#	ARTICLE	IF	CITATIONS
1	Diversity of Ophiostomatoid Fungi Associated with <i>Dendroctonus armandi</i> Infesting <i>Pinus armandii</i> in Western China. <i>Journal of Fungi</i> (Basel, Switzerland), 2022, 8, 214.	3.5	3
2	Abundance and Diversity of Ophiostomatoid Fungi Associated With the Great Spruce Bark Beetle (<i>Dendroctonus micans</i>) in the Northeastern Qinghai-Tibet Plateau. <i>Frontiers in Microbiology</i> , 2021, 12, 721395.	3.5	3
3	Morphological and Phylogenetic Analyses Reveal a New Species of <i>Ceratocystiopsis</i> (Ophiostomataceae, Ophiostomatales) Associated with <i>Ips subelongatus</i> in Inner Mongolia (China) with Weak Host Pathogenicity. <i>Forests</i> , 2021, 12, 1795.	2.1	4
4	Epibiotic Fungal Communities of Three <i>Tomicus</i> spp. Infesting Pines in Southwestern China. <i>Microorganisms</i> , 2020, 8, 15.	3.6	4
5	<i>Grosmania tibetensis</i> , a new ophiostomatoid fungus associated with <i>Orthotomicus</i> sp. (Coleoptera) in Tibetan subalpine forests. <i>Mycoscience</i> , 2020, 61, 282-292.	0.8	2
6	Ophiostomatoid fungi associated with <i>Ips subelongatus</i> , including eight new species from northeastern China. <i>IMA Fungus</i> , 2020, 11, 3.	3.8	17
7	Differential patterns of ophiostomatoid fungal communities associated with three sympatric <i>Tomicus</i> species infesting pines in south-western China, with a description of four new species. <i>MycKeys</i> , 2019, 50, 93-133.	1.9	21
8	Ophiostomatoid fungi associated with pines infected by <i>Bursaphelenchus xylophilus</i> and <i>Monochamus alternatus</i> in China, including three new species. <i>MycKeys</i> , 2018, 39, 1-27.	1.9	20
9	Taxonomy and pathogenicity of <i>Leptographium</i> species associated with <i>Ips subelongatus</i> infestations of <i>Larix</i> spp. in northern China, including two new species. <i>Mycological Progress</i> , 2017, 16, 1-13.	1.4	16
10	<i>Ophiostoma olgensis</i> , a new species associated with <i>Larix</i> spp. and <i>Ips subelongatus</i> in northern China. <i>Phytotaxa</i> , 2016, 282, 282.	0.3	5
11	Ophiostomatoid fungi (Ascomycota) associated with <i>Pinus tabuliformis</i> infested by <i>Dendroctonus valens</i> (Coleoptera) in northern China and an assessment of their pathogenicity on mature trees. <i>Antonie Van Leeuwenhoek</i> , 2009, 96, 275-293.	1.7	38
12	Ophiostomatoid fungi associated with pines infected by <i>Bursaphelenchus xylophilus</i> and <i>Monochamus alternatus</i> in China, including three new species. <i>MycKeys</i> , 0, 39, 1-27.	1.9	4
