|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Lifestyle Risk Factors for Ischemic Stroke and Transient Ischemic Attack in Young Adults in the Stroke in Young Fabry Patients Study. <i>Stroke</i> , 2013, 44, 119-125.                                                              | 1.0 | 142       |
| 2  | Prevalence and correlates of frailty among older adults: findings from the German health interview and examination survey. <i>BMC Geriatrics</i> , 2015, 15, 22.                                                                      | 1.1 | 93        |
| 3  | Health risk factors and self-rated health among job-seekers. <i>BMC Public Health</i> , 2011, 11, 659.                                                                                                                                | 1.2 | 47        |
| 4  | MRI in acute cerebral ischemia of the young. <i>Neurology</i> , 2013, 81, 1914-1921.                                                                                                                                                  | 1.5 | 42        |
| 5  | Baseline participation in a health examination survey of the population 65 years and older: who is missed and why?. <i>BMC Geriatrics</i> , 2016, 16, 21.                                                                             | 1.1 | 36        |
| 6  | Physical exercise and cognitive function across the life span: Results of a nationwide population-based study. <i>Journal of Science and Medicine in Sport</i> , 2018, 21, 489-494.                                                   | 0.6 | 34        |
| 7  | In-person alcohol counseling versus computer-generated feedback: Results from a randomized controlled trial. <i>Health Psychology</i> , 2018, 37, 70-80.                                                                              | 1.3 | 31        |
| 8  | Motivation to change risky drinking and motivation to seek help for alcohol risk drinking among general hospital inpatients with problem drinking and alcohol-related diseases. <i>General Hospital Psychiatry</i> , 2010, 32, 86-93. | 1.2 | 29        |
| 9  | Does stage tailoring matter in brief alcohol interventions for job-seekers? A randomized controlled trial. <i>Addiction</i> , 2014, 109, 1845-1856.                                                                                   | 1.7 | 27        |
| 10 | In-person and computer-based alcohol interventions at general hospitals: reach and retention. <i>European Journal of Public Health</i> , 2016, 26, 844-849.                                                                           | 0.1 | 27        |
| 11 | "We can do only what we have the means for" general practitioners' views of primary care for older people with complex health problems. <i>BMC Family Practice</i> , 2015, 16, 35.                                                    | 2.9 | 24        |
| 12 | Kidney Function and White Matter Disease in Young Stroke Patients. <i>Stroke</i> , 2012, 43, 2382-2388.                                                                                                                               | 1.0 | 23        |
| 13 | How alcohol use problem severity affects the outcome of brief intervention delivered in-person versus through computer-generated feedback letters. <i>Drug and Alcohol Dependence</i> , 2018, 183, 82-88.                             | 1.6 | 20        |
| 14 | Operationalizing multimorbidity and autonomy for health services research in aging populations - the OMAHA study. <i>BMC Health Services Research</i> , 2011, 11, 47.                                                                 | 0.9 | 18        |
| 15 | How well do TTM measures work among a sample of individuals with unhealthy alcohol use that is characterized by low readiness to change?. <i>Psychology of Addictive Behaviors</i> , 2013, 27, 573-583.                               | 1.4 | 16        |
| 16 | Can brief alcohol interventions in general hospital inpatients improve mental and general health over 2 years? Results from a randomized controlled trial. <i>Psychological Medicine</i> , 2019, 49, 1722-1730.                       | 2.7 | 15        |
| 17 | Developments in the health situation in Germany during the initial stage of the COVID-19 pandemic for selected indicators of GEDA 2019/2020-EHIS. , 2020, 5, 3-20.                                                                    |     | 15        |
| 18 | Belief incongruence and the intention-behavior gap in persons with at-risk alcohol use. <i>Addictive Behaviors</i> , 2015, 48, 5-11.                                                                                                  | 1.7 | 14        |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                                                | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Gender-specific predictors of risky alcohol use among general hospital inpatients. <i>General Hospital Psychiatry</i> , 2013, 35, 9-15.                                                                                                                                                                                                | 1.2 | 12        |
| 20 | Normative data for the Digit Symbol Substitution Test in a population-based sample aged 65â€“79 years: Results from the German Health Interview and Examination Survey for Adults (DEGS1). <i>Clinical Neuropsychologist</i> , 2018, 32, 114-132.                                                                                      | 1.5 | 12        |
| 21 | The Stability of Social Desirability: A Latent Change Analysis. <i>Journal of Personality</i> , 2015, 83, 404-412.                                                                                                                                                                                                                     | 1.8 | 11        |
| 22 | Patterns of health risk behaviors among job-seekers: a latent class analysis. <i>International Journal of Public Health</i> , 2015, 60, 111-119.                                                                                                                                                                                       | 1.0 | 11        |
| 23 | Who benefits from computer-based brief alcohol intervention? Day-to-day drinking patterns as a moderator of intervention efficacy. <i>Drug and Alcohol Dependence</i> , 2017, 175, 119-126.                                                                                                                                            | 1.6 | 11        |
| 24 | Does impaired mental health interfere with the outcome of brief alcohol intervention at general hospitals?. <i>Journal of Consulting and Clinical Psychology</i> , 2017, 85, 562-573.                                                                                                                                                  | 1.6 | 11        |
| 25 | Sick days in general hospital patients two years after brief alcohol intervention: Secondary outcomes from a randomized controlled trial. <i>Preventive Medicine</i> , 2020, 139, 106106.                                                                                                                                              | 1.6 | 9         |
| 26 | Alcohol dependent inpatients who receive general hospital care vs. detoxification in psychiatric care and alcohol problem 1 year later. <i>Addictive Behaviors</i> , 2010, 35, 756-763.                                                                                                                                                | 1.7 | 8         |
| 27 | Indicator-based public health monitoring in old age in OECD member countries: a scoping review. <i>BMC Public Health</i> , 2019, 19, 1068.                                                                                                                                                                                             | 1.2 | 7         |
| 28 | Cognitive functioning in the general population: Factor structure and association with mental disordersâ€”The neuropsychological test battery of the mental health module of the German Health Interview and Examination Survey for Adults (DEGS1â€”MH). <i>International Journal of Methods in Psychiatric Research</i> , 2018, 27, . | 1.1 | 6         |
| 29 | Behavioral health risk factor profiles in general hospital patients: identifying the need for screening and brief intervention. <i>BMC Public Health</i> , 2019, 19, 1594.                                                                                                                                                             | 1.2 | 6         |
| 30 | The impact of a stage tailored intervention on alcohol use trajectories among those who do not intend to change. <i>Drug and Alcohol Dependence</i> , 2015, 147, 167-174.                                                                                                                                                              | 1.6 | 4         |
| 31 | Experiences with combined personalâ€”online case management and the selfâ€”reliance of older people with multimorbidity living alone in private households: results of an interpretativeâ€”hermeneutical analysis. <i>Scandinavian Journal of Caring Sciences</i> , 2019, 33, 931-939.                                                 | 1.0 | 4         |
| 32 | Older people at the beginning of the COVID-19 pandemic: A scoping review.. , 2021, 6, 2-37.                                                                                                                                                                                                                                            |     | 4         |
| 33 | Social Equity in the Efficacy of Computer-Based and In-Person Brief Alcohol Interventions Among General Hospital Patients With At-Risk Alcohol Use: A Randomized Controlled Trial. <i>JMIR Mental Health</i> , 2022, 9, e31712.                                                                                                        | 1.7 | 3         |
| 34 | Limitations in activities of daily living in old age in Germany and the EU - Results from the European Health Interview Survey (EHIS) 2.. , 2019, 4, 48-56.                                                                                                                                                                            |     | 3         |
| 35 | Do brief alcohol interventions among unemployed at-risk drinkers increase re-employment after 15 month?. <i>European Journal of Public Health</i> , 2018, 28, 510-515.                                                                                                                                                                 | 0.1 | 1         |
| 36 | Limitations in activities of daily living and support needs - Analysis of GEDA 2019/2020-EHIS.. , 2022, 7, 6-25.                                                                                                                                                                                                                       |     | 1         |
