#	ARTICLE	IF	CITATIONS
1	Spatio temporal dynamics of direct current in treated anisotropic tumors. <i>Mathematics and Computers in Simulation</i> , 2023, 203, 609-632.	4.4	2
2	A note on the stability of time-accurate and highly-stable explicit operators for stiff differential equations. <i>Journal of Computational Physics</i> , 2021, 436, 110316.	3.8	6
3	Efficacy of direct current generated by multiple-electrode arrays on F3II mammary carcinoma: experiment and mathematical modeling. <i>Journal of Translational Medicine</i> , 2020, 18, 190.	4.4	3
4	On the numerical stability of the exponentially fitted methods for first order IVPs. <i>Applied Mathematics and Computation</i> , 2020, 379, 125249.	2.2	0
5	Variable Step-Size Control Based on Two-Steps for Radau IIA Methods. <i>ACM Transactions on Mathematical Software</i> , 2020, 46, 1-24.	2.9	0
6	On the effectiveness of spectral methods for the numerical solution of multi-frequency highly oscillatory Hamiltonian problems. <i>Numerical Algorithms</i> , 2019, 81, 345-376.	1.9	31
7	High-order energy-conserving Line Integral Methods for charged particle dynamics. <i>Journal of Computational Physics</i> , 2019, 396, 209-227.	3.8	23
8	New formulation of the Gompertz equation to describe the kinetics of untreated tumors. <i>PLoS ONE</i> , 2019, 14, e0224978.	2.5	6
9	Spectrally accurate space-time solution of Hamiltonian PDEs. <i>Numerical Algorithms</i> , 2019, 81, 1183-1202.	1.9	28
10	A viscous modified Gompertz model for the analysis of the kinetics of tumors under electrochemical therapy. <i>Mathematics and Computers in Simulation</i> , 2018, 151, 96-110.	4.4	10
11	Explicit Runge-Kutta Methods for Stiff Problems with a Gap in Their Eigenvalue Spectrum. <i>Journal of Scientific Computing</i> , 2018, 77, 1055-1083.	2.3	4
12	Dose-response study for the highly aggressive and metastatic primary F3II mammary carcinoma under direct current. <i>Bioelectromagnetics</i> , 2018, 39, 460-475.	1.6	5
13	Algorithm 968. <i>ACM Transactions on Mathematical Software</i> , 2017, 43, 1-14.	2.9	10
14	Fast distributed algebraic connectivity estimation in large scale networks. <i>Journal of the Franklin Institute</i> , 2017, 354, 5421-5442.	3.4	6
15	Functionally Fitted Explicit Two Step Peer Methods. <i>Journal of Scientific Computing</i> , 2015, 64, 938-958.	2.3	5
16	Exponential fitting techniques for the solution of stiff problems with explicit methods. <i>AIP Conference Proceedings</i> , 2015, .	0.4	0
17	Numerical methods for non conservative perturbations of conservative problems. <i>Computer Physics Communications</i> , 2015, 187, 72-82.	7.5	7
18	Runge-Kutta projection methods with low dispersion and dissipation errors. <i>Advances in Computational Mathematics</i> , 2015, 41, 231-251.	1.6	11

#	ARTICLE	IF	CITATIONS
19	Robust discrete time dynamic average consensus. Automatica, 2014, 50, 3131-3138.	5.0	55
20	Step size analysis in discrete-time dynamic average consensus. , 2014, , .		9
21	Optimal starters for solving the elliptic Kepler's equation. Celestial Mechanics and Dynamical Astronomy, 2013, 115, 143-160.	1.4	10
22	Chebyshev Polynomials in Distributed Consensus Applications. IEEE Transactions on Signal Processing, 2013, 61, 693-706.	5.3	37
23	An efficient family of strongly A-stable Runge-Kutta collocation methods for stiff systems and DAEs. Part II: Convergence results. Applied Numerical Mathematics, 2012, 62, 1349-1360.	2.1	11
24	On some new low storage implementations of time advancing Runge-Kutta methods. Journal of Computational and Applied Mathematics, 2012, 236, 3665-3675.	2.0	51
25	Energy-preserving methods for Poisson systems. Journal of Computational and Applied Mathematics, 2012, 236, 3890-3904.	2.0	48
26	Recent Advances on Preserving Methods for Poisson Systems. , 2011, , .		0
27	On the derivation of explicit two-step peer methods. Applied Numerical Mathematics, 2011, 61, 395-409.	2.1	9
28	Error growth in the numerical integration of periodic orbits. Mathematics and Computers in Simulation, 2011, 81, 2646-2661.	4.4	14
29	Adaptive consensus and algebraic connectivity estimation in sensor networks with chebyshev polynomials. , 2011, , .		10
30	Fast distributed consensus with Chebyshev polynomials. , 2011, , .		7
31	Symmetric and symplectic exponentially fitted Runge-Kutta methods of high order. Computer Physics Communications, 2010, 181, 2044-2056.	7.5	63
32	Approximate preservation of quadratic first integrals by explicit Runge-Kutta methods. Advances in Computational Mathematics, 2010, 32, 255-274.	1.6	6
33	On high order symmetric and symplectic trigonometrically fitted Runge-Kutta methods with an even number of stages. BIT Numerical Mathematics, 2010, 50, 3-21.	2.0	55
34	Projection methods preserving Lyapunov functions. BIT Numerical Mathematics, 2010, 50, 223-241.	2.0	23
35	An efficient family of strongly A -stable Runge-Kutta collocation methods for stiff systems and DAEs. Part I: Stability and order results. Journal of Computational and Applied Mathematics. 2010. 234. 1105-1116.	2.0	19
36	On the Preservation of Lyapunov Functions by Runge-Kutta Methods. , 2009, , .		0

#	ARTICLE	IF	CITATIONS
37	Optimization of Spatial and Minimum Storage RK Schemes for Computational Acoustics. , 2009, , .		1
38	Sixth-order symmetric and symplectic exponentially fitted Rungeâ€Kutta methods of the Gauss type. Journal of Computational and Applied Mathematics, 2009, 223, 387-398.	2.0	79
39	Sixth-order symmetric and symplectic exponentially fitted modified Rungeâ€Kutta methods of Gauss type. Computer Physics Communications, 2008, 178, 732-744.	7.5	67
40	Global error estimation based on the tolerance proportionality for some adaptive Rungeâ€Kutta codes. Journal of Computational and Applied Mathematics, 2008, 218, 329-341.	2.0	13
41	Structure preservation of exponentially fitted Rungeâ€Kutta methods. Journal of Computational and Applied Mathematics, 2008, 218, 421-434.	2.0	79
42	On the Long Time Error of First Integrals of Some Numerical Integrators. , 2008, , .		0
43	Some Optimal Rungeâ€Kutta Collocation Methods for Stiff Problems and DAEs. , 2008, , .		1
44	A Code Based on Gauss Methods for Second Order Differential Systems. AIP Conference Proceedings, 2007, , .	0.4	0
45	A note on the error growth in the numerical integration of periodic orbits. Proceedings in Applied Mathematics and Mechanics, 2007, 7, 2020047-2020048.	0.2	1
46	On explicit multi-revolution Rungeâ€Kutta schemes. Advances in Computational Mathematics, 2007, 26, 105-120.	1.6	6
47	On the Preservation of Invariants by Explicit Rungeâ€Kutta Methods. SIAM Journal of Scientific Computing, 2006, 28, 868-885.	2.8	43
48	Initializers for RK-Gauss methods based on pseudo-symplecticity. Journal of Computational and Applied Mathematics, 2006, 189, 228-241.	2.0	2
49	Two-step error estimators for implicit Rungeâ€Kutta methods applied to stiff systems. ACM Transactions on Mathematical Software, 2004, 30, 1-18.	2.9	10
50	Approximate compositions of a near identity map by multi-revolution Runge-Kutta methods. Numerische Mathematik, 2004, 97, 635-666.	1.9	10
51	Two-Step High Order Starting Values for Implicit Rungeâ€Kutta Methods. Advances in Computational Mathematics, 2003, 19, 401-412.	1.6	7
52	On the Solution of Discontinuous IVPs by Adaptive Rungeâ€Kutta Codes. Numerical Algorithms, 2003, 33, 163-182.	1.9	6
53	Stabilized starting algorithms for collocation Runge-Kutta methods. Computers and Mathematics With Applications, 2003, 45, 411-428.	2.7	4
54	Variable-order starting algorithms for implicit Runge?Kutta methods on stiff problems*1. Applied Numerical Mathematics, 2003, 44, 77-94.	2.1	7

#	ARTICLE	IF	CITATIONS
55	Starting algorithms for Gauss Runge-Kutta methods for Hamiltonian systems. Computers and Mathematics With Applications, 2003, 45, 401-410.	2.7	8
56	Implementation of high-order implicit runge-kutta methods. Computers and Mathematics With Applications, 2001, 41, 1009-1024.	2.7	11
57	On the numerical integration of orthogonal flows with Runge-Kutta methods. Journal of Computational and Applied Mathematics, 2000, 115, 121-135.	2.0	3
58	On the iterative solution of the algebraic equations in fully implicit Runge-Kutta methods. Numerical Algorithms, 2000, 23, 97-113.	1.9	3
59	On the existence of solution of stage equations in implicit Runge-Kutta methods. Journal of Computational and Applied Mathematics, 1999, 111, 25-36.	2.0	2
60	On the convergence of Runge-Kutta methods for stiff non linear differential equations. Numerische Mathematik, 1998, 81, 31-51.	1.9	4
61	Stepsize selection for tolerance proportionality in explicit Runge-Kutta codes. Advances in Computational Mathematics, 1997, 7, 361-382.	1.6	21
62	Improving the efficiency of the iterative schemes for implicit Runge-Kutta methods. Journal of Computational and Applied Mathematics, 1996, 66, 227-238.	2.0	4
63	Explicit Runge-Kutta methods for initial value problems with oscillating solutions. Journal of Computational and Applied Mathematics, 1996, 76, 195-212.	2.0	24
64	Global error estimation with adaptive explicit Runge-Kutta methods. IMA Journal of Numerical Analysis, 1996, 16, 47-63.	2.9	12
65	Iterative schemes for three-stage implicit Runge-Kutta methods. Applied Numerical Mathematics, 1995, 17, 363-382.	2.1	28
66	Iterative schemes for Gauss methods. Computers and Mathematics With Applications, 1994, 27, 67-81.	2.7	16
67	A polyvalent Runge-Kutta triple. Applied Numerical Mathematics, 1994, 15, 13-26.	2.1	3
68	A0-stability of variable stepsize BDF methods. Journal of Computational and Applied Mathematics, 1993, 45, 29-39.	2.0	8
69	On the change of step size in multistep codes. Numerical Algorithms, 1993, 4, 283-304.	1.9	12
70	A fifth-order interpolant for the Dormand and Prince Runge-Kutta method. Journal of Computational and Applied Mathematics, 1990, 29, 91-100.	2.0	27
71	A new embedded pair of Runge-Kutta formulas of orders 5 and 6. Computers and Mathematics With Applications, 1990, 20, 15-24.	2.7	17
72	On The Stability of Variable Stepsize Adams Methods in Nordsieck Form. North-Holland Mathematics Studies, 1987, , 193-203.	0.2	0

#	ARTICLE	IF	CITATIONS
73	On the Stability of Variable-Stepsize Nordsieck BDF Methods. SIAM Journal on Numerical Analysis, 1987, 24, 844-854.	2.3	19
