

Barbara A Romanowicz

List of Publications by Citations

Source: <https://exaly.com/author-pdf/5367133/barbara-a-romanowicz-publications-by-citations.pdf>

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
243	Broad plumes rooted at the base of the Earth's mantle beneath major hotspots. <i>Nature</i> , 2015 , 525, 95-9	50.4	468
242	The three-dimensional shear velocity structure of the mantle from the inversion of body, surface and higher-mode waveforms. <i>Geophysical Journal International</i> , 2000 , 143, 709-728	2.6	402
241	Lithospheric layering in the North American craton. <i>Nature</i> , 2010 , 466, 1063-8	50.4	366
240	Global anisotropy and the thickness of continents. <i>Nature</i> , 2003 , 422, 707-11	50.4	352
239	Global mantle shear velocity model developed using nonlinear asymptotic coupling theory. <i>Journal of Geophysical Research</i> , 1996 , 101, 22245-22272		331
238	A three-dimensional radially anisotropic model of shear velocity in the whole mantle. <i>Geophysical Journal International</i> , 2006 , 167, 361-379	2.6	288
237	Whole-mantle radially anisotropic shear velocity structure from spectral-element waveform tomography. <i>Geophysical Journal International</i> , 2014 , 199, 1303-1327	2.6	245
236	Excitation of Earth's continuous free oscillations by atmosphere-ocean-seafloor coupling. <i>Nature</i> , 2004 , 431, 552-6	50.4	222
235	North American lithospheric discontinuity structure imaged by Ps and Sp receiver functions. <i>Journal of Geophysical Research</i> , 2010 , 115,		194
234	Time scales and heterogeneous structure in geodynamic earth models. <i>Science</i> , 1998 , 280, 91-5	33.3	194
233	Cluster analysis of global lower mantle tomography: A new class of structure and implications for chemical heterogeneity. <i>Earth and Planetary Science Letters</i> , 2012 , 357-358, 68-77	5.3	180
232	Inferences on flow at the base of Earth's mantle based on seismic anisotropy. <i>Science</i> , 2004 , 303, 351-3	33.3	180
231	Superplumes from the core-mantle boundary to the lithosphere: implications for heat flux. <i>Science</i> , 2002 , 296, 513-6	33.3	176
230	Mantle Anchor Structure: An argument for bottom up tectonics. <i>Earth and Planetary Science Letters</i> , 2010 , 299, 69-79	5.3	161
229	Viscosity of oceanic asthenosphere inferred from remote triggering of earthquakes. <i>Science</i> , 1998 , 280, 1245-9	33.3	155
228	Comparison of global waveform inversions with and without considering cross-branch modal coupling. <i>Geophysical Journal International</i> , 1995 , 121, 695-709	2.6	154
227	Waveform tomography reveals channeled flow at the base of the oceanic asthenosphere. <i>Science</i> , 2013 , 342, 227-30	33.3	151

226	A global tomographic model of shear attenuation in the upper mantle. <i>Journal of Geophysical Research</i> , 1995 , 100, 12375-12394		147
225	GLOBALMANTLETOMOGRAPHY: Progress Status in the Past 10 Years. <i>Annual Review of Earth and Planetary Sciences</i> , 2003 , 31, 303-328	15.3	140
224	Toward real-time estimation of regional moment tensors. <i>Bulletin of the Seismological Society of America</i> , 1996 , 86, 1255-1269	2.3	126
223	Inferring upper-mantle structure by full waveform tomography with the spectral element method. <i>Geophysical Journal International</i> , 2011 , 185, 799-831	2.6	125
222	The depth distribution of azimuthal anisotropy in the continental upper mantle. <i>Nature</i> , 2007 , 447, 198-201	5.0	125
221	3-D shear wave radially and azimuthally anisotropic velocity model of the North American upper mantle. <i>Geophysical Journal International</i> , 2011 , 184, 1237-1260	2.6	123
220	A low-velocity zone in the central Chang-Thang platform of Tibet: Evidence from pure path phase velocity measurements of long period Rayleigh waves. <i>Journal of Geophysical Research</i> , 1986 , 91, 6547		120
219	Tomography of the upper mantle using three-component long-period waveforms. <i>Geophysical Journal International</i> , 2004 , 157, 813-830	2.6	115
218	3D effects of sharp boundaries at the borders of the African and Pacific Superplumes: Observation and modeling. <i>Earth and Planetary Science Letters</i> , 2005 , 233, 137-153	5.3	107
217	Strike-slip earthquakes on quasi-vertical transcurrent faults: Inferences for general scaling relations. <i>Geophysical Research Letters</i> , 1992 , 19, 481-484	4.9	106
216	Multiplet-multiplet coupling due to lateral heterogeneity: asymptotic effects on the amplitude and frequency of the Earth's normal modes. <i>Geophysical Journal International</i> , 1987 , 90, 75-100	2.6	102
215	Importance of crustal corrections in the development of a new global model of radial anisotropy. <i>Journal of Geophysical Research</i> , 2010 , 115,		101
214	GEOSCOPE: A French initiative in long-period three-component global seismic networks. <i>Eos</i> , 1984 , 65, 753	1.5	101
213	Hemispherical transition of seismic attenuation at the top of the earth's inner core. <i>Earth and Planetary Science Letters</i> , 2004 , 228, 243-253	5.3	100
212	On the variation of b-values with earthquake size. <i>Physics of the Earth and Planetary Interiors</i> , 1994 , 87, 55-76	2.3	100
211	Can we resolve 3D density heterogeneity in the lower mantle?. <i>Geophysical Research Letters</i> , 2001 , 28, 1107-1110	4.9	97
210	Seismic Tomography of the Earth's Mantle. <i>Annual Review of Earth and Planetary Sciences</i> , 1991 , 19, 77-99	5.3	97
209	A study of the relation between ocean storms and the Earth's hum. <i>Geochemistry, Geophysics, Geosystems</i> , 2006 , 7, n/a-n/a	3.6	92

208	Seismic anisotropy in the D? layer. <i>Geophysical Research Letters</i> , 1995 , 22, 1657-1660	4.9	88
207	Slip of the 2004 Sumatra-Andaman Earthquake from Joint Inversion of Long-Period Global Seismic Waveforms and GPS Static Offsets. <i>Bulletin of the Seismological Society of America</i> , 2007 , 97, S115-S127	2.3	87
206	Constraints on the structure of the Tibet Plateau from pure path phase velocities of Love and Rayleigh waves. <i>Journal of Geophysical Research</i> , 1982 , 87, 6865-6883		86
205	The upper mantle degree 2: Constraints and inferences from global mantle wave attenuation measurements. <i>Journal of Geophysical Research</i> , 1990 , 95, 11051		84
204	Inversion of receiver functions without deconvolution—application to the Indian craton. <i>Geophysical Journal International</i> , 2014 , 196, 1025-1033	2.6	82
203	Crust and upper mantle tomography in Tibet using surface waves. <i>Geophysical Research Letters</i> , 1992 , 19, 881-884	4.9	82
202	Anisotropy in inner core attenuation: A new type of data to constrain the nature of the solid core. <i>Geophysical Research Letters</i> , 1996 , 23, 1-4	4.9	81
201	An unusually large ULVZ at the base of the mantle near Hawaii. <i>Earth and Planetary Science Letters</i> , 2012 , 355-356, 213-222	5.3	80
200	Inversion of teleseismic S particle motion for azimuthal anisotropy in the upper mantle: a feasibility study. <i>Geophysical Journal International</i> , 1991 , 106, 421-431	2.6	79
199	The cape mendocino, california, earthquakes of april 1992: subduction at the triple junction. <i>Science</i> , 1993 , 261, 433-8	33.3	78
198	On the resolution of density anomalies in the Earth's mantle using spectral fitting of normal-mode data. <i>Geophysical Journal International</i> , 2002 , 150, 162-179	2.6	76
197	Anisotropy in the Inner Core: Could It Be Due To Low-Order Convection?. <i>Science</i> , 1996 , 274, 963-6	33.3	76
196	Spatiotemporal patterns in the energy release of great earthquakes. <i>Science</i> , 1993 , 260, 1923-6	33.3	71
195	Anisotropy in the center of the inner core. <i>Geophysical Research Letters</i> , 1994 , 21, 1671-1674	4.9	71
194	Constraints on D? structure using PKP(AB-DF), PKP(BC-DF) and PcP-P traveltime data from broad-band records. <i>Geophysical Journal International</i> , 2002 , 149, 599-616	2.6	70
193	Three-dimensional structure at the base of the mantle beneath the central pacific. <i>Science</i> , 1998 , 282, 718-20	33.3	69
192	Anisotropic structures at the base of the Earth's mantle. <i>Nature</i> , 1998 , 393, 564-567	50.4	68
191	Insights into the nature of the transition zone from physically constrained inversion of long-period seismic data. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007 , 104, 9139-44	11.5	68

190	Lithospheric expression of geological units in central and eastern North America from full waveform tomography. <i>Earth and Planetary Science Letters</i> , 2014 , 402, 176-186	5.3	67
189	Geophysics. The thickness of tectonic plates. <i>Science</i> , 2009 , 324, 474-6	33.3	67
188	Observational evidence for diffracted SV in the shadow of the Earth's core. <i>Geophysical Research Letters</i> , 1989 , 16, 519-522	4.9	67
187	Modelling of coupled normal modes of the Earth: the spectral method. <i>Geophysical Journal International</i> , 1990 , 102, 365-395	2.6	67
186	The effect of D? on PKP(ABDF) travel time residuals and possible implications for inner core structure. <i>Earth and Planetary Science Letters</i> , 2000 , 175, 133-143	5.3	64
185	Three-dimensional radial anisotropic structure of the North American upper mantle from inversion of surface waveform data. <i>Geophysical Journal International</i> , 2007 , 171, 206-222	2.6	63
184	Inner core anisotropy inferred by direct inversion of normal mode spectra. <i>Geophysical Journal International</i> , 1999 , 139, 599-622	2.6	63
183	How Did Early Earth Become Our Modern World?. <i>Annual Review of Earth and Planetary Sciences</i> , 2014 , 42, 151-178	15.3	62
182	Anomalous splitting of free oscillations: A reevaluation of possible interpretations. <i>Journal of Geophysical Research</i> , 2000 , 105, 21559-21578		61
181	3-D upper mantle shear velocity and attenuation from fundamental mode free oscillation data. <i>Geophysical Journal International</i> , 1990 , 101, 61-80	2.6	61
180	Tectonic regionalization without a priori information: A cluster analysis of upper mantle tomography. <i>Earth and Planetary Science Letters</i> , 2011 , 308, 151-160	5.3	59
179	Seismic structure of the upper mantle beneath the United States by three-dimensional inversion of body wave arrival times. <i>Geophysical Journal International</i> , 1979 , 57, 479-506	2.6	59
178	Monitoring of strain release in central and northern California using broadband data. <i>Geophysical Research Letters</i> , 1993 , 20, 1643-1646	4.9	58
177	Measurement and implications of frequency dependence of attenuation. <i>Earth and Planetary Science Letters</i> , 2009 , 282, 285-293	5.3	57
176	Seismic evidence for partial melting at the root of major hot spot plumes. <i>Science</i> , 2017 , 357, 393-397	33.3	56
175	PKP(BC-DF) Travel time residuals and short scale heterogeneity in the deep Earth. <i>Geophysical Research Letters</i> , 1999 , 26, 3169-3172	4.9	56
174	The Spitak (Armenia) earthquake of 7 December 1988: field observations, seismology and tectonics. <i>Nature</i> , 1989 , 339, 675-679	50.4	55
173	Short wavelength topography on the inner-core boundary. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007 , 104, 31-5	11.5	54

172	Layered structure in the upper mantle across North America from joint inversion of long and short period seismic data. <i>Earth and Planetary Science Letters</i> , 2016 , 449, 164-175	5.3	53
171	Joint inversion for three-dimensional S velocity mantle structure along the Tethyan margin. <i>Journal of Geophysical Research</i> , 2010 , 115,		52
170	Anisotropy in the deep Earth. <i>Physics of the Earth and Planetary Interiors</i> , 2017 , 269, 58-90	2.3	51
169	Deformation in the lowermost mantle: From polycrystal plasticity to seismic anisotropy. <i>Earth and Planetary Science Letters</i> , 2011 , 306, 33-45	5.3	50
168	Using seismic waves to image Earth's internal structure. <i>Nature</i> , 2008 , 451, 266-8	50.4	50
167	P'P' Precursors Under Africa: Evidence for Mid-Mantle Reflectors. <i>Science</i> , 1995 , 270, 74-77	33.3	50
166	Towards global earth tomography using the spectral element method: a technique based on source stacking. <i>Geophysical Journal International</i> , 2005 , 162, 541-554	2.6	49
165	Non-linear crustal corrections in high-resolution regional waveform seismic tomography. <i>Geophysical Journal International</i> , 2007 , 170, 460-467	2.6	48
164	Constraints on density and shear velocity contrasts at the inner core boundary. <i>Geophysical Journal International</i> , 2004 , 157, 1146-1151	2.6	48
163	An observation of PKJKP: inferences on inner core shear properties. <i>Science</i> , 2005 , 308, 1453-5	33.3	48
162	First-order asymptotics for the eigenfrequencies of the Earth and application to the retrieval of large-scale lateral variations of structure. <i>Geophysical Journal International</i> , 1986 , 87, 209-239	2.6	48
161	On scaling relations for large earthquakes. <i>Bulletin of the Seismological Society of America</i> , 1993 , 83, 1294-1297	4.8	48
160	A new formalism for the effect of lateral heterogeneity on normal modes and surface waves--I: isotropic perturbations, perturbations of interfaces and gravitational perturbations. <i>Geophysical Journal International</i> , 1988 , 92, 207-221	2.6	45
159	An experiment in the retrieval of depth and source mechanism of large earthquakes using very long-period Rayleigh wave data. <i>Bulletin of the Seismological Society of America</i> , 1984 , 74, 417-437	2.3	45
158	On the origin of complexity in PKP travel time data. <i>Geodynamic Series</i> , 2003 , 31-44		44
157	A study of large-scale lateral variations of P velocity in the upper mantle beneath western Europe. <i>Geophysical Journal International</i> , 1980 , 63, 217-232	2.6	44
156	Observations of changing anisotropy across the southern margin of the African LLSVP. <i>Geophysical Journal International</i> , 2013 , 195, 1184-1195	2.6	42
155	Rapid Finite-source Analysis and Near-fault Strong Ground Motions: Application to the 2003 Mw 6.5 San Simeon and 2004 Mw 6.0 Parkfield Earthquakes. <i>Seismological Research Letters</i> , 2005 , 76, 40-48	3	42

154	The one-bit noise correlation: a theory based on the concepts of coherent and incoherent noise. <i>Geophysical Journal International</i> , 2011 , 184, 1397-1414	2.6	41
153	Inferring the thermochemical structure of the upper mantle from seismic data. <i>Geophysical Journal International</i> , 2009 , 179, 1169-1185	2.6	41
152	Imaging 3-D spherical convection models: What can seismic tomography tell us about mantle dynamics?. <i>Geophysical Research Letters</i> , 1997 , 24, 1299-1302	4.9	41
151	Anisotropy in the inner core: relation between P-velocity and attenuation. <i>Physics of the Earth and Planetary Interiors</i> , 1997 , 101, 33-47	2.3	41
150	Attenuation Tomography of the Earth's Mantle: A Review of Current Status. <i>Pure and Applied Geophysics</i> , 1998 , 153, 257-272	2.2	41
149	Moment tensor inversion of long period Rayleigh waves: A new approach. <i>Journal of Geophysical Research</i> , 1982 , 87, 5395-5407		41
148	On the numerical implementation of time-reversal mirrors for tomographic imaging. <i>Geophysical Journal International</i> , 2014 , 196, 1580-1599	2.6	39
147	Rupture processes of large deep-focus earthquakes from inversion of moment rate functions. <i>Journal of Geophysical Research</i> , 1999 , 104, 863-894		39
146	The upper mantle degree two pattern: Constraints from geoscope fundamental spheroidal mode eigenfrequency and attenuation measurements. <i>Geophysical Research Letters</i> , 1987 , 14, 1219-1222	4.9	39
145	Seismological constraints on attenuation in the Earth: A review. <i>Geophysical Monograph Series</i> , 2000 , 119, 161-179	1.1	38
144	A new formalism for the effect of lateral heterogeneity on normal modes and surface waves-II. General anisotropic perturbation. <i>Geophysical Journal International</i> , 1988 , 93, 91-99	2.6	38
143	The COSY Project: verification of global seismic modeling algorithms. <i>Physics of the Earth and Planetary Interiors</i> , 2000 , 119, 3-23	2.3	36
142	Anelastic tomography: a new perspective on upper mantle thermal structure. <i>Earth and Planetary Science Letters</i> , 1994 , 128, 113-121	5.3	36
141	On the measurement of anelastic attenuation using amplitudes of low-frequency surface waves. <i>Physics of the Earth and Planetary Interiors</i> , 1994 , 84, 179-191	2.3	36
140	The French Pilot Experiment OFM-SISMOBS: first scientific results on noise level and event detection. <i>Physics of the Earth and Planetary Interiors</i> , 1994 , 84, 321-336	2.3	35
139	Seismic waveform modeling and surface wave tomography in a three-dimensional Earth: asymptotic and non-asymptotic approaches. <i>Physics of the Earth and Planetary Interiors</i> , 2000 , 119, 37-56 ²⁻³		34
138	The 23 May 1989 MacQuarie Ridge Earthquake: A very broad band analysis. <i>Geophysical Research Letters</i> , 1990 , 17, 993-996	4.9	34
137	Coupling spectral elements and modes in a spherical Earth: an extension to the Sandwich Case. <i>Geophysical Journal International</i> , 2003 , 154, 44-57	2.6	33

136	On moment-length scaling of large strike slip earthquakes and the strength of faults. <i>Geophysical Research Letters</i> , 2002 , 29, 45-1	4.9	33
135	Accessing northern California earthquake data via Internet. <i>Eos</i> , 1994 , 75, 257	1.5	33
134	Depth dependent azimuthal anisotropy in the western US upper mantle. <i>Earth and Planetary Science Letters</i> , 2010 , 300, 385-394	5.3	32
133	Locating scatterers in the mantle using array analysis of PKP precursors from an earthquake doublet. <i>Earth and Planetary Science Letters</i> , 2007 , 255, 22-31	5.3	32
132	The GEOSCOPE program: Present status and perspectives. <i>Bulletin of the Seismological Society of America</i> , 1991 , 81, 243-264	2.3	31
131	Synthetic seismic anisotropy models within a slab impinging on the core-mantle boundary. <i>Geophysical Journal International</i> , 2014 , 199, 164-177	2.6	30
130	Seismic waveform modelling in a 3-D Earth using the Born approximation: potential shortcomings and a remedy. <i>Geophysical Journal International</i> , 2009 , 177, 161-178	2.6	29
129	Short scale heterogeneity in the lowermost mantle: insights from PcP-P and ScS-S data. <i>Earth and Planetary Science Letters</i> , 2002 , 201, 57-68	5.3	29
128	Multidisciplinary Constraints on the Abundance of Diamond and Eclogite in the Cratonic Lithosphere. <i>Geochemistry, Geophysics, Geosystems</i> , 2018 , 19, 2062-2086	3.6	27
127	The seismic OPTIMISM experiment. <i>Planetary and Space Science</i> , 1998 , 46, 739-747	2	27
126	Toward a federation of broadband seismic networks. <i>Eos</i> , 1986 , 67, 541	1.5	27
125	On an improved method to obtain the moment tensor and depth of earthquakes from the amplitude spectrum of Rayleigh waves. <i>Bulletin of the Seismological Society of America</i> , 1983 , 73, 1513-1526	2.3	27
124	Imaging anisotropic layering with Bayesian inversion of multiple data types. <i>Geophysical Journal International</i> , 2016 , 206, 605-629	2.6	27
123	Deep Earth Structure [Q] of the Earth from Crust to Core 2007 , 731-774		26
122	Box tomography: localized imaging of remote targets buried in an unknown medium, a step forward for understanding key structures in the deep Earth. <i>Geophysical Journal International</i> , 2017 , 211, 141-163	2.6	25
121	Primitive Helium Is Sourced From Seismically Slow Regions in the Lowermost Mantle. <i>Geochemistry, Geophysics, Geosystems</i> , 2019 , 20, 4130-4145	3.6	25
120	On the computation of long period seismograms in a 3-D earth using normal mode based approximations. <i>Geophysical Journal International</i> , 2008 , 175, 520-536	2.6	25
119	Test of the innermost inner core models using broadband PKIKP travel time residuals. <i>Geophysical Research Letters</i> , 2007 , 34,	4.9	25

118	Observations of infragravity waves at the Monterey ocean bottom broadband station (MOBB). <i>Geochemistry, Geophysics, Geosystems</i> , 2005 , 6, n/a-n/a	3.6	25
117	Long-period seismology on Europa: 2. Predicted seismic response. <i>Journal of Geophysical Research</i> , 2006 , 111, n/a-n/a		25
116	Regional geodynamic implications of the May-July 1990 earthquake sequence in southern Sudan. <i>Tectonophysics</i> , 1992 , 209, 87-103	3.1	25
115	A Lithosphere-Asthenosphere Boundary Global Model Derived from Multimode Surface-Wave Tomography and Petrology. <i>Geophysical Monograph Series</i> , 2018 , 111-123	1.1	25
114	Depth resolution of earthquakes in central Asia by moment tensor inversion of long-period Rayleigh waves: Effects of phase velocity variations across Eurasia and their calibration. <i>Journal of Geophysical Research</i> , 1981 , 86, 5963-5984		24
113	The effects of the theoretical formalism and data selection on mantle models derived from waveform tomography. <i>Geophysical Journal International</i> , 1999 , 138, 366-380	2.6	23
112	Finite fault source study of the Great 1994 Deep Bolivia Earthquake. <i>Geophysical Research Letters</i> , 1996 , 23, 1589-1592	4.9	23
111	Reconsideration of the relations between S and P Station anomalies in North America. <i>Geophysical Research Letters</i> , 1980 , 7, 417-420	4.9	23
110	Box Tomography: first application to the imaging of upper-mantle shear velocity and radial anisotropy structure beneath the North American continent. <i>Geophysical Journal International</i> , 2018 , 213, 1849-1875	2.6	22
109	Radial profiles of seismic attenuation in the upper mantle based on physical models. <i>Geophysical Journal International</i> , 2008 , 175, 116-134	2.6	22
108	Seismic anisotropy in the Earth's innermost inner core: Testing structural models against mineral physics predictions. <i>Geophysical Research Letters</i> , 2016 , 43, 93-100	4.9	21
107	Degrees 2, 4, 6 inferred from seismic tomography. <i>Geophysical Research Letters</i> , 1993 , 20, 631-634	4.9	21
106	Fast computation of synthetic seismograms within a medium containing remote localized perturbations: a numerical solution to the scattering problem. <i>Geophysical Journal International</i> , 2017 , 208, 674-692	2.6	20
105	MOISE: A pilot experiment towards long term sea-floor geophysical observatories. <i>Earth, Planets and Space</i> , 1998 , 50, 927-937	2.9	20
104	A first step toward an oceanic geophysical observatory. <i>Eos</i> , 1994 , 75, 150	1.5	20
