#	ARTICLE	IF	CITATIONS
1	Postnatal exercise protects offspring from high-fat diet-induced reductions in subcutaneous adipocyte beiging in C57Bl6/J mice. <i>Journal of Nutritional Biochemistry</i> , 2022, 99, 108853.	1.9	6
2	Consumption of Dietary Guidelines for Americans Types and Amounts of Vegetables Increases Mean Subjective Happiness Scale Scores: A Randomized Controlled Trial. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2022, 122, 1355-1362.	0.4	5
3	Lipidomic Analysis of TRPC1 Ca ²⁺ -Permeable Channel-Knock Out Mouse Demonstrates a Vital Role in Placental Tissue Sphingolipid and Triacylglycerol Homeostasis Under Maternal High-Fat Diet. <i>Frontiers in Endocrinology</i> , 2022, 13, 854269.	1.5	1
4	Incorporating the Dietary Guidelines for Americans Vegetable Recommendations into the Diet Alters Dietary Intake Patterns of Other Foods and Improves Diet Quality in Adults with Overweight and Obesity. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2022, 122, 1345-1354.e1.	0.4	2
5	The influence of active video game play upon physical activity and screen-based activities in sedentary children. <i>PLoS ONE</i> , 2022, 17, e0269057.	1.1	1
6	Associations between objective physical activity and emotional eating among adiposity-discordant siblings using ecological momentary assessment and accelerometers. <i>Pediatric Obesity</i> , 2021, 16, e12720.	1.4	6
7	Weight discordant siblings' ability to reduce energy intake at a meal as compensation for prior energy intake from sugar-sweetened beverages (SSBs). <i>Nutrition and Health</i> , 2021, 27, 59-67.	0.6	1
8	Increasing Vegetable Intake Decreases Urinary Acidity and Bone Resorption Marker in Overweight and Obese Adults: An 8-Week Randomized Controlled Trial. <i>Journal of Nutrition</i> , 2021, 151, 3413-3420.	1.3	0
9	Consumption of a Variety of Vegetables to Meet Dietary Guidelines for Americans' Recommendations Does Not Induce Sensitization of Vegetable Reinforcement Among Adults with Overweight and Obesity: A Randomized Controlled Trial. <i>Journal of Nutrition</i> , 2021, 151, 1665-1672.	1.3	8
10	Environmental Factors Associated with Physical Activity in Rural U.S. Counties. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 7688.	1.2	6
11	Comparing the reinforcing value of high intensity interval training versus moderate intensity aerobic exercise in sedentary adults. <i>Physiology and Behavior</i> , 2021, 238, 113468.	1.0	2
12	Bi-Directional Associations Between Real-Time Affect and Physical Activity in Weight-Discordant Siblings. <i>Journal of Pediatric Psychology</i> , 2021, 46, 443-453.	1.1	5
13	What Sets Physically Active Rural Communities Apart from Less Active Ones? A Comparative Case Study of Three US Counties. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 10574.	1.2	2
14	Effects of Exercise Training on Resting Testosterone Concentrations in Insufficiently Active Men: A Systematic Review and Meta-Analysis. <i>Journal of Strength and Conditioning Research</i> , 2021, 35, 3521-3528.	1.0	3
15	External food cue responsiveness and emotional eating in adolescents: A multimethod study. <i>Appetite</i> , 2021, 168, 105789.	1.8	4
16	Active Videogames to Promote Traditional Active Play: Increasing the Reinforcing Value of Active Play Among Low-Active Children. <i>Games for Health Journal</i> , 2020, 9, 208-214.	1.1	2
17	Identification of Barriers to Adherence to a Weight Loss Diet in Women Using the Nominal Group Technique. <i>Nutrients</i> , 2020, 12, 3750.	1.7	7
18	Impact of beef consumption on saturated fat intake in the United States adult population: Insights from modeling the influences of bovine genetics and nutrition. <i>Meat Science</i> , 2020, 169, 108225.	2.7	11

#	ARTICLE	IF	CITATIONS
19	Paternal high-fat diet and exercise regulate sperm miRNA and histone methylation to modify placental inflammation, nutrient transporter mRNA expression and fetal weight in a sex-dependent manner. <i>Journal of Nutritional Biochemistry</i> , 2020, 81, 108373.	1.9	38
20	Nutrients and Immunometabolism: Role of Macrophage NLRP3. <i>Journal of Nutrition</i> , 2020, 150, 1693-1704.	1.3	10
21	23 Current progress in the Agricultural Research Service Beef Grand Challenge: A large-scale genetics by environment by management evaluation project. <i>Journal of Animal Science</i> , 2020, 98, 13-14.	0.2	1
22	Genetic variations in the dopamine reward system influence exercise reinforcement and tolerance for exercise intensity. <i>Behavioural Brain Research</i> , 2019, 375, 112148.	1.2	31
23	Food Price Elasticity by Status of Participation in Federal Food Assistance Programs: A Laboratory-Based Grocery Store Study. <i>Current Developments in Nutrition</i> , 2019, 3, nzz096.	0.1	1
24	Reconsidering the Energy Homeostasis Hypothesis. the Proposed Role of Fat-Free Mass (FFM) and Resting Metabolic Rate (RMR) Driving Increased Energy Intake After Weight Loss (OR09-04-19). <i>Current Developments in Nutrition</i> , 2019, 3, nzz041.OR09-04-19.	0.1	0
25	Eating Responses to External Food Cues in Weight Discordant Siblings. <i>Journal of Adolescent Health</i> , 2019, 65, 155-160.	1.2	4
26	Inducing incentive sensitization of exercise reinforcement among adults who do not regularly exercise—a randomized controlled trial. <i>PLoS ONE</i> , 2019, 14, e0216355.	1.1	6
27	Decreasing the Consumption of Foods with Sugar Increases Their Reinforcing Value: A Potential Barrier for Dietary Behavior Change. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2019, 119, 1099-1108.	0.4	15
28	Increasing the Reinforcing Value of Exercise in Overweight Adults. <i>Frontiers in Behavioral Neuroscience</i> , 2019, 13, 265.	1.0	6
29	Vitamin D Awareness and Intake in Collegiate Athletes. <i>Journal of Strength and Conditioning Research</i> , 2019, Publish Ahead of Print, 2742-2748.	1.0	5
30	Paternal exercise protects mouse offspring from high-fat-diet-induced type 2 diabetes risk by increasing skeletal muscle insulin signaling. <i>Journal of Nutritional Biochemistry</i> , 2018, 57, 35-44.	1.9	33
31	Test-retest reliability of jump execution variables using mechanography: a comparison of jump protocols. <i>Journal of Sports Sciences</i> , 2018, 36, 963-969.	1.0	5
32	Youth and Adult Visitation and Physical Activity Intensity at Rural and Urban Parks. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 1760.	1.2	16
33	Nutrient intake disparities in the US: modeling the effect of food substitutions. <i>Nutrition Journal</i> , 2018, 17, 53.	1.5	7
34	Energy compensation in response to aerobic exercise training in overweight adults. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2018, 315, R619-R626.	0.9	28
35	Study design for a clinical trial to examine food price elasticity among participants in federal food assistance programs: A laboratory-based grocery store study. <i>Contemporary Clinical Trials Communications</i> , 2018, 10, 154-160.	0.5	2
36	The relative reinforcing value of sweet versus savory snack foods after consumption of sugar- or non-nutritive sweetened beverages. <i>Appetite</i> , 2017, 112, 143-149.	1.8	22

#	ARTICLE	IF	CITATIONS
37	The social context moderates the relationship between neighborhood safety and adolescents' activities. <i>Preventive Medicine Reports</i> , 2017, 6, 355-360.	0.8	19
38	Aerobic and resistance exercise reinforcement and discomfort tolerance predict meeting activity guidelines. <i>Physiology and Behavior</i> , 2017, 170, 32-36.	1.0	19
39	The TRPC1 Ca ²⁺ -permeable channel inhibits exercise-induced protection against high-fat diet-induced obesity and type II diabetes. <i>Journal of Biological Chemistry</i> , 2017, 292, 20799-20807.	1.6	29
40	Cost-effectiveness of Family-Based Obesity Treatment. <i>Pediatrics</i> , 2017, 140, .	1.0	21
41	The reinforcing value and liking of resistance training and aerobic exercise as predictors of adult's physical activity. <i>Physiology and Behavior</i> , 2017, 179, 284-289.	1.0	16
42	Influence of maternal obesity, diet and exercise on epigenetic regulation of adipocytes. <i>Molecular Aspects of Medicine</i> , 2017, 54, 37-49.	2.7	16
43	Time Trends and Patterns of Reported Egg Consumption in the U.S. by Sociodemographic Characteristics. <i>Nutrients</i> , 2017, 9, 333.	1.7	24
44	Impact of Dietary Protein and Gender on Food Reinforcement. <i>Nutrients</i> , 2017, 9, 957.	1.7	4
45	Effects of prenatal low protein and postnatal high fat diets on visceral adipose tissue macrophage phenotypes and IL-6 expression in Sprague Dawley rat offspring. <i>PLoS ONE</i> , 2017, 12, e0169581.	1.1	16
46	Postprandial energy metabolism and substrate oxidation in response to the inclusion of a sugar- or non-nutritive sweetened beverage with meals differing in protein content. <i>BMC Nutrition</i> , 2017, 3, 49.	0.6	5
47	Increasing Discomfort Tolerance Predicts Incentive Sensitization of Exercise Reinforcement: Preliminary Results from a Randomized Controlled Intervention to Increase the Reinforcing Value of Exercise in Adults. <i>FASEB Journal</i> , 2017, 31, 149.3.	0.2	0
48	Effect of Interpersonal and Cognitive Stressors on Habituation and the Utility of Heart Rate Variability to Measure Habituation. <i>Stress and Health</i> , 2016, 32, 320-327.	1.4	5
49	Decreased beige adipocyte number and mitochondrial respiration coincide with increased histone methyl transferase (G9a) and reduced FGF21 gene expression in Spragueâ€Dawley rats fed prenatal low protein and postnatal high-fat diets. <i>Journal of Nutritional Biochemistry</i> , 2016, 31, 113-121.	1.9	27
50	Cross-Validation of Resting Metabolic Rate Prediction Equations. <i>Journal of the Academy of Nutrition and Dietetics</i> , 2016, 116, 1413-1422.	0.4	58
51	Maternal low protein diet leads to placental angiogenic compensation via dysregulated M1/M2 macrophages and TNFÎ± expression in Sprague-Dawley rats. <i>Journal of Reproductive Immunology</i> , 2016, 118, 9-17.	0.8	16
52	Study design for a randomized controlled trial to increase the relative reinforcing value of vegetable consumption using incentive sensitization among obese and overweight people. <i>Contemporary Clinical Trials</i> , 2016, 50, 186-192.	0.8	7
53	Height-Adjustable Desks: Energy Expenditure, Liking, and Preference of Sitting and Standing. <i>Journal of Physical Activity and Health</i> , 2016, 13, 1094-1099.	1.0	15
54	The Effect of Increasing Autonomy Through Choice on Young Childrenâ€™s Physical Activity Behavior. <i>Journal of Physical Activity and Health</i> , 2016, 13, 428-432.	1.0	9

#	ARTICLE	IF	CITATIONS
55	Evaluation of markers of beige adipocytes in white adipose tissue of the mouse. <i>Nutrition and Metabolism</i> , 2016, 13, 24.	1.3	92
56	Habituation to a stressor predicts adolescents' adiposity. <i>Anxiety, Stress and Coping</i> , 2016, 29, 457-462.	1.7	4
57	Cross-validation of Recent and Longstanding Resting Metabolic Rate Prediction Equations. <i>FASEB Journal</i> , 2016, 30, .	0.2	1
58	Maternal low-protein diet causes body weight loss in male, neonate Sprague-Dawley rats involving UCP-1-mediated thermogenesis. <i>Journal of Nutritional Biochemistry</i> , 2015, 26, 729-735.	1.9	23
59	Park-Like Campus Settings and Physical Activity. <i>Journal of American College Health</i> , 2015, 63, 68-72.	0.8	14
60	Park design and children's active play: a microscale spatial analysis of intensity of play in Olmsted's Delaware Park. <i>Environment and Planning B: Planning and Design</i> , 2015, 42, 1079-1097.	1.7	12
61	Skeletal muscle Sirt3 expression and mitochondrial respiration are regulated by a prenatal low-protein diet. <i>Journal of Nutritional Biochemistry</i> , 2015, 26, 184-189.	1.9	28
62	A Mobile Phone Food Record App to Digitally Capture Dietary Intake for Adolescents in a Free-Living Environment: Usability Study. <i>JMIR MHealth and UHealth</i> , 2015, 3, e30.	1.8	62
63	Endocrine Modulators of Mouse Subcutaneous Adipose Tissue Beige Adipocyte Markers. <i>FASEB Journal</i> , 2015, 29, 595.5.	0.2	0
64	Seasonal Alterations in Park Visitation, Amenity Use, and Physical Activity in Grand Forks, North Dakota, 2012-2013. <i>Preventing Chronic Disease</i> , 2014, 11, E155.	1.7	12
65	Stress, Behavior, and Biology. <i>Exercise and Sport Sciences Reviews</i> , 2014, 42, 145-152.	1.6	30
66	Flow-mediated dilation and exercise blood pressure in healthy adolescents. <i>Journal of Science and Medicine in Sport</i> , 2014, 17, 425-429.	0.6	9
67	Effects of a Summer Treatment Program on Functional Sports Outcomes in Young Children with ADHD. <i>Journal of Abnormal Child Psychology</i> , 2014, 42, 1005-1017.	3.5	25
68	A microenvironment approach to reducing sedentary time and increasing physical activity of children and adults at a playground. <i>Preventive Medicine</i> , 2014, 62, 108-112.	1.6	21
69	Treatment Outcomes of Overweight Children and Parents in the Medical Home. <i>Pediatrics</i> , 2014, 134, 290-297.	1.0	48
70	Food characteristics, long-term habituation and energy intake. Laboratory and field studies. <i>Appetite</i> , 2013, 60, 40-50.	1.8	24
71	Indicated Prevention of Adult Obesity. <i>JAMA Pediatrics</i> , 2013, 167, 21.	3.3	45
72	Neighbourhood for Playing: Using GPS, GIS and Accelerometry to Delineate Areas within which Youth are Physically Active. <i>Urban Studies</i> , 2013, 50, 2922-2939.	2.2	34

#	ARTICLE	IF	CITATIONS
73	Prenatal Low-Protein and Postnatal High-Fat Diets Induce Rapid Adipose Tissue Growth by Inducing Igf2 Expression in Sprague Dawley Rat Offspring. <i>Journal of Nutrition</i> , 2013, 143, 1533-1539.	1.3	46
74	Systolic Blood Pressure Reactivity During Submaximal Exercise and Acute Psychological Stress in Youth. <i>American Journal of Hypertension</i> , 2013, 26, 409-415.	1.0	10
75	Efficacy of Family-Based Weight Control Program for Preschool Children in Primary Care. <i>Pediatrics</i> , 2012, 130, 660-666.	1.0	78
76	The Effect of Simulated Ostracism on Physical Activity Behavior in Children. <i>Pediatrics</i> , 2012, 129, e659-e666.	1.0	45
77	Use of an Open-Loop System to Increase Physical Activity. <i>Pediatric Exercise Science</i> , 2012, 24, 384-398.	0.5	7
78	Children's coping after psychological stress. Choices among food, physical activity, and television. <i>Appetite</i> , 2012, 59, 298-304.	1.8	42
79	Effects of Ostracism and Social Connection-Related Activities on Adolescents' Motivation to Eat and Energy Intake. <i>Journal of Pediatric Psychology</i> , 2012, 37, 23-32.	1.1	16
80	Excess heart rate and systolic blood pressure during psychological stress in relation to metabolic demand in adolescents. <i>Biological Psychology</i> , 2012, 91, 42-47.	1.1	13
81	Usual Energy Intake Mediates the Relationship Between Food Reinforcement and BMI. <i>Obesity</i> , 2012, 20, 1815-1819.	1.5	39
82	The Built Environment Moderates Effects of Family-Based Childhood Obesity Treatment over 2 Years. <i>Annals of Behavioral Medicine</i> , 2012, 44, 248-258.	1.7	55
83	Effect of increasing the choice of active options on children's physically active play. <i>Journal of Science and Medicine in Sport</i> , 2012, 15, 334-340.	0.6	14
84	Metabolic and cardiovascular adjustments during psychological stress and carotid artery intima-media thickness in youth. <i>Physiology and Behavior</i> , 2012, 105, 1140-1147.	1.0	19
85	Autonomy supportive environments and mastery as basic factors to motivate physical activity in children: a controlled laboratory study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 16.	2.0	52
86	Impact of simulated ostracism on overweight and normal-weight youths' motivation to eat and food intake. <i>Appetite</i> , 2011, 56, 39-45.	1.8	57
87	Slow rates of habituation predict greater zBMI gains over 12 months in lean children. <i>Eating Behaviors</i> , 2011, 12, 214-218.	1.1	20
88	Interactive effects of dietary restraint and adiposity on stress-induced eating and the food choice of children. <i>Eating Behaviors</i> , 2011, 12, 309-312.	1.1	34
89	Validity of a Pediatric RPE Scale When Different Exercise Intensities are Completed on Separate Days. <i>Journal of Exercise Science and Fitness</i> , 2011, 9, 52-57.	0.8	6
90	Stress-induced cardiovascular reactivity and atherogenesis in adolescents. <i>Atherosclerosis</i> , 2011, 215, 465-470.	0.4	34

#	ARTICLE	IF	CITATIONS
91	The motivation to be sedentary predicts weight change when sedentary behaviors are reduced. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2011, 8, 13.	2.0	19
92	Influence of parents and friends on children's and adolescents' food intake and food selection. <i>American Journal of Clinical Nutrition</i> , 2011, 93, 87-92.	2.2	87
93	Effect of a Simulated Active Commute to School on Cardiovascular Stress Reactivity. <i>Medicine and Science in Sports and Exercise</i> , 2010, 42, 1609-1616.	0.2	42
94	What constitutes food variety? Stimulus specificity of food. <i>Appetite</i> , 2010, 54, 23-29.	1.8	37
95	Energy intake, parental control of children's eating, and physical activity in siblings discordant for adiposity. <i>Appetite</i> , 2010, 55, 325-331.	1.8	18
96	Variety influences habituation of motivated behavior for food and energy intake in children. <i>American Journal of Clinical Nutrition</i> , 2009, 89, 746-754.	2.2	56
97	Cardiovascular reactivity to psychological stress and carotid intima-media thickness in children. <i>Psychophysiology</i> , 2009, 46, 293-299.	1.2	27
98	Protective effect of interval exercise on psychophysiological stress reactivity in children. <i>Psychophysiology</i> , 2009, 46, 852-861.	1.2	21
99	Reinforcing value of interval and continuous physical activity in children. <i>Physiology and Behavior</i> , 2009, 98, 31-36.	1.0	34
100	Habituation as a determinant of human food intake.. <i>Psychological Review</i> , 2009, 116, 384-407.	2.7	171
101	Puberty, statural growth, and growth hormone release in children with cerebral palsy. <i>Journal of Pediatric Rehabilitation Medicine</i> , 2009, 2, 131-141.	0.3	37
102	Increasing passive energy expenditure during clerical work. <i>European Journal of Applied Physiology</i> , 2008, 103, 353-360.	1.2	80
103	Increasing Healthy Eating vs. Reducing High Energy-dense Foods to Treat Pediatric Obesity. <i>Obesity</i> , 2008, 16, 318-326.	1.5	182
104	Sensitization and habituation of motivated behavior in overweight and non-overweight children. <i>Learning and Motivation</i> , 2008, 39, 243-255.	0.6	33
105	Habituation and within-session changes in motivated responding for food in children. <i>Appetite</i> , 2008, 50, 390-396.	1.8	26
106	Association of liking and reinforcing value with children's physical activity. <i>Physiology and Behavior</i> , 2008, 93, 1011-1018.	1.0	70
107	Peer Influence on Children's Physical Activity: An Experience Sampling Study. <i>Journal of Pediatric Psychology</i> , 2008, 33, 39-49.	1.1	122
108	Effect of Peers and Friends on Youth Physical Activity and Motivation to be Physically Active. <i>Journal of Pediatric Psychology</i> , 2008, 34, 217-225.	1.1	164

#	ARTICLE	IF	CITATIONS
109	A Randomized Trial of the Effects of Reducing Television Viewing and Computer Use on Body Mass Index in Young Children. <i>JAMA Pediatrics</i> , 2008, 162, 239.	3.6	448
110	Validity of the CALER and OMNI-Bike Ratings of Perceived Exertion. <i>Medicine and Science in Sports and Exercise</i> , 2008, 40, 760-766.	0.2	32
111	Dietary variety impairs habituation in children.. <i>Health Psychology</i> , 2008, 27, S10-S19.	1.3	53
112	Family-based obesity treatment, then and now: Twenty-five years of pediatric obesity treatment.. <i>Health Psychology</i> , 2007, 26, 381-391.	1.3	427
113	Cost effectiveness of recruitment methods in an obesity prevention trial for young children. <i>Preventive Medicine</i> , 2007, 44, 499-503.	1.6	29
114	Overweight children habituate slower than non-overweight children to food. <i>Physiology and Behavior</i> , 2007, 91, 250-254.	1.0	40
