#	ARTICLE	IF	CITATIONS
1	Estimation of the Percentage of US Patients With Cancer Who Are Eligible for and Respond to Checkpoint Inhibitor Immunotherapy Drugs. JAMA Network Open, 2019, 2, e192535.	2.8	842
2	Evidence-based de-implementation for contradicted, unproven, and aspiring healthcare practices. Implementation Science, 2014, 9, 1.	2.5	486
3	Research and Development Spending to Bring a Single Cancer Drug to Market and Revenues After Approval. JAMA Internal Medicine, 2017, 177, 1569.	2.6	333
4	A Decade of Reversal: An Analysis of 146 Contradicted Medical Practices. Mayo Clinic Proceedings, 2013, 88, 790-798.	1.4	300
5	The high price of anticancer drugs: origins, implications, barriers, solutions. Nature Reviews Clinical Oncology, 2017, 14, 381-390.	12.5	289
6	The Strength of Association Between Surrogate End Points and Survival in Oncology. JAMA Internal Medicine, 2015, 175, 1389.	2.6	287
7	Cancer Drugs Approved on the Basis of a Surrogate End Point and Subsequent Overall Survival. JAMA Internal Medicine, 2015, 175, 1992.	2.6	287
8	Estimation of the Percentage of US Patients With Cancer Who Benefit From Genome-Driven Oncology. JAMA Oncology, 2018, 4, 1093.	3.4	274
9	Five Years of Cancer Drug Approvals. JAMA Oncology, 2015, 1, 539.	3.4	271
10	Perspective: The precision-oncology illusion. Nature, 2016, 537, S63-S63.	13.7	236
11	Prespecified Falsification End Points. JAMA - Journal of the American Medical Association, 2013, 309, 241.	3.8	204
12	Precision oncology: origins, optimism, and potential. Lancet Oncology, The, 2016, 17, e81-e86.	5.1	190
13	Tisagenlecleucel "the first approved CAR-T-cell therapy: implications for payers and policy makers. Nature Reviews Clinical Oncology, 2018, 15, 11-12.	12.5	177
14	Reversals of Established Medical Practices. JAMA - Journal of the American Medical Association, 2012, 307, 37.	3.8	171
15	Surrogate endpoints in oncology: when are they acceptable for regulatory and clinical decisions, and are they currently overused?. BMC Medicine, 2017, 15, 134.	2.3	169
16	Estimation of the Percentage of US Patients With Cancer Who Are Eligible for Immune Checkpoint Inhibitor Drugs. JAMA Network Open, 2020, 3, e200423.	2.8	148
17	A systematic review of trial-level meta-analyses measuring the strength of association between surrogate end-points and overall survival in oncology. European Journal of Cancer, 2019, 106, 196-211.	1.3	127
18	The Frequency of Medical Reversal. Archives of Internal Medicine, 2011, 171, 1675.	4.3	114

#	ARTICLE	IF	CITATIONS
19	Cancer Drugs Approved Based on Biomarkers and Not Tumor Type—FDA Approval of Pembrolizumab for Mismatch Repair-Deficient Solid Cancers. <i>JAMA Oncology</i> , 2018, 4, 157.	3.4	114
20	An Overview of Cancer Drugs Approved by the US Food and Drug Administration Based on the Surrogate End Point of Response Rate. <i>JAMA Internal Medicine</i> , 2019, 179, 915.	2.6	107
21	Examining the Use of Real-World Evidence in the Regulatory Process. <i>Clinical Pharmacology and Therapeutics</i> , 2020, 107, 843-852.	2.3	99
22	Why cancer screening has never been shown to “save lives” and what we can do about it. <i>BMJ</i> , The, 2016, 352, h6080.	3.0	98
23	Evolution of the Randomized Clinical Trial in the Era of Precision Oncology. <i>JAMA Oncology</i> , 2021, 7, 728.	3.4	94
24	Total Costs of Chimeric Antigen Receptor T Cell Immunotherapy. <i>JAMA Oncology</i> , 2018, 4, 994.	3.4	93
25	Strength of Validation for Surrogate End Points Used in the US Food and Drug Administration's Approval of Oncology Drugs. <i>Mayo Clinic Proceedings</i> , 2016, 91, 713-725.	1.4	91
26	Nivolumab and pembrolizumab: Monoclonal antibodies against programmed cell death-1 (PD-1) that are interchangeable. <i>Seminars in Oncology</i> , 2017, 44, 132-135.	0.8	90
27	Estimation of Study Time Reduction Using Surrogate End Points Rather Than Overall Survival in Oncology Clinical Trials. <i>JAMA Internal Medicine</i> , 2019, 179, 642.	2.6	76
28	Colorectal Cancer Survival Gains and Novel Treatment Regimens. <i>JAMA Oncology</i> , 2015, 1, 787.	3.4	75
29	Analysis of Control Arm Quality in Randomized Clinical Trials Leading to Anticancer Drug Approval by the US Food and Drug Administration. <i>JAMA Oncology</i> , 2019, 5, 887.	3.4	73
30	A comprehensive review of randomized clinical trials in three medical journals reveals 396 medical reversals. <i>ELife</i> , 2019, 8, .	2.8	71
31	Observational studies often make clinical practice recommendations: an empirical evaluation of authors' attitudes. <i>Journal of Clinical Epidemiology</i> , 2013, 66, 361-366.e4.	2.4	64
32	FDA Acceptance of Surrogate End Points for Cancer Drug Approval: 1992-2019. <i>JAMA Internal Medicine</i> , 2020, 180, 912.	2.6	61
33	Oral Anticancer Drugs: How Limited Dosing Options and Dose Reductions May Affect Outcomes in Comparative Trials and Efficacy in Patients. <i>Journal of Clinical Oncology</i> , 2014, 32, 1620-1629.	0.8	60
34	The Use of Superlatives in Cancer Research. <i>JAMA Oncology</i> , 2016, 2, 139.	3.4	57
35	Limitations in Clinical Trials Leading to Anticancer Drug Approvals by the US Food and Drug Administration. <i>JAMA Internal Medicine</i> , 2020, 180, 1108.	2.6	57
36	Mortality and Treatment Patterns Among Patients Hospitalized With Acute Cardiovascular Conditions During Dates of National Cardiology Meetings. <i>JAMA Internal Medicine</i> , 2015, 175, 237.	2.6	56

#	ARTICLE	IF	CITATIONS
37	Anticancer Drugs Approved by the US Food and Drug Administration From 2009 to 2020 According to Their Mechanism of Action. <i>JAMA Network Open</i> , 2021, 4, e2138793.	2.8	54
38	Direct-to-Consumer Genetic Testing. <i>JAMA - Journal of the American Medical Association</i> , 2018, 319, 2377.	3.8	52
39	The Accelerated Approval of Oncologic Drugs. <i>JAMA - Journal of the American Medical Association</i> , 2014, 311, 353.	3.8	51
40	Do cancer drugs improve survival or quality of life?. <i>BMJ: British Medical Journal</i> , 2017, 359, j4528.	2.4	51
41	Patient Experience Captured by Quality-of-Life Measurement in Oncology Clinical Trials. <i>JAMA Network Open</i> , 2020, 3, e200363.	2.8	49
42	The Inferior Vena Cava Filter. <i>JAMA Internal Medicine</i> , 2013, 173, 493.	2.6	46
43	Authorship Inflation in Medical Publications. <i>Inquiry (United States)</i> , 2015, 52, 004695801559831.	0.5	46
44	Chest Pain in the Emergency Department. <i>Archives of Internal Medicine</i> , 2012, 172, 1506.	4.3	44
45	Financial Conflicts of Interest Among Hematologist-Oncologists on Twitter. <i>JAMA Internal Medicine</i> , 2017, 177, 425.	2.6	44
46	Media Coverage of Medical Journals: Do the Best Articles Make the News?. <i>PLoS ONE</i> , 2014, 9, e85355.	1.1	44
47	Real-world Evidence—What Does It Really Mean?. <i>JAMA Oncology</i> , 2019, 5, 781.	3.4	43
48	Distinctive clinical characteristics of malignant mesothelioma in young patients. <i>Oncotarget</i> , 2015, 6, 16766-16773.	0.8	42
49	Comparative Effectiveness Questions in Oncology. <i>New England Journal of Medicine</i> , 2014, 370, 1478-1481.	13.9	39
50	The Withdrawal of Drugs for Commercial Reasons. <i>JAMA Internal Medicine</i> , 2014, 174, 1887.	2.6	36
51	The Diagnosis and Treatment of Pulmonary Embolism. <i>Archives of Internal Medicine</i> , 2012, 172, 955-8.	4.3	35
52	Hard-Wired Bias. <i>Mayo Clinic Proceedings</i> , 2015, 90, 1171-1175.	1.4	35
53	Characteristics of Exceptional or Super Responders to Cancer Drugs. <i>Mayo Clinic Proceedings</i> , 2015, 90, 1639-1649.	1.4	34
54	US News and World Report Cancer Hospital Rankings: Do They Reflect Measures of Research Productivity?. <i>PLoS ONE</i> , 2014, 9, e107803.	1.1	33

#	ARTICLE	IF	CITATIONS
55	The misguided ethics of crossover trials. <i>Contemporary Clinical Trials</i> , 2014, 37, 167-169.	0.8	33
56	Does the Declining Lethality of Gunshot Injuries Mask a Rising Epidemic of Gun Violence in the United States?. <i>Journal of General Internal Medicine</i> , 2014, 29, 1065-1069.	1.3	32
57	Blood-Based Screening for Colon Cancer. <i>JAMA - Journal of the American Medical Association</i> , 2016, 315, 2519.	3.8	31
58	Assessing the Eventual Publication of Clinical Trial Abstracts Submitted to a Large Annual Oncology Meeting. <i>Oncologist</i> , 2016, 21, 261-268.	1.9	30
59	Nusinersen for Spinal Muscular Atrophy. <i>JAMA Pediatrics</i> , 2018, 172, 123.	3.3	30
60	Characteristics and Conflicts of Public Speakers at Meetings of the Oncologic Drugs Advisory Committee to the US Food and Drug Administration. <i>JAMA Internal Medicine</i> , 2016, 176, 389.	2.6	29
61	Improving observational studies in the era of big data. <i>Lancet, The</i> , 2018, 392, 716-717.	6.3	29
62	A reality check of the accelerated approval of immune-checkpoint inhibitors. <i>Nature Reviews Clinical Oncology</i> , 2019, 16, 656-658.	12.5	29
63	Overall Survival in Cancer Drug Trials as a New Surrogate End Point for Overall Survival in the Real World. <i>JAMA Oncology</i> , 2017, 3, 889.	3.4	28
64	Frequency and level of evidence used in recommendations by the National Comprehensive Cancer Network guidelines beyond approvals of the US Food and Drug Administration: retrospective observational study. <i>BMJ: British Medical Journal</i> , 2018, 360, k668.	2.4	28
65	Most medical practices are not parachutes: a citation analysis of practices felt by biomedical authors to be analogous to parachutes. <i>CMAJ Open</i> , 2018, 6, E31-E38.	1.1	27
66	Potential Cost Implications for All US Food and Drug Administration Oncology Drug Approvals in 2018. <i>JAMA Internal Medicine</i> , 2021, 181, 162.	2.6	27
67	Industry Funding of Cancer Patient Advocacy Organizations. <i>Mayo Clinic Proceedings</i> , 2016, 91, 1668-1670.	1.4	26
68	Implications of Proposed Medicare Reforms to Counteract High Cancer Drug Prices. <i>JAMA - Journal of the American Medical Association</i> , 2016, 316, 271.	3.8	26
69	Cancer Drug Approvals That Displaced Existing Standard-of-Care Therapies, 2016-2021. <i>JAMA Network Open</i> , 2022, 5, e222265.	2.8	26
70	Drugs that lack single-agent activity: are they worth pursuing in combination?. <i>Nature Reviews Clinical Oncology</i> , 2017, 14, 193-194.	12.5	25
71	The approval and withdrawal of melphalan flufenamide (melflufen): Implications for the state of the FDA.. <i>Translational Oncology</i> , 2022, 18, 101374.	1.7	25
72	Considering benefit and risk before routinely recommending SpaceOAR. <i>Lancet Oncology, The</i> , 2021, 22, 11-13.	5.1	23

#	ARTICLE	IF	CITATIONS
73	Drug repurposing for cancer treatments: a well-intentioned, but misguided strategy. <i>Lancet Oncology, The</i> , 2020, 21, 1134-1136.	5.1	22
74	The Effect of Hospital Visitor Policies on Patients, Their Visitors, and Health Care Providers During the COVID-19 Pandemic: A Systematic Review. <i>American Journal of Medicine</i> , 2022, 135, 1158-1167.e3.	0.6	22
75	The UK Cancer Drugs Fund Experiment and the US Cancer Drug Cost Problem. <i>Mayo Clinic Proceedings</i> , 2016, 91, 707-712.	1.4	21
76	The Rising Price of Cancer Drugs—A New Old Problem?. <i>JAMA Oncology</i> , 2017, 3, 277.	3.4	21
77	Reclaiming the morbidity and mortality conference: between Codman and Kundera. <i>Medical Humanities</i> , 2010, 36, 108-111.	0.6	20
78	A medical burden of proof: Towards a new ethic. <i>BioSocieties</i> , 2012, 7, 72-87.	0.8	20
79	Future jobs of FDA’s haematology-oncology reviewers. <i>BMJ, The</i> , 2016, 354, i5055.	3.0	20
80	Conflicts of interest in Twitter. <i>Lancet Haematology,the</i> , 2017, 4, e408-e409.	2.2	20
81	Characteristics of Cost-effectiveness Studies for Oncology Drugs Approved in the United States From 2015-2020. <i>JAMA Network Open</i> , 2021, 4, e2135123.	2.8	20
82	Non-inferiority trials: why oncologists must remain wary. <i>Lancet Oncology, The</i> , 2015, 16, 364-366.	5.1	19
83	Effect of the American Society of Clinical Oncology’s Conflict of Interest Policy on Information Overload. <i>JAMA Oncology</i> , 2016, 2, 1653.	3.4	19
84	A pooled analysis of published, basket trials in cancer medicine. <i>European Journal of Cancer</i> , 2018, 101, 244-250.	1.3	19
85	The role of censoring on progression free survival: Oncologist discretion advised. <i>European Journal of Cancer</i> , 2015, 51, 2269-2271.	1.3	18
86	Me-too drugs with limited benefits — the tale of regorafenib for HCC. <i>Nature Reviews Clinical Oncology</i> , 2017, 14, 653-654.	12.5	17
87	Low-value approvals and high prices might incentivize ineffective drug development. <i>Nature Reviews Clinical Oncology</i> , 2018, 15, 399-400.	12.5	17
88	Are Observational, Real-World Studies Suitable to Make Cancer Treatment Recommendations?. <i>JAMA Network Open</i> , 2020, 3, e2012119.	2.8	17
89	Comparison of Drugs Used for Adjuvant and Metastatic Therapy of Colon, Breast, and Non–Small Cell Lung Cancers. <i>JAMA Network Open</i> , 2020, 3, e202488.	2.8	17
90	Persistent challenges with treating multiple myeloma early. <i>Blood</i> , 2021, 137, 456-458.	0.6	17
