#	Article	IF	CITATIONS
1	Principles of maximum entropy and maximum caliber in statistical physics. Reviews of Modern Physics, 2013, 85, 1115-1141.	45.6	298
2	The FALC-Loop web server for protein loop modeling. Nucleic Acids Research, 2011, 39, W210-W214.	14.5	101
3	Protein loop modeling by using fragment assembly and analytical loop closure. Proteins: Structure, Function and Bioinformatics, 2010, 78, 3428-3436.	2.6	90
4	Prediction of protein solvent accessibility using fuzzy k-nearest neighbor method. Bioinformatics, 2005, 21, 2844-2849.	4.1	81
5	Prediction of protein tertiary structure using PROFESY, a novel method based on fragment assembly and conformational space annealing. Proteins: Structure, Function and Bioinformatics, 2004, 56, 704-714.	2.6	74
6	Exact partition function zeros and the collapse transition of a two-dimensional lattice polymer. Journal of Chemical Physics, 2010, 133, 114106.	3.0	42
7	Protein structure prediction based on fragment assembly and parameter optimization. Biophysical Chemistry, 2005, 115, 209-214.	2.8	38
8	Single Molecule Conformational Memory Extraction: P5ab RNA Hairpin. Journal of Physical Chemistry B, 2014, 118, 6597-6603.	2.6	35
9	Exact partition function zeros of a polymer on a simple cubic lattice. Physical Review E, 2012, 86, 011802.	2.1	34
10	Exact Partition Function Zeros of The Wako-Saitô-Muñoz-Eaton Protein Model. Physical Review Letters, 2013, 110, 248101.	7.8	30
11	Refinement of protein termini in templateâ€based modeling using conformational space annealing. Proteins: Structure, Function and Bioinformatics, 2011, 79, 2725-2734.	2.6	25
12	Collapse transition of a square-lattice polymer with next nearest-neighbor interaction. Journal of Chemical Physics, 2011, 135, 204102.	3.0	25
13	A derivation of the master equation from path entropy maximization. Journal of Chemical Physics, 2012, 137, 074103.	3.0	20
14	Parallel algorithm for calculation of the exact partition function of a lattice polymer. Computer Physics Communications, 2011, 182, 1027-1033.	7.5	19
15	Partition function zeros of a square-lattice homopolymer with nearest- and next-nearest-neighbor interactions. Physical Review E, 2013, 87, 052601.	2.1	18
16	Exact Partition Function Zeros of Two-Dimensional Lattice Polymers. Journal of the Korean Physical Society, 2004, 44, 617.	0.7	18
17	Quantitative analysis of a transient dynamics of a gene regulatory network. Physical Review E, 2018, 98, .	2.1	15
18	Measures for the assessment of fuzzy predictions of protein secondary structure. Proteins: Structure, Function and Bioinformatics, 2006, 65, 453-462.	2.6	11

Julian Lee

#	Article	IF	CITATIONS
19	Exact partition function zeros of the Wako-Saitô-Muñoz-Eatonβhairpin model. Physical Review E, 2013, 88, 022710.	2.1	11
20	Derivation of Markov processes that violate detailed balance. Physical Review E, 2018, 97, 032110.	2.1	10
21	Protein folding using fragment assembly and physical energy function. Journal of Chemical Physics, 2006, 125, 194908.	3.0	9
22	Microcanonical origin of the maximum entropy principle for open systems. Physical Review E, 2012, 86, 041126.	2.1	8
23	Low-temperature behavior of the finite-size one-dimensional Ising model and the partition function zeros. Journal of the Korean Physical Society, 2014, 65, 676-683.	0.7	8
24	<i>In Silico</i> Development of Quorum‣ensing Inhibitors. Bulletin of the Korean Chemical Society, 2017, 38, 728-734.	1.9	7
25	Protein Loop Modeling Using Fragment Assembly. Journal of the Korean Physical Society, 2008, 52, 1137-1142.	0.7	7
26	Exact zeros of the partition function for a continuum system with double Gaussian peaks. Physical Review E, 2000, 62, 4558-4563.	2.1	6
27	Analytic model of the Schottky anomaly and phase transition. Journal of the Korean Physical Society, 2015, 67, 1133-1136.	0.7	6
28	Study on collapse and folding transitions of a lattice protein using exact enumeration. AIP Advances, 2015, 5, 127211.	1.3	5
29	Method for identification of rigid domains and hinge residues in proteins based on exhaustive enumeration. Proteins: Structure, Function and Bioinformatics, 2015, 83, 1054-1067.	2.6	5
30	Stability analysis of an autocatalytic protein model. AIP Advances, 2016, 6, 055013.	1.3	5
31	Transfer matrix algorithm for computing the exact partition function of a square lattice polymer. Computer Physics Communications, 2018, 228, 11-21.	7.5	5
32	Schottky anomaly in a repulsive lattice polymer. Journal of the Korean Physical Society, 2016, 68, 288-295.	0.7	4
33	Hydrodynamic interaction facilitates the unsteady transport of two neighboring vesicles. Journal of Chemical Physics, 2019, 151, 094108.	3.0	4
34	Exact partition functions of a polymer on a square lattice up to chain length 38. Journal of Physics: Conference Series, 2013, 454, 012083.	0.4	3
35	Low-temperature conformational transition of a square-lattice polymer. Journal of the Korean Physical Society, 2015, 66, 1797-1801.	0.7	3
36	Study on the ground states of a square-lattice polymer by using exhaustive enumeration. Journal of the Korean Physical Society, 2016, 69, 1518-1522.	0.7	3

Julian Lee

37       Microcanonical analysis of a finite size nonequilibrium system. Physical Review E, 2016, 93, 052148.         38       Protein contact prediction by using information theory. Journal of the Korean Physical Society, 2017, 70, 876-879.         39       Phase diagram of the Wako-SalfA-MuAeoz-Eaton 12 hairpin model obtained from the partition-function zeros. Journal of the Korean Physical Society, 2014, 65, 671-675.         40       Exhaustive Enumeration of Fragment-Assembled Protein Conformations. Journal of the Korean Physical Society, 2008, 52, 137-142.         41       Finite-size phase diagram of the Wako-SalfA-MuEconoz-Eaton 1±-belix model. Journal of the Korean Physical Society, 2015, 67, 1187-1191.         42       Analysis of precision and accuracy in a simple model of machine learning. Journal of the Korean Physical Society, 2017, 71, 866-870.         43       Protein Structure Prediction Lising the Hybrid Energy Function, Fragment Assembly and Double Optimization. Journal of the Korean Physical Society, 2008, 53, 873-879.         44       Protein Structure Prediction Using a Hybrid Energy Function and an Exact Enumeration. Journal of the Korean Physical Society, 2008, 53, 873-879.         45       Bifurcations of a Positive Feedback Loop with Partial Binding. Journal of the Korean Physical Society, 2009, 76, 762-768.         46       A new method for prediction of RNA secondary structure with pseudoknots, based on helix removal and refinement. Optimization, 2009, 58, 861-869.         47       Exact Enumeration of Protein Conformations from Fragment Assembly. Journal of Physics: Conference Series, 2013, 410, 01207	IF	CITATIONS
