#	Article	IF	CITATIONS
1	Above average increases in body fat from 9 to 15Âyears of age had a negative impact on academic performance, independent of physical activity. Acta Paediatrica, International Journal of Paediatrics, 2019, 108, 347-353.	0.7	4
2	Associations of Leukocyte Telomere Length With Aerobic and Muscular Fitness in Young Adults. American Journal of Epidemiology, 2017, 185, 529-537.	1.6	11
3	Accelerometer-Measured Physical Activity and Sedentary Time Differ According to Education Level in Young Adults. PLoS ONE, 2016, 11, e0158902.	1.1	26
4	Associations of Physical Activity and Sedentary Behavior With Adolescent Academic Achievement. Journal of Research on Adolescence, 2016, 26, 432-442.	1.9	32
5	High Levels of Physical Activity and Cardiorespiratory Fitness are Associated With Good Self-Rated Health in Adolescents. Journal of Physical Activity and Health, 2015, 12, 266-272.	1.0	30
6	Internal consistency and stability of the CANTAB neuropsychological test battery in children Psychological Assessment, 2015, 27, 698-709.	1.2	41
7	The Associations of Objectively Measured Physical Activity and Sedentary Time with Cognitive Functions in School-Aged Children. PLoS ONE, 2014, 9, e103559.	1.1	102
8	Childhood Attention-Deficit/Hyperactivity Disorder Symptoms Are Risk Factors for Obesity and Physical Inactivity in Adolescence. Journal of the American Academy of Child and Adolescent Psychiatry, 2014, 53, 425-436.	0.3	128
9	Response. Medicine and Science in Sports and Exercise, 2014, 46, 841.	0.2	1
10	Physical activity and obesity mediate the association between childhood motor function and adolescents' academic achievement. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 1917-1922.	3.3	113
10	adolescentsâ€ <sup>™</sup> academic achievement. Proceedings of the National Academy of Sciences of the United	3.3	113
	adolescentsâ€ <sup>™</sup> academic achievement. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 1917-1922.  Physical Activity, Sedentary Behavior, and Academic Performance in Finnish Children. Medicine and		
11	adolescentsâ€ <sup>™</sup> academic achievement. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 1917-1922.  Physical Activity, Sedentary Behavior, and Academic Performance in Finnish Children. Medicine and Science in Sports and Exercise, 2013, 45, 2098-2104.  Suspected Motor Problems and Low Preference for Active Play in Childhood Are Associated with	0.2	104
11 12	adolescentsâ€ <sup>™</sup> academic achievement. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 1917-1922.  Physical Activity, Sedentary Behavior, and Academic Performance in Finnish Children. Medicine and Science in Sports and Exercise, 2013, 45, 2098-2104.  Suspected Motor Problems and Low Preference for Active Play in Childhood Are Associated with Physical Inactivity and Low Fitness in Adolescence. PLoS ONE, 2011, 6, e14554.  Factors related to seeking health care among adolescents with musculoskeletal pain. Pain, 2011, 152,	0.2	104 30
11 12 13	adolescentsâ€ <sup>™</sup> academic achievement. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 1917-1922.  Physical Activity, Sedentary Behavior, and Academic Performance in Finnish Children. Medicine and Science in Sports and Exercise, 2013, 45, 2098-2104.  Suspected Motor Problems and Low Preference for Active Play in Childhood Are Associated with Physical Inactivity and Low Fitness in Adolescence. PLoS ONE, 2011, 6, e14554.  Factors related to seeking health care among adolescents with musculoskeletal pain. Pain, 2011, 152, 896-903.
