#	ARTICLE	IF	CITATIONS
1	Emotional intelligence in incarcerated sexual offenders with sexual sadism. <i>Journal of Sexual Aggression</i> , 2023, 29, 68-85.	1.0	2
2	Increases in loneliness during medical school are associated with increases in individuals'™ likelihood of mislabeling emotions as negative.. <i>Emotion</i> , 2022, 22, 740-750.	1.8	10
3	Neural processing of moral content reflects moral identity in 10-year-old children. <i>Developmental Science</i> , 2022, 25, e13232.	2.4	5
4	Do psychopathic traits vary with age among women? A cross-sectional investigation. <i>Journal of Forensic Psychiatry and Psychology</i> , 2022, 33, 112-129.	1.0	4
5	Psychopathic traits modulate functional connectivity during pain perception and perspective-taking in female inmates. <i>NeuroImage: Clinical</i> , 2022, 34, 102984.	2.7	1
6	Do the means affect the ends? Radical tactics influence motivation and action tendencies via the perceived legitimacy and efficacy of those actions. <i>European Journal of Social Psychology</i> , 2022, 52, 695-717.	2.4	3
7	Moral conviction and metacognitive ability shape multiple stages of information processing during social decision-making. <i>Cortex</i> , 2022, 151, 162-175.	2.4	2
8	Are empathic processes mechanisms of pregnancy's protective effect on smoking? Identification of a novel target for preventive intervention. <i>Social Science and Medicine</i> , 2022, 305, 115071.	3.8	4
9	Uncovering social-contextual and individual mental health factors associated with violence via computational inference. <i>Patterns</i> , 2021, 2, 100176.	5.9	8
10	The Difference Spotting Task: A new nonverbal measure of cheating behavior. <i>Behavior Research Methods</i> , 2021, 53, 1935-1944.	4.0	4
11	Déficits de l'empathie et psychopathologie. <i>Neuropsychiatrie De L'Enfance Et De L'Adolescence</i> , 2021, 69, 147-152.	0.2	1
12	The social neuroscience of music: Understanding the social brain through human song.. <i>American Psychologist</i> , 2021, 76, 1172-1185.	4.2	14
13	An investigation of children's empathic dispositions and behaviours across seven countries. <i>Infant and Child Development</i> , 2021, 30, e2251.	1.5	2
14	The neurodevelopment of social preferences in early childhood. <i>Current Opinion in Neurobiology</i> , 2021, 68, 23-28.	4.2	15
15	Le développement de l'empathie chez le jeune enfant. <i>Annee Psychologique</i> , 2021, Vol. 121, 239-273.	0.3	2
16	Why Empathy Is Not a Reliable Source of Information in Moral Decision Making. <i>Current Directions in Psychological Science</i> , 2021, 30, 425-430.	5.3	29
17	Reduced endorsement of specific moral foundations in incarcerated adult women with elevated psychopathic traits. <i>Personality and Individual Differences</i> , 2021, 181, 110998.	2.9	0
18	Neural responses to morally laden interactions in female inmates with psychopathy. <i>NeuroImage: Clinical</i> , 2021, 30, 102645.	2.7	10

#	ARTICLE	IF	CITATIONS
19	The emergence of empathy: A developmental neuroscience perspective. <i>Developmental Review</i> , 2021, 62, 100999.	4.7	24
20	Neural computations in children's third-party interventions are modulated by their parents' moral values. <i>Npj Science of Learning</i> , 2021, 6, 38.	2.8	5
21	Conflicting influences of justice motivations on moral judgments. <i>Cognition and Emotion</i> , 2020, 34, 670-683.	2.0	1
22	Medical students' empathy positively predicts charitable donation behavior. <i>Journal of Positive Psychology</i> , 2020, 15, 734-742.	4.0	13
23	Aberrant brain gray matter in murderers. <i>Brain Imaging and Behavior</i> , 2020, 14, 2050-2061.	2.1	16
24	L'émpathie en médecine. <i>Annales Medico-Psychologiques</i> , 2020, 178, 197-206.	0.4	2
25	Psychopathy is associated with fear-specific reductions in neural activity during affective perspective-taking. <i>NeuroImage</i> , 2020, 223, 117342.	4.2	10
26	The Neurobehavioral Mechanisms Underlying Attitudes Toward People With Mental or Physical Illness. <i>Frontiers in Behavioral Neuroscience</i> , 2020, 14, 571225.	2.0	4
27	The Dark Side of Morality – Neural Mechanisms Underpinning Moral Convictions and Support for Violence. <i>AJOB Neuroscience</i> , 2020, 11, 269-284.	1.1	16
28	Me first: Neural representations of fairness during three-party interactions. <i>Neuropsychologia</i> , 2020, 147, 107576.	1.6	3
29	EEG distinguishes heroic narratives in ISIS online video propaganda. <i>Scientific Reports</i> , 2020, 10, 19593.	3.3	4
30	Parsing the components of forgiveness: Psychological and neural mechanisms. <i>Neuroscience and Biobehavioral Reviews</i> , 2020, 112, 437-451.	6.1	23
31	The effect of hunger on children's sharing behavior and fairness preferences. <i>Journal of Experimental Child Psychology</i> , 2020, 192, 104786.	1.4	9
32	Empathy in Medicine: What It Is, and How Much We Really Need It. <i>American Journal of Medicine</i> , 2020, 133, 561-566.	1.5	119
33	The development of social comparisons and sharing behavior across 12 countries. <i>Journal of Experimental Child Psychology</i> , 2020, 192, 104778.	1.4	26
34	A developmental neuroscience perspective on empathy. , 2020, , 485-503.		3
35	Third-party punishment following observed social rejection.. <i>Emotion</i> , 2020, 20, 713-720.	1.8	11
36	The Social Neuroscience of Empathy and Its Implication for Business Ethics. <i>Advances in Neuroethics</i> , 2020, , 167-189.	0.3	1

#	ARTICLE	IF	CITATIONS
37	The relationship between cavum septum pellucidum and psychopathic traits in female offenders. <i>Behavioural Brain Research</i> , 2019, 359, 967-972.	2.2	8
38	Resting-state fMRI dynamic functional network connectivity and associations with psychopathy traits. <i>NeuroImage: Clinical</i> , 2019, 24, 101970.	2.7	33
39	The gradual development of the preference for natural environments. <i>Journal of Environmental Psychology</i> , 2019, 65, 101328.	5.1	36
40	Psychopathy is associated with shifts in the organization of neural networks in a large incarcerated male sample. <i>NeuroImage: Clinical</i> , 2019, 24, 102083.	2.7	12
41	Vegetarian, vegan, activist, radical: Using latent profile analysis to examine different forms of support for animal welfare. <i>Group Processes and Intergroup Relations</i> , 2019, 22, 836-857.	3.9	34
42	Effects of early adversity and social discrimination on empathy for complex mental states: An fMRI investigation. <i>Scientific Reports</i> , 2019, 9, 12959.	3.3	22
43	Moral identity relates to the neural processing of third-party moral behavior. <i>Social Cognitive and Affective Neuroscience</i> , 2019, 14, 435-445.	3.0	13
44	Brain circuits involved in understanding our own and other's internal states in the context of romantic relationships. <i>Social Neuroscience</i> , 2019, 14, 729-738.	1.3	11
45	The development of children's preferences for equality and equity across 13 individualistic and collectivist cultures. <i>Developmental Science</i> , 2019, 22, e12729.	2.4	83
46	Machine learning of brain gray matter differentiates sex in a large forensic sample. <i>Human Brain Mapping</i> , 2019, 40, 1496-1506.	3.6	95
47	Third-Party Sociomoral Evaluations in Children With Autism Spectrum Disorder. <i>Child Development</i> , 2019, 90, e584-e597.	3.0	7
48	Affective and interpersonal psychopathic traits associated with reduced corpus callosum volume among male inmates – RETRACTED. <i>Psychological Medicine</i> , 2019, 49, 1401-1408.	4.5	0
49	That's not fair: Children's neural computations of fairness and their impact on resource allocation behaviors and judgments. <i>Developmental Psychology</i> , 2019, 55, 2299-2310.	1.6	16
50	Aberrant functional network connectivity in psychopathy from a large (N=985) forensic sample. <i>Human Brain Mapping</i> , 2018, 39, 2624-2634.	3.6	51
51	Predictive utility cannot substitute for construct validity. <i>Medical Education</i> , 2018, 52, 457-458.	2.1	6
52	Children's neural processing of moral scenarios provides insight into the formation and reduction of in-group biases. <i>Developmental Science</i> , 2018, 21, e12676.	2.4	8
53	A Developmental Neuroscience Study of Moral Decision Making Regarding Resource Allocation. <i>Child Development</i> , 2018, 89, 1177-1192.	3.0	19
54	Interpersonal harm aversion as a necessary foundation for morality: A developmental neuroscience perspective. <i>Development and Psychopathology</i> , 2018, 30, 153-164.	2.3	61

#	ARTICLE	IF	CITATIONS
55	Loving-kindness language exposure leads to changes in sensitivity to imagined pain. <i>Journal of Positive Psychology</i> , 2018, 13, 429-433.	4.0	8
56	The development of cognitive empathy and concern in preschool children: A behavioral neuroscience investigation. <i>Developmental Science</i> , 2018, 21, e12570.	2.4	81
57	A multilevel social neuroscience perspective on radicalization and terrorism. <i>Social Neuroscience</i> , 2018, 13, 511-529.	1.3	43
58	Lateral orbitofrontal cortex activity is modulated by group membership in situations of justified and unjustified violence. <i>Social Neuroscience</i> , 2018, 13, 739-755.	1.3	12
59	Domain-general neural computations underlying prosociality during infancy and early childhood. <i>Current Opinion in Psychology</i> , 2018, 20, 66-71.	4.9	11
60	The neuroscience of morality and social decision-making. <i>Psychology, Crime and Law</i> , 2018, 24, 279-295.	1.0	64
61	Functional connectivity during affective mentalizing in criminal offenders with psychotic disorders: Associations with clinical symptoms. <i>Psychiatry Research - Neuroimaging</i> , 2018, 271, 91-99.	1.8	8
62	The impact of implicitly and explicitly primed ingroup/outgroup categorization on the evaluation of others pain: The case of the Jewish/Arab conflict. <i>Motivation and Emotion</i> , 2018, 42, 438-445.	1.3	6
63	Abnormal cortical gyrification in criminal psychopathy. <i>NeuroImage: Clinical</i> , 2018, 19, 876-882.	2.7	14
64	Age of gray matters: Neuroprediction of recidivism. <i>NeuroImage: Clinical</i> , 2018, 19, 813-823.	2.7	32
65	Moral Progress Requires a Coupling Between Empathy and Reason – A Social Neuroscience Perspective. <i>Exploring Complexity</i> , 2018, , 187-209.	0.1	1
66	The development of generosity and moral cognition across five cultures. <i>Developmental Science</i> , 2017, 20, e12403.	2.4	93
67	Differentiating emotional processing and attention in psychopathy with functional neuroimaging. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2017, 17, 491-515.	2.0	41
68	Impulsive-antisocial psychopathic traits linked to increased volume and functional connectivity within prefrontal cortex. <i>Social Cognitive and Affective Neuroscience</i> , 2017, 12, 1169-1178.	3.0	48
69	Empathy and moral emotions in post-apartheid South Africa: an fMRI investigation. <i>Social Cognitive and Affective Neuroscience</i> , 2017, 12, 881-892.	3.0	36
70	Brain Volume Correlates With Duration of Abstinence From Substance Abuse in a Region-Specific and Substance-Specific Manner. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2017, 2, 626-635.	1.5	9
71	Convergence of interoception, emotion, and social cognition: A twofold fMRI meta-analysis and lesion approach. <i>Cortex</i> , 2017, 88, 124-142.	2.4	155
72	The complexity of empathy during medical school training: evidence for positive changes. <i>Medical Education</i> , 2017, 51, 1146-1159.	2.1	102

#	ARTICLE	IF	CITATIONS
73	Impulsive-Antisocial Dimension of Psychopathy Linked to Enlargement and Abnormal Functional Connectivity of the Striatum. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2017, 2, 149-157.	1.5	34
74	The Emerging Social Neuroscience of Justice Motivation. <i>Trends in Cognitive Sciences</i> , 2017, 21, 6-14.	7.8	59
75	Physiological dynamics of stress contagion. <i>Scientific Reports</i> , 2017, 7, 6168.	3.3	42
76	Specification of Change Mechanisms in Pregnant Smokers for Malleable Target Identification: A Novel Approach to a Tenacious Public Health Problem. <i>Frontiers in Public Health</i> , 2017, 5, 239.	2.7	14
77	How Situational Context Impacts Empathic Responses and Brain Activation Patterns. <i>Frontiers in Behavioral Neuroscience</i> , 2017, 11, 165.	2.0	30
78	Socio-neuro risk factors for suicidal behavior in criminal offenders with psychotic disorders. <i>Social Cognitive and Affective Neuroscience</i> , 2017, 12, 70-80.	3.0	13
79	How empathic are war veterans? An examination of the psychological impacts of combat exposure.. <i>Peace and Conflict</i> , 2017, 23, 422-426.	0.4	6
80	Les fondements naturels de la morale. , 2017, , 89-110.		1
81	Le sens moral chez le bÃ©bÃ©: neurosciences dÃ©veloppementales. <i>Spirale</i> , 2016, NÂ° 76, 35-42.	0.0	3
82	Anxiolytic Treatment Impairs Helping Behavior in Rats. <i>Frontiers in Psychology</i> , 2016, 7, 850.	2.1	86
83	Our Brains are Wired for Morality: Evolution, Development, and Neuroscience. <i>Frontiers for Young Minds</i> , 2016, 4, .	0.8	3
84	Abnormal fronto-limbic engagement in incarcerated stimulant users during moral processing. <i>Psychopharmacology</i> , 2016, 233, 3077-3087.	3.1	6
85	Brain response to viewing others being harmed in children with conduct disorder symptoms. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2016, 57, 510-519.	5.2	58
86	Testosterone administration in females modulates moral judgment and patterns of brain activation and functional connectivity. <i>Human Brain Mapping</i> , 2016, 37, 3417-3430.	3.6	34
87	Prior exposure to extreme pain alters neural response to pain in others. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2016, 16, 662-671.	2.0	16
88	Increased Moral Sensitivity for Outgroup Perpetrators Harming Ingroup Members. <i>Cerebral Cortex</i> , 2016, 26, 225-233.	2.9	47
89	Callous traits in children with and without conduct problems predict reduced connectivity when viewing harm to others. <i>Scientific Reports</i> , 2016, 6, 20216.	3.3	51
90	Empathy as a driver of prosocial behaviour: highly conserved neurobehavioural mechanisms across species. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2016, 371, 20150077.	4.0	413

#	ARTICLE	IF	CITATIONS
91	Early detection of intentional harm in the human amygdala. <i>Brain</i> , 2016, 139, 54-61.	7.6	82
92	Empathy and motivation for justice: Cognitive empathy and concern, but not emotional empathy, predict sensitivity to injustice for others. <i>Social Neuroscience</i> , 2016, 11, 1-14.	1.3	167
93	Les fondements naturels de la morale. , 2016, , 43-69.		0
94	Specific electrophysiological components disentangle affective sharing and empathic concern in psychopathy. <i>Journal of Neurophysiology</i> , 2015, 114, 493-504.	1.8	63
95	Interpersonal traits of psychopathy linked to reduced integrity of the uncinate fasciculus. <i>Human Brain Mapping</i> , 2015, 36, 4202-4209.	3.6	75
96	The Curious Relation between Theory of Mind and Sharing in Preschool Age Children. <i>PLoS ONE</i> , 2015, 10, e0117947.	2.5	53
97	Individual differences in vagal regulation are related to testosterone responses to observed violence. <i>Frontiers in Psychology</i> , 2015, 6, 19.	2.1	11
98	Individual differences in local gray matter density are associated with differences in affective and cognitive empathy. <i>NeuroImage</i> , 2015, 117, 305-310.	4.2	134
99	Amygdala subnuclei connectivity in response to violence reveals unique influences of individual differences in psychopathic traits in a nonforensic sample. <i>Human Brain Mapping</i> , 2015, 36, 1417-1428.	3.6	59
100	The neural pathways, development and functions of empathy. <i>Current Opinion in Behavioral Sciences</i> , 2015, 3, 1-6.	3.9	226
101	Association of regional gray matter volumes in the brain with disruptive behavior disorders in male and female children. <i>NeuroImage: Clinical</i> , 2015, 7, 252-257.	2.7	32
102	Alterations in Brain Activation During Cognitive Empathy Are Related to Social Functioning in Schizophrenia. <i>Schizophrenia Bulletin</i> , 2015, 41, 211-222.	4.3	43
103	Socioemotional processing of morally laden behavior and their consequences on others in forensic psychopaths. <i>Human Brain Mapping</i> , 2015, 36, 2015-2026.	3.6	50
104	Self-perspective leads to increased activation of pain processing brain regions in fibromyalgia. <i>Comprehensive Psychiatry</i> , 2015, 59, 80-90.	3.1	3
105	Sex differences in abnormal white matter development associated with conduct disorder in children. <i>Psychiatry Research - Neuroimaging</i> , 2015, 233, 269-277.	1.8	20
106	Empathy: A Social Neuroscience Perspective. , 2015, , 541-548.		2
107	The neural correlates of justified and unjustified killing: an fMRI study. <i>Social Cognitive and Affective Neuroscience</i> , 2015, 10, 1397-1404.	3.0	28
108	Empathy, Justice, and Moral Behavior. <i>AJOB Neuroscience</i> , 2015, 6, 3-14.	1.1	128

#	ARTICLE	IF	CITATIONS
109	Precursors to morality in development as a complex interplay between neural, socioenvironmental, and behavioral facets. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 12657-12662.	7.1	148
110	The Neuroscience of Implicit Moral Evaluation and Its Relation to Generosity in Early Childhood. <i>Current Biology</i> , 2015, 25, 93-97.	3.9	89
111	Oxytocin increases empathy to pain when adopting the other- but not the self-perspective. <i>Social Neuroscience</i> , 2015, 10, 7-15.	1.3	64
112	Emotional processing in Colombian ex-combatants and its relationship with empathy and executive functions. <i>Social Neuroscience</i> , 2015, 10, 153-165.	1.3	18
113	Genetic imaging of the association of oxytocin receptor gene (OXTR) polymorphisms with positive maternal parenting. <i>Frontiers in Behavioral Neuroscience</i> , 2014, 8, 21.	2.0	64
114	The relationship between different facets of empathy, pain perception and compassion fatigue among physicians. <i>Frontiers in Behavioral Neuroscience</i> , 2014, 8, 243.	2.0	117
115	Intention understanding over T: a neuroimaging study on shared representations and tennis return predictions. <i>Frontiers in Human Neuroscience</i> , 2014, 8, 781.	2.0	15
116	Empathy and helping: effects of racial group membership and cognitive load. <i>South African Journal of Psychology</i> , 2014, 44, 426-438.	2.0	15
117	Neurosciences, empathy, and healthy interpersonal relationships: Recent findings and implications for counseling psychology.. <i>Journal of Counseling Psychology</i> , 2014, 61, 541-548.	2.0	55
118	An EEG/ERP investigation of the development of empathy in early and middle childhood. <i>Developmental Cognitive Neuroscience</i> , 2014, 10, 160-169.	4.0	103
119	A social neuroscience perspective on clinical empathy. <i>World Psychiatry</i> , 2014, 13, 233-237.	10.4	65
120	The influence of group membership and individual differences in psychopathy and perspective taking on neural responses when punishing and rewarding others. <i>Human Brain Mapping</i> , 2014, 35, 4989-4999.	3.6	77
121	Empathic arousal and social understanding in individuals with autism: evidence from fMRI and ERP measurements. <i>Social Cognitive and Affective Neuroscience</i> , 2014, 9, 1203-1213.	3.0	164
122	The Good, the Bad, and the Just: Justice Sensitivity Predicts Neural Response during Moral Evaluation of Actions Performed by Others. <i>Journal of Neuroscience</i> , 2014, 34, 4161-4166.	3.6	136
123	Friends or Foes. <i>Perspectives on Psychological Science</i> , 2014, 9, 525-537.	9.0	214
124	Neural processing of dynamic emotional facial expressions in psychopaths. <i>Social Neuroscience</i> , 2014, 9, 36-49.	1.3	106
125	The complex relation between morality and empathy. <i>Trends in Cognitive Sciences</i> , 2014, 18, 337-339.	7.8	341
126	Oxytocin receptor gene variation predicts empathic concern and autonomic arousal while perceiving harm to others. <i>Social Neuroscience</i> , 2014, 9, 1-9.	1.3	123
