#	ARTICLE	IF	CITATIONS
1	A unifying hypothesis for the spawning migrations of temperate anguillid eels. <i>Fish and Fisheries</i> , 2022, 23, 358-375.	2.7	17
2	Photo-enhanced toxicity of crude oil on early developmental stages of Atlantic cod (<i>Gadus morhua</i>). <i>Science of the Total Environment</i> , 2022, 807, 150697.	3.9	8
3	“Adaptation science”™ is needed to inform the sustainable management of the world's oceans in the face of climate change. <i>ICES Journal of Marine Science</i> , 2022, 79, 457-462.	1.2	13
4	Magnetic fields generated by the DC cables of offshore wind farms have no effect on spatial distribution or swimming behavior of lesser sandeel larvae (<i>Ammodytes marinus</i>). <i>Marine Environmental Research</i> , 2022, 176, 105609.	1.1	6
5	Goldsinny wrasse (<i>Ctenolabrus rupestris</i>) have a sex-dependent magnetic compass for maintaining site fidelity. <i>Fisheries Oceanography</i> , 2022, 31, 164-171.	0.9	2
6	The lunar compass of European glass eels (<i>Anguilla anguilla</i>) increases the probability that they recruit to North Sea coasts. <i>Fisheries Oceanography</i> , 2021, 30, 315-330.	0.9	13
7	The future is now: marine aquaculture in the anthropocene. <i>ICES Journal of Marine Science</i> , 2021, 78, 315-322.	1.2	17
8	Sidney Holt’s legacy lives on in fisheries science. <i>ICES Journal of Marine Science</i> , 2021, 78, 2150-2154.	1.2	0
9	Feeding habitat and silvering stage affect lipid content and fatty acid composition of European eel <i>Anguilla anguilla</i> tissues. <i>Journal of Fish Biology</i> , 2021, 99, 1110-1124.	0.7	8
10	Movement patterns of temperate wrasses (Labridae) within a small marine protected area. <i>Journal of Fish Biology</i> , 2021, 99, 1513-1518.	0.7	6
11	Defining what constitutes a reliable dataset to test for hybridization and introgression in marine zooplankton: Comment on Choquet et al. 2020 “No evidence for hybridization between <i>Calanus finmarchicus</i> and <i>C. glacialis</i> in a subarctic area of sympatry”. <i>Limnology and Oceanography</i> , 2021, 66, 3597-3602.	1.6	3
12	Gene expression and epigenetic responses of the marine Cladoceran, <i>Evadne nordmanni</i> , and the copepod, <i>Acartia clausi</i> , to elevated CO ₂ . <i>Ecology and Evolution</i> , 2021, 11, 16776-16785.	0.8	6
13	Effects of Exposure to Low Concentrations of Oil on the Expression of Cytochrome P4501a and Routine Swimming Speed of Atlantic Haddock (<i>Melanogrammus aeglefinus</i>) Larvae In Situ. <i>Environmental Science & Technology</i> , 2020, 54, 13879-13887.	4.6	11
14	Pragmatic animal welfare is independent of feelings. <i>Science</i> , 2020, 370, 180-180.	6.0	1
15	Mind the Depth: The Vertical Dimension of a Small-Scale Coastal Fishery Shapes Selection on Species, Size, and Sex in Wrasses. <i>Marine and Coastal Fisheries</i> , 2020, 12, 404-422.	0.6	9
16	Setting the stage for the machine intelligence era in marine science. <i>ICES Journal of Marine Science</i> , 2020, 77, 1267-1273.	1.2	38
17	Orientation behavior and swimming speed of Atlantic herring larvae (<i>Clupea harengus</i>) in situ and in laboratory exposures to rotated artificial magnetic fields. <i>Journal of Experimental Marine Biology and Ecology</i> , 2020, 526, 151358.	0.7	10
18	Welfare of aquatic animals: where things are, where they are going, and what it means for research, aquaculture, recreational angling, and commercial fishing. <i>ICES Journal of Marine Science</i> , 2019, 76, 82-92.	1.2	70

#	ARTICLE	IF	CITATIONS
19	Class eels (<i>Anguilla anguilla</i>) imprint the magnetic direction of tidal currents from their juvenile estuaries. <i>Communications Biology</i> , 2019, 2, 366.	2.0	23
20	The relationship between the moon cycle and the orientation of glass eels (<i>Anguilla anguilla</i>) at sea. <i>Royal Society Open Science</i> , 2019, 6, 190812.	1.1	13
21	Airgun blasts used in marine seismic surveys have limited effects on mortality, and no sublethal effects on behaviour or gene expression, in the copepod <i>Calanus finmarchicus</i> . <i>ICES Journal of Marine Science</i> , 2019, 76, 2033-2044.	1.2	18
22	Atlantic Haddock (<i>Melanogrammus aeglefinus</i>) Larvae Have a Magnetic Compass that Guides Their Orientation. <i>IScience</i> , 2019, 19, 1173-1178.	1.9	18
23	Silencing of ionotropic receptor 25a decreases chemosensory activity in the salmon louse <i>Lepeophtheirus salmonis</i> during the infective stage. <i>Gene</i> , 2019, 697, 35-39.	1.0	9
24	The effects of hydrogen peroxide on mortality, escape response, and oxygen consumption of <i>Calanus</i> spp.. <i>Facets</i> , 2019, 4, 626-637.	1.1	15
25	The planktonic stages of the salmon louse (<i>Lepeophtheirus salmonis</i>) are tolerant of end-of-century pCO_2 concentrations. <i>PeerJ</i> , 2019, 7, e7810.	0.9	11
26	Applying organized skepticism to preprints. <i>Septentrio Conference Series</i> , 2019, , .	0.0	0
27	Behavioural responses of infective stage copepodids of the salmon louse (<i>Lepeophtheirus salmonis</i>). <i>Tj ETQq1_1_0.784314 rgBT</i> 0.9 15	0.9	15
28	The Atlantic salmon (<i>Salmo salar</i>) antimicrobial peptide cathelicidin-2 is a molecular host-associated cue for the salmon louse (<i>Lepeophtheirus salmonis</i>). <i>Scientific Reports</i> , 2018, 8, 13738.	1.6	13
29	Exposure to teflubenzuron negatively impacts exploratory behavior, learning and activity of juvenile European lobster (<i>Homarus gammarus</i>). <i>Ecotoxicology and Environmental Safety</i> , 2018, 160, 216-221.	2.9	14
30	Debating the effectiveness of marine protected areas. <i>ICES Journal of Marine Science</i> , 2018, 75, 1156-1159.	1.2	77
31	Early life stages of the Arctic copepod <i>Calanus glacialis</i> are unaffected by increased seawater pCO_2 . <i>ICES Journal of Marine Science</i> , 2017, 74, 996-1004.	1.2	55
32	Problems with equating thermal preference with emotional fever and sentience: comment on "Fish can show emotional fever: stress-induced hyperthermia in zebrafish" by Rey et al. (2015). <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20160681.	1.2	6
33	Operationalizing and implementing ecosystem-based management. <i>ICES Journal of Marine Science</i> , 2017, 74, 379-381.	1.2	76
34	Glass eels (<i>Anguilla anguilla</i>) have a magnetic compass linked to the tidal cycle. <i>Science Advances</i> , 2017, 3, e1602007.	4.7	61
35	Visual sensitivity and spatial resolution of the planktivorous fish, <i>Atherinomorus forskalii</i> (Atherinidae; <i>Rappell</i> , 1838), to a polarized grating. <i>Vision Research</i> , 2017, 131, 37-43.	0.7	2
36	Whether European eel <i>leptocephali</i> use the Earth's magnetic field to guide their migration remains an open question. <i>Current Biology</i> , 2017, 27, R998-R1000.	1.8	5

#	ARTICLE	IF	CITATIONS
37	Responses of larval zebrafish to low pH immersion assay. Comment on Lopez-Luna et al.. Journal of Experimental Biology, 2017, 220, 3191-3192.	0.8	9
38	Fecundity of the invasive marine gastropod <i>Crepidula fornicata</i> near the current northern extreme of its range. Invertebrate Biology, 2017, 136, 394-402.	0.3	25
39	Regulation of gene expression is associated with tolerance of the Arctic copepod <i>Calanus glacialis</i> to CO_2 -acidified sea water. Ecology and Evolution, 2017, 7, 7145-7160.	0.8	53
40	Quo Vadimus Redux. ICES Journal of Marine Science, 2017, 74, 1-2.	1.2	3
41	Advancing the link between ocean connectivity, ecological function and management challenges. ICES Journal of Marine Science, 2017, 74, 1702-1707.	1.2	16
42	Towards a broader perspective on ocean acidification research. ICES Journal of Marine Science, 2017, 74, 889-894.	1.2	8
43	Observing and managing seascapes: linking synoptic oceanography, ecological processes, and geospatial modelling. ICES Journal of Marine Science, 2016, 73, 1825-1830.	1.2	21
44	Stress is not pain. Comment on Elwood and Adams (2015) "Electric shock causes physiological stress responses in shore crabs, consistent with prediction of pain". Biology Letters, 2016, 12, 20151006.	1.0	15
45	End of the century CO ₂ concentrations do not have a negative effect on vital rates of <i>Calanus finmarchicus</i> , an ecologically critical planktonic species in North Atlantic ecosystems. ICES Journal of Marine Science, 2016, 73, 937-950.	1.2	34
46	The effect of hydrostatic pressure on grazing in three calanoid copepods. Journal of Plankton Research, 2016, 38, 131-138.	0.8	2
47	The copepod <i>Calanus</i> spp. (Calanidae) is repelled by polarized light. Scientific Reports, 2016, 6, 35891.	1.6	5
48	Insects cannot tell us anything about subjective experience or the origin of consciousness. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, E3813-E3813.	3.3	8
49	Applying organized scepticism to ocean acidification research. ICES Journal of Marine Science, 2016, 73, 529-536.	1.2	67
50	An overview of global research effort in fisheries science. ICES Journal of Marine Science, 2016, 73, 1004-1011.	1.2	40
51	Revisiting Sverdrup's critical depth hypothesis. ICES Journal of Marine Science, 2015, 72, 1892-1896.	1.2	30
52	The swimming kinematics and foraging behavior of larval Atlantic herring (<i>Clupea harengus</i> L.) are unaffected by elevated pCO ₂ . Journal of Experimental Marine Biology and Ecology, 2015, 466, 42-48.	0.7	31
53	Where has all the recruitment research gone, long time passing?. ICES Journal of Marine Science, 2015, 71, 2293-2299.	1.2	16
54	Risk assessment and risk management: a primer for marine scientists. ICES Journal of Marine Science, 2015, 72, 992-996.	1.2	29

#	ARTICLE	IF	CITATIONS
55	Distribution and habitat preferences of five species of wrasse (Family Labridae) in a Norwegian fjord. ICES Journal of Marine Science, 2015, 72, 890-899.	1.2	34
56	Infection of the planktonic copepod <i>Calanus finmarchicus</i> by the parasitic dinoflagellate, <i>Blastodinium</i> spp: effects on grazing, respiration, fecundity and fecal pellet production. Journal of Plankton Research, 2015, 37, 211-220.	0.8	16
57	The early life history of fish“there is still a lot of work to do!. ICES Journal of Marine Science, 2014, 71, 907-908.	1.2	3
58	Commemorating 100 years since Hjort's 1914 treatise on fluctuations in the great fisheries of northern Europe: where we have been, where we are, and where we are going. ICES Journal of Marine Science, 2014, 71, 1989-1992.	1.2	10
59	Johan Hjort's impact on fisheries science: a bibliometric analysis. ICES Journal of Marine Science, 2014, 71, 2012-2016.	1.2	4
60	Wrasse (Labridae) as cleaner fish in salmonid aquaculture “ The Hardangerfjord as a case study. Marine Biology Research, 2014, 10, 289-300.	0.3	66
61	Marine ecosystem acoustics (MEA): quantifying processes in the sea at the spatio-temporal scales on which they occur. ICES Journal of Marine Science, 2014, 71, 2357-2369.	1.2	47
62	The proteome of Atlantic herring (<i>Clupea harengus</i> L.) larvae is resistant to elevated p CO 2. Marine Pollution Bulletin, 2014, 86, 154-160.	2.3	18
63	Parameterizing and operationalizing zooplankton population dynamic and trophic interaction models. ICES Journal of Marine Science, 2014, 71, 234-235.	1.2	0
64	Integrating what? Levels of marine ecosystem-based assessment and management. ICES Journal of Marine Science, 2014, 71, 1170-1173.	1.2	147
65	Sub-lethal exposure to ultraviolet radiation reduces prey consumption by Atlantic cod larvae (<i>Gadus morhua</i>). <i>Journal of Experimental Marine Biology and Ecology</i> , 2014, 417, 107-114.	0.7	10
66	The swimming kinematics of larval Atlantic cod, <i>Gadus morhua</i> L., are resilient to elevated seawater pCO ₂ . <i>Marine Biology</i> , 2013, 160, 1963-1972.	0.7	56
67	Delousing of Atlantic salmon (<i>Salmo salar</i>) by cultured vs. wild ballan wrasse (<i>Labrus bergylta</i>). <i>Aquaculture</i> , 2013, 402-403, 113-118.	1.7	103
68	Magnetic Compass Orientation in the European Eel. <i>PLoS ONE</i> , 2013, 8, e59212.	1.1	53
69	Quo Vadimus. ICES Journal of Marine Science, 2012, 69, 1-2.	1.2	13
70	UVB Radiation Variably Affects nâ€³ Fatty Acids but Elevated Temperature Reduces nâ€³ Fatty Acids in Juvenile Atlantic Salmon (<i>Salmo salar</i>). <i>Lipids</i> , 2012, 47, 1181-1192.	0.7	18
71	Light Primes the Escape Response of the Calanoid Copepod, <i>Calanus finmarchicus</i> . <i>PLoS ONE</i> , 2012, 7, e39594.	1.1	15
72	Effect of Sub-Lethal Exposure to Ultraviolet Radiation on the Escape Performance of Atlantic Cod Larvae (<i>Gadus morhua</i>). <i>PLoS ONE</i> , 2012, 7, e35554.	1.1	22

#	ARTICLE	IF	CITATIONS
73	Additive effects of enhanced ambient ultraviolet B radiation and increased temperature on immune function, growth and physiological condition of juvenile (parr) Atlantic Salmon, <i>Salmo salar</i> . <i>Fish and Shellfish Immunology</i> , 2011, 30, 102-108.	1.6	50
74	Early ontogeny of the Atlantic halibut <i>Hippoglossus hippoglossus</i> head. <i>Journal of Fish Biology</i> , 2011, 78, 1035-1053.	0.7	10
75	Foraging behaviour of larval cod (<i>Gadus morhua</i>) at low light intensities. <i>Marine Biology</i> , 2011, 158, 1125-1133.	0.7	37
76	Fine-scale observations of the predatory behaviour of the carnivorous copepod <i>Paraeuchaeta norvegica</i> and the escape responses of their ichthyoplankton prey, Atlantic cod (<i>Gadus morhua</i>). <i>Marine Biology</i> , 2011, 158, 2653-2660.	0.7	12
77	Grazing Rates of <i>Calanus finmarchicus</i> on <i>Thalassiosira weissflogii</i> Cultured under Different Levels of Ultraviolet Radiation. <i>PLoS ONE</i> , 2011, 6, e26333.	1.1	9
78	Welfare of aquatic organisms: Is there some faith-based HARKing going on here?. <i>Diseases of Aquatic Organisms</i> , 2011, 94, 255-257.	0.5	13
79	The three-dimensional prey field of the northern krill, <i>Meganyctiphanes norvegica</i> , and the escape responses of their copepod prey. <i>Marine Biology</i> , 2010, 157, 1251-1258.	0.7	17
80	Effects of UV Radiation and Diet on Polyunsaturated Fatty Acids in the Skin, Ocular Tissue and Dorsal Muscle of Atlantic Salmon (<i>Salmo salar</i>) Held in Outdoor Rearing Tanks. <i>Photochemistry and Photobiology</i> , 2010, 86, 909-919.	1.3	13
81	Effects of UV Radiation and Diet on Polyunsaturated Fatty Acids in the Skin, Ocular Tissue and Dorsal Muscle of Atlantic Salmon (<i>Salmo salar</i>) Held in Outdoor Rearing Tanks. <i>Photochemistry and Photobiology</i> , 2010, 86, 909-919.	1.3	5
82	Exposure to Increased Ambient Ultraviolet B Radiation has Negative Effects on Growth, Condition and Immune Function of Juvenile Atlantic Salmon (<i>Salmo salar</i>). <i>Photochemistry and Photobiology</i> , 2008, 84, 1265-1271.	1.3	50
83	The Role of Fisheries-Induced Evolution. <i>Science</i> , 2008, 320, 47-50.	6.0	42
84	INTRODUCTION Factors and indices are one thing, deciding who is scholarly, why they are scholarly, and the relative value of their scholarship is something else entirely. <i>Ethics in Science and Environmental Politics</i> , 2008, 8, 1-3.	4.6	46
85	Chemoreception in the salmon louse <i>Lepeophtheirus salmonis</i> : an electrophysiology approach. <i>Diseases of Aquatic Organisms</i> , 2007, 78, 161-168.	0.5	23
86	Olfactory and gustatory sensitivity to some feed-related chemicals in the Atlantic halibut (<i>Hippoglossus hippoglossus</i>). <i>Aquaculture</i> , 2007, 263, 303-309.	1.7	30
87	Prey extracts evoke swimming behavior in juvenile Atlantic halibut (<i>Hippoglossus hippoglossus</i>). <i>Aquaculture</i> , 2007, 270, 570-573.	1.7	13
88	The escape response of food-deprived cod larvae (<i>Gadus morhua</i> L.). <i>Journal of Experimental Marine Biology and Ecology</i> , 2007, 353, 135-144.	0.7	16
89	Introduction: status and future of modelling physical-biological interactions during the early life of fishes. <i>Marine Ecology - Progress Series</i> , 2007, 347, 121-126.	0.9	69
90	Introducing Aquatic Biology. <i>Aquatic Biology</i> , 2007, 1, .	0.5	0

#	ARTICLE	IF	CITATIONS
91	The relationship between ultraviolet and polarized light and growth rate in the early larval stages of turbot (<i>Scophthalmus maximus</i>), Atlantic cod (<i>Gadus morhua</i>) and Atlantic herring (<i>Clupea harengus</i>) reared in intensive culture conditions. <i>Aquaculture</i> , 2006, 256, 296-301.	1.7	9
92	Bridging the gap between aquatic and terrestrial ecology. <i>Marine Ecology - Progress Series</i> , 2005, 304, 271-307.	0.9	40
93	The effect of light on the settlement of the salmon louse, <i>Lepeophtheirus salmonis</i> , on Atlantic salmon, <i>Salmo salar</i> L.. <i>Journal of Fish Diseases</i> , 2004, 27, 701-708.	0.9	21
94	Electroencephalogram recordings from the olfactory bulb of juvenile (0 year) Atlantic cod in response to amino acids. <i>Journal of Fish Biology</i> , 2004, 65, 1657-1664.	0.7	13
95	Assessing the impacts of solar ultraviolet radiation on the early life stages of crustacean zooplankton and ichthyoplankton in Marine coastal systems. <i>Estuaries and Coasts</i> , 2003, 26, 30-39.	1.7	23
96	Ultraviolet (280-400 nm)-induced DNA Damage in the Eggs and Larvae of <i>Calanus finmarchicus</i> G. (Copepoda) and Atlantic Cod (<i>Gadus morhua</i>) Å¶. <i>Photochemistry and Photobiology</i> , 2003, 77, 397.	1.3	54
97	Ultraviolet (280-400 nm)-induced DNA Damage in the Eggs and Larvae of <i>Calanus finmarchicus</i> G. (Copepoda) and Atlantic Cod (<i>Gadus morhua</i>) Å¶. <i>Photochemistry and Photobiology</i> , 2003, 77, 397-404.	1.3	2
98	Impacts of Ultraviolet Radiation on Crustacean Zooplankton and Ichthyoplankton: Case Studies from Subarctic Marine Ecosystems. <i>Ecological Studies</i> , 2002, , 261-304.	0.4	7
99	Foraging and prey-search behaviour of small juvenile rainbow trout (<i>Oncorhynchus mykiss</i>) under polarized light. <i>Journal of Experimental Biology</i> , 2001, 204, 2415-2422.	0.8	64
100	Foraging and prey-search behaviour of small juvenile rainbow trout (<i>Oncorhynchus mykiss</i>) under polarized light. <i>Journal of Experimental Biology</i> , 2001, 204, 2415-22.	0.8	54
101	Modeling the effects of ultraviolet radiation on embryos of <i>Calanus finmarchicus</i> and Atlantic cod (<i>Gadus morhua</i>) in a mixing environment. <i>Limnology and Oceanography</i> , 2000, 45, 1797-1806.	1.6	25
102	Wavelength-dependent polarization orientation in <i>Daphnia</i> . <i>Journal of Comparative Physiology A: Neuroethology, Sensory, Neural, and Behavioral Physiology</i> , 2000, 186, 1073-1087.	0.7	21
103	Ontogenetic changes in visual sensitivity of the parasitic salmon louse <i>Lepeophtheirus salmonis</i> . <i>Journal of Experimental Biology</i> , 2000, 203, 1649-57.	0.8	24
104	Penetration of ultraviolet radiation in the waters of the estuary and Gulf of St. Lawrence. <i>Limnology and Oceanography</i> , 1999, 44, 710-716.	1.6	52
105	Biological weighting of ultraviolet (280-400 nm) induced mortality in marine zooplankton and fish. I. Atlantic cod (<i>Gadus morhua</i>) eggs. <i>Marine Biology</i> , 1999, 134, 269-284.	0.7	105
106	Biological weighting of ultraviolet (280-400 nm) induced mortality in marine zooplankton and fish. II. <i>Calanus finmarchicus</i> (Copepoda) eggs. <i>Marine Biology</i> , 1999, 134, 285-293.	0.7	72
107	Effect of solar ultraviolet radiation (280-400 nm) on the eggs and larvae of Atlantic cod (<i>Gadus</i>) Tj ETQq1 1 0.784314 rgBT /Overlock 45	0.7	45
108	Effect of solar ultraviolet radiation (280-400 nm) on the eggs and larvae of Atlantic cod (<i>Gadus</i>) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50	0.7	41
