

Jos L Lzaro-Martnez

List of Publications by Citations

Source: <https://exaly.com/author-pdf/531158/jose-l-lazaro-martinez-publications-by-citations.pdf>
Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

114 papers	1,775 citations	22 h-index	37 g-index
134 ext. papers	2,276 ext. citations	3.7 avg, IF	4.98 L-index

#	Paper	IF	Citations
114	Antibiotics versus conservative surgery for treating diabetic foot osteomyelitis: a randomized comparative trial. <i>Diabetes Care</i> , 2014 , 37, 789-95	14.6	160
113	Outcomes of surgical treatment of diabetic foot osteomyelitis: a series of 185 patients with histopathological confirmation of bone involvement. <i>Diabetologia</i> , 2008 , 51, 1962-70	10.3	146
112	Diagnosing diabetic foot osteomyelitis: is the combination of probe-to-bone test and plain radiography sufficient for high-risk inpatients?. <i>Diabetic Medicine</i> , 2011 , 28, 191-4	3.5	109
111	Sucrose octasulfate dressing versus control dressing in patients with neuroischaemic diabetic foot ulcers (Explorer): an international, multicentre, double-blind, randomised, controlled trial. <i>Lancet Diabetes and Endocrinology</i> , 2018 , 6, 186-196	18.1	104
110	Does osteomyelitis in the feet of patients with diabetes really recur after surgical treatment? Natural history of a surgical series. <i>Diabetic Medicine</i> , 2012 , 29, 813-8	3.5	61
109	Analysis of transfer lesions in patients who underwent surgery for diabetic foot ulcers located on the plantar aspect of the metatarsal heads. <i>Diabetic Medicine</i> , 2013 , 30, 973-6	3.5	53
108	Predictors of Diabetic Foot Reulceration beneath the Hallux. <i>Journal of Diabetes Research</i> , 2019 , 2019, 9038171	3.9	47
107	Impact of diabetic foot related complications on the Health Related Quality of Life (HRQoL) of patients--a regional study in Spain. <i>International Journal of Lower Extremity Wounds</i> , 2011 , 10, 6-11	1.6	45
106	Necrotizing soft-tissue infections in the feet of patients with diabetes: outcome of surgical treatment and factors associated with limb loss and mortality. <i>International Journal of Lower Extremity Wounds</i> , 2009 , 8, 141-6	1.6	42
105	Effect of oral nutritional supplementation on wound healing in diabetic foot ulcers: a prospective randomized controlled trial. <i>Diabetic Medicine</i> , 2014 , 31, 1069-77	3.5	41
104	Are diabetic foot ulcers complicated by MRSA osteomyelitis associated with worse prognosis? Outcomes of a surgical series. <i>Diabetic Medicine</i> , 2009 , 26, 552-5	3.5	35
103	Inter-observer reproducibility of diagnosis of diabetic foot osteomyelitis based on a combination of probe-to-bone test and simple radiography. <i>Diabetes Research and Clinical Practice</i> , 2014 , 105, e3-5	7.4	29
102	Foot biomechanics in patients with diabetes mellitus: doubts regarding the relationship between neuropathy, foot motion, and deformities. <i>Journal of the American Podiatric Medical Association</i> , 2011 , 101, 208-14	1	29
101	Delayed referral of patients with diabetic foot ulcers across Europe: patterns between primary care and specialised units. <i>Journal of Wound Care</i> , 2018 , 27, 186-192	2.2	27
100	Histopathologic characteristics of bone infection complicating foot ulcers in diabetic patients. <i>Journal of the American Podiatric Medical Association</i> , 2013 , 103, 24-31	1	27
99	From the diabetic foot ulcer and beyond: how do foot infections spread in patients with diabetes?. <i>Diabetic Foot & Ankle</i> , 2012 , 3,	6.5	27
98	Gram-negative diabetic foot osteomyelitis: risk factors and clinical presentation. <i>International Journal of Lower Extremity Wounds</i> , 2013 , 12, 63-8	1.6	26

97	Metalloproteinases in chronic and acute wounds: A systematic review and meta-analysis. <i>Wound Repair and Regeneration</i> , 2019 , 27, 415-420	3.6	24
96	In-hospital complications and mortality following major lower extremity amputations in a series of predominantly diabetic patients. <i>International Journal of Lower Extremity Wounds</i> , 2010 , 9, 16-23	1.6	24
95	Epidemiology of diabetes-related lower extremity amputations in Gran Canaria, Canary Islands (Spain). <i>Diabetes Research and Clinical Practice</i> , 2009 , 86, e6-8	7.4	24
94	The best way to reduce reulcerations: if you understand biomechanics of the diabetic foot, you can do it. <i>International Journal of Lower Extremity Wounds</i> , 2014 , 13, 294-319	1.6	23
93	Conservative Surgery of Diabetic Forefoot Osteomyelitis: How Can I Operate on This Patient Without Amputation?. <i>International Journal of Lower Extremity Wounds</i> , 2015 , 14, 108-31	1.6	22
92	Optimal management of diabetic foot osteomyelitis: challenges and solutions. <i>Diabetes, Metabolic Syndrome and Obesity: Targets and Therapy</i> , 2019 , 12, 947-959	3.4	19
91	Analysis of Ulcer Recurrences After Metatarsal Head Resection in Patients Who Underwent Surgery to Treat Diabetic Foot Osteomyelitis. <i>International Journal of Lower Extremity Wounds</i> , 2015 , 14, 154-9	1.6	19
90	Efficacy and safety of neutral pH superoxidised solution in severe diabetic foot infections. <i>International Wound Journal</i> , 2007 , 4, 353-62	2.6	19
89	Triggering mechanisms of neuroarthropathy following conservative surgery for osteomyelitis. <i>Diabetic Medicine</i> , 2010 , 27, 844-7	3.5	17
88	Surgical complications associated with primary closure in patients with diabetic foot osteomyelitis. <i>Diabetic Foot & Ankle</i> , 2012 , 3,	6.5	17
87	Surgical treatment of limb- and life-threatening infections in the feet of patients with diabetes and at least one palpable pedal pulse: successes and lessons learnt. <i>International Journal of Lower Extremity Wounds</i> , 2011 , 10, 207-13	1.6	16
86	Diagnostic and therapeutic update on diabetic foot osteomyelitis. <i>Endocrinologia, Diabetes Y Nutrición</i> , 2017 , 64, 100-108	1.3	15
85	Clinical efficacy of therapeutic footwear with a rigid rocker sole in the prevention of recurrence in patients with diabetes mellitus and diabetic polyneuropathy: A randomized clinical trial. <i>PLoS ONE</i> , 2019 , 14, e0219537	3.7	15
84	Interobserver and intraobserver reproducibility of plain X-rays in the diagnosis of diabetic foot osteomyelitis. <i>International Journal of Lower Extremity Wounds</i> , 2013 , 12, 12-5	1.6	15
83	Optimal wound closure of diabetic foot ulcers with early initiation of TLC-NOSF treatment: post-hoc analysis of Explorer. <i>Journal of Wound Care</i> , 2019 , 28, 358-367	2.2	14
82	Inter-observer reproducibility of probing to bone in the diagnosis of diabetic foot osteomyelitis. <i>Diabetic Medicine</i> , 2011 , 28, 1238-40	3.5	14
81	Ultrasound-assisted debridement of neuroischaemic diabetic foot ulcers, clinical and microbiological effects: a case series. <i>Journal of Wound Care</i> , 2018 , 27, 278-286	2.2	13
80	Perception of diabetic foot ulcers among general practitioners in four European countries: knowledge, skills and urgency. <i>Journal of Wound Care</i> , 2018 , 27, 310-319	2.2	13

79	The influence of the length of the first metatarsal on the risk of reulceration in the feet of patients with diabetes. <i>International Journal of Lower Extremity Wounds</i> , 2014 , 13, 27-32	1.6	13
78	Super-oxidized solution (Dermacyn Wound Care) as adjuvant treatment in the postoperative management of complicated diabetic foot osteomyelitis: preliminary experience in a specialized department. <i>International Journal of Lower Extremity Wounds</i> , 2013 , 12, 130-7	1.6	13
77	Impact of perioperative glycaemia and glycated haemoglobin on the outcomes of the surgical treatment of diabetic foot osteomyelitis. <i>Diabetes Research and Clinical Practice</i> , 2011 , 94, e83-5	7.4	13
76	Clinical significance of the isolation of Staphylococcus epidermidis from bone biopsy in diabetic foot osteomyelitis. <i>Diabetic Foot & Ankle</i> , 2010 , 1,	6.5	13
75	Identifying and treating foot ulcers in patients with diabetes: saving feet, legs and lives. <i>Journal of Wound Care</i> , 2018 , 27, S1-S52	2.2	12
74	Controversies regarding radiological changes and variables predicting amputation in a surgical series of diabetic foot osteomyelitis. <i>Foot and Ankle Surgery</i> , 2012 , 18, 233-6	3.1	12
73	Influence of the location of nonischemic diabetic forefoot osteomyelitis on time to healing after undergoing surgery. <i>International Journal of Lower Extremity Wounds</i> , 2013 , 12, 184-8	1.6	12
72	What Is the Clinical Utility of the Ankle-Brachial Index in Patients With Diabetic Foot Ulcers and Radiographic Arterial Calcification?. <i>International Journal of Lower Extremity Wounds</i> , 2015 , 14, 372-6	1.6	11
71	Interobserver reliability of the ankle-brachial index, toe-brachial index and distal pulse palpation in patients with diabetes. <i>Diabetes and Vascular Disease Research</i> , 2018 , 15, 344-347	3.3	11
70	Diabetic foot units in Spain: knowing the facts using a questionnaire. <i>Endocrinología Y Nutrición: Organo De La Sociedad Espanola De Endocrinología Y Nutrición</i> , 2014 , 61, 79-86		11
69	Factors associated with calcification in the pedal arteries in patients with diabetes and neuropathy admitted for foot disease and its clinical significance. <i>International Journal of Lower Extremity Wounds</i> , 2013 , 12, 252-5	1.6	11
68	Prevalence, Clinical Aspects and Outcomes in a Large Cohort of Persons with Diabetic Foot Disease: Comparison between Neuropathic and Ischemic Ulcers. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	10
67	Clinical and Antimicrobial Efficacy of a Silver Foam Dressing With Silicone Adhesive in Diabetic Foot Ulcers With Mild Infection. <i>International Journal of Lower Extremity Wounds</i> , 2019 , 18, 269-278	1.6	10
66	Complications associated with the approach to metatarsal head resection in diabetic foot osteomyelitis. <i>International Wound Journal</i> , 2019 , 16, 467-472	2.6	10
65	Diabetic foot units in Spain: Knowing the facts using a questionnaire. <i>Endocrinología Y Nutrición (English Edition)</i> , 2014 , 61, 79-86		9
64	Morphofunctional characteristics of the foot in patients with diabetes mellitus and diabetic neuropathy. <i>Diabetes and Metabolic Syndrome: Clinical Research and Reviews</i> , 2013 , 7, 78-82	8.9	9
63	Statistical reliability of bone biopsy for the diagnosis of diabetic foot osteomyelitis. <i>Journal of Foot and Ankle Surgery</i> , 2013 , 52, 692	1.6	9
62	Albuminuria is a predictive factor of in-hospital mortality in patients with diabetes admitted for foot disease. <i>Diabetes Research and Clinical Practice</i> , 2014 , 104, e23-5	7.4	9

61	Revision surgery for diabetic foot infections: giving another chance to the patient. <i>International Journal of Lower Extremity Wounds</i> , 2013 , 12, 146-51	1.6	9
60	Adipose-Derived Mesenchymal Stem Cells in the Treatment of Diabetic Foot Ulcers: A Review of Preclinical and Clinical Studies. <i>Angiology</i> , 2020 , 71, 853-863	2.1	9
59	Increased transcutaneous oxygen tension in the skin dorsum over the foot in patients with diabetic foot disease in response to the topical use of an emulsion of hyperoxygenated Fatty acids. <i>International Journal of Lower Extremity Wounds</i> , 2009 , 8, 187-93	1.6	8
58	Correlation between Empirical Antibiotic Therapy and Bone Culture Results in Patients with Osteomyelitis. <i>Advances in Skin and Wound Care</i> , 2019 , 32, 41-44	1.5	8
57	Advances in Dermoepidermal Skin Substitutes for Diabetic Foot Ulcers. <i>Current Vascular Pharmacology</i> , 2020 , 18, 182-192	3.3	7
56	Advantages of early diagnosis of diabetic neuropathy in the prevention of diabetic foot ulcers. <i>Diabetes Research and Clinical Practice</i> , 2018 , 146, 148-154	7.4	7
55	Forefoot ulcer risk is associated with foot type in patients with diabetes and neuropathy. <i>Diabetes Research and Clinical Practice</i> , 2016 , 114, 93-8	7.4	7
54	Does the location of the ulcer affect the interpretation of the probe-to-bone test in the diagnosis of osteomyelitis in diabetic foot ulcers?. <i>Diabetic Medicine</i> , 2014 , 31, 112-3	3.5	7
53	Charcot neuroarthropathy triggered and complicated by osteomyelitis. How limb salvage can be achieved. <i>Diabetic Medicine</i> , 2013 , 30, e229-32	3.5	7
52	Validation of an algorithm to predict reulceration in amputation patients with diabetes. <i>International Wound Journal</i> , 2017 , 14, 523-528	2.6	7
51	Diagnostic and therapeutic update on diabetic foot osteomyelitis. <i>Endocrinología y Diabetes Y Nutrición (English Ed)</i> , 2017 , 64, 100-108	0.1	6
50	Early Foot Structural Changes After Lateral Column Exostectomy in Patients With Charcot Foot. <i>International Journal of Lower Extremity Wounds</i> , 2019 , 18, 129-134	1.6	6
49	Additional information on the role of histopathology in diagnosing diabetic foot osteomyelitis. <i>Diabetic Medicine</i> , 2014 , 31, 113-6	3.5	6
48	Mortality in Patients with Diabetic Foot Ulcers: Causes, Risk Factors, and Their Association with Evolution and Severity of Ulcer. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	6
47	The Influence of Multidrug-Resistant Bacteria on Clinical Outcomes of Diabetic Foot Ulcers: A Systematic Review. <i>Journal of Clinical Medicine</i> , 2021 , 10,	5.1	6
46	Topical treatment for plantar warts: A systematic review. <i>Dermatologic Therapy</i> , 2021 , 34, e14621	2.2	6
45	To Smoke or Not To Smoke: Cigarettes Have a Negative Effect on Wound Healing of Diabetic Foot Ulcers. <i>International Journal of Lower Extremity Wounds</i> , 2018 , 17, 258-260	1.6	6
44	Preliminary experience of an expert panel using Triangle Wound Assessment for the evaluation of chronic wounds. <i>Journal of Wound Care</i> , 2018 , 27, 790-796	2.2	6

43	Hard-to-heal diabetic foot ulcers treated using negatively charged polystyrene microspheres: a prospective case series. <i>Journal of Wound Care</i> , 2019 , 28, 104-109	2.2	5
42	Importance of Footwear Outsole Rigidity in Improving Spatiotemporal Parameters in Patients with Diabetes and Previous Forefoot Ulcerations. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	5
41	Never amputate a patient with diabetes without consulting with a specialized unit. <i>International Journal of Lower Extremity Wounds</i> , 2011 , 10, 214-7	1.6	5
40	Fast-track pathway for diabetic foot ulceration during COVID-19 crisis: A document from International Diabetic Foot Care Group and D-Foot International. <i>Diabetes/Metabolism Research and Reviews</i> , 2021 , 37, e3396	7.5	5
39	Role of inflammatory markers in the healing time of diabetic foot osteomyelitis treated by surgery or antibiotics. <i>Journal of Wound Care</i> , 2020 , 29, 5-10	2.2	4
38	Relationship of limited joint mobility and foot deformities with neurological examination in patients with diabetes. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2013 , 121, 239-43	2.3	4
37	Utility of Blood Parameters to Detect Complications during Long-Term Follow-Up in Patients with Diabetic Foot Osteomyelitis. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	4
36	Cellular Proliferation, Dermal Repair, and Microbiological Effectiveness of Ultrasound-Assisted Wound Debridement (UAW) Versus Standard Wound Treatment in Complicated Diabetic Foot Ulcers (DFU): An Open-Label Randomized Controlled Trial. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	4
35	Diabetic foot off loading and ulcer remission: Exploring surgical off-loading. <i>Journal of the Royal College of Surgeons of Edinburgh</i> , 2021 , 19, e526-e535	2.5	4
34	Digital Deformity Assessment Prior to Percutaneous Flexor Tenotomy for Managing Diabetic Foot Ulcers on the Toes. <i>Journal of Foot and Ankle Surgery</i> , 2019 , 58, 453-457	1.6	3
33	Referral of patients with diabetic foot ulcers in four European countries: patient follow-up after first GP visit. <i>Journal of Wound Care</i> , 2019 , 28, S4-S14	2.2	3
32	Increasing Transcutaneous Oxygen Pressure in Patients With Neuroischemic Diabetic Foot Ulcers Treated With a Sucrose Octasulfate Dressing: A Pilot Study. <i>International Journal of Lower Extremity Wounds</i> , 2020 , 1534734620952244	1.6	3
31	Medical Versus Surgical Treatment for the Management of Diabetic Foot Osteomyelitis: A Systematic Review. <i>Journal of Clinical Medicine</i> , 2021 , 10,	5.1	3
30	Effectiveness of fast-track pathway for diabetic foot ulcerations. <i>Acta Diabetologica</i> , 2021 , 58, 1351-1358.9	5.9	3
29	A comparison of hyperspectral imaging with routine vascular noninvasive techniques to assess the healing prognosis in patients with diabetic foot ulcers. <i>Journal of Vascular Surgery</i> , 2021 ,	3.5	3
28	Conservative surgery for chronic diabetic foot osteomyelitis: Procedures and recommendations. <i>Journal of Clinical Orthopaedics and Trauma</i> , 2021 , 16, 86-98	2.1	3
27	Evolution of the TcPO values following hyperoxygenated fatty acids emulsion application in patients with diabetic foot disease: results of a clinical trial. <i>Journal of Wound Care</i> , 2021 , 30, 74-79	2.2	3
26	Analysis of recurrent ulcerations at a multidisciplinary diabetic Foot unit after implementation of a comprehensive Foot care program. <i>Endocrinología, Diabetes Y Nutrición</i> , 2018 , 65, 438.e1-438.e10	1.3	3

25	Metatarsal Head Resections in Diabetic Foot Patients: A Systematic Review. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	2
24	Multifunctional and patient-focused Mepilex Border Flex: an exploration of its holistic clinical benefits. <i>Journal of Wound Care</i> , 2019 , 28, S1-S31	2.2	2
23	Comments on the use of bemiparin in diabetic foot ulcers. <i>Diabetic Medicine</i> , 2009 , 26, 110	3.5	2
22	Diagnostic Accuracy of Bone Culture Versus Biopsy in Diabetic Foot Osteomyelitis. <i>Advances in Skin and Wound Care</i> , 2021 , 34, 204-208	1.5	2
21	Cortical disruption is the most reliable and accurate plain radiographic sign in the diagnosis of diabetic foot osteomyelitis. <i>Diabetic Medicine</i> , 2019 , 36, 258-259	3.5	2
20	Analysis of recurrent ulcerations at a multidisciplinary diabetic Foot unit after implementation of a comprehensive Foot care program. <i>Endocrinología y Nutrición (English Ed)</i> , 2018 , 65, 438.e1-438.e10	0.1	2
19	How should clinical wound care and management translate to effective engineering standard testing requirements from foam dressings? Mapping the existing gaps and needs.. <i>Advances in Wound Care</i> , 2022 ,	4.8	2
18	Differences in the Sub-Metatarsal Fat Pad Atrophy Symptoms between Patients with Metatarsal Head Resection and Those without Metatarsal Head Resection: A Cross-Sectional Study. <i>Journal of Clinical Medicine</i> , 2020 , 9,	5.1	1
17	Limb salvage for spreading midfoot osteomyelitis following diabetic foot surgery. <i>Journal of Tissue Viability</i> , 2012 , 21, 64-70	3.2	1
16	Comment on: Lipsky et al. Developing and validating a risk score for lower-extremity amputation in patients hospitalized for a diabetic foot infection. <i>Diabetes Care</i> 2011;34:1695-1700. <i>Diabetes Care</i> , 2011 , 34, e160; author reply e161	14.6	1
15	Evaluation of Adherence to the Oral Antibiotic Treatment in Patients With Diabetic Foot Infection. <i>International Journal of Lower Extremity Wounds</i> , 2021 , 15347346211057342	1.6	1
14	Punch Grafting for the Management of Hard-to-Heal Diabetic Foot Ulcers: A Prospective Case Series. <i>International Journal of Lower Extremity Wounds</i> , 2021 , 15347346211031085	1.6	1
13	Surgical intervention and customised dressings in an extremity wound caused by necrotising fasciitis: a case study. <i>Journal of Wound Care</i> , 2019 , 28, S21-S27	2.2	0
12	Characteristics of new patient referrals to specialised diabetic foot units across Europe and factors influencing delays. <i>Journal of Wound Care</i> , 2021 , 30, 804-808	2.2	0
11	Predictive values of foot plantar pressure assessment in patients with midfoot deformity secondary to Charcot neuroarthropathy. <i>Diabetes Research and Clinical Practice</i> , 2021 , 175, 108795	7.4	0
10	Efficacy of cryotherapy for plantar warts: A systematic review and meta-analysis.. <i>Dermatologic Therapy</i> , 2022 , e15480	2.2	0
9	Respond to the letter on Tnterobserver reliability of the ankle brachial index, toe-brachial index and distal pulse palpation in patients with diabetes: a methodological issueT <i>Diabetes and Vascular Disease Research</i> , 2018 , 15, 578-579	3.3	
8	Response to comment on Lazaro-Martinez et al. Antibiotics versus conservative surgery for treating diabetic foot osteomyelitis: a randomized comparative trial. <i>Diabetes care</i> 2014;37:789-795. <i>Diabetes Care</i> , 2014 , 37, e116-7	14.6	

- 7 Consensus document on actions to prevent and to improve the management of diabetic foot in Spain. *Endocrinología Diabetes Y Nutrición (English Ed)*, **2021**, 68, 509-513 0.1
