-Activated Receptor- β Mediated Signaling Regulates Mitochondrial Energy Metabolism in Human Hair Follicle Epithelium. <i>Journal of Investigative Dermatology</i> , 2018 , 138, 1656-1659	4.3	10

5	A technique for more precise distinction between catagen and telogen human hair follicles <i>ex vivo</i> . <i>Journal of the American Academy of Dermatology</i> , 2018 , 79, 558-559	4.5	9
4	Image Gallery: Intravital visualization of the dynamic changes in human hair follicle cycling. <i>British Journal of Dermatology</i> , 2018 , 178, e396	4	4
3	Olfactory receptor OR2AT4 regulates human hair growth. <i>Nature Communications</i> , 2018 , 9, 3624	17.4	55
2	Thyroid Hormones Enhance Mitochondrial Function in Human Epidermis. <i>Journal of Investigative Dermatology</i> , 2016 , 136, 2003-2012	4.3	18
1	MicroRNA-214 controls skin and hair follicle development by modulating the activity of the Wnt pathway. <i>Journal of Cell Biology</i> , 2014 , 207, 549-67	7.3	77
