#	Article	IF	CITATIONS
1	Extension of Murine Life Span by Overexpression of Catalase Targeted to Mitochondria. Science, 2005, 308, 1909-1911.	12.6	1,576
2	Overexpression of Catalase Targeted to Mitochondria Attenuates Murine Cardiac Aging. Circulation, 2009, 119, 2789-2797.	1.6	414
3	An aged immune system drives senescence and ageing of solid organs. Nature, 2021, 594, 100-105.	27.8	368
4	Rapamycin Reverses Elevated mTORC1 Signaling in Lamin A/C–Deficient Mice, Rescues Cardiac and Skeletal Muscle Function, and Extends Survival. Science Translational Medicine, 2012, 4, 144ra103.	12.4	300
5	Pancreatic Â-Cell Failure and Diabetes in Mice With a Deletion Mutation of the Endoplasmic Reticulum Molecular Chaperone Gene P58IPK. Diabetes, 2005, 54, 1074-1081.	0.6	203
6	Mitochondrial targeted catalase suppresses invasive breast cancer in mice. BMC Cancer, 2011, 11, 191.	2.6	127
7	Reduction of Age-Associated Pathology in Old Mice by Overexpression of Catalase in Mitochondria. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2008, 63, 813-822.	3.6	115
8	Lifespan extension in genetically modified mice. Aging Cell, 2009, 8, 346-352.	6.7	100
9	Phenylbutyric acid reduces amyloid plaques and rescues cognitive behavior in AD transgenic mice. Aging Cell, 2011, 10, 418-428.	6.7	91
10	Voluntary Wheel Running in Mice. Current Protocols in Mouse Biology, 2015, 5, 283-290.	1.2	88
11	Disruption of Protein Kinase A in Mice Enhances Healthy Aging. PLoS ONE, 2009, 4, e5963.	2.5	87
12	Circulating levels of monocyte chemoattractant proteinâ€1 as a potential measure of biological age in mice and frailty in humans. Aging Cell, 2018, 17, e12706.	6.7	77
13	Measures of Healthspan as Indices of Aging in Mice—A Recommendation. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2016, 71, 427-430.	3.6	76
14	Polymorphisms in the DNA repair gene XRCC1 and age-related disease. Mechanisms of Ageing and Development, 2003, 124, 27-32.	4.6	60
15	Chronic low-level exposure to the common seafood toxin domoic acid causes cognitive deficits in mice. Harmful Algae, 2017, 64, 20-29.	4.8	57
16	Cellular Werner Phenotypes in Mice Expressing a Putative Dominant-Negative Human WRN Gene. Genetics, 2000, 154, 357-362.	2.9	56
17	Decline in muscle strength and running endurance in klotho deficient C57BL/6 mice. Biogerontology, 2013, 14, 729-739.	3.9	55
18	ATM is a key driver of NF-κB-dependent DNA-damage-induced senescence, stem cell dysfunction and aging. Aging. 2020, 12, 4688-4710.	3.1	54

#	Article	IF	CITATIONS
19	Glycine supplementation extends lifespan of male and female mice. Aging Cell, 2019, 18, e12953.	6.7	53
20	Exercise Training in Transgenic Mice Is Associated with Attenuation of Early Breast Cancer Growth in a Dose-Dependent Manner. PLoS ONE, 2013, 8, e80123.	2.5	52
21	Canagliflozin extends life span in genetically heterogeneous male but not female mice. JCI Insight, 2020, 5, .	5.0	51
22	C.Âelegans S6K Mutants Require a Creatine-Kinase-like Effector for Lifespan Extension. Cell Reports, 2016, 14, 2059-2067.	6.4	50
23	Heterochronic parabiosis regulates the extent of cellular senescence in multiple tissues. GeroScience, 2020, 42, 951-961.	4.6	48
24	Mitochondrial-Targeted Catalase Protects Against High-Fat Diet–Induced Muscle Insulin Resistance by Decreasing Intramuscular Lipid Accumulation. Diabetes, 2017, 66, 2072-2081.	0.6	45
25	Exercise enhances wound healing and prevents cancer progression during aging by targeting macrophage polarity. Mechanisms of Ageing and Development, 2014, 139, 41-48.	4.6	40
26	Attenuation of Age-Related Metabolic Dysfunction in Mice With a Targeted Disruption of the CÂ Subunit of Protein Kinase A. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2009, 64A, 1221-1231.	3.6	36
27	Exercise, physical activity and breast cancer: the role of tumor-associated macrophages. Exercise Immunology Review, 2012, 18, 158-76.	0.4	34
28	Utility of a C57BL/6 ES line versus 129 ES lines for Targeted Mutations in Mice. Transgenic Research, 2003, 12, 743-746.	2.4	32
29	Protein kinase A signaling as an anti-aging target. Ageing Research Reviews, 2010, 9, 269-272.	10.9	32
30	Grip strength is potentially an early indicator of age-related decline in mice. Pathobiology of Aging & Age Related Diseases, 2016, 6, 32981.	1.1	32
31	Genetics of extreme human longevity to guide drug discovery for healthy ageing. Nature Metabolism, 2020, 2, 663-672.	11.9	32
32	A Mitochondrial view of aging, reactive oxygen species and metastatic cancer. Aging Cell, 2010, 9, 462-465.	6.7	31
33	Tissue specific expression of PKR protein kinase in aging B6D2F1 mice. Mechanisms of Ageing and Development, 2000, 114, 123-132.	4.6	26
34	A New Preclinical Paradigm for Testing Anti-Aging Therapeutics. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2017, 72, 760-762.	3.6	26
35	Fe65 Stimulates Proteolytic Liberation of the β-Amyloid Precursor Protein Intracellular Domain. Journal of Biological Chemistry, 2007, 282, 33313-33325.	3.4	25
36	Curcumin suppresses intestinal polyps in APC Min mice fed a high fat diet. Pathobiology of Aging & Age Related Diseases, 2011, 1, 7013.	1.1	25

#	Article	IF	CITATIONS
37	Protein kinase A is a target for aging and the aging heart. Aging, 2010, 2, 238-243.	3.1	25
38	Hyperinsulinemia and insulin resistance in Wrn null mice fed a diabetogenic diet. Mechanisms of Ageing and Development, 2008, 129, 201-206.	4.6	24
39	Validation of a geropathology grading system for aging mouse studies. GeroScience, 2019, 41, 455-465.	4.6	24
40	Mitochondrial redox signaling and cancer invasiveness. Journal of Bioenergetics and Biomembranes, 2012, 44, 635-638.	2.3	23
41	Mice lacking the Cβ subunit of PKA are resistant to angiotensin II-induced cardiac hypertrophy and dysfunction. BMC Research Notes, 2010, 3, 307.	1.4	22
42	Chronic oral rapamycin decreases adiposity, hepatic triglycerides and insulin resistance in male mice fed a diet high in sucrose and saturated fat. Experimental Physiology, 2018, 103, 1469-1480.	2.0	22
43	Rare genetic coding variants associated with human longevity and protection against age-related diseases. Nature Aging, 2021, 1, 783-794.	11.6	22
44	The potential use of physical resilience to predict healthy aging. Pathobiology of Aging & Age Related Diseases, 2018, 8, 1403844.	1.1	21
45	A Novel Oneâ€Ðay Learning Procedure for Mice. Current Protocols in Mouse Biology, 2020, 10, e68.	1.2	18
46	Deletion of P58IPK, the Cellular Inhibitor of the Protein Kinases PKR and PERK, Causes Bone Changes and Joint Degeneration in Mice. Frontiers in Endocrinology, 2014, 5, 174.	3.5	17
47	Pathology assessment is necessary to validate translational endpoints in preclinical aging studies. Pathobiology of Aging & Age Related Diseases, 2016, 6, 31478.	1.1	16
48	The Geropathology Research Network: An Interdisciplinary Approach for Integrating Pathology Into Research on Aging. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2016, 71, 431-434.	3.6	16
49	A novel radial water tread maze tracks age-related cognitive decline in mice. Pathobiology of Aging & Age Related Diseases, 2013, 3, 20679.	1.1	13
50	Pathology is a critical aspect of preclinical aging studies. Pathobiology of Aging & Age Related Diseases, 2013, 3, 22451.	1.1	13
51	Neuropathological assessment and validation of mouse models for Alzheimer's disease: applying NIA-AA guidelines. Pathobiology of Aging & Age Related Diseases, 2016, 6, 32397.	1.1	13
52	Novel application of a Radial Water Tread maze can distinguish cognitive deficits in mice with traumatic brain injury. Brain Research, 2017, 1657, 140-147.	2.2	13
53	T-cell receptor Vbeta deletion and Valpha polymorphism are responsible for the resistance of SWR mouse to arthritis induction. Immunogenetics, 1999, 49, 764-772.	2.4	11
54	The quality control theory of aging. Pathobiology of Aging & Age Related Diseases, 2014, 4, 24835.	1.1	10

#	Article	IF	CITATIONS
55	Sleep-deprived cognitive impairment in aging mice is alleviated by rapamycin. Aging Pathobiology and Therapeutics, 2019, 1, 05-09.	0.5	10
56	Mitochondrial catalase suppresses naturally occurring lung cancer in old mice. Pathobiology of Aging & Age Related Diseases, 2015, 5, 28776.	1.1	9
57	Self-motivated and stress-response performance assays in mice are age-dependent. Experimental Gerontology, 2017, 91, 1-4.	2.8	9
58	Testing drug combinations to slow aging. Pathobiology of Aging & Age Related Diseases, 2018, 8, 1407203.	1.1	9
59	The potential of GHK as an anti-aging peptide. Aging Pathobiology and Therapeutics, 2020, 2, 58-61.	0.5	9
60	QuPath. A new digital imaging tool for geropathology. Aging Pathobiology and Therapeutics, 2020, 2, 114-116.	0.5	9
61	Resilience to acute sleep deprivation is associated with attenuation of hippocampal mediated learning impairment. Aging Pathobiology and Therapeutics, 2020, 2, 195-202.	0.5	9
62	Pre-tumor exercise decreases breast cancer in old mice in a distance-dependent manner. American Journal of Cancer Research, 2014, 4, 378-84.	1.4	9
63	Short term treatment with a cocktail of rapamycin, acarbose and phenylbutyrate delays aging phenotypes in mice. Scientific Reports, 2022, 12, 7300.	3.3	9
64	B16 melanoma tumor growth is delayed in mice in an age-dependent manner. Pathobiology of Aging & Age Related Diseases, 2012, 2, 19182.	1.1	8
65	The geropathology of organ-specific aging. Journal of Translational Science, 2020, 7, .	0.2	8
66	Expression of Human PKR Protein Kinase in Transgenic Mice. Journal of Interferon and Cytokine Research, 2002, 22, 329-334.	1.2	7
67	Approaches to determine clinical significance of genetic variants. Mutation Research - Fundamental and Molecular Mechanisms of Mutagenesis, 2005, 573, 205-220.	1.0	7
68	Breast tumors in PyMT transgenic mice expressing mitochondrial catalase have decreased labeling for macrophages and endothelial cells. Pathobiology of Aging & Age Related Diseases, 2012, 2, 17391.	1.1	7
69	The emerging role of geropathology in preclinical aging studies. Pathobiology of Aging & Age Related Diseases, 2017, 7, 1304005.	1.1	7
70	Measuring biological age in mice using differential mass spectrometry. Aging, 2019, 11, 1045-1061.	3.1	7
71	Comparative Mouse Genomics Centers Consortium: The Mouse Genotype Database. Mutation Research - Fundamental and Molecular Mechanisms of Mutagenesis, 2006, 595, 137-144.	1.0	6
72	Adverse Neurological Effects of Short-Term Sleep Deprivation in Aging Mice Are Prevented by SS31 Peptide. Clocks & Sleep, 2020, 2, 325-333.	2.0	6

#	Article	IF	CITATIONS
73	A geroscience mouse model for Alzheimer's disease. Pathobiology of Aging & Age Related Diseases, 2019, 9, 1616994.	1.1	5
74	Tumor growth is suppressed in mice expressing a truncated XRCC1 protein. American Journal of Cancer Research, 2012, 2, 168-77.	1.4	5
75	Pathobiology of aging: an old problem gets a new look. Pathobiology of Aging & Age Related Diseases, 2011, 1, 7281.	1.1	4
76	Application of the microfluidic-assisted replication track analysis to measure DNA repair in human and mouse cells. Methods, 2016, 108, 99-110.	3.8	4
77	Development of a Geropathology Grading Platform for nonhuman primates. Aging Pathobiology and Therapeutics, 2020, 2, 16-19.	0.5	4
78	An immunohistochemical approach for monitoring effects of exercise on tumor stromal cells in old mice. Pathobiology of Aging & Age Related Diseases, 2014, 4, 24824.	1.1	3
79	Rapamycin increases breast tumor burden in young wheel-running mice. Pathobiology of Aging & Age Related Diseases, 2019, 9, 1647746.	1.1	3
80	A Geroscience Approach to Preventing Pathologic Consequences of COVID-19. Journal of Interferon and Cytokine Research, 2020, 40, 433-437.	1.2	3
81	Development of a cyclophosphamide stress test to predict resilience to aging in mice. GeroScience, 2020, 42, 1675-1683.	4.6	3
82	The unrecognized potential of pet cats for studying aging and age-related diseases. Aging Pathobiology and Therapeutics, 2021, 3, 134-135.	0.5	3
83	Modeling Alzheimer's disease in progeria mice. An age-related concept. Pathobiology of Aging & Age Related Diseases, 2018, 8, 1524815.	1.1	2
84	Cross species application of quantitative neuropathology assays developed for clinical Alzheimer's disease samples. Pathobiology of Aging & Age Related Diseases, 2019, 9, 1657768.	1.1	2
85	Physical performance is enhanced in old mice fed a short term diet medicated with rapamycin, acarbose, and phenylbutyrate. Aging Pathobiology and Therapeutics, 2021, 3, 12-13.	0.5	2
86	A model for studying cutaneous wound healing and resilience to aging: Ear punch biopsy in old mice. Aging Pathobiology and Therapeutics, 2020, 2, 173-175.	0.5	2
87	Resilience to aging is a heterogeneous characteristic defined by physical stressors. Aging Pathobiology and Therapeutics, 2022, 4, 19-22.	0.5	2
88	Geropathology. An inside view of biological aging. Aging Pathobiology and Therapeutics, 2022, 4, 23-24.	0.5	2
89	A model of chronic hepatitis in mice expressing a truncated XRCC1 protein. Pathobiology of Aging & Age Related Diseases, 2015, 5, 27703.	1.1	1
90	Geropathology Research Network Symposium 2015. Pathobiology of Aging & Age Related Diseases, 2015, 5, 28866.	1.1	1

#	Article	IF	CITATIONS
91	Pathobiology of aging and age-related diseases is the official journal of the Geropathology Research Network. Pathobiology of Aging & Age Related Diseases, 2019, 9, 1593786.	1.1	1
92	The antidiabetic drug acarbose suppresses age-related lesions in C57BL/6 mice in an organ dependent manner. Aging Pathobiology and Therapeutics, 2021, 3, 41-42.	0.5	1
93	University of Washington Nathan Shock Center: innovation to advance aging research. GeroScience, 2021, 43, 2161-2165.	4.6	1
94	Mouse modeling for anxiety disorders in older adults. Aging Pathobiology and Therapeutics, 2021, 3, 77-78.	0.5	1
95	A geropathology approach for identifying therapeutic targets to prevent pathological complications of COVID-19. Aging Pathobiology and Therapeutics, 2020, 2, 106-108.	0.5	1
96	Short-term oral rapamycin prevents age-related learning impairment in mice. Aging Pathobiology and Therapeutics, 2020, 2, 166-177.	0.5	1
97	An immune stress test for resilience to aging: Pneumococcal vaccine response. Aging Pathobiology and Therapeutics, 2020, 2, 171-172.	0.5	1
98	Mice expressing an XRCC1 truncated protein are at increased risk for insulin resistance. Pathobiology of Aging & Age Related Diseases, 2019, 9, 1603517.	1.1	0
99	Wheel running predicts resilience to tumors in old mice. Pathobiology of Aging & Age Related Diseases, 2019, 9, 1676104.	1.1	0
100	Harnessing the heterogeneity of aging. Aging Pathobiology and Therapeutics, 2021, 3, 01-01.	0.5	0
101	Precision aging. Human lifespan has intrinsic limits but measurable outcomes. Aging Pathobiology and Therapeutics, 2021, 3, 39-40.	0.5	0
102	Neutrophil response to cyclophosphamide predicts resilience to age-related learning impairment. Aging Pathobiology and Therapeutics, 2020, 2, 230-231.	0.5	0
103	PathoClock and PhysioClock in mice recapitulate human multimorbidity and heterogeneous aging. Aging Pathobiology and Therapeutics, 2021, 3, 107-126.	0.5	Ο
