#	ARTICLE	IF	CITATIONS
1	Procedural and 12-month in-hospital costs of primary infra-popliteal bypass surgery, infrapopliteal best endovascular treatment, and major lower limb amputation for chronic limb threatening ischemia. <i>Journal of Vascular Surgery</i> , 2022, 75, 195-204.	0.6	9
2	Comparison of Clinical Outcomes in Patients Selected for Infra-Popliteal Bypass or Plain Balloon Angioplasty for Chronic Limb Threatening Ischemia Between 2009 and 2013. <i>Vascular and Endovascular Surgery</i> , 2021, 55, 26-32.	0.3	2
3	A Comparison of Contemporary Clinical Outcomes Following Femoro-Popliteal Plain Balloon Angioplasty and Bypass Surgery for Chronic Limb Threatening Ischemia. <i>Vascular and Endovascular Surgery</i> , 2021, 55, 544-550.	0.3	1
4	Comparison of Outcomes Following Infrapopliteal Plain Balloon Angioplasty in the BASIL Trial (1999-2004) and in a Contemporary Series (2009-2013). <i>Vascular and Endovascular Surgery</i> , 2020, 54, 141-146.	0.3	9
5	Editor's Choice "Relationship Between Global Limb Anatomic Staging System (GLASS) and Clinical Outcomes Following Revascularisation for Chronic Limb Threatening Ischaemia in the Bypass Versus Angioplasty in Severe Ischaemia of the Leg (BASIL)-1 Trial. <i>European Journal of Vascular and Endovascular Surgery</i> , 2020, 60, 687-695.	0.8	43
6	Contemporary (2009-2014) clinical outcomes after femoropopliteal bypass surgery for chronic limb threatening ischemia are inferior to those reported in the UK Bypass versus Angioplasty for Severe Ischaemia of the Leg (BASIL) trial (1999-2004). <i>Journal of Vascular Surgery</i> , 2019, 69, 1840-1847.	0.6	17
7	Publication of UK NICE Clinical Guidelines 168 has not significantly changed the management of leg ulcers in primary care: An analysis of The Health Improvement Network database. <i>Phlebology</i> , 2019, 34, 311-316.	0.6	12
8	Impact of UK NICE clinical guidelines 168 on referrals to a specialist academic leg ulcer service. <i>Phlebology</i> , 2018, 33, 84-88.	0.6	15
9	Analysis of Effect of National Institute for Health and Care Excellence Clinical Guideline CG168 on Management of Varicose Veins in Primary Care Using the Health Improvement Network Database. <i>European Journal of Vascular and Endovascular Surgery</i> , 2018, 56, 880-884.	0.8	4
10	BALloon versus Stenting in severe Ischaemia of the Leg-3 (BASIL-3): study protocol for a randomised controlled trial. <i>Trials</i> , 2017, 18, 224.	0.7	59
11	Impact of UK NICE Clinical Guidelines 168 and social deprivation on access to interventional treatment for symptomatic varicose vein and specialist referral for leg ulceration. <i>Phlebology</i> , 2017, 32, 548-552.	0.6	7
12	Bypass versus angio plasty in severe ischaemia of the leg - 2 (BASIL-2) trial: study protocol for a randomised controlled trial. <i>Trials</i> , 2016, 17, 11.	0.7	134
13	The impact of 2013 UK NICE guidelines on the management of varicose veins at the Heart of England NHS Foundation Trust, Birmingham, UK. <i>Phlebology</i> , 2016, 31, 612-616.	0.6	3
14	A review of randomised controlled trials comparing ultrasound-guided foam sclerotherapy with endothermal ablation for the treatment of great saphenous varicose veins. <i>Phlebology</i> , 2016, 31, 234-240.	0.6	45
