#	Article	IF	CITATIONS
1	A comparison of patch testing with nickel sulfate in <scp>TRUE</scp> Test and in petrolatum at 2.5% and 5% concentrations. Contact Dermatitis, 2022, 86, 233-234.	1.4	1
2	Guidelines for diagnosis, prevention, and treatment of hand eczema. Contact Dermatitis, 2022, 86, 357-378.	1.4	83
3	Occupational contact dermatitis from <i>Senecio barbertonicus</i> "Himalaya― Contact Dermatitis, 2022, 87, 197-198.	1.4	0
4	Psoriasis patient preferences for topical drugs: a systematic review. Journal of Dermatological Treatment, 2021, 32, 478-483.	2.2	26
5	Patch Testing With a New Composition of the Mercapto Mix—A Multicenter Study from the International Contact Dermatitis Research Group. Dermatitis, 2021, 32, 160-163.	1.6	Ο
6	Patch Testing With Methylchloroisothiazolinone/Methylisothiazolinone Using a New Diagnostic Mix—A Multicenter Study From the International Contact Dermatitis Research Group. Dermatitis, 2021, 32, 220-224.	1.6	1
7	Pros and cons of eHealth: A systematic review of the literature and observations in Denmark. SAGE Open Medicine, 2021, 9, 205031212110161.	1.8	9
8	Long-term improvement of psoriasis patients' adherence to topical drugs: testing a patient-supporting intervention delivered by healthcare professionals. Trials, 2021, 22, 742.	1.6	10
9	Improving psoriasis patients' adherence to topical drugs: a systematic review. Journal of Dermatological Treatment, 2020, 31, 776-785.	2.2	14
10	Contact sensitization to florists' chrysanthemums and marguerite daisies in Denmark: A 21â€year experience. Contact Dermatitis, 2020, 82, 18-23.	1.4	5
11	Contact Allergy to Fragrance Mix II and Hydroxyisohexyl 3-Cyclohexene Carboxaldehyde: A Retrospective Study by International Contact Dermatitis Research Group. Dermatitis, 2020, 31, 268-271.	1.6	6
12	Revised Baseline Series of the International Contact Research Group. Dermatitis, 2020, 31, e5-e7.	1.6	12
13	Compositae sensitization in Danish children and adolescents. Contact Dermatitis, 2020, 83, 296-300.	1.4	0
14	Screening for Compositae contact sensitization with sesquiterpene lactones and Compositae mix 2.5% pet. Contact Dermatitis, 2019, 81, 368-373.	1.4	14
15	Dermatology nurses view on factors related to Danish psoriasis patients' adherence to topical drugs: a focus group study. Journal of Dermatological Treatment, 2019, 32, 1-6.	2.2	2
16	Twentyâ€eightâ€day followâ€up of patch test reactions to pâ€phenylenediamine and pâ€phenylenediamine dihydrochloride: A multicentre study on behalf of the European Environmental and Contact Dermatitis Research Group. Contact Dermatitis, 2019, 81, 1-8.	1.4	13
17	Response to: Positive reactions to gold sodium thiosulfate in patch test panels (TRUE Test) in Japan: A multicentre study. Contact Dermatitis, 2019, 81, 156-156.	1.4	2
18	Screening for Gold Sensitization in Consecutive Eczema Patients: Prevalence, Relevance, and Sources of Exposure. Dermatitis, 2019, 30, 222-226.	1.6	5

#	Article	IF	CITATIONS
19	Patch Testing With Formaldehyde 2.0% (0.60 mg/cm2) Detects More Contact Allergy to Formaldehyde Than 1.0%. Dermatitis, 2019, 30, 342-346.	1.6	5
20	Atopic diseases and type I sensitization from adolescence to adulthood in an unselected population ( <scp>TOACS</scp> ) with focus on predictors for allergic rhinitis. Allergy: European Journal of Allergy and Clinical Immunology, 2019, 74, 308-317.	5.7	19
21	Antiâ€inflammatory potency testing of topical corticosteroids and calcineurin inhibitors in human volunteers sensitized to diphenylcyclopropenone. British Journal of Clinical Pharmacology, 2018, 84, 1719-1728.	2.4	17
22	Allergic contact dermatitis caused by nail acrylates in Europe. An EECDRG study. Contact Dermatitis, 2018, 78, 254-260.	1.4	74
23	eHealth Technologies as an intervention to improve adherence to topical antipsoriatics: a systematic review. Journal of Dermatological Treatment, 2018, 29, 123-128.	2.2	9
24	Clinical patterns of <scp>C</scp> ompositae dermatitis in <scp>D</scp> anish monosensitized patients. Contact Dermatitis, 2018, 78, 185-193.	1.4	26
25	Excipient and Dose per Unit Area Affect Sensitivity When Patch Testing With Gold Sodium Thiosulfate. Dermatitis, 2018, 29, 258-263.	1.6	13
26	Parthenolide in Danish biodynamic and organic milk: A new source of exposure to an allergenic sesquiterpene lactone. Contact Dermatitis, 2018, 79, 208-212.	1.4	8
27	Can an app supporting psoriasis patients improve adherence to topical treatment? A single-blind randomized controlled trial. BMC Dermatology, 2018, 18, 2.	2.1	12
28	Different concentrations and volumes of <i>p</i> â€phenylenediamine in pet. (equivalent doses) are associated with similar patch test outcomes: a pilot study. Contact Dermatitis, 2018, 78, 335-340.	1.4	3
29	Medical adherence to topical corticosteroid preparations prescribed for psoriasis: A systematic review. Journal of Dermatological Treatment, 2017, 28, 32-39.	2.2	22
30	Allergenic sesquiterpene lactones from cushion bush ( <i>Leucophyta brownii</i> Cass.): new and old sensitizers in a shrubâ€ŧurnedâ€aâ€pot plant. Contact Dermatitis, 2017, 76, 280-286.	1.4	13
31	Multicenter Patch Testing With Methylisothiazolinone and Methylchloroisothiazolinone/Methylisothiazolinone Within the International Contact Dermatitis Research Group. Dermatitis, 2017, 28, 210-214.	1.6	22
32	Multicenter Patch Testing With Methylchloroisothizoline/Methylisothiazolinone in 100 and 200 ppm Within the International Contact Dermatitis Research Group. Dermatitis, 2017, 28, 215-218.	1.6	11
33	The gene expression and immunohistochemical timeâ€course of diphenylcyclopropenoneâ€induced contact allergy in healthy humans following repeated epicutaneous challenges. Experimental Dermatology, 2017, 26, 926-933.	2.9	7
34	Clinical characteristics and real-life diagnostic approaches in all Danish children with hereditary angioedema. Orphanet Journal of Rare Diseases, 2017, 12, 55.	2.7	25
35	The epidemic of methylisothiazolinone: a <scp>E</scp> uropean prospective study. Contact Dermatitis, 2017, 76, 272-279.	1.4	76
36	Generalized Correlation Coefficient for Non-Parametric Analysis of Microarray Time-Course Data. Journal of Integrative Bioinformatics, 2017, 14, .	1.5	4

#	Article	IF	CITATIONS
37	Worldwide utilization of topical remedies in treatment of psoriasis: a systematic review. Journal of Dermatological Treatment, 2017, 28, 374-383.	2.2	35
38	Psoriasis patients' experiences concerning medical adherence to treatment with topical corticosteroids. Psoriasis: Targets and Therapy, 2016, Volume 6, 113-119.	2.2	7
39	Persistent Skin Reactions and Aluminium Hypersensitivity Induced by Childhood Vaccines. Acta Dermato-Venereologica, 2016, 96, 967-971.	1.3	20
40	Contact Allergy in Danish Healthcare Workers: A Retrospective Matched Case-control Study. Acta Dermato-Venereologica, 2016, 96, 237-240.	1.3	29
41	Low patch test reactivity to nickel in unselected adolescents tested repeatedly with nickel in infancy. Pediatric Allergy and Immunology, 2016, 27, 636-639.	2.6	6
42	Oxidized limonene and oxidized linalool – concomitant contact allergy to common fragrance terpenes. Contact Dermatitis, 2016, 74, 273-280.	1.4	49
43	2â€Aminoâ€4â€hydroxyethylaminoanisole sulfate – a coupler causing contact allergy from use in hair dyes. Contact Dermatitis, 2016, 74, 102-104.	1.4	5
44	Occupational allergic contact dermatitis caused by heroin (diacetylmorphine) and morphine. Contact Dermatitis, 2016, 74, 301-302.	1.4	6
45	Should carba mix be reintroduced into the European baseline series?. Contact Dermatitis, 2016, 75, 48-50.	1.4	16
46	Lettuce contact allergy. Contact Dermatitis, 2016, 74, 67-75.	1.4	28
47	The reproducibility of nickel, cobalt and chromate sensitization in patients tested at least twice in the period 1992–2014 with TRUE Test®. Contact Dermatitis, 2016, 75, 111-113.	1.4	20
48	Contact allergy to 1,2-benzisothiazolin-3-one. Contact Dermatitis, 2016, 75, 324-326.	1.4	11
49	Methylisothiazolinone in a designer spectacle frame - a surprising finding. Contact Dermatitis, 2016, 75, 310-312.	1.4	18
50	Undisclosed presence of methylisothiazolinone in â€~100% natural' Konjac® sponge. Contact Dermatitis, 2016, 75, 308-309.	1.4	9
51	Proposed ICDRG Classification of the Clinical Presentation of Contact Allergy. Dermatitis, 2016, 27, 248-258.	1.6	30
52	Occupational allergic airborne contact dermatitis caused by pethoxamid – a new herbicide. Contact Dermatitis, 2016, 74, 315-316.	1.4	7
53	Preservatives. , 2016, , 147-157.		1
54	Sunflower seeds as eliciting agents of Compositae dermatitis. Contact Dermatitis, 2015, 72, 172-177.	1.4	14
