Stephan Ruhrmann

List of Publications by Year in Descending Order

196 papers	10,794 citations	59 h-index	100 g-index
256 ext. papers	12,880 ext. citations	5.1 avg, IF	6.07 L-index

#	Paper	IF	Citations
196	Relationships between global functioning and neuropsychological predictors in subjects at high risk of psychosis or with a recent onset of depression.. *World Journal of Biological Psychiatry*, **2022**, 1-9	3.8	0
195	Verbal memory performance predicts remission and functional outcome in people at clinical high-risk for psychosis.. *Schizophrenia Research: Cognition*, **2022**, 28, 100222	2.8	0
194	Impact of smoking behavior on cognitive functioning in persons at risk for psychosis and healthy controls: A longitudinal study - CORRIGENDUM.. *European Psychiatry*, **2022**, 65, e17	6	
193	Using combined environmental-clinical classification models to predict role functioning outcome in clinical high-risk states for psychosis and recent-onset depression.. *British Journal of Psychiatry*, **2022**, 1-17	5.4	0
192	Pattern of predictive features of continued cannabis use in patients with recent-onset psychosis and clinical high-risk for psychosis.. *NPJ Schizophrenia*, **2022**, 8, 19	5.5	
191	Detailed clinical phenotyping and generalisability in prognostic models of functioning in at-risk populations.. *British Journal of Psychiatry*, **2021**, 1-4	5.4	
190	A randomized Phase II trial evaluating efficacy, safety, and tolerability of oral BI 409306 in attenuated psychosis syndrome: Design and rationale. *Microbial Biotechnology*, **2021**, 15, 1315-1325	3.3	2
189	Clinical, cognitive and neuroanatomical associations of serum NMDAR autoantibodies in people at clinical high risk for psychosis. *Molecular Psychiatry*, **2021**, 26, 2590-2604	15.1	7
188	Pre-training inter-rater reliability of clinical instruments in an international psychosis research project. *Schizophrenia Research*, **2021**, 230, 104-107	3.6	5
187	Association between age of cannabis initiation and gray matter covariance networks in recent onset psychosis. *Neuropsychopharmacology*, **2021**, 46, 1484-1493	8.7	5
186	Cognitive subtypes in recent onset psychosis: distinct neurobiological fingerprints?. *Neuropsychopharmacology*, **2021**, 46, 1475-1483	8.7	2
185	Multimodal prognosis of negative symptom severity in individuals at increased risk of developing psychosis. *Translational Psychiatry*, **2021**, 11, 312	8.6	3
184	Is there a diagnosis-specific influence of childhood trauma on later educational attainment? A machine learning analysis in a large help-seeking sample. *Journal of Psychiatric Research*, **2021**, 138, 591-597	5.2	
183	Towards clinical application of prediction models for transition to psychosis: A systematic review and external validation study in the PRONIA sample. *Neuroscience and Biobehavioral Reviews*, **2021**, 125, 478-492	9	13
182	Toward Generalizable and Transdiagnostic Tools for Psychosis Prediction: An Independent Validation and Improvement of the NAPLS-2 Risk Calculator in the Multisite PRONIA Cohort. *Biological Psychiatry*, **2021**, 90, 632-642	7.9	8
181	The Psychopathology and Neuroanatomical Markers of Depression in Early Psychosis. *Schizophrenia Bulletin*, **2021**, 47, 249-258	1.3	9
180	Dysregulated Lipid Metabolism Precedes Onset of Psychosis. *Biological Psychiatry*, **2021**, 89, 288-297	7.9	10

#	Reference	IF	Cit
179	Development of Proteomic Prediction Models for Transition to Psychotic Disorder in the Clinical High-Risk State and Psychotic Experiences in Adolescence. *JAMA Psychiatry*, **2021**, 78, 77-90	14.5	19
178	Genome-wide association study of pediatric obsessive-compulsive traits: shared genetic risk between traits and disorder. *Translational Psychiatry*, **2021**, 11, 91	8.6	10
177	Heterogeneity and Classification of Recent Onset Psychosis and Depression: A Multimodal Machine Learning Approach. *Schizophrenia Bulletin*, **2021**, 47, 1130-1140	1.3	3
176	Multimodal Machine Learning Workflows for Prediction of Psychosis in Patients With Clinical High-Risk Syndromes and Recent-Onset Depression. *JAMA Psychiatry*, **2021**, 78, 195-209	14.5	31
175	Obsessive-Compulsive Symptoms and Other Symptoms of the At-risk Mental State for Psychosis: A Network Perspective. *Schizophrenia Bulletin*, **2021**, 47, 1018-1028	1.3	2
174	The non-specific nature of mental health and structural brain outcomes following childhood trauma. *Psychological Medicine*, **2021**, 1-10	6.9	1
173	Impact of Comorbid Affective Disorders on Longitudinal Clinical Outcomes in Individuals at Ultra-high Risk for Psychosis. *Schizophrenia Bulletin*, **2021**,	1.3	2
172	Novel Gyrification Networks Reveal Links with Psychiatric Risk Factors in Early Illness. *Cerebral Cortex*, **2021**,	5.1	1
171	Impact of smoking Behavior on cognitive functioning in persons at risk for psychosis and healthy controls: A longitudinal study. *European Psychiatry*, **2021**, 64, e60	6	1
170	The clinical relevance of formal thought disorder in the early stages of psychosis: results from the PRONIA study. *European Archives of Psychiatry and Clinical Neuroscience*, **2021**, 1	5.1	0
169	Association between tobacco use and symptomatology in individuals at ultra-high risk to develop a psychosis: A longitudinal study. *Schizophrenia Research*, **2021**, 236, 48-53	3.6	1
168	Attitudes towards Risk Prediction in a Help Seeking Population of Early Detection Centers for Mental Disorders-A Qualitative Approach. *International Journal of Environmental Research and Public Health*, **2021**, 18,	4.6	1
167	Cognitive functioning throughout adulthood and illness stages in individuals with psychotic disorders and their unaffected siblings. *Molecular Psychiatry*, **2021**, 26, 4529-4543	15.1	7
166	Traces of Trauma: A Multivariate Pattern Analysis of Childhood Trauma, Brain Structure, and Clinical Phenotypes. *Biological Psychiatry*, **2020**, 88, 829-842	7.9	15
165	Atypical processing of uncertainty in individuals at risk for psychosis. *NeuroImage: Clinical*, **2020**, 26, 102239	3.9	14
164	Sex differences in cognitive functioning of patients at-risk for psychosis and healthy controls: Results from the European Gene-Environment Interactions study. *European Psychiatry*, **2020**, 63, e25	6	8
163	Emotion Recognition and Adverse Childhood Experiences in Individuals at Clinical High Risk of Psychosis. *Schizophrenia Bulletin*, **2020**, 46, 823-833	1.3	7
162	Basic Symptoms Are Associated With Age in Patients With a Clinical High-Risk State for Psychosis: Results From the PRONIA Study. *Frontiers in Psychiatry*, **2020**, 11, 552175	5	2

161	Validation of the Bullying Scale for Adults - Results of the PRONIA-study. *Journal of Psychiatric Research*, **2020**, 129, 88-97	5.2	4
160	General psychopathology links burden of recent life events and psychotic symptoms in a network approach. *NPJ Schizophrenia*, **2020**, 6, 40	5.5	8
159	Association of Adverse Outcomes With Emotion Processing and Its Neural Substrate in Individuals at Clinical High Risk for Psychosis. *JAMA Psychiatry*, **2020**, 77, 190-200	14.5	14
158	S94. PREDICTION OF CANNABIS RELAPSE IN CLINICAL HIGH-RISK INDIVIDUALS AND RECENT ONSET PSYCHOSIS - PRELIMINARY RESULTS FROM THE PRONIA STUDY. *Schizophrenia Bulletin*, **2020**, 46, S69-S70	1.3	78
157	Relationship between jumping to conclusions and clinical outcomes in people at clinical high-risk for psychosis. *Psychological Medicine*, **2020**, 1-9	6.9	4
156	Age effects on basic symptoms in the community: A route to gain new insight into the neurodevelopment of psychosis?. *European Archives of Psychiatry and Clinical Neuroscience*, **2020**, 270, 311-324	5.1	11
155	Peculiarities of health literacy in people with mental disorders: A cross-sectional study. *International Journal of Social Psychiatry*, **2020**, 66, 10-22	8.5	4
154	Sex differences in symptomatology of psychosis-risk patients and in prediction of psychosis. *Archives of Womenls Mental Health*, **2020**, 23, 339-349	5	5
153	The interrelationship between schizotypy, clinical high risk for psychosis and related symptoms: Cognitive disturbances matter. *Schizophrenia Research*, **2019**, 210, 188-196	3.6	19
152	Health literacy in clinical-high-risk individuals for psychosis: A systematic mixed-methods review. *Microbial Biotechnology*, **2019**, 13, 1293-1309	3.3	4
151	Individualized Prediction of Transition to Psychosis in 1,676 Individuals at Clinical High Risk: Development and Validation of a Multivariable Prediction Model Based on Individual Patient Data Meta-Analysis. *Frontiers in Psychiatry*, **2019**, 10, 345	5	18
150	Gender differences of patients at-risk for psychosis regarding symptomatology, drug use, comorbidity and functioning - Results from the EU-GEI study. *European Psychiatry*, **2019**, 59, 52-59	6	15
149	Multimodal prevention of first psychotic episode through N-acetyl-l-cysteine and integrated preventive psychological intervention in individuals clinically at high risk for psychosis: Protocol of a randomized, placebo-controlled, parallel-group trial. *Microbial Biotechnology*, **2019**, 13, 1404-1415	3.3	8
148	O6.5. INVESTIGATING VARIABLES FROM THE NAPLS RISK CALCULATOR FOR PSYCHOSIS IN THE EU-GEI HIGH RISK STUDY. *Schizophrenia Bulletin*, **2019**, 45, S177-S178	1.3	78
147	Childhood adversity predicts persistence of suicidal thoughts differently in females and males at clinical high-risk patients of psychosis. Results of the EPOS project. *Microbial Biotechnology*, **2019**, 13, 935-942	3.3	7
146	Resilience as a multimodal dynamic process. *Microbial Biotechnology*, **2019**, 13, 725-732	3.3	59
145	Validierung einer deutschen Version der Resilience Scale for´Adults (RSA). *Diagnostica*, **2019**, 65, 205-215	5.8	3
144	Genomic Relationships, Novel Loci, and Pleiotropic Mechanisms across Eight Psychiatric Disorders. *Cell*, **2019**, 179, 1469-1482.e11	56.2	402

No.	Reference	IF	Cit.
143	Sex differences in the genetic architecture of obsessive-compulsive disorder. *American Journal of Medical Genetics Part B: Neuropsychiatric Genetics*, **2019**, 180, 351-364	3.5	25
142	Antisaccade and prosaccade eye movements in individuals clinically at risk for psychosis: comparison with first-episode schizophrenia and prediction of conversion. *European Archives of Psychiatry and Clinical Neuroscience*, **2019**, 269, 921-930	5.1	10
141	Expressed emotion as a predictor of the first psychotic episode - Results of the European prediction of psychosis study. *Schizophrenia Research*, **2018**, 199, 346-352	3.6	9
140	Course of clinical high-risk states for psychosis beyond conversion. *European Archives of Psychiatry and Clinical Neuroscience*, **2018**, 268, 39-48	5.1	43
139	Child Maltreatment and Clinical Outcome in Individuals at Ultra-High Risk for Psychosis in the EU-GEI High Risk Study. *Schizophrenia Bulletin*, **2018**, 44, 584-592	1.3	25
138	Prevalence and clinical relevance of interview-assessed psychosis-risk symptoms in the young adult community. *Psychological Medicine*, **2018**, 48, 1167-1178	6.9	32
137	S13. DO PATIENTS WITH RECENT-ONSET DEPRESSION DIFFER CLINICALLY AND NEUROBIOLOGICALLY FROM DEPRESSED PATIENTS WITH A CLINICAL HIGH-RISK STATE FOR PSYCHOSIS?. *Schizophrenia Bulletin*, **2018**, 44, S328-S329	1.3	78
136	Revealing the complex genetic architecture of obsessive-compulsive disorder using meta-analysis. *Molecular Psychiatry*, **2018**, 23, 1181-1188	15.1	205
135	T239. SINGLE-SUBJECT PREDICTION OF FUNCTIONAL OUTCOMES IN CLINICAL HIGH RISK SUBJECTS USING CLINICAL DATA. *Schizophrenia Bulletin*, **2018**, 44, S209-S210	1.3	78
134	Prediction Models of Functional Outcomes for Individuals in the Clinical High-Risk State for Psychosis or With Recent-Onset Depression: A Multimodal, Multisite Machine Learning Analysis. *JAMA Psychiatry*, **2018**, 75, 1156-1172	14.5	156
133	Integrating evolutionary and regulatory information with a multispecies approach implicates genes and pathways in obsessive-compulsive disorder. *Nature Communications*, **2017**, 8, 774	17.4	41
132	Intervention in Clinical High Risk States - Current Status and Future Perspectives. *European Psychiatry*, **2017**, 41, S27-S28	6	
131	Clinical High Risk Symptoms and Criteria in the Community: Prevalence, Clinical Significance and Risk Factors for Their Occurrence. *European Psychiatry*, **2017**, 41, S226-S226	6	1
130	Basic Symptoms in the Community and their Association with Age. *European Psychiatry*, **2017**, 41, S84-S85	6	1
129	Restricted attention to social cues in schizophrenia patients. *European Archives of Psychiatry and Clinical Neuroscience*, **2016**, 266, 649-61	5.1	21
128	Psychosis-predictive value of self-reported schizotypy in a clinical high-risk sample. *Journal of Abnormal Psychology*, **2016**, 125, 923-932	7	46
127	Depression predicts persistence of paranoia in clinical high-risk patients to psychosis: results of the EPOS project. *Social Psychiatry and Psychiatric Epidemiology*, **2016**, 51, 247-57	4.5	17
126	Predictors for symptom re-exacerbation after targeted stepwise drug discontinuation in first-episode schizophrenia: Results of the first-episode study within the German research network on schizophrenia. *Schizophrenia Research*, **2016**, 170, 168-76	3.6	27

125	Revisiting the Basic Symptom Concept: Toward Translating Risk Symptoms for Psychosis into Neurobiological Targets. *Frontiers in Psychiatry*, **2016**, 7, 9	5	40
124	Development of a stage-dependent prognostic model to predict psychosis in ultra-high-risk patients seeking treatment for co-morbid psychiatric disorders. *Psychological Medicine*, **2016**, 46, 1839-51	6.9	12
123	Authors Reply. *British Journal of Psychiatry*, **2016**, 208, 197-8	5.4	
122	EPA guidance on the early detection of clinical high risk states of psychoses. *European Psychiatry*, **2015**, 30, 405-16	6	235
121	Personality dimensions in persons symptomatically at risk of psychosis: pronounced but lacking a characteristic profile. *Microbial Biotechnology*, **2015**, 9, 242-7	3.3	6
120	Duration of unspecific prodromal and clinical high risk states, and early help-seeking in first-admission psychosis patients. *Social Psychiatry and Psychiatric Epidemiology*, **2015**, 50, 1831-41	4.5	41
119	Disorder, not just state of risk: meta-analysis of functioning and quality of life in people at high risk of psychosis. *British Journal of Psychiatry*, **2015**, 207, 198-206	5.4	180
118	Forecasting psychosis by event-related potentials-systematic review and specific meta-analysis. *Biological Psychiatry*, **2015**, 77, 951-8	7.9	76
117	EPA guidance on the early intervention in clinical high risk states of psychoses. *European Psychiatry*, **2015**, 30, 388-404	6	233
116	Neurocognitive functioning in parents of schizophrenia patients: Attentional and executive performance vary with genetic loading. *Psychiatry Research*, **2015**, 230, 885-91	9.9	10
115	Cross-disorder genome-wide analyses suggest a complex genetic relationship between Tourette's syndrome and OCD. *American Journal of Psychiatry*, **2015**, 172, 82-93	11.9	101
114	Psychosis prediction: stratification of risk estimation with information-processing and premorbid functioning variables. *Schizophrenia Bulletin*, **2014**, 40, 1482-90	1.3	75
113	5-HT3 receptor influences the washing phenotype and visual organization in obsessive-compulsive disorder supporting 5-HT3 receptor antagonists as novel treatment option. *European Neuropsychopharmacology*, **2014**, 24, 86-94	1.2	18
112	Prediction and prevention of psychosis: current progress and future tasks. *European Archives of Psychiatry and Clinical Neuroscience*, **2014**, 264 Suppl 1, S9-16	5.1	16
111	Copy number variation in obsessive-compulsive disorder and tourette syndrome: a cross-disorder study. *Journal of the American Academy of Child and Adolescent Psychiatry*, **2014**, 53, 910-9	7.2	86
110	A stratified model for psychosis prediction in clinical practice. *Schizophrenia Bulletin*, **2014**, 40, 1533-42	1.3	53
109	Prevalence and clinical significance of DSM-5-attenuated psychosis syndrome in adolescents and young adults in the general population: the Bern Epidemiological At-Risk (BEAR) study. *Schizophrenia Bulletin*, **2014**, 40, 1499-508	1.3	70
108	Improving the clinical prediction of psychosis by combining ultra-high risk criteria and cognitive basic symptoms. *Schizophrenia Research*, **2014**, 154, 100-6	3.6	94

107	PREVENTIVE PSYCHOTHERAPY. *Schizophrenia Research*, **2014**, 153, S42-S43	3.6	1
106	Self-reported psychotic-like experiences are a poor estimate of clinician-rated attenuated and frank delusions and hallucinations. *Psychopathology*, **2014**, 47, 194-201	3.4	47
105	Identifying gene-environment interactions in schizophrenia: contemporary challenges for integrated, large-scale investigations. *Schizophrenia Bulletin*, **2014**, 40, 729-36	1.3	186
104	Short-term functional outcome and premorbid adjustment in clinical high-risk patients. Results of the EPOS project. *European Psychiatry*, **2014**, 29, 371-80	6	24
103	Can quantitative EEG measures predict clinical outcome in subjects at Clinical High Risk for psychosis? A prospective multicenter study. *Schizophrenia Research*, **2014**, 153, 42-7	3.6	38
102	Pathways to care in subjects at high risk for psychotic disorders - a European perspective. *Schizophrenia Research*, **2014**, 152, 400-7	3.6	21
101	Psychosocial outcome in patients at clinical high risk of psychosis: a prospective follow-up. *Social Psychiatry and Psychiatric Epidemiology*, **2013**, 48, 303-11	4.5	27
100	Morphometry of structural disconnectivity indicators in subjects at risk and in age-matched patients with schizophrenia. *European Archives of Psychiatry and Clinical Neuroscience*, **2013**, 263, 15-24	5.1	20
99	Physical illnesses, developmental risk factors and psychiatric diagnoses among subjects at risk of psychosis. *European Psychiatry*, **2013**, 28, 135-40	6	3
98	Prediction of psychosis in clinical high-risk patients by the Schizotypal Personality Questionnaire. Results of the EPOS project. *European Psychiatry*, **2013**, 28, 469-75	6	36
97	The psychosis high-risk state: a comprehensive state-of-the-art review. *JAMA Psychiatry*, **2013**, 70, 107-20	14.5	965
96	The Strauss and Carpenter Prognostic Scale in subjects clinically at high risk of psychosis. *Acta Psychiatrica Scandinavica*, **2013**, 127, 53-61	6.5	23
95	Genome-wide association study of obsessive-compulsive disorder. *Molecular Psychiatry*, **2013**, 18, 788-98	15.1	244
94	The functional coding variant Asn107Ile of the neuropeptide S receptor gene (NPSR1) influences age at onset of obsessive-compulsive disorder. *International Journal of Neuropsychopharmacology*, **2013**, 16, 1951-8	5.8	6
93	Partitioning the heritability of Tourette syndrome and obsessive compulsive disorder reveals differences in genetic architecture. *PLoS Genetics*, **2013**, 9, e1003864	6	189
92	A rose is a rose is a rose, but at-risk criteria differ. *Psychopathology*, **2013**, 46, 75-87	3.4	51
91	Characterization of SLITRK1 variation in obsessive-compulsive disorder. *PLoS ONE*, **2013**, 8, e70376	3.7	37
90	Basic disturbances of information processing in psychosis prediction. *Frontiers in Psychiatry*, **2013**, 4, 93	5	5

89	Personality disorders and accentuations in at-risk persons with and without conversion to first-episode psychosis. *Microbial Biotechnology*, **2012**, 6, 389-98	3.3	34
88	A promoter variant of SHANK1 affects auditory working memory in schizophrenia patients and in subjects clinically at risk for psychosis. *European Archives of Psychiatry and Clinical Neuroscience*, **2012**, 262, 117-24	5.1	33
87	Antisaccade performance in patients with obsessive-compulsive disorder and unaffected relatives: further evidence for impaired response inhibition as a candidate endophenotype. *European Archives of Psychiatry and Clinical Neuroscience*, **2012**, 262, 625-34	5.1	38
86	Perceived negative attitude of others predicts transition to psychosis in patients at risk of psychosis. *European Psychiatry*, **2012**, 27, 264-6	6	10
85	Pharmacological prevention and treatment in clinical at-risk states for psychosis. *Current Pharmaceutical Design*, **2012**, 18, 550-7	3.3	16
84	Whither the attenuated psychosis syndrome?. *Schizophrenia Bulletin*, **2012**, 38, 1130-4	1.3	74
83	Preventing progression to first-episode psychosis in early initial prodromal states. *British Journal of Psychiatry*, **2012**, 200, 22-9	5.4	162
82	Poster #202 COMPARING THE PRODROME OF SCHIZOPHRENIA-SPECTRUM PSYCHOSES AND BIPOLAR DISORDERS WITH AND WITHOUT PSYCHOTIC FEATURES. *Schizophrenia Research*, **2012**, 136, S163-S164	3.6	
81	Axis I diagnoses and transition to psychosis in clinical high-risk patients EPOS project: prospective follow-up of 245 clinical high-risk outpatients in four countries. *Schizophrenia Research*, **2012**, 138, 192-7	3.6	85
80	Comparing the prodrome of schizophrenia-spectrum psychoses and affective disorders with and without psychotic features. *Schizophrenia Research*, **2012**, 138, 218-22	3.6	13
79	Chances and risks of predicting psychosis. *European Archives of Psychiatry and Clinical Neuroscience*, **2012**, 262 Suppl 2, S85-90	5.1	16
78	Cannabis use and age at onset of symptoms in subjects at clinical high risk for psychosis. *Acta Psychiatrica Scandinavica*, **2012**, 125, 45-53	6.5	61
77	Basic symptoms and the prediction of first-episode psychosis. *Current Pharmaceutical Design*, **2012**, 18, 351-7	3.3	121
76	Neurophysiological correlates of impaired facial affect recognition in individuals at risk for schizophrenia. *Schizophrenia Bulletin*, **2012**, 38, 1021-9	1.3	51
75	Rationale and first results of developing at-risk (prodromal) criteria for bipolar disorder. *Current Pharmaceutical Design*, **2012**, 18, 358-75	3.3	65
74	Subjective quality of life and its changes in patients at-risk for psychosis results of the EPOS study. *European Psychiatry*, **2011**, 26, 2039-2039	6	
73	Course of psychopathology in the at-risk mental state - outcomes beyond transition to psychosis. *European Psychiatry*, **2011**, 26, 2037-2037	6	
72	Prediction of psychosis by mismatch negativity. *Biological Psychiatry*, **2011**, 69, 959-66	7.9	219

71	The near Babylonian speech confusion in early detection of psychosis. *Schizophrenia Bulletin*, **2011**, 37, 653-5	1.3	54
70	Neuropsychological profiles in different at-risk states of psychosis: executive control impairment in the early--and additional memory dysfunction in the late--prodromal state. *Schizophrenia Bulletin*, **2011**, 37, 861-73	1.3	105
69	Prediction and prevention of schizophrenia: what has been achieved and where to go next?. *World Psychiatry*, **2011**, 10, 165-74	14.4	73
68	Prediction and Early Detection of First-Episode Psychosis **2011**, 207-267		2
67	Prevention and Early Intervention in At-Risk States for Developing Psychosis **2011**, 81-92		
66	Perceived parental rearing in subjects with obsessive-compulsive disorder and their siblings. *Acta Psychiatrica Scandinavica*, **2010**, 121, 280-8	6.5	30
65	The EPOS prediction model improves ability to predict transition to first episode psychosis in individuals at high risk. *Evidence-Based Mental Health*, **2010**, 13, 77	11.1	
64	Basic symptoms and ultrahigh risk criteria: symptom development in the initial prodromal state. *Schizophrenia Bulletin*, **2010**, 36, 182-91	1.3	152
63	Klinische Prädiktion und Prävention von Psychosen. *Psychiatrie Und Psychotherapie Up2date*, **2010**, 4, 237-252		
62	Prediction of psychosis in adolescents and young adults at high risk: results from the prospective European prediction of psychosis study. *Archives of General Psychiatry*, **2010**, 67, 241-51		491
61	The interaction of working memory and emotion in persons clinically at risk for psychosis: an fMRI pilot study. *Schizophrenia Research*, **2010**, 120, 167-76	3.6	29
60	Probably at-risk, but certainly ill--advocating the introduction of a psychosis spectrum disorder in DSM-V. *Schizophrenia Research*, **2010**, 120, 23-37	3.6	114
59	Disability in people clinically at high risk of psychosis. *British Journal of Psychiatry*, **2010**, 197, 278-84	5.4	101
58	DAOA/G72 predicts the progression of prodromal syndromes to first episode psychosis. *European Archives of Psychiatry and Clinical Neuroscience*, **2010**, 260, 209-15	5.1	29
57	Intervention in at-risk states for developing psychosis. *European Archives of Psychiatry and Clinical Neuroscience*, **2010**, 260 Suppl 2, S90-4	5.1	13
56	Search for copy number variants in chromosomes 15q11-q13 and 22q11.2 in obsessive compulsive disorder. *BMC Medical Genetics*, **2010**, 11, 100	2.1	13
55	Anandamide elevation in cerebrospinal fluid in initial prodromal states of psychosis. *British Journal of Psychiatry*, **2009**, 194, 371-2	5.4	140
54	Gray matter abnormalities in subjects at ultra-high risk for schizophrenia and first-episode schizophrenic patients compared to healthy controls. *Psychiatry Research - Neuroimaging*, **2009**, 173, 163-9	2.9	116

53	Antisaccade performance is related to genetic loading for schizophrenia. *Journal of Psychiatric Research*, **2009**, 43, 291-7	5.2	12
52	Early onset of obsessive-compulsive disorder and associated comorbidity. *Depression and Anxiety*, **2009**, 26, 1012-7	8.4	36
