#	ARTICLE	IF	CITATIONS
1	Coral Reefs Under Rapid Climate Change and Ocean Acidification. <i>Science</i> , 2007, 318, 1737-1742.	6.0	4,578
2	The IPBES Conceptual Framework “connecting nature and people. <i>Current Opinion in Environmental Sustainability</i> , 2015, 14, 1-16.	3.1	1,658
3	A mid-term analysis of progress toward international biodiversity targets. <i>Science</i> , 2014, 346, 241-244.	6.0	949
4	Rising to the challenge of sustaining coral reef resilience. <i>Trends in Ecology and Evolution</i> , 2010, 25, 633-642.	4.2	872
5	Mangroves enhance the biomass of coral reef fish communities in the Caribbean. <i>Nature</i> , 2004, 427, 533-536.	13.7	861
6	Fishing, Trophic Cascades, and the Process of Grazing on Coral Reefs. <i>Science</i> , 2006, 311, 98-101.	6.0	738
7	Thresholds and the resilience of Caribbean coral reefs. <i>Nature</i> , 2007, 450, 98-101.	13.7	724
8	The tropicalization of temperate marine ecosystems: climate-mediated changes in herbivory and community phase shifts. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014, 281, 20140846.	1.2	679
9	Capacity shortfalls hinder the performance of marine protected areas globally. <i>Nature</i> , 2017, 543, 665-669.	13.7	630
10	Coral reef management and conservation in light of rapidly evolving ecological paradigms. <i>Trends in Ecology and Evolution</i> , 2008, 23, 555-563.	4.2	496
11	The cost and feasibility of marine coastal restoration. <i>Ecological Applications</i> , 2016, 26, 1055-1074.	1.8	495
12	Global disparity in the resilience of coral reefs. <i>Trends in Ecology and Evolution</i> , 2012, 27, 404-413.	4.2	384
13	Climate change disables coral bleaching protection on the Great Barrier Reef. <i>Science</i> , 2016, 352, 338-342.	6.0	375
14	Technical note: Simple and robust removal of sun glint for mapping shallow-water benthos. <i>International Journal of Remote Sensing</i> , 2005, 26, 2107-2112.	1.3	370
15	Trophic cascade facilitates coral recruitment in a marine reserve. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007, 104, 8362-8367.	3.3	328
16	Larval dispersal and movement patterns of coral reef fishes, and implications for marine reserve network design. <i>Biological Reviews</i> , 2015, 90, 1215-1247.	4.7	304
17	The Impact Of Exploiting Grazers (Scaridae) On The Dynamics Of Caribbean Coral Reefs. , 2006, 16, 747-769.		303
18	Mapping marine environments with IKONOS imagery: enhanced spatial resolution can deliver greater thematic accuracy. <i>Remote Sensing of Environment</i> , 2002, 82, 248-257.	4.6	295

#	ARTICLE	IF	CITATIONS
19	Caribbean-wide decline in carbonate production threatens coral reef growth. <i>Nature Communications</i> , 2013, 4, 1402.	5.8	291
20	Multi-site evaluation of IKONOS data for classification of tropical coral reef environments. <i>Remote Sensing of Environment</i> , 2003, 88, 128-143.	4.6	289
21	Ocean acidification and warming will lower coral reef resilience. <i>Global Change Biology</i> , 2011, 17, 1798-1808.	4.2	277
22	Effect of macroalgal competition on growth and survival of juvenile Caribbean corals. <i>Marine Ecology - Progress Series</i> , 2007, 342, 139-149.	0.9	268
23	Remote sensing techniques for mangrove mapping. <i>International Journal of Remote Sensing</i> , 1998, 19, 935-956.	1.3	261
24	Remote sensing of coral reefs and their physical environment. <i>Marine Pollution Bulletin</i> , 2004, 48, 219-228.	2.3	259
25	Marine Reserves Enhance the Recovery of Corals on Caribbean Reefs. <i>PLoS ONE</i> , 2010, 5, e8657.	1.1	259
26	Vulnerability of Coral Reef Fisheries to a Loss of Structural Complexity. <i>Current Biology</i> , 2014, 24, 1000-1005.	1.8	255
27	Avoiding Coral Reef Functional Collapse Requires Local and Global Action. <i>Current Biology</i> , 2013, 23, 912-918.	1.8	252
28	Remote Sensing of Coral Reefs for Monitoring and Management: A Review. <i>Remote Sensing</i> , 2016, 8, 118.	1.8	252
29	Loss of coral reef growth capacity to track future increases in sea level. <i>Nature</i> , 2018, 558, 396-400.	13.7	250
30	Running the gauntlet: inhibitory effects of algal turfs on the processes of coral recruitment. <i>Marine Ecology - Progress Series</i> , 2010, 414, 91-105.	0.9	245
31	Recent Region-wide Declines in Caribbean Reef Fish Abundance. <i>Current Biology</i> , 2009, 19, 590-595.	1.8	238
32	Approaches to defining a planetary boundary for biodiversity. <i>Global Environmental Change</i> , 2014, 28, 289-297.	3.6	236
33	Connectivity of reef fish between mangroves and coral reefs: Algorithms for the design of marine reserves at seascape scales. <i>Biological Conservation</i> , 2006, 128, 215-222.	1.9	231
34	Multi-scale, object-based image analysis for mapping geomorphic and ecological zones on coral reefs. <i>International Journal of Remote Sensing</i> , 2012, 33, 3768-3797.	1.3	231
35	Coral reef habitat mapping: how much detail can remote sensing provide?. <i>Marine Biology</i> , 1997, 130, 193-202.	0.7	227
36	A review of remote sensing for the assessment and management of tropical coastal resources. <i>Coastal Management</i> , 1996, 24, 1-40.	1.0	225

#	ARTICLE	IF	CITATIONS
37	Conservation planning for connectivity across marine, freshwater, and terrestrial realms. <i>Biological Conservation</i> , 2010, 143, 565-575.	1.9	220
38	The cost-effectiveness of remote sensing for tropical coastal resources assessment and management. <i>Journal of Environmental Management</i> , 1999, 55, 157-166.	3.8	216
39	The Ecological Role of Sharks on Coral Reefs. <i>Trends in Ecology and Evolution</i> , 2016, 31, 395-407.	4.2	209
40	Prioritizing Key Resilience Indicators to Support Coral Reef Management in a Changing Climate. <i>PLoS ONE</i> , 2012, 7, e42884.	1.1	204
41	Operationalizing resilience for adaptive coral reef management under global environmental change. <i>Global Change Biology</i> , 2015, 21, 48-61.	4.2	201
42	Phase shifts and the stability of macroalgal communities on Caribbean coral reefs. <i>Coral Reefs</i> , 2009, 28, 761-773.	0.9	186
43	Ocean acidification reduces coral recruitment by disrupting intimate larval-algal settlement interactions. <i>Ecology Letters</i> , 2012, 15, 338-346.	3.0	185
44	New interventions are needed to save coral reefs. <i>Nature Ecology and Evolution</i> , 2017, 1, 1420-1422.	3.4	182
45	Cloudy weather may have saved Society Island reef corals during the 1998 ENSO event. <i>Marine Ecology - Progress Series</i> , 2001, 222, 209-216.	0.9	182
46	Quantifying temporal change in biodiversity: challenges and opportunities. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2013, 280, 20121931.	1.2	178
47	Development of a systematic classification scheme of marine habitats to facilitate regional management and mapping of Caribbean coral reefs. <i>Biological Conservation</i> , 1999, 88, 155-163.	1.9	176
48	Revisiting "Success" and "Failure" of Marine Protected Areas: A Conservation Scientist Perspective. <i>Frontiers in Marine Science</i> , 2018, 5, .	1.2	174
49	Benefits of water column correction and contextual editing for mapping coral reefs. <i>International Journal of Remote Sensing</i> , 1998, 19, 203-210.	1.3	167
50	Estimating rates of biologically driven coral reef framework production and erosion: a new census-based carbonate budget methodology and applications to the reefs of Bonaire. <i>Coral Reefs</i> , 2012, 31, 853-868.	0.9	162
51	Connectivity of Caribbean coral populations: complementary insights from empirical and modelled gene flow. <i>Molecular Ecology</i> , 2012, 21, 1143-1157.	2.0	162
52	Coral reef applications of Sentinel-2: Coverage, characteristics, bathymetry and benthic mapping with comparison to Landsat 8. <i>Remote Sensing of Environment</i> , 2018, 216, 598-614.	4.6	162
53	Characterizing the ecological trade-offs throughout the early ontogeny of coral recruitment. <i>Ecological Monographs</i> , 2016, 86, 20-44.	2.4	153
54	The impact of ecosystem connectivity on coral reef resilience. <i>Journal of Applied Ecology</i> , 2008, 45, 854-862.	1.9	149

#	ARTICLE	IF	CITATIONS
55	Remote sensing of the coastal zone: An overview and priorities for future research. <i>International Journal of Remote Sensing</i> , 2003, 24, 2805-2815.	1.3	148
56	Reserve design for uncertain responses of coral reefs to climate change. <i>Ecology Letters</i> , 2011, 14, 132-140.	3.0	145
57	The future of resilience-based management in coral reef ecosystems. <i>Journal of Environmental Management</i> , 2019, 233, 291-301.	3.8	143
58	Organic carbon in seagrass sediments is influenced by seagrass canopy complexity, turbidity, wave height, and water depth. <i>Limnology and Oceanography</i> , 2016, 61, 938-952.	1.6	139
59	The Future of Coral Reefs Subject to Rapid Climate Change: Lessons from Natural Extreme Environments. <i>Frontiers in Marine Science</i> , 2018, 5, .	1.2	136
60	Ecological resilience, robustness and vulnerability: how do these concepts benefit ecosystem management?. <i>Current Opinion in Environmental Sustainability</i> , 2014, 7, 22-27.	3.1	131
61	A holistic view of marine regime shifts. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2015, 370, 20130279.	1.8	131
62	Herbivory versus corallivory: are parrotfish good or bad for Caribbean coral reefs?. <i>Coral Reefs</i> , 2009, 28, 683-690.	0.9	129
63	Bleaching and hurricane disturbances to populations of coral recruits in Belize. <i>Marine Ecology - Progress Series</i> , 1999, 190, 27-35.	0.9	128
64	Tradeoffs between fisheries harvest and the resilience of coral reefs. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 4536-4541.	3.3	124
65	Multiple Stressors and the Functioning of Coral Reefs. <i>Annual Review of Marine Science</i> , 2017, 9, 445-468.	5.1	124
66	Habitat collapse due to overgrazing threatens turtle conservation in marine protected areas. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014, 281, 20132890.	1.2	123
67	Estimating leaf area index of mangroves from satellite data. <i>Aquatic Botany</i> , 1997, 58, 11-19.	0.8	119
68	Revisiting the catastrophic die-off of the urchin <i>Diadema antillarum</i> on Caribbean coral reefs: Fresh insights on resilience from a simulation model. <i>Ecological Modelling</i> , 2006, 196, 131-148.	1.2	118
69	Transforming management of tropical coastal seas to cope with challenges of the 21st century. <i>Marine Pollution Bulletin</i> , 2014, 85, 8-23.	2.3	118
70	Connectivity and systemic resilience of the Great Barrier Reef. <i>PLoS Biology</i> , 2017, 15, e2003355.	2.6	117
71	Grouper as a Natural Biocontrol of Invasive Lionfish. <i>PLoS ONE</i> , 2011, 6, e21510.	1.1	116
72	Digital analysis of multispectral airborne imagery of coral reefs. <i>Coral Reefs</i> , 1998, 17, 59-69.	0.9	114

#	ARTICLE	IF	CITATIONS
73	Coral Reef Habitats as Surrogates of Species, Ecological Functions, and Ecosystem Services. <i>Conservation Biology</i> , 2008, 22, 941-951.	2.4	114
74	Integrating regional conservation priorities for multiple objectives into national policy. <i>Nature Communications</i> , 2015, 6, 8208.	5.8	113
75	The Functional Value of Caribbean Coral Reef, Seagrass and Mangrove Habitats to Ecosystem Processes. <i>Advances in Marine Biology</i> , 2006, 50, 57-189.	0.7	111
76	Mangrove Habitat Use by Juvenile Reef Fish: Meta-Analysis Reveals that Tidal Regime Matters More than Biogeographic Region. <i>PLoS ONE</i> , 2014, 9, e114715.	1.1	108
77	Seagrass ecosystem trajectory depends on the relative timescales of resistance, recovery and disturbance. <i>Marine Pollution Bulletin</i> , 2018, 134, 166-176.	2.3	108
78	Fishing down a Caribbean food web relaxes trophic cascades. <i>Marine Ecology - Progress Series</i> , 2012, 445, 13-24.	0.9	107
79	Anticipative management for coral reef ecosystem services in the 21st century. <i>Global Change Biology</i> , 2015, 21, 504-514.	4.2	105
80	Linking Demographic Processes of Juvenile Corals to Benthic Recovery Trajectories in Two Common Reef Habitats. <i>PLoS ONE</i> , 2015, 10, e0128535.	1.1	103
81	Impaired recovery of the Great Barrier Reef under cumulative stress. <i>Science Advances</i> , 2018, 4, eaar6127.	4.7	103
82	Spatial Patterns of Aggression, Territory Size, and Harem Size in Five Sympatric Caribbean Parrotfish Species. <i>Environmental Biology of Fishes</i> , 2002, 63, 265-279.	0.4	101
83	Regional-scale dominance of non-framework building corals on Caribbean reefs affects carbonate production and future reef growth. <i>Global Change Biology</i> , 2015, 21, 1153-1164.	4.2	101
84	Fisheries productivity under progressive coral reef degradation. <i>Journal of Applied Ecology</i> , 2018, 55, 1041-1049.	1.9	101
85	MODELING THE BETA DIVERSITY OF CORAL REEFS. <i>Ecology</i> , 2006, 87, 2871-2881.	1.5	100
86	High vulnerability of ecosystem function and services to diversity loss in Caribbean coral reefs. <i>Biological Conservation</i> , 2014, 171, 186-194.	1.9	100
87	Coastal retreat and improved water quality mitigate losses of seagrass from sea level rise. <i>Global Change Biology</i> , 2013, 19, 2569-2583.	4.2	99
88	Coral reef habitat mapping: A combination of object-based image analysis and ecological modelling. <i>Remote Sensing of Environment</i> , 2018, 208, 27-41.	4.6	99
89	Measurement of seagrass standing crop using satellite and digital airborne remote sensing. <i>Marine Ecology - Progress Series</i> , 1997, 159, 51-60.	0.9	99
90	Evidence for and against the existence of alternate attractors on coral reefs. <i>Oikos</i> , 2013, 122, 481-491.	1.2	98

#	ARTICLE	IF	CITATIONS
91	Decline of coastal apex shark populations over the past half century. <i>Communications Biology</i> , 2018, 1, 223.	2.0	98
92	Revisiting coral reef connectivity. <i>Coral Reefs</i> , 2002, 21, 43-48.	0.9	97
93	Environmental and Sensor Limitations in Optical Remote Sensing of Coral Reefs: Implications for Monitoring and Sensor Design. <i>Remote Sensing</i> , 2012, 4, 271-302.	1.8	96
94	Operationalizing the Resilience of Coral Reefs in an Era of Climate Change. <i>Conservation Letters</i> , 2014, 7, 176-187.	2.8	96
95	Vulnerability of the Great Barrier Reef to climate change and local pressures. <i>Global Change Biology</i> , 2018, 24, 1978-1991.	4.2	92
96	On the prevalence and dynamics of inverted trophic pyramids and otherwise top-heavy communities. <i>Ecology Letters</i> , 2018, 21, 439-454.	3.0	92
97	Motivations, success, and cost of coral reef restoration. <i>Restoration Ecology</i> , 2019, 27, 981-991.	1.4	92
98	Spectral discrimination of coral mortality states following a severe bleaching event. <i>International Journal of Remote Sensing</i> , 2000, 21, 2321-2327.	1.3	91
99	Unprecedented bleaching-induced mortality in <i>Porites</i> spp. at Rangiroa Atoll, French Polynesia. <i>Marine Biology</i> , 2001, 139, 183-189.	0.7	90
100	Seasonal and spatial heterogeneity of recent sea surface temperature trends in the Caribbean Sea and southeast Gulf of Mexico. <i>Marine Pollution Bulletin</i> , 2012, 64, 956-965.	2.3	90
101	Patch dynamics of coral reef macroalgae under chronic and acute disturbance. <i>Coral Reefs</i> , 2005, 24, 681-692.	0.9	88
102	The effectiveness of different meso-scale rugosity metrics for predicting intra-habitat variation in coral-reef fish assemblages. <i>Environmental Biology of Fishes</i> , 2012, 94, 431-442.	0.4	88
103	Physical environments of the Caribbean Sea. <i>Limnology and Oceanography</i> , 2012, 57, 1233-1244.	1.6	87
104	Sexual vs. asexual reproduction in an ecosystem engineer: the massive coral <i>Montastraea annularis</i> . <i>Journal of Animal Ecology</i> , 2007, 76, 384-391.	1.3	86
105	The dynamics of architectural complexity on coral reefs under climate change. <i>Global Change Biology</i> , 2015, 21, 223-235.	4.2	85
106	Incorporating larval dispersal into MPA design for both conservation and fisheries. <i>Ecological Applications</i> , 2017, 27, 925-941.	1.8	83
107	Crucial knowledge gaps in current understanding of climate change impacts on coral reef fishes. <i>Journal of Experimental Biology</i> , 2010, 213, 894-900.	0.8	82
108	Designing a blueprint for coral reef survival. <i>Biological Conservation</i> , 2021, 257, 109107.	1.9	82

#	ARTICLE	IF	CITATIONS
109	Spectral unmixing of coral reef benthos under ideal conditions. <i>Coral Reefs</i> , 2004, 23, 60-73.	0.9	81
110	Connectivity networks reveal the risks of crown-of-thorns starfish outbreaks on the Great Barrier Reef. <i>Journal of Applied Ecology</i> , 2014, 51, 1188-1196.	1.9	81
111	The cover of living and dead corals from airborne remote sensing. <i>Coral Reefs</i> , 2004, 23, 171.	0.9	80
112	Quantifying Multiscale Habitat Structural Complexity: A Cost-Effective Framework for Underwater 3D Modelling. <i>Remote Sensing</i> , 2016, 8, 113.	1.8	80
113	Experiment mimics fishing on parrotfish: insights on coral reef recovery and alternative attractors. <i>Marine Ecology - Progress Series</i> , 2014, 506, 115-127.	0.9	80
114	Biological and remote sensing perspectives of pigmentation in coral reef organisms. <i>Advances in Marine Biology</i> , 2002, 43, 277-317.	0.7	78
115	Consistency and inconsistency in multispecies population network dynamics of coral reef ecosystems. <i>Marine Ecology - Progress Series</i> , 2014, 499, 1-18.	0.9	78
116	Competitive effects of macroalgae on the fecundity of the reef-building coral <i>Montastraea annularis</i> . <i>Marine Ecology - Progress Series</i> , 2008, 367, 143-152.	0.9	77
117	Predicting the distribution of <i>Montastraea</i> reefs using wave exposure. <i>Coral Reefs</i> , 2012, 31, 493-503.	0.9	76
118	Changing dynamics of Caribbean reef carbonate budgets: emergence of reef bioeroders as critical controls on present and future reef growth potential. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014, 281, 20142018.	1.2	76
