#	ARTICLE	IF	CITATIONS
1	Association of <i>RNF213</i> Variants With Periventricular Anastomosis in Moyamoya Disease. <i>Stroke</i> , 2022, 53, 2906-2916.	1.0	5
2	Letter to the Editor Regarding "Clinical Prediction of Surgical Revascularization Outcome in Moyamoya Disease Via Transcranial Color Sonography". <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2021, 30, 105545.	0.7	0
3	Hyperhomocysteinemia is a risk factor for postoperative ischemia in adult patients with moyamoya disease. <i>Neurosurgical Review</i> , 2021, 44, 2913-2921.	1.2	8
4	Association Between Ultrasound Parameters and History of Ischemic or Hemorrhagic Stroke in Patients With Moyamoya Disease. <i>Frontiers in Neurology</i> , 2021, 12, 570843.	1.1	2
5	Homocysteine Level and Risk of Hemorrhage in Brain Arteriovenous Malformations. <i>Disease Markers</i> , 2021, 2021, 1-9.	0.6	2
6	Clinical Significance of Ultrasound-Based Hemodynamic Assessment of Extracranial Internal Carotid Artery and Posterior Cerebral Artery in Symptomatic and Angiographic Evolution of Moyamoya Disease: A Preliminary Study. <i>Frontiers in Neurology</i> , 2021, 12, 614749.	1.1	4
7	Risk factors for postoperative ischemic complications in pediatric moyamoya disease. <i>BMC Neurology</i> , 2021, 21, 229.	0.8	9
8	Association between bilateral postoperative neoangiogenesis in patients with moyamoya disease. <i>Clinical Neurology and Neurosurgery</i> , 2020, 197, 106195.	0.6	1
9	Hemorrhagic patterns and their risk factors in patients with moyamoya disease. <i>European Journal of Neurology</i> , 2020, 27, 2499-2507.	1.7	9
10	Different subtypes of collateral vessels in hemorrhagic moyamoya disease with p.R4810K variant. <i>BMC Neurology</i> , 2020, 20, 308.	0.8	5
11	Prognostic Significance of Homocysteine Level on Neurological Outcome in Brain Arteriovenous Malformations. <i>Disease Markers</i> , 2020, 2020, 1-8.	0.6	0
12	FAM225B Is a Prognostic lncRNA for Patients with Recurrent Glioblastoma. <i>Disease Markers</i> , 2020, 2020, 1-7.	0.6	13
13	Clinical features, surgical treatment, and outcome of intracranial aneurysms associated with moyamoya disease. <i>Journal of Clinical Neuroscience</i> , 2020, 80, 274-279.	0.8	6
14	Digital subtraction angiographic characteristics of progression of moyamoya disease 6 months prior to surgical revascularisation. <i>Stroke and Vascular Neurology</i> , 2020, 5, 97-102.	1.5	5
15	Response to letter regarding article, "Angiographic characteristics in moyamoya disease with the p.R4810K variant: a propensity score-matched analysis". <i>European Journal of Neurology</i> , 2020, 27, e27.	1.7	0
16	Modifiable Risk Factors Associated With Moyamoya Disease. <i>Stroke</i> , 2020, 51, 2472-2479.	1.0	36
17	Angiographic characteristics in Moyamoya disease with the p.R4810K variant: a propensity score-matched analysis. <i>European Journal of Neurology</i> , 2020, 27, 856-863.	1.7	4
18	Postoperative collateral formation after indirect bypass for hemorrhagic moyamoya disease. <i>BMC Neurology</i> , 2020, 20, 28.	0.8	19

#	ARTICLE	IF	CITATIONS
19	Association Between p.R4810K Variant and Long-Term Clinical Outcome in Patients With Moyamoya Disease. <i>Frontiers in Neurology</i> , 2019, 10, 662.	1.1	27
20	Clinical Features and Surgical Outcomes of Patients With Moyamoya Disease and the Homozygous RNF213 p.R4810K Variant. <i>Journal of Child Neurology</i> , 2019, 34, 793-800.	0.7	13
21	Cranioplasty after decompressive craniectomy in hemorrhagic moyamoya disease. <i>Journal of Clinical Neuroscience</i> , 2019, 70, 234-237.	0.8	0
22	Association between p.R4810K Variant and Postoperative Collateral Formation in Patients with Moyamoya Disease. <i>Cerebrovascular Diseases</i> , 2019, 48, 77-84.	0.8	13
23	Angiographic Outcomes of Direct and Combined Bypass Surgery in Moyamoya Disease. <i>Frontiers in Neurology</i> , 2019, 10, 1267.	1.1	19
24	Association of Ring Finger Protein 213 Gene P.R4810k Polymorphism with Intracranial Major Artery Stenosis/Occlusion. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2018, 27, 1556-1564.	0.7	4
25	Encephaloduroarteriosynangiosis versus conservative treatment for patients with moyamoya disease at late Suzuki stage. <i>Journal of Clinical Neuroscience</i> , 2018, 50, 277-280.	0.8	12
26	Clinical Features, Surgical Treatment, and Long-Term Outcome in Children with Hemorrhagic Moyamoya Disease. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2018, 27, 1517-1523.	0.7	15
27	Treatment of Moyamoya Disease. <i>Neurosurgery</i> , 2018, 65, 62-65.	0.6	20
28	The Association of the RNF213 p.R4810K Polymorphism with Quasi-Moyamoya Disease and a Review of the Pertinent Literature. <i>World Neurosurgery</i> , 2017, 99, 701-708.e1.	0.7	19
29	Clinical Features, Surgical Treatment, and Long-Term Outcome in Elderly Patients with Moyamoya Disease. <i>World Neurosurgery</i> , 2017, 100, 459-466.	0.7	22
30	Long-Term Outcome After Conservative Treatment and Direct Bypass Surgery of Moyamoya Disease at Late Suzuki Stage. <i>World Neurosurgery</i> , 2017, 103, 283-290.	0.7	22
31	In Reply To "Moyamoya Disease: From Hypoperfusion to Network Disruption". <i>World Neurosurgery</i> , 2017, 104, 1038-1039.	0.7	0
32	Steroid sulfatase and filaggrin mutations in a boy with severe ichthyosis, elevated serum IgE level and moyamoya syndrome. <i>Gene</i> , 2017, 628, 103-108.	1.0	4
33	Clinical Features of Hemorrhagic Moyamoya Disease in China. <i>World Neurosurgery</i> , 2017, 106, 224-230.	0.7	13
34	Moyamoya disease associated with ankylosing spondylitis in a 9-year-old child: a case report. <i>Chinese Neurosurgical Journal</i> , 2017, 3, .	0.3	0
35	Clinical Features and Long-Term Outcomes of Unilateral Moyamoya Disease. <i>World Neurosurgery</i> , 2016, 96, 474-482.	0.7	29
36	Prediction of High-Grade Pediatric Meningiomas: Magnetic Resonance Imaging Features Based on T1-Weighted, T2-Weighted, and Contrast-Enhanced T1-Weighted Images. <i>World Neurosurgery</i> , 2016, 91, 89-95.	0.7	6
