| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Characterizing sustained social anxiety in individuals at clinical high risk for psychosis: trajectory, risk factors, and functional outcomes. Psychological Medicine, 2023, 53, 3644-3651.                                 | 2.7 | 5         |
| 2  | North American Prodrome Longitudinal Study (NAPLS 3): Methods and baseline description.<br>Schizophrenia Research, 2022, 243, 262-267.  | 1.1 | 39        |
| 3  | Life Event Stress and Reduced Cortical Thickness in Youth at Clinical High Risk for Psychosis and<br>Healthy Control Subjects. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2022, 7,<br>171-179.         | 1.1 | 2         |
| 4  | Bullying and social functioning, schemas, and beliefs among youth at clinical high risk for psychosis.<br>Microbial Biotechnology, 2022, 16, 281-288.   | 0.9 | 4         |
| 5  | Sleep Disturbance in Individuals at Clinical High Risk for Psychosis. Schizophrenia Bulletin, 2022, 48, 111-121.  | 2.3 | 15        |
| 6  | Individualized Prediction of Prodromal Symptom Remission for Youth at Clinical High Risk for<br>Psychosis. Schizophrenia Bulletin, 2022, 48, 395-404.   | 2.3 | 7         |
| 7  | Bullying in clinical high risk for psychosis participants from the NAPLS-3 cohort. Social Psychiatry and Psychiatric Epidemiology, 2022, 57, 1379-1388.   | 1.6 | 4         |
| 8  | The associations between area-level residential instability and gray matter volumes from the North<br>American Prodrome Longitudinal Study (NAPLS) consortium. Schizophrenia Research, 2022, 241, 1-9.                      | 1.1 | 8         |
| 9  | Sulforaphane Effects on Cognition and Symptoms in First and Early Episode Schizophrenia: A<br>Randomized Double-Blind Trial. Schizophrenia Bulletin Open, 2022, 3, .  | 0.9 | 3         |
| 10 | Longitudinal impact of trauma in the North American Prodrome Longitudinal Studyâ€3. Microbial<br>Biotechnology, 2022, 16, 1211-1216.  | 0.9 | 0         |
| 11 | Family history of psychosis in youth at clinical high risk: A replication study. Psychiatry Research, 2022, 311, 114480.  | 1.7 | 3         |
| 12 | Cognitive-Behavioral Social Skills Training Adapted for Youth at Clinical High Risk for Psychosis.<br>Journal of Cognitive Psychotherapy, 2022, , JCP-2021-0029.R1.   | 0.2 | 1         |
| 13 | Mismatch Negativity in Response to Auditory Deviance and Risk for Future Psychosis in Youth at<br>Clinical High Risk for Psychosis. JAMA Psychiatry, 2022, 79, 780.   | 6.0 | 21        |
| 14 | The Association Between Neighborhood Poverty and Hippocampal Volume Among Individuals at<br>Clinical High-Risk for Psychosis: The Moderating Role of Social Engagement. Schizophrenia Bulletin,<br>2022, 48, 1032-1042.     | 2.3 | 9         |
| 15 | Associations between childhood adversity, cognitive schemas and attenuated psychotic symptoms.<br>Microbial Biotechnology, 2021, 15, 818-827.   | 0.9 | 10        |
| 16 | Cross-paradigm connectivity: reliability, stability, and utility. Brain Imaging and Behavior, 2021, 15, 614-629.  | 1.1 | 7         |
| 17 | Counterpoint. Early intervention for psychosis risk syndromes: Minimizing risk and maximizing benefit. Schizophrenia Research, 2021, 227, 10-17.  | 1.1 | 28        |
| 18 | Selection for psychosocial treatment for youth at clinical high risk for psychosis based on the North<br>American Prodrome Longitudinal Study individualized risk calculator. Microbial Biotechnology, 2021,<br>15, 96-103. | 0.9 | 9         |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Depression: An actionable outcome for those at clinical high-risk. Schizophrenia Research, 2021, 227, 38-43.  | 1.1 | 7         |
| 20 | Social decline in the psychosis prodrome: Predictor potential and heterogeneity of outcome.<br>Schizophrenia Research, 2021, 227, 44-51.  | 1.1 | 12        |
| 21 | Concordance and factor structure of subthreshold positive symptoms in youth at clinical high risk for psychosis. Schizophrenia Research, 2021, 227, 72-77.  | 1.1 | 4         |
| 22 | Incorporating cortisol into the NAPLS2 individualized risk calculator for prediction of psychosis.<br>Schizophrenia Research, 2021, 227, 95-100.  | 1.1 | 17        |
| 23 | Discriminatory experiences predict neuroanatomical changes and anxiety among healthy individuals and those at clinical high risk for psychosis. NeuroImage: Clinical, 2021, 31, 102757.   | 1.4 | 8         |
| 24 | Cognitive behavioural social skills training: Methods of a randomized controlled trial for youth at risk of psychosis. Microbial Biotechnology, 2021, 15, 1626-1636.  | 0.9 | 12        |
| 25 | Abnormally Large Baseline P300 Amplitude Is Associated With Conversion to Psychosis in Clinical High<br>Risk Individuals With a History of Autism: A Pilot Study. Frontiers in Psychiatry, 2021, 12, 591127.  | 1.3 | 10        |
| 26 | Visual cortical plasticity and the risk for psychosis: An interim analysis of the North American<br>Prodrome Longitudinal Study. Schizophrenia Research, 2021, 230, 26-37.  | 1.1 | 4         |
| 27 | Toward Generalizable and Transdiagnostic Tools for Psychosis Prediction: An Independent Validation<br>and Improvement of the NAPLS-2 Risk Calculator in the Multisite PRONIA Cohort. Biological<br>Psychiatry, 2021, 90, 632-642.                             | 0.7 | 32        |
| 28 | Familyâ€focused therapy for individuals at high clinical risk for psychosis: A confirmatory efficacy<br>trial. Microbial Biotechnology, 2021, , .   | 0.9 | 1         |
| 29 | Anxiety in youth at clinical high-risk for psychosis: A two-year follow-up. Schizophrenia Research,<br>2021, 236, 87-88.  | 1.1 | 1         |
| 30 | The association between migrant status and transition in an ultra-high risk for psychosis population.<br>Social Psychiatry and Psychiatric Epidemiology, 2021, 56, 943-952.   | 1.6 | 5         |
| 31 | Genetic and clinical analyses of psychosis spectrum symptoms in a large multiethnic youth cohort<br>reveal significant link with ADHD. Translational Psychiatry, 2021, 11, 80.  | 2.4 | 11        |
| 32 | Association between residential instability at individual and area levels and future psychosis in<br>adolescents at clinical high risk from the North American Prodrome Longitudinal Study (NAPLS)<br>consortium. Schizophrenia Research, 2021, 238, 137-144. | 1.1 | 7         |
| 33 | Depression Predicts Global Functional Outcomes in Individuals at Clinical High Risk for Psychosis.<br>Psychiatric Research and Clinical Practice, 2021, 3, 163-171.   | 1.3 | 4         |
| 34 | Progressive reconfiguration of resting-state brain networks as psychosis develops: Preliminary<br>results from the North American Prodrome Longitudinal Study (NAPLS) consortium. Schizophrenia<br>Research, 2020, 226, 30-37.                                | 1.1 | 36        |
| 35 | Stress perception following childhood adversity: Unique associations with adversity type and sex.<br>Development and Psychopathology, 2020, 32, 343-356.  | 1.4 | 25        |
| 36 | Characterizing Covariant Trajectories of Individuals at Clinical High Risk for Psychosis Across<br>Symptomatic and Functional Domains. American Journal of Psychiatry, 2020, 177, 164-171.  | 4.0 | 34        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Polygenic Risk Score Contribution to Psychosis Prediction in a Target Population of Persons at<br>Clinical High Risk. American Journal of Psychiatry, 2020, 177, 155-163.   | 4.0 | 90        |
| 38 | Predictive validity of conversion from the clinical high risk syndrome to frank psychosis.<br>Schizophrenia Research, 2020, 216, 184-191.   | 1.1 | 22        |
| 39 | Duration of the psychosis prodrome. Schizophrenia Research, 2020, 216, 443-449.   | 1.1 | 16        |
| 40 | Evidence of Slow Neural Processing, Developmental Differences and Sensitivity to Cannabis Effects in<br>a Sample at Clinical High Risk for Psychosis From the NAPLS Consortium Assessed With the Human<br>Startle Paradigm. Frontiers in Psychiatry, 2020, 11, 833. | 1.3 | 4         |
| 41 | Guest Editorial: Special issue on "Biomarkers in the attenuated psychosis syndromeâ€. Schizophrenia<br>Research, 2020, 226, 1-4.  | 1.1 | Ο         |
| 42 | Reliability of mismatch negativity event-related potentials in a multisite, traveling subjects study.<br>Clinical Neurophysiology, 2020, 131, 2899-2909.  | 0.7 | 6         |
| 43 | Stressor-Cortisol Concordance Among Individuals at Clinical High-Risk for Psychosis: Novel Findings from the NAPLS Cohort. Psychoneuroendocrinology, 2020, 115, 104649.   | 1.3 | 21        |
| 44 | Stability of mismatch negativity eventâ€related potentials in a multisite study. International Journal of<br>Methods in Psychiatric Research, 2020, 29, e1819.  | 1.1 | 10        |
| 45 | Immuno-inflammatory changes across phases of early psychosis: The impact of antipsychotic medication and stage of illness. Schizophrenia Research, 2020, 226, 13-23.  | 1.1 | 16        |
| 46 | Deficits in auditory predictive coding in individuals with the psychosis risk syndrome: Prediction of conversion to psychosis Journal of Abnormal Psychology, 2020, 129, 599-611.   | 2.0 | 15        |
| 47 | Neurocognitive profiles in the prodrome to psychosis in NAPLS-1. Schizophrenia Research, 2019, 204, 311-319.  | 1.1 | 30        |
| 48 | Association Between P300 Responses to Auditory Oddball Stimuli and Clinical Outcomes in the Psychosis Risk Syndrome. JAMA Psychiatry, 2019, 76, 1187.   | 6.0 | 59        |
| 49 | Sleep problems and attenuated psychotic symptoms in youth at clinical high-risk for psychosis.<br>Psychiatry Research, 2019, 282, 112492.   | 1.7 | 24        |
| 50 | Cortical abnormalities in youth at clinical high-risk for psychosis: Findings from the NAPLS2 cohort.<br>NeuroImage: Clinical, 2019, 23, 101862.  | 1.4 | 48        |
| 51 | Impact of childhood adversity on corticolimbic volumes in youth at clinical high-risk for psychosis.<br>Schizophrenia Research, 2019, 213, 48-55.   | 1.1 | 21        |
| 52 | The Early Psychosis Screener for Internet (EPSI)-SR: Predicting 12â€ <sup>-</sup> month psychotic conversion using machine learning. Schizophrenia Research, 2019, 208, 390-396.  | 1.1 | 13        |
| 53 | Adding a neuroanatomical biomarker to an individualized risk calculator for psychosis: A proof-of-concept study. Schizophrenia Research, 2019, 208, 41-43.  | 1.1 | 15        |
| 54 | Clinical and functional characteristics of youth at clinical high-risk for psychosis who do not transition to psychosis. Psychological Medicine, 2019, 49, 1670-1677.   | 2.7 | 74        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Altered Brain Activation During Memory Retrieval Precedes and Predicts Conversion to Psychosis in<br>Individuals at Clinical High Risk. Schizophrenia Bulletin, 2019, 45, 924-933.  | 2.3 | 14        |
| 56 | The Global Functioning: Social and Role Scales—Further Validation in a Large Sample of Adolescents<br>and Young Adults at Clinical High Risk for Psychosis. Schizophrenia Bulletin, 2019, 45, 763-772.  | 2.3 | 55        |
| 57 | Tobacco use and psychosis risk in persons at clinical high risk. Microbial Biotechnology, 2019, 13, 1173-1181.  | 0.9 | 11        |
| 58 | Association of baseline inflammatory markers and the development of negative symptoms in in individuals at clinical high risk for psychosis. Brain, Behavior, and Immunity, 2019, 76, 268-274.  | 2.0 | 48        |
| 59 | Metabolic abnormalities and low dietary Omega 3 are associated with symptom severity and worse functioning prior to the onset of psychosis: Findings from the North American Prodrome Longitudinal Studies Consortium. Schizophrenia Research, 2019, 204, 96-103. | 1.1 | 31        |
| 60 | The role of a family history of psychosis for youth at clinical high risk of psychosis. Microbial<br>Biotechnology, 2019, 13, 251-256.  | 0.9 | 10        |
| 61 | Changes in symptom content from a clinical highâ€risk state to conversion to psychosis. Microbial<br>Biotechnology, 2019, 13, 257-263.  | 0.9 | 7         |
| 62 | Toward Leveraging Human Connectomic Data in Large Consortia: Generalizability of fMRI-Based Brain<br>Graphs Across Sites, Sessions, and Paradigms. Cerebral Cortex, 2019, 29, 1263-1279.  | 1.6 | 55        |
| 63 | Compensatory Cognitive Training for Latino Youth at Clinical High Risk for Psychosis: Study Protocol for a Randomized Controlled Trial. Frontiers in Psychiatry, 2019, 10, 951.   | 1.3 | 1         |
| 64 | Lack of Diagnostic Pluripotentiality in Patients at Clinical High Risk for Psychosis: Specificity of<br>Comorbidity Persistence and Search for Pluripotential Subgroups. Schizophrenia Bulletin, 2018, 44,<br>254-263.  | 2.3 | 51        |
| 65 | Latent class cluster analysis of symptom ratings identifies distinct subgroups within the clinical high risk for psychosis syndrome. Schizophrenia Research, 2018, 197, 522-530.  | 1.1 | 22        |
| 66 | Treatment Precedes Positive Symptoms in North American Adolescent and Young Adult Clinical High<br>Risk Cohort. Journal of Clinical Child and Adolescent Psychology, 2018, 47, 69-78.   | 2.2 | 17        |
| 67 | Depression and clinical high-risk states: Baseline presentation of depressed vs. non-depressed participants in the NAPLS-2 cohort. Schizophrenia Research, 2018, 192, 357-363.  | 1.1 | 45        |
| 68 | Exploration of clinical high-risk dropouts. Schizophrenia Research, 2018, 195, 579-580.   | 1.1 | 15        |
| 69 | Cerebello-thalamo-cortical hyperconnectivity as a state-independent functional neural signature for psychosis prediction and characterization. Nature Communications, 2018, 9, 3836.  | 5.8 | 156       |
| 70 | Use of Machine Learning to Determine Deviance in Neuroanatomical Maturity Associated With Future<br>Psychosis in Youths at Clinically High Risk. JAMA Psychiatry, 2018, 75, 960.  | 6.0 | 114       |
| 71 | The relation of atypical antipsychotic use and stress with weight in individuals at clinical high risk for psychosis. Stress and Health, 2018, 34, 591-600.   | 1.4 | 3         |
| 72 | Networks of blood proteins in the neuroimmunology of schizophrenia. Translational Psychiatry, 2018,<br>8, 112.  | 2.4 | 16        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 73 | Anxiety in youth at clinical high risk for psychosis. Microbial Biotechnology, 2017, 11, 480-487.   | 0.9 | 56        |
| 74 | Prediction of functional outcome in young patients with a recent-onset psychiatric disorder: Beyond the traditional diagnostic classification system. Schizophrenia Research, 2017, 185, 114-121.   | 1.1 | 9         |
| 75 | Ventricular enlargement and progressive reduction of cortical gray matter are linked in prodromal youth who develop psychosis. Schizophrenia Research, 2017, 189, 169-174.  | 1.1 | 32        |
| 76 | The Role of microRNA Expression in Cortical Development During Conversion to Psychosis.<br>Neuropsychopharmacology, 2017, 42, 2188-2195.  | 2.8 | 12        |
| 77 | Multisite reliability of MR-based functional connectivity. NeuroImage, 2017, 146, 959-970.  | 2.1 | 140       |
| 78 | Investigating the link between drug-naive first episode psychoses (FEPs), weight gain abnormalities and<br>brain structural damages: Relevance and implications for therapy. Progress in<br>Neuro-Psychopharmacology and Biological Psychiatry, 2017, 77, 9-22. | 2.5 | 26        |
| 79 | Comorbid diagnoses for youth at clinical high risk of psychosis. Schizophrenia Research, 2017, 190,<br>90-95.   | 1.1 | 95        |
| 80 | Mirror Neurons in Psychiatric Disorders: from Neuroception to Bio-behavioral System Dysregulation.<br>Neuropsychopharmacology, 2017, 42, 366-366.   | 2.8 | 6         |
| 81 | Perceptual abnormalities in clinical high risk youth and the role of trauma, cannabis use and anxiety.<br>Psychiatry Research, 2017, 258, 462-468.  | 1.7 | 6         |
| 82 | An Individualized Risk Calculator for Research in Prodromal Psychosis. American Journal of Psychiatry, 2016, 173, 980-988.  | 4.0 | 458       |
| 83 | The relations of age and pubertal development with cortisol and daily stress in youth at clinical risk for psychosis. Schizophrenia Research, 2016, 172, 29-34.   | 1.1 | 15        |
| 84 | Traumatic brain injury in individuals at clinical high risk for psychosis. Schizophrenia Research, 2016,<br>174, 77-81.   | 1.1 | 12        |
| 85 | Prioritizing schizophrenia endophenotypes for future genetic studies: An example using data from the COCS-1 family study. Schizophrenia Research, 2016, 174, 1-9.   | 1.1 | 13        |
| 86 | A Case of Attenuated Psychosis Syndrome: A Broad Differential Diagnosis Requires Broad-Spectrum<br>Treatment. American Journal of Psychiatry, 2016, 173, 321-329.   | 4.0 | 3         |
| 87 | Functional Capacity Assessed by the Map Task in Individuals at Clinical High-Risk for Psychosis.<br>Schizophrenia Bulletin, 2016, 42, 1234-1242.  | 2.3 | 17        |
| 88 | Theory of Mind as a mediator variable between neurocognition and functioning in young individuals<br>in treatment with secondary services for non-psychotic disorders. Psychiatry Research, 2016, 246,<br>415-420.  | 1.7 | 6         |
| 89 | Association of Neurocognition With Transition to Psychosis. JAMA Psychiatry, 2016, 73, 1239.  | 6.0 | 205       |
| 90 | The Violent Content in Attenuated Psychotic Symptoms. Psychiatry Research, 2016, 242, 61-66.  | 1.7 | 14        |

| #   | Article   | IF   | CITATIONS |
|-----|---|------|-----------|
| 91  | Relation between cannabis use and subcortical volumes in people at clinical high risk of psychosis.<br>Psychiatry Research - Neuroimaging, 2016, 254, 3-9.  | 0.9  | 8         |
| 92  | Effects of intranasal oxytocin on neural processing within a socially relevant neural circuit.<br>European Neuropsychopharmacology, 2016, 26, 626-630.  | 0.3  | 16        |
| 93  | Social cognition over time in individuals at clinical high risk for psychosis: Findings from the NAPLS-2 cohort. Schizophrenia Research, 2016, 171, 176-181.  | 1.1  | 55        |
| 94  | Biological Motion induced mu suppression is reduced in Early Psychosis (EP) patients with active negative symptoms and Autism Spectrum Disorders (ASD). Psychiatry Research, 2016, 238, 374-377.  | 1.7  | 9         |
| 95  | Healthy adolescent performance on the MATRICS Consensus Cognitive Battery (MCCB): Developmental data from two samples of volunteers. Schizophrenia Research, 2016, 172, 106-113.  | 1.1  | 20        |
| 96  | Early traumatic experiences, perceived discrimination and conversion to psychosis in those at clinical high risk for psychosis. Social Psychiatry and Psychiatric Epidemiology, 2016, 51, 497-503.  | 1.6  | 60        |
| 97  | Altering the course of schizophrenia: progress and perspectives. Nature Reviews Drug Discovery, 2016, 15, 485-515.  | 21.5 | 410       |
| 98  | Evaluating the impact of cannabis use on thalamic connectivity in youth at clinical high risk of psychosis. BMC Psychiatry, 2015, 15, 276.  | 1.1  | 18        |
| 99  | North American Prodrome Longitudinal Study (NAPLS 2). Journal of Nervous and Mental Disease, 2015, 203, 328-335.  | 0.5  | 189       |
| 100 | Negative symptoms and impaired social functioning predict later psychosis in <scp>L</scp> atino youth<br>at clinical high risk in the <scp>N</scp> orth <scp>A</scp> merican prodromal longitudinal studies<br>consortium. Microbial Biotechnology, 2015, 9, 467-475. | 0.9  | 26        |
| 101 | Prodromal Symptom Severity Predicts Accelerated Gray Matter Reduction and Third Ventricle<br>Expansion among Clinically High-Risk Youth Developing Psychotic Disorders. Molecular<br>Neuropsychiatry, 2015, 1, 13-22.   | 3.0  | 27        |
| 102 | Evaluating the relationship between cannabis use and IQ in youth and young adults at clinical high risk of psychosis. Psychiatry Research, 2015, 230, 878-884.  | 1.7  | 13        |
| 103 | Factor structure and heritability of endophenotypes in schizophrenia: Findings from the Consortium on the Genetics of Schizophrenia (COGS-1). Schizophrenia Research, 2015, 163, 73-79.   | 1.1  | 52        |
| 104 | Theory of mind, emotion recognition and social perception in individuals at clinical high risk for psychosis: Findings from the NAPLS-2 cohort. Schizophrenia Research: Cognition, 2015, 2, 133-139.  | 0.7  | 46        |
| 105 | Reliability of an fMRI paradigm for emotional processing in a multisite longitudinal study. Human<br>Brain Mapping, 2015, 36, 2558-2579.  | 1.9  | 63        |
| 106 | Association of Thalamic Dysconnectivity and Conversion to Psychosis in Youth and Young Adults at<br>Elevated Clinical Risk. JAMA Psychiatry, 2015, 72, 882.   | 6.0  | 284       |
| 107 | Specificity of Incident Diagnostic Outcomes in Patients at Clinical High Risk for Psychosis.<br>Schizophrenia Bulletin, 2015, 41, 1066-1075.  | 2.3  | 71        |
| 108 | Severity of thought disorder predicts psychosis in persons at clinical high-risk. Schizophrenia<br>Research, 2015, 169, 169-177.  | 1.1  | 43        |

| #   | Article   | IF  | CITATIONS |
|-----|---|-----|-----------|
| 109 | Demographic correlates of attenuated positive psychotic symptoms. Schizophrenia Research, 2015, 166, 31-36.   | 1.1 | 17        |
| 110 | Progressive Reduction in Cortical Thickness as Psychosis Develops: A Multisite Longitudinal<br>Neuroimaging Study of Youth at Elevated Clinical Risk. Biological Psychiatry, 2015, 77, 147-157.   | 0.7 | 516       |
| 111 | Towards a Psychosis Risk Blood Diagnostic for Persons Experiencing High-Risk Symptoms: Preliminary<br>Results From the NAPLS Project. Schizophrenia Bulletin, 2015, 41, 419-428.  | 2.3 | 195       |
