#	ARTICLE	IF	CITATIONS
1	Optimization Problems in Tracking Control Design for an Underactuated Ship with Feedback Delay, State and Control Constraints. Lecture Notes in Computer Science, 2020, , 71-85.	1.0	0
2	The Method of Lyapunov-Razumikhin Functions in Stability Analysis of Systems with Delay. Automation and Remote Control, 2019, 80, 1185-1229.	0.4	7
3	LMI and SDP technique for stability analysis of nonlinear delay systems subject to constraints. Optimization Letters, 2019, 13, 1937-1952.	0.9	1
4	Analysis of stability and stabilization of cascade systems with time delay in terms of linear matrix inequalities. Journal of Computer and Systems Sciences International, 2017, 56, 19-32.	0.2	8
5	On the use of a general quadratic Lyapunov function for studying the stability of Takagi-Sugeno systems. Russian Mathematics, 2017, 61, 66-72.	0.1	0
6	Razumikhin conditions in partial stability problem for delay systems. , 2016, , .		0
7	Method of limiting equations for the stability analysis of equations with infinite delay in the Carathéodory conditions: II. Differential Equations, 2014, 50, 711-721.	0.1	2
8	Method of limiting equations for the stability analysis of equations with infinite delay in the Carathéodory conditions: I. Differential Equations, 2014, 50, 569-580.	0.1	3
9	On the problem of tracking for the nonholonomic systems with provision for the feedback delay. Automation and Remote Control, 2013, 74, 1348-1355.	0.4	1
10	The design of digital stabilizing regulators for continuous systems based on the Lyapunov function approach. Automation and Remote Control, 2012, 73, 1572-1580.	0.4	1
11	The design of digital stabilizing regulators for continuous systems based on the Lyapunov function approach. Automation and Remote Control, 2012, 73, 1734-1743.	0.4	2
12	On the principle of reduction for the nonlinear delay systems. Automation and Remote Control, 2011, 72, 1864-1875.	0.4	6
13	Lyapunov-Razumikhin pairs in the instability problem for infinite delay equations. Nonlinear Analysis: Theory, Methods & Applications, 2010, 73, 2324-2333.	0.6	1
14	Control functionals in stabilization problem systems with time delay. Automation and Remote Control, 2010, 71, 902-910.	0.4	4
15	Stability in systems with unbounded aftereffect. Automation and Remote Control, 2009, 70, 1553-1564.	0.4	3
16	Development of the direct Lyapunov method for functional-differential equations with infinite delay. Mathematical Notes, 2008, 84, 826-841.	0.1	2
17	Local and semiglobal stabilization in a cascade with delay. Automation and Remote Control, 2008, 69, 968-979.	0.4	6
18	Degenerate Functions in the Analysis of Asymptotic Stability of Solutions of Functional Differential Equations. Mathematical Notes, 2005, 78, 427-431.	0.1	3

#	ARTICLE	IF	CITATIONS
19	Razumikhin-Type Theorems in the Problem on Instability of Nonautonomous Equations with Finite Delay. Funkcialaj Ekvacioj, 2004, 47, 187-204.	0.2	2
20	On employment of semidefinite functions in stability of delayed equations. Journal of Mathematical Analysis and Applications, 2003, 281, 307-319.	0.5	11
21	A Remark on the Lyapunovâ€“Razumikhin Method for Equations with Infinite Delay. Differential Equations, 2002, 38, 1423-1434.	0.1	4
