

Yota Tsuge

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5389879/yota-tsuge-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
59	?????????????????????????????????????. <i>Kagaku To Seibutsu</i> , 2021 , 59, 2-3	0	
58	Advances in metabolic engineering of <i>Corynebacterium glutamicum</i> to produce high-value active ingredients for food, feed, human health, and well-being. <i>Essays in Biochemistry</i> , 2021 , 65, 197-212	7.6	14
57	Elevated, non-proliferative temperatures change the profile of fermentation products in <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2021 , 105, 367-377	5.7	
56	Enhanced methane production from cellulose using a two-stage process involving a bioelectrochemical system and a fixed film reactor. <i>Biotechnology for Biofuels</i> , 2021 , 14, 7	7.8	3
55	Recent progress in production of amino acid-derived chemicals using <i>Corynebacterium glutamicum</i> . <i>World Journal of Microbiology and Biotechnology</i> , 2021 , 37, 49	4.4	8
54	Physiological characteristics of <i>Corynebacterium glutamicum</i> as a cell factory under anaerobic conditions. <i>Applied Microbiology and Biotechnology</i> , 2021 , 105, 6173-6181	5.7	0
53	Anaerobic glucose consumption is accelerated at non-proliferating elevated temperatures through upregulation of a glucose transporter gene in <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2020 , 104, 6719-6729	5.7	1
52	Automatic Redirection of Carbon Flux between Glycolysis and Pentose Phosphate Pathway Using an Oxygen-Responsive Metabolic Switch in. <i>ACS Synthetic Biology</i> , 2020 , 9, 814-826	5.7	14
51	Requirement of de novo synthesis of pyruvate carboxylase in long-term succinic acid production in <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2020 , 104, 4313-4320	5.7	3
50	Optimal Ratio of Carbon Flux between Glycolysis and the Pentose Phosphate Pathway for Amino Acid Accumulation in. <i>ACS Synthetic Biology</i> , 2020 , 9, 1615-1622	5.7	7
49	Less biomass and intracellular glutamate in anodic biofilms lead to efficient electricity generation by microbial fuel cells. <i>Biotechnology for Biofuels</i> , 2019 , 12, 72	7.8	10
48	Metabolic engineering of <i>Corynebacterium glutamicum</i> for hyperproduction of polymer-grade L- and D-lactic acid. <i>Applied Microbiology and Biotechnology</i> , 2019 , 103, 3381-3391	5.7	15
47	Enhanced production of d-lactate from mixed sugars in <i>Corynebacterium glutamicum</i> by overexpression of glycolytic genes encoding phosphofructokinase and triosephosphate isomerase. <i>Journal of Bioscience and Bioengineering</i> , 2019 , 127, 288-293	3.3	11
46	Application of microalgae hydrolysate as a fermentation medium for microbial production of 2-pyrone 4,6-dicarboxylic acid. <i>Journal of Bioscience and Bioengineering</i> , 2018 , 125, 717-722	3.3	9
45	Metabolic engineering of <i>Corynebacterium glutamicum</i> for production of sunscreen shinorine. <i>Bioscience, Biotechnology and Biochemistry</i> , 2018 , 82, 1252-1259	2.1	10
44	Changes in the microbial consortium during dark hydrogen fermentation in a bioelectrochemical system increases methane production during a two-stage process. <i>Biotechnology for Biofuels</i> , 2018 , 11, 173	7.8	9
43	Dimethyl sulfoxide enhances both the cellulose dissolution ability and biocompatibility of a carboxylate-type liquid zwitterion. <i>New Journal of Chemistry</i> , 2018 , 42, 13225-13228	3.6	22

42	Lignocellulose nanofibers prepared by ionic liquid pretreatment and subsequent mechanical nanofibrillation of bagasse powder: Application to esterified bagasse/polypropylene composites. <i>Carbohydrate Polymers</i> , 2018 , 182, 8-14	10.3	27
41	Pretreatment of bagasse with a minimum amount of cholinium ionic liquid for subsequent saccharification at high loading and co-fermentation for ethanol production. <i>Chemical Engineering Journal</i> , 2018 , 334, 657-663	14.7	27
40	Oxidative depolymerization potential of biorefinery lignin obtained by ionic liquid pretreatment and subsequent enzymatic saccharification of eucalyptus. <i>Industrial Crops and Products</i> , 2018 , 111, 457-461	5.9	15
39	Sucrose purification and repeated ethanol production from sugars remaining in sweet sorghum juice subjected to a membrane separation process. <i>Applied Microbiology and Biotechnology</i> , 2017 , 101, 6007-6014	5.7	8
38	1,5-Diaminopentane production from xylooligosaccharides using metabolically engineered <i>Corynebacterium glutamicum</i> displaying beta-xylosidase on the cell surface. <i>Bioresource Technology</i> , 2017 , 245, 1684-1691	11	32
37	Ionic liquid pretreatment of bagasse improves mechanical property of bagasse/polypropylene composites. <i>Industrial Crops and Products</i> , 2017 , 109, 158-162	5.9	19
36	Molecular dynamics simulation on elastic anisotropy and slip systems of crystalline phase of polypropylene. <i>Transactions of the JSME (in Japanese)</i> , 2017 , 83, 16-00525-16-00525	0.2	
35	Design of Wall-Destructive but Membrane-Compatible Solvents. <i>Journal of the American Chemical Society</i> , 2017 , 139, 16052-16055	16.4	32
34	Production of Amino Acids (L-Glutamic Acid and L-Lysine) from Biomass. <i>Biofuels and Biorefineries</i> , 2017 , 437-455	0.3	1
33	Toward the complete utilization of rice straw: Methane fermentation and lignin recovery by a combinational process involving mechanical milling, supporting material and nanofiltration. <i>Bioresource Technology</i> , 2016 , 216, 830-7	11	20
32	FudC, a protein primarily responsible for furfural detoxification in <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2016 , 100, 2685-92	5.7	14
31	Comparative metabolic state of microflora on the surface of the anode electrode in a microbial fuel cell operated at different pH conditions. <i>AMB Express</i> , 2016 , 6, 125	4.1	10
30	Engineering cell factories for producing building block chemicals for bio-polymer synthesis. <i>Microbial Cell Factories</i> , 2016 , 15, 19	6.4	58
29	Mechanical milling and membrane separation for increased ethanol production during simultaneous saccharification and co-fermentation of rice straw by xylose-fermenting <i>Saccharomyces cerevisiae</i> . <i>Bioresource Technology</i> , 2015 , 185, 263-8	11	26
28	Precipitate obtained following membrane separation of hydrothermally pretreated rice straw liquid revealed by 2D NMR to have high lignin content. <i>Biotechnology for Biofuels</i> , 2015 , 8, 88	7.8	20
27	Glucose consumption rate critically depends on redox state in <i>Corynebacterium glutamicum</i> under oxygen deprivation. <i>Applied Microbiology and Biotechnology</i> , 2015 , 99, 5573-82	5.7	16
26	Overexpression of the phosphofructokinase encoding gene is crucial for achieving high production of D-lactate in <i>Corynebacterium glutamicum</i> under oxygen deprivation. <i>Applied Microbiology and Biotechnology</i> , 2015 , 99, 4679-89	5.7	42
25	Repeated ethanol production from sweet sorghum juice concentrated by membrane separation. <i>Bioresource Technology</i> , 2015 , 186, 351-355	11	17

24	3-Amino-4-hydroxybenzoic acid production from sweet sorghum juice by recombinant <i>Corynebacterium glutamicum</i> . <i>Bioresource Technology</i> , 2015 , 198, 410-7	11	23
23	Recent advances in the metabolic engineering of <i>Corynebacterium glutamicum</i> for the production of lactate and succinate from renewable resources. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2015 , 42, 375-89	4.2	27
22	Phenyllactic acid production by simultaneous saccharification and fermentation of pretreated sorghum bagasse. <i>Bioresource Technology</i> , 2015 , 182, 169-178	11	24
21	Two-step production of D-lactate from mixed sugars by growing and resting cells of metabolically engineered <i>Lactobacillus plantarum</i> . <i>Applied Microbiology and Biotechnology</i> , 2014 , 98, 4911-8	5.7	19
20	Simultaneous saccharification and fermentation of kraft pulp by recombinant <i>Escherichia coli</i> for phenyllactic acid production. <i>Biochemical Engineering Journal</i> , 2014 , 88, 188-194	4.2	36
19	Detoxification of furfural in <i>Corynebacterium glutamicum</i> under aerobic and anaerobic conditions. <i>Applied Microbiology and Biotechnology</i> , 2014 , 98, 8675-83	5.7	20
18	Comparison of metabolomic profiles of microbial communities between stable and deteriorated methanogenic processes. <i>Bioresource Technology</i> , 2014 , 172, 83-90	11	12
17	Increased ethanol production from sweet sorghum juice concentrated by a membrane separation process. <i>Bioresource Technology</i> , 2014 , 169, 821-825	11	14
16	Optimized membrane process to increase hemicellulosic ethanol production from pretreated rice straw by recombinant xylose-fermenting <i>Saccharomyces cerevisiae</i> . <i>Bioresource Technology</i> , 2014 , 169, 380-386	11	15
15	Increase in lactate yield by growing <i>Corynebacterium glutamicum</i> in a bioelectrochemical reactor. <i>Journal of Bioscience and Bioengineering</i> , 2014 , 117, 598-601	3.3	15
14	Reactions upstream of glycerate-1,3-bisphosphate drive <i>Corynebacterium glutamicum</i> (D)-lactate productivity under oxygen deprivation. <i>Applied Microbiology and Biotechnology</i> , 2013 , 97, 6693-703	5.7	27
13	Utilization of lactic acid bacterial genes in <i>Synechocystis</i> sp. PCC 6803 in the production of lactic acid. <i>Bioscience, Biotechnology and Biochemistry</i> , 2013 , 77, 966-70	2.1	25
12	Direct production of organic acids from starch by cell surface-engineered <i>Corynebacterium glutamicum</i> in anaerobic conditions. <i>AMB Express</i> , 2013 , 3, 72	4.1	24
11	Deletion of <i>cgR_1596</i> and <i>cgR_2070</i> , encoding NlpC/P60 proteins, causes a defect in cell separation in <i>Corynebacterium glutamicum</i> R. <i>Journal of Bacteriology</i> , 2008 , 190, 8204-14	3.5	29
10	Isolation of a new insertion sequence, IS13655, and its application to <i>Corynebacterium glutamicum</i> genome mutagenesis. <i>Bioscience, Biotechnology and Biochemistry</i> , 2007 , 71, 1683-90	2.1	4
9	Random segment deletion based on IS31831 and Cre/loxP excision system in <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2007 , 74, 1333-41	5.7	24
8	Comparative analysis of the <i>Corynebacterium glutamicum</i> group and complete genome sequence of strain R. <i>Microbiology (United Kingdom)</i> , 2007 , 153, 1042-1058	2.9	212
7	High-throughput transposon mutagenesis of <i>Corynebacterium glutamicum</i> and construction of a single-gene disruptant mutant library. <i>Applied and Environmental Microbiology</i> , 2006 , 72, 3750-5	4.8	82

6	A new insertion sequence, IS14999, from <i>Corynebacterium glutamicum</i> . <i>Microbiology (United Kingdom)</i> , 2005 , 151, 501-508	2.9	9
5	Cre/loxP-mediated deletion system for large genome rearrangements in <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2005 , 67, 225-33	5.7	41
4	Multiple large segment deletion method for <i>Corynebacterium glutamicum</i> . <i>Applied Microbiology and Biotechnology</i> , 2005 , 69, 151-61	5.7	38
3	Large-scale engineering of the <i>Corynebacterium glutamicum</i> genome. <i>Applied and Environmental Microbiology</i> , 2005 , 71, 3369-72	4.8	62
2	Isolation and characterization of a native composite transposon, Tn14751, carrying 17.4 kilobases of <i>Corynebacterium glutamicum</i> chromosomal DNA. <i>Applied and Environmental Microbiology</i> , 2005 , 71, 407-16	4.8	18
1	New multiple-deletion method for the <i>Corynebacterium glutamicum</i> genome, using a mutant lox sequence. <i>Applied and Environmental Microbiology</i> , 2005 , 71, 8472-80	4.8	81
