#	ARTICLE	IF	CITATIONS
1	Physiological tests on firefighters whilst using protective clothing. <i>International Journal of Occupational Safety and Ergonomics</i> , 2021, 27, 384-392.	1.9	9
2	Thermal Load of Mine Rescuer in the Underwear and Protective Clothing with Phase Change Materials in Simulated Utility Conditions. <i>Materials</i> , 2020, 13, 4320.	2.9	9
3	Evaluation of a new ballistic vest design for compliance with Standard No. PN-V-87000:2011 using physiological tests. <i>International Journal of Occupational Safety and Ergonomics</i> , 2019, 25, 268-277.	1.9	3
4	Mine rescuers' heat load during the expenditure of physical effort in a hot environment, using ventilated underwear and selected breathing apparatus. <i>International Journal of Occupational Safety and Ergonomics</i> , 2018, 24, 1-13.	1.9	14
5	Assessment of the effectiveness of modular clothing protecting against the cold based on physiological tests. <i>International Journal of Occupational Safety and Ergonomics</i> , 2018, 24, 534-545.	1.9	6
6	Analysis of thermoregulation properties of PCM garments on the basis of ergonomic tests. <i>Textile Research Journal</i> , 2013, 83, 148-159.	2.2	28
7	Physical Capacity of Occupationally Active Population and Capability to Perform Physical Work. <i>International Journal of Occupational Safety and Ergonomics</i> , 2011, 17, 129-138.	1.9	9
8	Physiological Effects of a Modification of the Construction of Impermeable Protective Clothing. <i>International Journal of Occupational Safety and Ergonomics</i> , 2009, 15, 61-73.	1.9	20
9	Age-Related Thermal Strain in Men While Wearing Radiation Protective Clothing During Short-Term Exercise in the Heat. <i>International Journal of Occupational Safety and Ergonomics</i> , 2004, 10, 361-367.	1.9	4
10	Thirst and Work Capacity of Older People in a Hot Environment. <i>International Journal of Occupational Safety and Ergonomics</i> , 2000, 6, 135-142.	1.9	6
