Craig M Schramm

List of Publications by Year
in descending order

43 papers	1,241 citations	430874 18 h-index	361022 35 g-index
44 all docs	44 docs citations	44 times ranked	1362 citing authors

#	Article	IF	Citations
1	Bacterial Surface Detachment during Nebulization with Contaminated Reusable Home Nebulizers. Microbiology Spectrum, 2022, 10, e0253521.	3.0	4
2	Two versus four puffs of albuterol: does dose change bronchodilator response? . Journal of Asthma and Allergy, 2019, Volume 12, 59-65.	3.4	5
3	Repeated hot water and steam disinfection of Pari LC PlusÂ® nebulizers alter nebulizer output. Journal of Cystic Fibrosis, 2019, 18, 233-235.	0.7	8
4	Early-life antibiotics attenuate regulatory T cell generation and increase the severity of murine house dust mite-induced asthma. Pediatric Research, 2018, 84, 426-434.	2.3	23
5	Regulation of IgE activity in inhalational tolerance via formation of IgG anti-IgE/IgE immune complexes. Clinical and Molecular Allergy, 2018, 16, 13.	1.8	2
6	ILâ€15â€deficient mice develop enhanced allergic responses to airway allergen exposure. Clinical and Experimental Allergy, 2017, 47, 639-655.	2.9	4
7	Clinical Examination Does Not Predict Response to Albuterol in Ventilated Infants With Bronchiolitis. Pediatric Critical Care Medicine, 2017, 18, e18-e23.	0.5	6
8	An evaluation strategy for potential QTc prolongation with chronic azithromycin therapy in cystic fibrosis. Journal of Cystic Fibrosis, 2016, 15, 192-195.	0.7	10
9	Cbl-b Deficiency in Mice Results in Exacerbation of Acute and Chronic Stages of Allergic Asthma. Frontiers in Immunology, 2015, 6, 592.	4.8	4
10	Long-Term Exposure to House Dust Mite Leads to the Suppression of Allergic Airway Disease Despite Persistent Lung Inflammation. International Archives of Allergy and Immunology, 2015, 166, 243-258.	2.1	34
11	Regulatory B Cells in Allergic Airways Disease and Asthma. Methods in Molecular Biology, 2014, 1190, 207-225.	0.9	6
12	Bromelain Inhibits Allergic Sensitization and Murine Asthma via Modulation of Dendritic Cells. Evidence-based Complementary and Alternative Medicine, 2013, 2013, 1-9.	1.2	14
13	Pulmonary Mechanics Following Albuterol Therapy in Mechanically Ventilated Infants with Bronchiolitis. Journal of Asthma, 2012, 49, 688-696.	1.7	4
14	Regulatory B cells from hilar lymph nodes of tolerant mice in a murine model of allergic airway disease are CD5+, express TGF-Î², and co-localize with CD4+Foxp3+ T cells. Mucosal Immunology, 2012, 5, 691-701.	6.0	93
15	Î²₂-Adrenergic Receptor Haplotype Linked to Intubation and Mechanical Ventilation in Children with Asthma. Journal of Asthma, 2012, 49, 563-568.	1.7	13
16	Clinical Features Cannot Distinguish Allergic from Non-allergic Asthma in Children. Journal of Asthma, 2012, 49, 51-56.	1.7	17
17	Phenotypic Changes to the Endogenous Antigen-Specific CD8+ T Cell Response Correlates with the Development and Resolution of Allergic Airway Disease. American Journal of Pathology, 2012, 180, 1991-2000.	3.8	5
18	Betaâ€adrenergic receptor polymorphisms associated with length of ICU stay in pediatric status asthmaticus. Pediatric Pulmonology, 2012, 47, 233-239.	2.0	22

#	Article	IF	Citations
19	Reassessment of Disease Severity in Patients Following Severe Acute Exacerbations of Asthma. Journal of Asthma & Allergy Educators, 2010, 1, 56-60.	0.1	1
20	Advances in treating acute asthma exacerbations in children. Current Opinion in Pediatrics, 2009, 21, 326-332.	2.0	15
21	Î² 2 -Adrenergic Receptor Polymorphisms Affect Response to Treatment in Children With Severe Asthma Exacerbations. Chest, 2009, 135, 1186-1192.	0.8	48
22	Slowâ€responders to IV Î²₂â€adrenergic agonist therapy: Defining a novel phenotype in pediatric asthma. Pediatric Pulmonology, 2008, 43, 627-633.	2.0	9
23	Subcutaneous late phase responses are augmented during local inhalational tolerance in a murine asthma model. Immunology and Cell Biology, 2008, 86, 535-538.	2.3	4
24	Severe Exacerbations in Children with Mild Asthma: Characterizing a Pediatric Phenotype. Journal of Asthma, 2008, 45, 513-517.	1.7	33
25	Accumulation of Regulatory T Cells in Local Draining Lymph Nodes of the Lung Correlates with Spontaneous Resolution of Chronic Asthma in a Murine Model. International Archives of Allergy and Immunology, 2008, 145, 231-243.	2.1	40
26	Oral Bromelain Attenuates Inflammation in an Ovalbumin-Induced Murine Model of Asthma. Evidence-based Complementary and Alternative Medicine, 2008, 5, 61-69.	1.2	46
27	Regulatory Role of B Cells in a Murine Model of Allergic Airway Disease. Journal of Immunology, 2008, 180, 7318-7326.	0.8	97
28	Endotracheal intubation and pediatric status asthmaticus: Site of original care affects treatment*. Pediatric Critical Care Medicine, 2007, 8, 91-95.	0.5	63
29	Tolerance induced by chronic inhaled antigen in a murine asthma model is not mediated by endotoxin. Biochimica Et Biophysica Acta - Molecular Basis of Disease, 2006, 1762, 499-501.	3.8	6
30	Protocol-based titration of intravenous terbutaline decreases length of stay in pediatric status asthmaticus. Pediatric Pulmonology, 2006, 41, 350-356.	2.0	17
31	Interleukin-10 does not mediate inhalational tolerance in a chronic model of ovalbumin-induced allergic airway disease. Cellular Immunology, 2006, 239, 67-74.	3.0	12
32	Bromelain exerts anti-inflammatory effects in an ovalbumin-induced murine model of allergic airway disease. Cellular Immunology, 2005, 237, 68-75.	3.0	70
33	A Modified Pulmonary Index Score with predictive value for pediatric asthma exacerbations. Annals of Allergy, Asthma and Immunology, 2005, 94, 355-359.	1.0	79
34	The Influence of Pulmonary Function Testing on the Management of Asthma in Children. Journal of Pediatrics, 2005, 147, 797-801.	1.8	69
35	Chronic Inhaled Ovalbumin Exposure Induces Antigen-Dependent but Not Antigen-Specific Inhalational Tolerance in a Murine Model of Allergic Airway Disease. American Journal of Pathology, 2004, 164, 295-304.	3.8	70
36	Murine Cytomegalovirus Infection Alters Th1/Th2 Cytokine Expression, Decreases Airway Eosinophilia, and Enhances Mucus Production in Allergic Airway Disease. Journal of Immunology, 2001, 167, 2798-2807.	0.8	37

#	Article	IF	Citations
37	Dexamethasone potentiates high-affinity Î²-agonist binding and G_sÎ± protein expression in airway smooth muscle. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2000, 278, L1101-L1106.	2.9	42
38	Proinflammatory Roles of T-Cell Receptor (TCR) Î³Î´ and TCR Î±Î² Lymphocytes in a Murine Model of Asthma. American Journal of Respiratory Cell and Molecular Biology, 2000, 22, 218-225.	2.9	64
39	beta-adrenergic relaxation of rabbit tracheal smooth muscle: a receptor deficit that improves with corticosteroid administration. Journal of Pharmacology and Experimental Therapeutics, 2000, 292, 280-7.	2.5	19
40	Shifts in Lung Lymphocyte Profiles Correlate with the Sequential Development of Acute Allergic and Chronic Tolerant Stages in a Murine Asthma Model. American Journal of Pathology, 1999, 154, 1911-1921.	3.8	97
41	Corticosteroid modulation of Na ⁺â€K⁺ pumpâ€mediated relaxation in maturing airway smooth muscle. British Journal of Pharmacology, 1996, 119, 807-812.	5.4	15
42	Ontogeny of Î²-adrenergic desensitization in rabbit tracheal smooth muscle. , 1996, 22, 255-262.		3
43	Role of muscarinic M2 receptors in regulating beta-adrenergic responsiveness in maturing rabbit airway smooth muscle. American Journal of Physiology - Lung Cellular and Molecular Physiology, 1995, 269, L783-L790.	2.9	11
