

Catherine J Mondloch

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5381302/catherine-j-mondloch-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
93	Learning faces from variability: Four- and five-year-olds differ from older children and adults. <i>Journal of Experimental Child Psychology</i> , 2022 , 213, 105259	2.3	0
92	Face masks have a limited influence on first impressions: evidence from three experiments.. <i>Perception</i> , 2022 , 51, 417-434	1.2	0
91	Learning and recognizing facial identity in variable images: New insights from older adults. <i>Visual Cognition</i> , 2021 , 29, 708-731	1.8	0
90	The influence of postural emotion cues on implicit trait judgements. <i>Motivation and Emotion</i> , 2021 , 45, 641-648	2.5	0
89	Ensemble coding of facial identity is not refined by experience: Evidence from other-race and inverted faces. <i>British Journal of Psychology</i> , 2021 , 112, 265-281	4	5
88	Mandatory First Impressions: Happy Expressions Increase Trustworthiness Ratings of Subsequent Neutral Images. <i>Perception</i> , 2021 , 50, 103-115	1.2	1
87	First impressions of child faces: Facial trustworthiness influences adults' interpretations of children's behavior in ambiguous situations. <i>Journal of Experimental Child Psychology</i> , 2021 , 208, 105153 ^{2,3}	2.3	1
86	Similar use of shape and texture cues for own- and other-race faces during face learning and recognition. <i>Vision Research</i> , 2021 , 188, 32-41	2.1	2
85	Recognizing, discriminating, and labeling emotional expressions in a free-sorting task: A developmental story. <i>Emotion</i> , 2020 ,	4.1	2
84	Visual configural processing in adults born at extremely low birth weight. <i>Developmental Science</i> , 2020 , 23, e12890	4.5	4
83	Interactive situations reveal more about children's emotional knowledge. <i>Journal of Experimental Child Psychology</i> , 2020 , 198, 104879	2.3	2
82	Two Sides of Face Learning: Improving Between-Identity Discrimination While Tolerating More Within-Person Variability in Appearance. <i>Perception</i> , 2019 , 48, 1124-1145	1.2	0
81	Evidence for a young adult face bias in accuracy and consensus of age estimates. <i>British Journal of Psychology</i> , 2019 , 110, 652-669	4	4
80	Children's perception of emotions in the context of live interactions: Eye movements and emotion judgements. <i>Behavioural Processes</i> , 2019 , 164, 193-200	1.6	5
79	Perceptual Experience and Within-Person Variability Affect the Magnitude of the Other-Race Effect. <i>Journal of Vision</i> , 2019 , 19, 153c	0.4	
78	Learning newly encountered faces from variable images in adults and children. <i>Journal of Vision</i> , 2019 , 19, 139	0.4	
77	No experimental evidence for emotion-specific gaze cueing in a threat context. <i>Cognition and Emotion</i> , 2019 , 33, 1144-1154	2.3	2

76	The influence of subtle facial expressions on children's first impressions of trustworthiness and dominance is not adult-like. <i>Journal of Experimental Child Psychology</i> , 2019 , 180, 19-38	2.3	12
75	Attending to identity cues reduces the own-age but not the own-race recognition advantage. <i>Vision Research</i> , 2019 , 157, 184-191	2.1	13
74	Encoding differences affect the number and precision of own-race versus other-race faces stored in visual working memory. <i>Attention, Perception, and Psychophysics</i> , 2018 , 80, 702-712	2	9
73	Improving Identity Matching of Newly Encountered Faces: Effects of Multi-image Training. <i>Journal of Applied Research in Memory and Cognition</i> , 2018 , 7, 280-290	2.3	13
72	Finding an unfamiliar face in a line-up: Viewing multiple images of the target is beneficial on target-present trials but costly on target-absent trials. <i>British Journal of Psychology</i> , 2018 , 109, 758-776	4	10
71	Children's visual attention to emotional expressions varies with stimulus movement. <i>Journal of Experimental Child Psychology</i> , 2018 , 172, 13-24	2.3	7
70	Representing Facial Expressions in Visual Working Memory: A Novel Adaptation of the Continuous Response Paradigm. <i>Journal of Vision</i> , 2018 , 18, 612	0.4	
69	Getting to know you: The development of mechanisms underlying face learning. <i>Journal of Experimental Child Psychology</i> , 2018 , 167, 295-313	2.3	10
68	Becoming Familiar With a Newly Encountered Face: Evidence of an Own-Race Advantage. <i>Perception</i> , 2018 , 47, 807-820	1.2	10
67	How does a newly encountered face become familiar? The effect of within-person variability on adults' and children's perception of identity. <i>Cognition</i> , 2017 , 161, 19-30	3.5	27
66	Adults' and children's perception of facial expressions is influenced by body postures even for dynamic stimuli. <i>Visual Cognition</i> , 2017 , 25, 563-574	1.8	16
65	That's my teacher! Children's ability to recognize personally familiar and unfamiliar faces improves with age. <i>Journal of Experimental Child Psychology</i> , 2016 , 143, 123-38	2.3	20
64	Judging Normality and Attractiveness in Faces: Direct Evidence of a More Refined Representation for Own-Race, Young Adult Faces. <i>Perception</i> , 2016 , 45, 973-90	1.2	10
63	The flip side of the other-race coin: They all look different to me. <i>British Journal of Psychology</i> , 2016 , 107, 374-88	4	38
62	Recognizing "Bella Swan" and "Hermione Granger": No Own-Race Advantage in Recognizing Photos of Famous Faces. <i>Perception</i> , 2016 , 45, 1426-1429	1.2	28
61	Attractiveness judgments and discrimination of mommies and grandmas: perceptual tuning for young adult faces. <i>Journal of Experimental Child Psychology</i> , 2015 , 129, 1-11	2.3	3
60	Attentional biases and recognition accuracy: What happens when multiple own- and other-race faces are encountered simultaneously?. <i>Perception</i> , 2015 , 44, 52-70	1.2	6
59	The own-age face recognition bias is task dependent. <i>British Journal of Psychology</i> , 2015 , 106, 446-67	4	13

58	Representing young and older adult faces: Shared or age-specific prototypes?. <i>Visual Cognition</i> , 2015 , 23, 939-956	1.8	6
57	Category-specific face prototypes are emerging, but not yet mature, in 5-year-old children. <i>Journal of Experimental Child Psychology</i> , 2014 , 126, 161-77	2.3	14
56	Impact of total sleep deprivation on behavioural neural processing of emotionally expressive faces. <i>Experimental Brain Research</i> , 2014 , 232, 1429-42	2.3	57
55	Early visual deprivation from congenital cataracts disrupts activity and functional connectivity in the face network. <i>Neuropsychologia</i> , 2014 , 57, 122-39	3.2	56
54	The neural correlates of the face attractiveness aftereffect: a functional near-infrared spectroscopy (fNIRS) study. <i>NeuroImage</i> , 2014 , 85 Pt 1, 363-71	7.9	15
53	Differential attentional allocation and subsequent recognition for young and older adult faces. <i>Visual Cognition</i> , 2014 , 22, 1272-1295	1.8	8
52	Wide eyes and drooping arms: adult-like congruency effects emerge early in the development of sensitivity to emotional faces and body postures. <i>Journal of Experimental Child Psychology</i> , 2013 , 114, 203-16	2.3	26
51	Infant face preferences after binocular visual deprivation. <i>International Journal of Behavioral Development</i> , 2013 , 37, 148-153	2.6	37
50	The effect of early visual deprivation on the development of face detection. <i>Developmental Science</i> , 2013 , 16, 728-42	4.5	59
49	Aging faces and aging perceivers: young and older adults are less sensitive to deviations from normality in older than in young adult faces. <i>Perception</i> , 2013 , 42, 795-812	1.2	12
48	Asymmetries of influence: differential effects of body postures on perceptions of emotional facial expressions. <i>PLoS ONE</i> , 2013 , 8, e73605	3.7	17
47	Detection of Propensity for Aggression based on Facial Structure Irrespective of Face Race. <i>Evolution and Human Behavior</i> , 2012 , 33, 121-129	4	44
46	The timing of individual face recognition in the brain. <i>Neuropsychologia</i> , 2012 , 50, 1451-61	3.2	43
45	Effects of normal and abnormal visual experience on the development of opposing aftereffects for upright and inverted faces. <i>Developmental Science</i> , 2012 , 15, 194-203	4.5	16
44	Sad or fearful? The influence of body posture on adults' and children's perception of facial displays of emotion. <i>Journal of Experimental Child Psychology</i> , 2012 , 111, 180-96	2.3	41
43	Facing aggression: cues differ for female versus male faces. <i>PLoS ONE</i> , 2012 , 7, e30366	3.7	42
42	Recognizing identity in the face of change: the development of an expression-independent representation of facial identity. <i>Journal of Vision</i> , 2012 , 12,	0.4	10
41	The development of norm-based coding and race-specific face prototypes: an examination of 5- and 8-year-olds' face space. <i>Journal of Experimental Child Psychology</i> , 2011 , 108, 338-57	2.3	65

40	Telling one face from another: electrocortical correlates of facial characteristics among individual female faces. <i>Neuropsychologia</i> , 2011 , 49, 3254-64	3.2	11
39	The function and specificity of sensitivity to cues to facial identity: an individual-differences approach. <i>Perception</i> , 2010 , 39, 819-29	1.2	11
38	Discrimination of facial features by adults, 10-year-olds, and cataract-reversal patients. <i>Perception</i> , 2010 , 39, 184-94	1.2	69
37	Estimating aggression from emotionally neutral faces: which facial cues are diagnostic?. <i>Perception</i> , 2010 , 39, 356-77	1.2	79
36	The importance of social factors is a matter of perception. <i>Perception</i> , 2010 , 39, 1562-4	1.2	14
35	Processes underlying the cross-race effect: an investigation of holistic, featural, and relational processing of own-race versus other-race faces. <i>Perception</i> , 2010 , 39, 1065-85	1.2	73
34	Shy children are less sensitive to some cues to facial recognition. <i>Child Psychiatry and Human Development</i> , 2010 , 41, 1-14	3.3	16
33	Deficits in sensitivity to spacing after early visual deprivation in humans: a comparison of human faces, monkey faces, and houses. <i>Developmental Psychobiology</i> , 2010 , 52, 775-81	3	72
32	The Facial Width-to-Height Ratio as a Basis for Estimating Aggression from Emotionally Neutral Faces. <i>Journal of Vision</i> , 2010 , 10, 599-599	0.4	3
31	Face adaptation and attractiveness aftereffects in 8-year-olds and adults. <i>Child Development</i> , 2009 , 80, 178-91	4.9	45
30	Shyness and face scanning in children. <i>Journal of Anxiety Disorders</i> , 2009 , 23, 909-14	10.9	29
29	Children's representations of facial expression and identity: identity-contingent expression aftereffects. <i>Journal of Experimental Child Psychology</i> , 2009 , 104, 326-45	2.3	26
28	Facial structure is a reliable cue of aggressive behavior. <i>Psychological Science</i> , 2009 , 20, 1194-8	7.9	296
27	Contact and other-race effects in configural and component processing of faces. <i>British Journal of Psychology</i> , 2009 , 100, 717-28	4	57
26	Limitations in 4-year-old children's sensitivity to the spacing among facial features. <i>Child Development</i> , 2008 , 79, 1513-23	4.9	31
25	The effect of face orientation on holistic processing. <i>Perception</i> , 2008 , 37, 1175-86	1.2	56
24	The composite face effect in six-year-old children: Evidence of adult-like holistic face processing. <i>Visual Cognition</i> , 2007 , 15, 564-577	1.8	76
23	Sleeper effects. <i>Developmental Science</i> , 2007 , 10, 40-7	4.5	110

22	Neural correlates of processing facial identity based on features versus their spacing. <i>Neuropsychologia</i> , 2007 , 45, 1438-51	3.2	112
21	Effects of early visual deprivation on perceptual and cognitive development. <i>Progress in Brain Research</i> , 2007 , 164, 87-104	2.9	39
20	Becoming a face expert. <i>Psychological Science</i> , 2006 , 17, 930-4	7.9	120
19	What aspects of face processing are impaired in developmental prosopagnosia?. <i>Brain and Cognition</i> , 2006 , 61, 139-58	2.7	165
18	Recognizing the face of Johnny, Suzy, and me: insensitivity to the spacing among features at 4 years of age. <i>Child Development</i> , 2006 , 77, 234-43	4.9	40
17	The shape of boubas: sound-shape correspondences in toddlers and adults. <i>Developmental Science</i> , 2006 , 9, 316-22	4.5	308
16	Developmental changes in perceptions of attractiveness: a role of experience?. <i>Developmental Science</i> , 2006 , 9, 530-43	4.5	50
15	Missing sights: consequences for visual cognitive development. <i>Trends in Cognitive Sciences</i> , 2005 , 9, 144-51	14	99
14	Impairment in holistic face processing following early visual deprivation. <i>Psychological Science</i> , 2004 , 15, 762-8	7.9	253
13	Do small white balls squeak? Pitch-object correspondences in young children. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2004 , 4, 133-6	3.5	114
12	Why 8-year-olds cannot tell the difference between Steve Martin and Paul Newman: factors contributing to the slow development of sensitivity to the spacing of facial features. <i>Journal of Experimental Child Psychology</i> , 2004 , 89, 159-81	2.3	36
11	Expert face processing requires visual input to the right hemisphere during infancy. <i>Nature Neuroscience</i> , 2003 , 6, 1108-12	25.5	289
10	Developmental changes in the processing of hierarchical shapes continue into adolescence. <i>Journal of Experimental Child Psychology</i> , 2003 , 84, 20-40	2.3	50
9	Developmental changes in face processing skills. <i>Journal of Experimental Child Psychology</i> , 2003 , 86, 67-84	2.3	209
8	The effect of early visual deprivation on the development of face processing. <i>Developmental Science</i> , 2002 , 5, 490-501	4.5	88
7	Configural face processing develops more slowly than featural face processing. <i>Perception</i> , 2002 , 31, 553-66	1.2	497
6	The many faces of configural processing. <i>Trends in Cognitive Sciences</i> , 2002 , 6, 255-260	14	1522
5	Neuroperception. Early visual experience and face processing. <i>Nature</i> , 2001 , 410, 890	50.4	366

- 4 Face Perception During Early Infancy. *Psychological Science*, **1999**, 10, 419-422 7.9 247
- 3 Cross-modal transfer of shape is difficult to demonstrate in one-month-olds. *Child Development*, **1999**, 70, 1047-57 4.9 61
- 2 The temporal pattern of unconstrained drinking: Rats' responses to inversion and identity constraints. *Journal of the Experimental Analysis of Behavior*, **1986**, 45, 5-13 2.1 3
- 1 Picture this: Photographers no better than controls for recognizing unfamiliar faces. *Perception*, 030100662210987 6.2 10987
