

Beata Ponikowska

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5288683/beata-ponikowska-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

30
papers

1,045
citations

#	Paper	IF	Citations
30	Neck Chamber Technique Revisited: Low-Noise Device Delivering Negative and Positive Pressure and Enabling Concomitant Carotid Artery Imaging With Ultrasonography. <i>Frontiers in Physiology</i> , 2021 , 12, 703692	4.6	0
29	Low ventilatory responsiveness to transient hypoxia or breath-holding predicts fast marathon performance in healthy middle-aged and older men. <i>Scientific Reports</i> , 2021 , 11, 10255	4.9	
28	Inspiratory- and expiratory-gated transcutaneous vagus nerve stimulation have different effects on heart rate in healthy subjects: preliminary results. <i>Clinical Autonomic Research</i> , 2021 , 31, 205-214	4.3	13
27	Acute effects of increased gut microbial fermentation on the hypoxic ventilatory response in humans. <i>Experimental Physiology</i> , 2021 , 106, 748-758	2.4	2
26	Passive cycling with concomitant circulatory occlusion for testing interactions between the exercise pressor reflex afferent pathways: (re)naissance or déjà-vu?—Authors' response. <i>Clinical Autonomic Research</i> , 2020 , 30, 591-592	4.3	2
25	Passive bilateral leg cycling with concomitant regional circulatory occlusion for testing mechanoreflex-metaboreflex interactions in humans. <i>Clinical Autonomic Research</i> , 2020 , 30, 549-556	4.3	3
24	Hypoxic tachycardia is not a result of increased respiratory activity in healthy subjects. <i>Experimental Physiology</i> , 2019 , 104, 476-489	2.4	8
23	Assessment of baroreflex sensitivity has no prognostic value in contemporary, optimally managed patients with mild-to-moderate heart failure with reduced ejection fraction: a retrospective analysis of 5-year survival. <i>European Journal of Heart Failure</i> , 2019 , 21, 50-58	12.3	3
22	Non-invasive approach for the assessment of sympathetic baroreflex function: A feasibility study. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2017 , 203, 108-112	2.4	1
21	Central Chemoreceptor Sensitivity Is Not Enhanced in Contemporary Patients With Chronic Systolic Heart Failure Receiving Optimal Treatment. <i>Journal of Cardiac Failure</i> , 2017 , 23, 83-87	3.3	0
20	Increased body fat is associated with potentiation of blood pressure response to hypoxia in healthy men: relations with insulin and leptin. <i>Clinical Autonomic Research</i> , 2016 , 26, 107-116	4.3	10
19	Age-related reflex responses from peripheral and central chemoreceptors in healthy men. <i>Clinical Autonomic Research</i> , 2014 , 24, 285-96	4.3	12
18	Circulating testosterone and estradiol, autonomic balance and baroreflex sensitivity in middle-aged and elderly men with heart failure. <i>Aging Male</i> , 2013 , 16, 58-66	2.1	15
17	Iron status and survival in diabetic patients with coronary artery disease. <i>Diabetes Care</i> , 2013 , 36, 4147-56	4.6	37
16	Anabolic deficiencies in men with systolic heart failure: do co-morbidities and therapies really contribute significantly?. <i>Aging Male</i> , 2013 , 16, 123-31	2.1	6
15	Baroreceptor sensitivity and diabetes mellitus. <i>Cardiology Journal</i> , 2013 , 20, 453-63	1.4	22
14	Andropausal syndrome in men with systolic heart failure. <i>Polish Archives of Internal Medicine</i> , 2013 , 123, 156-69	1.9	3

13	Iron deficiency predicts impaired exercise capacity in patients with systolic chronic heart failure. <i>Journal of Cardiac Failure</i> , 2011 , 17, 899-906	3.3	160
12	Changes in autonomic balance in patients with decompensated chronic heart failure. <i>Clinical Autonomic Research</i> , 2011 , 21, 47-54	4.3	25
11	Identification of chronic heart failure patients with a high 12-month mortality risk using biomarkers including plasma C-terminal pro-endothelin-1. <i>PLoS ONE</i> , 2011 , 6, e14506	3.7	31
10	Deficiencies in circulating testosterone and dehydroepiandrosterone sulphate, and depression in men with systolic chronic heart failure. <i>European Journal of Heart Failure</i> , 2010 , 12, 966-73	12.3	27
9	Iron deficiency: an ominous sign in patients with systolic chronic heart failure. <i>European Heart Journal</i> , 2010 , 31, 1872-80	9.5	379
8	Gonadal and adrenal androgen deficiencies as independent predictors of increased cardiovascular mortality in men with type II diabetes mellitus and stable coronary artery disease. <i>International Journal of Cardiology</i> , 2010 , 143, 343-8	3.2	38
7	Circulating estradiol and mortality in men with systolic chronic heart failure. <i>JAMA - Journal of the American Medical Association</i> , 2009 , 301, 1892-901	27.4	70
6	Bone mineral status and bone loss over time in men with chronic systolic heart failure and their clinical and hormonal determinants. <i>European Journal of Heart Failure</i> , 2009 , 11, 28-38	12.3	36
5	Reduction in circulating testosterone relates to exercise capacity in men with chronic heart failure. <i>Journal of Cardiac Failure</i> , 2009 , 15, 442-50	3.3	69
4	Abnormal indices of autonomic function are no longer predictors of poor outcome in diabetic patients without neuropathy but with coexisting coronary artery disease who receive optimal pharmacological therapy. <i>Kardiologia Polska</i> , 2009 , 67, 1325-32	0.9	1
3	Excessive ventilation during early phase of exercise: a new predictor of poor long-term outcome in patients with chronic heart failure. <i>European Journal of Heart Failure</i> , 2007 , 9, 1024-31	12.3	14
2	Hyperuricaemia predicts poor outcome in patients with mild to moderate chronic heart failure. <i>International Journal of Cardiology</i> , 2007 , 115, 151-5	3.2	58
1	Understanding mechanoreflex and metaboreflex interactions is a great challenge. <i>Indian Journal of Physiology and Pharmacology</i> , 2007 , 65, 1-11
