#	ARTICLE	IF	CITATIONS
1	Effect of Ion-Plasma Nitriding on Phase Composition and Tensile Properties of AISI 321-Type Stainless Steel Produced by Wire-Feed Electron-Beam Additive Manufacturing. <i>Metals</i> , 2022, 12, 176.	1.0	5
2	Hydrogen embrittlement of the additively manufactured Nb-free and Nb-alloyed austenitic steels. <i>AIP Conference Proceedings</i> , 2022, . .	0.3	0
3	Microstructure and mechanical properties of Nb-alloyed austenitic CrNi steel fabricated by wire-feed electron beam additive manufacturing. <i>Materials Characterization</i> , 2022, 190, 112063.	1.9	9
4	A comparative study of a solid solution hardening in carbon-alloyed FeMnCrNiCo _{0.95} C _{0.05} high-entropy alloy subjected to different thermalâ€œmechanical treatments. <i>Materials Letters</i> , 2021, 285, 129073.	1.3	16
5	Influence of hydrogen saturation on the structure and mechanical properties of Fe-17Cr-13Ni-3Mo-0.01C austenitic steel during rolling at different temperatures. <i>Metal Working and Material Science</i> , 2021, 23, 81-97.	0.0	0
6	The microstructure, phase composition and tensile properties of austenitic stainless steel in a wire-feed electron beam melting combined with ultrasonic vibration. <i>Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing</i> , 2021, 820, 141519.	2.6	19
7	Electron-beam additive manufacturing of high-nitrogen steel: Microstructure and tensile properties. <i>Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing</i> , 2021, 826, 141951.	2.6	13
8	Stable high-nickel austenitic steel produced by electron beam additive manufacturing using dual wire-feed system. <i>Materials Letters</i> , 2021, 305, 130863.	1.3	7
9	CHARACTERISTICS OF A GRADIENT MATERIAL BASED ON NI-CR STAINLESS STEEL AND H20N80 ALLOY PRODUCED BY ELECTRON-BEAM 3D-PRINTING. <i>Vektor Nauki Tol Yattinskogo Gosudarstvennogo Universiteta</i> , 2021, , 57-66.	0.1	0
10	The Effect of Phase Transformations During Electrom-Beam 3D-Printing and Post-Built Heat Treatment on Plastic Deformation and Fracture of Additively Manufactured High Nitrogen Crâ€œMn Steel. <i>Russian Physics Journal</i> , 2021, 64, 1183-1190.	0.2	2
11	Influence of thermal and thermal-mechanical treatments on microstructure and mechanical properties of the multicomponent alloy FeCrMnNiCo _{0.85} C _{0.15} . <i>Letters on Materials</i> , 2021, 11, 375-381.	0.2	1
12	Microstructure and mechanical properties of low-carbon steel fabricated by electron-beam additive manufacturing. <i>Letters on Materials</i> , 2021, 11, 427-432.	0.2	3
13	Stabilization of austenitic structure in transition zone of â€œaustenitic stainless steel/NiCr alloyâ€œjoint fabricated by wire-feed electron beam melting. <i>Materials Letters</i> , 2020, 277, 128321.	1.3	14
14	The Effect of Thermo-Mechanical Processing Regime on High-Temperature Tensile Properties of V-Alloyed High-Nitrogen Steel. <i>Solid State Phenomena</i> , 2020, 306, 53-61.	0.3	1
15	The Influence of Phase Composition and Phase Distribution on Crack Formation and Fracture Mechanisms of Crâ€œNi Steels Produced by the Method of 3D Electron-Beam Printing. <i>Russian Physics Journal</i> , 2020, 63, 917-925.	0.2	2
16	Microstructure and grain growth inhomogeneity in austenitic steel produced by wire-feed electron beam melting: the effect of post-building solid-solution treatment. <i>Journal of Materials Science</i> , 2020, 55, 9211-9224.	1.7	41
17	On Temperature Dependence of Microstructure, Deformation Mechanisms and Tensile Properties in Austenitic Cr-Mn Steel with Ultrahigh Interstitial Content C + N = 1.9 Mass.%. <i>Metals</i> , 2020, 10, 786.	1.0	2
18	On the Superplastic Deformation in Vanadium-Alloyed High-Nitrogen Steel. <i>Metals</i> , 2020, 10, 27.	1.0	3

#	ARTICLE	IF	CITATIONS
19	Gradient transition zone structure in “steel” copper sample produced by double wire-feed electron beam additive manufacturing. Journal of Materials Science, 2020, 55, 9258-9272.	1.7	62
20	THE EFFECT OF NIOBIUM ON MICROSTRUCTURE AND MECHANICAL PROPERTIES OF AUSTENITIC CrNi STEEL PRODUCED BY WIRE-FEED ELECTRON BEAM ADDITIVE MANUFACTURING. Nanoscience and Technology, 2020, 11, 109-118.	0.6	4
21	Microstructure and phase composition of high-nitrogen steel fabricated by electron beam additive manufacturing. AIP Conference Proceedings, 2020, , .	0.3	1
22	On the influence of strain rate and deformation temperature on the peculiarities of plastic flow in vanadium-alloyed austenitic steel with high interstitial content. AIP Conference Proceedings, 2020, , .	0.3	0
23	Mechanical properties and fracture micromechanisms in 316L stainless steel subjected to ion-plasma treatment with mixture of N, H and Ar gases. AIP Conference Proceedings, 2020, , .	0.3	0
24	The change in solidification mode and phase composition in “321 stainless Steel/NiCr Alloy” joint produced by Wire-feed electron beam melting. AIP Conference Proceedings, 2020, , .	0.3	0
25	The peculiarities of hydrogen embrittlement of Nb-alloyed stainless steel fabricated by electron-beam additive manufacturing. AIP Conference Proceedings, 2020, , .	0.3	0
26	Peculiarities of tensile deformation and fracture of high-nitrogen steel obtained by electron beam additive manufacturing. AIP Conference Proceedings, 2020, , .	0.3	0
27	The influence of ion-plasma treatment on microhardness and tensile yield strength of austenitic stainless steel with different grain size and microstructure. AIP Conference Proceedings, 2020, , .	0.3	0
28	Microstructure/mechanical properties relationship in high-nitrogen steel obtained by electron beam additive manufacturing and conventional casting. AIP Conference Proceedings, 2020, , .	0.3	0
29	Microstructure and phase composition of vanadium-alloyed high-nitrogen steel fabricated by additive manufacturing. AIP Conference Proceedings, 2020, , .	0.3	2
30	The effect of V-alloying on microstructure peculiarities of high-nitrogen austenitic steels subjected to high-pressure torsion. AIP Conference Proceedings, 2020, , .	0.3	0
31	The effect of age-hardening mechanism on hydrogen embrittlement in high-nitrogen steels. International Journal of Hydrogen Energy, 2019, 44, 20529-20544.	3.8	11
32	The strain-rate dependence of the Hall-Petch effect in two austenitic stainless steels with different stacking fault energies. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 2019, 756, 365-372.	2.6	58
33	The effect of ion-plasma treatment on micromechanical characteristics of compositional layers in austenitic stainless steel with different grain sizes. AIP Conference Proceedings, 2019, , .	0.3	0
34	The effect of solid-solution temperature on phase composition and tensile properties of vanadium-alloyed high interstitial steels. AIP Conference Proceedings, 2019, , .	0.3	0
35	A comparative study of the macroscopical and microscopical fracture mechanisms in cast and additively manufactured austenitic stainless steels. AIP Conference Proceedings, 2019, , .	0.3	2
36	Effect of stacking fault energy on Hall-Petch relationship parameters of austenitic stainless steels. AIP Conference Proceedings, 2019, , .	0.3	3

#	ARTICLE	IF	CITATIONS
37	On the influence of post-built heat treatment on strength and ductility of AISI 304 steel produced by electron-beam additive technology. AIP Conference Proceedings, 2019, , .	0.3	1
38	A variation of phase composition and microhardness of high nitrogen austenitic steel subjected to high-pressure torsion to different strain values. AIP Conference Proceedings, 2019, , .	0.3	1
39	Microstructural inhomogeneity of phase composition and grain structure in electron beam wire-feed additive manufactured AISI 304 stainless steel. AIP Conference Proceedings, 2019, , .	0.3	4
40	Low-temperature tensile ductility by V-alloying of high-nitrogen CrMn and CrNiMn steels: Characterization of deformation microstructure and fracture micromechanisms. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 2019, 745, 265-278.	2.6	20
41	The influence of prior deformation on phase composition and strength properties of austenitic stainless steel in ion-plasma treatment. Letters on Materials, 2019, 9, 377-381.	0.2	1
42	Anisotropy of the tensile properties in austenitic stainless steel obtained by wire-feed electron beam additive growth. Letters on Materials, 2019, 9, 460-464.	0.2	15
43	The Effect of Test Temperature on Deformation Microstructure and Fracture Mechanisms in CrMn High-Nitrogen Steels Alloyed (0-3 wt.%) with Vanadium. Materials Science Forum, 2018, 941, 27-32.	0.3	6
44	The effect of solution treatment regime on temperature dependence of 0.2% offset yield strength in V-alloyed high-nitrogen austenitic steel. AIP Conference Proceedings, 2018, , .	0.3	0
45	Effect of vanadium-alloying on hydrogen embrittlement of austenitic high-nitrogen steels. Procedia Structural Integrity, 2018, 13, 1053-1058.	0.3	3
46	Temperature Dependence of Tensile Deformation and Fracture Micromechanisms in V-Alloyed High-Nitrogen Steel: Effect of Solution-Treatment Temperature. Procedia Structural Integrity, 2018, 13, 1129-1134.	0.3	1
47	Effect of age hardening on phase composition and microhardness of V-free and V-alloyed high-nitrogen austenitic steels. AIP Conference Proceedings, 2018, , .	0.3	0
48	Influence of hydrogen-charging on microstructure and microhardness of high-nitrogen austenitic steel processed by high-pressure torsion. AIP Conference Proceedings, 2018, , .	0.3	1
49	The Influence of Warm abc-Pressing on the Structure and Mechanical Properties of Stable Chromium-Nickel-Molybdenum Steel. Russian Physics Journal, 2018, 61, 1062-1069.	0.2	1
50	Effect of hydrogenation on mechanical properties and tensile fracture mechanism of a high-nitrogen austenitic steel. Journal of Materials Science, 2017, 52, 4224-4233.	1.7	7
51	Strain hardening and fracture behavior during tension of directionally solidified high-nitrogen austenitic steel. AIP Conference Proceedings, 2017, , .	0.3	0
52	Influence of hydrogenation regime on structure, phase composition and mechanical properties of Fe ₁₈ Cr ₉ Ni _{0.5} Ti _{0.08} C steel in cold rolling. AIP Conference Proceedings, 2017, , .	0.3	1
53	Influence of thermomechanical treatments on mechanical properties and fracture mechanism of high-nitrogen austenitic steel. AIP Conference Proceedings, 2017, , .	0.3	0
54	Microhardness homogeneity and microstructure of high-nitrogen austenitic steel processed by high-pressure torsion. AIP Conference Proceedings, 2017, , .	0.3	2

#	ARTICLE	IF	CITATIONS
55	Effect of rolling on phase composition and microhardness of austenitic steels with different stacking-fault energies. AIP Conference Proceedings, 2017, , .	0.3	0
56	Effect of Grain Refinement on the Elemental Composition and Nanohardness of the Surface Layers in AISI 316L Austenitic Steel Subjected to Ion-Plasma Hardening. Defect and Diffusion Forum, 0, 385, 267-272.	0.4	4
