Glauber S F Da Silva

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/5396396/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Strategies adopted by undergraduate teaching assistants in physiology and biophysics education during the COVID-19 pandemic. American Journal of Physiology - Advances in Physiology Education, 2022, 46, 351-357.	1.6	3
2	Lesion of Serotonergic Afferents to the Retrotrapezoid Nucleus Impairs the Tachypneic Response to Hypercapnia in Unanesthetized Animals. Neuroscience, 2021, 452, 63-77.	2.3	4
3	Role of hydrogen sulfide in ventilatory responses to hypercapnia in the medullary raphe of adult rats. Experimental Physiology, 2021, 106, 1992-2001.	2.0	7
4	A Biosafety Level 2 Mouse Model for Studying Betacoronavirus-Induced Acute Lung Damage and Systemic Manifestations. Journal of Virology, 2021, 95, e0127621.	3.4	23
5	Inhibition of nNOS in the paraventricular nucleus of hypothalamus decreases exercise-induced hyperthermia. Brain Research Bulletin, 2021, 177, 64-72.	3.0	4
6	Cardiorespiratory and thermal responses to hypercapnia in chickens exposed to CO2 during embryonic development. Respiratory Physiology and Neurobiology, 2020, 273, 103317.	1.6	7
7	Differential modulation of active expiration during hypercapnia by the medullary raphe in unanesthetized rats. Pflugers Archiv European Journal of Physiology, 2020, 472, 1563-1576.	2.8	4
8	Commentaries on Viewpoint: Time to reconsider how ventilation is regulated above the respiratory compensation point during incremental exercise. Journal of Applied Physiology, 2020, 128, 1450-1455.	2.5	1
9	Buccal jet streaming and dead space determination in the South American lungfish, Lepidosiren paradoxa. Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology, 2019, 235, 159-165.	1.8	3
10	Respiratory control of acid-base status in lungfish. Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology, 2019, 237, 110533.	1.8	4
11	Central administration of aminooxyacetate, an inhibitor of H2S production, affects thermoregulatory but not cardiovascular and ventilatory responses to hypercapnia in spontaneously hypertensive rats. Respiratory Physiology and Neurobiology, 2019, 263, 38-46.	1.6	8
12	Panic-like escape response elicited in mice by exposure to CO2, but not hypoxia. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2018, 81, 178-186.	4.8	24
13	Hypercapniaâ€induced active expiration increases in sleep and enhances ventilation in unanaesthetized rats. Journal of Physiology, 2018, 596, 3271-3283.	2.9	27
14	Carotid body removal normalizes arterial blood pressure and respiratory frequency in offspring of protein-restricted mothers. Hypertension Research, 2018, 41, 1000-1012.	2.7	5
15	Effects of aerial hypoxia and temperature on pulmonary breathing pattern and gas exchange in the South American lungfish, Lepidosiren paradoxa. Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology, 2017, 207, 107-115.	1.8	5
16	Acute effects of temperature and hypercarbia on cutaneous and branchial gas exchange in the South American lungfish, Lepidosiren paradoxa. Journal of Thermal Biology, 2017, 63, 112-118.	2.5	5
17	Temperature effects on the cardiorespiratory control of American bullfrog tadpoles based on a non-invasive methodology. Journal of Experimental Biology, 2017, 220, 3763-3770.	1.7	4
18	Analysis of the respiratory component of heart rate variability in the Cururu toad Rhinella schneideri. Scientific Reports, 2017, 7, 16119.	3.3	9

GLAUBER S F DA SILVA

#	Article	IF	CITATIONS
19	Influence of estrous cycle hormonal fluctuations and gonadal hormones on the ventilatory response to hypoxia in female rats. Pflugers Archiv European Journal of Physiology, 2017, 469, 1277-1286.	2.8	22
20	Excitatory Modulation of the preB¶tzinger Complex Inspiratory Rhythm Generating Network by Endogenous Hydrogen Sulfide. Frontiers in Physiology, 2017, 8, 452.	2.8	12
21	Behavioral, Ventilatory and Thermoregulatory Responses to Hypercapnia and Hypoxia in the Wistar Audiogenic Rat (WAR) Strain. PLoS ONE, 2016, 11, e0154141.	2.5	9
22	Baroreflex regulation affects ventilation in the Cururu toad <i>Rhinella schneideri</i> . Journal of Experimental Biology, 2016, 219, 3605-3615.	1.7	11
23	Ventilatory, metabolic, and thermal responses to hypercapnia in female rats: effects of estrous cycle, ovariectomy, and hormonal replacement. Journal of Applied Physiology, 2015, 119, 61-68.	2.5	22
24	Serotonin in the dorsal periaqueductal gray inhibits panic-like defensive behaviors in rats exposed to acute hypoxia. Neuroscience, 2015, 307, 191-198.	2.3	28
25	Short- and long-term effects of a maternal low-protein diet on ventilation, O ₂ /CO ₂ chemoreception and arterial blood pressure in male rat offspring. British Journal of Nutrition, 2014, 111, 606-615.	2.3	55
26	Endogenous preoptic hydrogen sulphide attenuates hypoxia-induced hyperventilation. Acta Physiologica, 2014, 210, 913-927.	3.8	18
27	Central hydrogen sulphide mediates ventilatory responses to hypercapnia in adult conscious rats. Acta Physiologica, 2014, 212, 239-247.	3.8	18
28	High-fat diet induces site-specific unresponsiveness to LPS-stimulated STAT3 activation in the hypothalamus. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2014, 306, R34-R44.	1.8	11
29	Temperature and respiratory function in ectothermic vertebrates. Journal of Thermal Biology, 2013, 38, 55-63.	2.5	19
30	Serotonergic neurons in the nucleus raphé obscurus are not involved in the ventilatory and thermoregulatory responses to hypoxia in adult rats. Respiratory Physiology and Neurobiology, 2013, 187, 139-148.	1.6	13
31	Role of hydrogen sulfide (H2S) on the ventilatory responses to hypercapnia. FASEB Journal, 2013, 27, lb870.	0.5	0
32	Purinergic transmission in the rostral but not caudal medullary raphe contributes to the hypercapnia-induced ventilatory response in unanesthetized rats. Respiratory Physiology and Neurobiology, 2012, 184, 41-47.	1.6	9
33	The breathing pattern and the ventilatory response to aquatic and aerial hypoxia and hypercarbia in the frog Pipa carvalhoi. Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology, 2012, 162, 281-287.	1.8	11
34	Combined ventilatory responses to aerial hypoxia and temperature in the South American lungfish Lepidosiren paradoxa. Journal of Thermal Biology, 2011, 36, 521-526.	2.5	9
35	Serotonergic neurons in the nucleus raphe obscurus contribute to interaction between central and peripheral ventilatory responses to hypercapnia. Pflugers Archiv European Journal of Physiology, 2011, 462, 407-418.	2.8	42
36	High CO2/H+ dialysis in the caudal ventrolateral medulla (Loeschcke's area) increases ventilation in wakefulness. Respiratory Physiology and Neurobiology, 2010, 171, 46-53.	1.6	25

#	Article	IF	CITATIONS
37	Role of neurokinin-1 expressing neurons in the locus coeruleus on ventilatory and cardiovascular responses to hypercapnia. Respiratory Physiology and Neurobiology, 2010, 172, 24-31.	1.6	28
38	Blood gases and cardiovascular shunt in the South American lungfish (Lepidosiren paradoxa) during normoxia and hyperoxia. Respiratory Physiology and Neurobiology, 2010, 173, 47-50.	1.6	10
39	Aestivation in Amphibians, Reptiles, and Lungfish. , 2009, , 179-189.		2
40	Aestivation in the South American lungfish, Lepidosiren paradoxa: Effects on cardiovascular function, blood gases, osmolality and leptin levels. Respiratory Physiology and Neurobiology, 2008, 164, 380-385.	1.6	21
