

Hanming Zhang

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5263890/hanming-zhang-publications-by-year.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

14
papers

923
citations

#	Paper	IF	Citations
14	Increased complement activation is a distinctive feature of severe SARS-CoV-2 infection. <i>Science Immunology</i> , 2021 , 6,	28	66
13	A neutrophil activation signature predicts critical illness and mortality in COVID-19. <i>Blood Advances</i> , 2021 , 5, 1164-1177	7.8	93
12	Increased complement activation is a distinctive feature of severe SARS-CoV-2 infection 2021 ,		16
11	Circulating markers of angiogenesis and endotheliopathy in COVID-19. <i>Pulmonary Circulation</i> , 2020 , 10, 2045894020966547	2.7	58
10	Endotheliopathy in COVID-19-associated coagulopathy: evidence from a single-centre, cross-sectional study. <i>Lancet Haematology</i> , 2020 , 7, e575-e582	14.6	544
9	Circulating Markers of Angiogenesis and Endotheliopathy in COVID-19 2020 ,		10
8	A neutrophil activation signature predicts critical illness and mortality in COVID-19 2020 ,		12
7	PDE1 inhibition facilitates proteasomal degradation of misfolded proteins and protects against cardiac proteinopathy. <i>Science Advances</i> , 2019 , 5, eaaw5870	14.3	32
6	Inhibition of Type 1 Phosphodiesterase Confers Therapeutic Benefit to Proteinopathy-based HFpEF in Mice. <i>FASEB Journal</i> , 2018 , 32, 903.14	0.9	
5	TFEB activation protects against cardiac proteotoxicity via increasing autophagic flux. <i>Journal of Molecular and Cellular Cardiology</i> , 2017 , 113, 51-62	5.8	53
4	COP9 signalosome controls the degradation of cytosolic misfolded proteins and protects against cardiac proteotoxicity. <i>Circulation Research</i> , 2015 , 117, 956-66	15.7	22
3	Priming the proteasome by protein kinase G: a novel cardioprotective mechanism of sildenafil. <i>Future Cardiology</i> , 2015 , 11, 177-89	1.3	5
2	Expression and Functional Analysis of Storage Protein 2 in the Silkworm, <i>Bombyx mori</i> . <i>International Journal of Genomics</i> , 2013 , 2013, 145450	2.5	10
1	Duo-activation of PKA and PKG by PDE1 inhibition facilitates proteasomal degradation of misfolded proteins and protects against proteinopathy		2
