#	ARTICLE	IF	CITATIONS
1	Seismic Performance Evaluation of Code-compliant RC Moment-resisting Frame Buildings Subjected to Near-fault Pulse-like and Non-pulse-like Ground Motions. <i>Journal of Earthquake Engineering</i> , 2022, 26, 5058-5085.	2.5	14
2	A multi-mode N2 (MN2) pushover procedure for ductility level seismic performance evaluation of jacket type offshore platforms. <i>Ocean Engineering</i> , 2021, 220, 108440.	4.3	8
3	An updated consecutive modal pushover (UCMP) procedure for estimating the ductility level earthquake design demands of jacket offshore platforms. <i>Soil Dynamics and Earthquake Engineering</i> , 2021, 145, 106680.	3.8	7
4	On the accuracy of enhanced pushover procedures for seismic performance evaluation of code-conforming RC moment-resisting frame buildings subjected to pulse-like and non-pulse-like excitations. <i>Structures</i> , 2021, 32, 929-945.	3.6	14
5	A lateral load distribution for the static analysis of base-isolated building frames under the effect of far-fault and near-fault ground motions. <i>Structures</i> , 2021, 34, 2384-2405.	3.6	4
6	Effect of the spectral shape of ground motion records on the collapse fragility assessment of degrading SDOF systems. <i>Earthquake Engineering and Engineering Vibration</i> , 2021, 20, 925-941.	2.3	3
7	Behavior factor and displacement amplification factor for the seismic design of single-layer barrel vaults. <i>Journal of Constructional Steel Research</i> , 2020, 169, 105987.	3.9	8
8	Seismic Evaluation of Tall Unstiffened Steel Plate Shear Wall (SPSW) Systems with Emphasis on Reversal Phenomenon in the Higher Mode Pushover Curve. <i>International Journal of Civil Engineering</i> , 2019, 17, 523-540.	2.0	5
9	The collapse period of degrading SDOF systems considering a broad range of structural parameters. <i>Soil Dynamics and Earthquake Engineering</i> , 2018, 115, 730-741.	3.8	5
10	Adaptive Force-Based Multimode Pushover Analysis for Seismic Evaluation of Midrise Buildings. <i>Journal of Structural Engineering</i> , 2018, 144, .	3.4	22
11	Prediction of the force demands of tall buildings through the enhanced pushover procedures. <i>Structural Design of Tall and Special Buildings</i> , 2018, 27, e1540.	1.9	4
12	Applicability of the N2, extended N2 and modal pushover analysis methods for the seismic evaluation of base-isolated building frames with lead rubber bearings (LRBs). <i>Soil Dynamics and Earthquake Engineering</i> , 2017, 98, 84-100.	3.8	16
13	Seismic evaluation of geometrically irregular steel moment resisting frames with setbacks considering their dynamic characteristics. <i>Bulletin of Earthquake Engineering</i> , 2016, 14, 2757-2777.	4.1	17
14	A non-adaptive displacement-based pushover procedure for the nonlinear static analysis of tall building frames. <i>Engineering Structures</i> , 2016, 126, 586-597.	5.3	27
15	Seismic evaluation of vertically irregular building frames with stiffness, strength, combined-stiffness-and-strength and mass irregularities. <i>Earthquake and Structures</i> , 2015, 9, 353-373.	1.0	17
16	The modified and extended upper-bound (UB) pushover method for the multi-mode pushover analysis of unsymmetric-plan tall buildings. <i>Soil Dynamics and Earthquake Engineering</i> , 2015, 71, 114-127.	3.8	19
17	A single-run multi-mode pushover analysis to account for the effect of higher modes in estimating the seismic demands of tall buildings. <i>Bulletin of Earthquake Engineering</i> , 2015, 13, 2347-2365.	4.1	28
18	The extended consecutive modal pushover procedure for estimating the seismic demands of two-way unsymmetric-plan tall buildings under influence of two horizontal components of ground motions. <i>Soil Dynamics and Earthquake Engineering</i> , 2014, 63, 162-173.	3.8	53

#	ARTICLE	IF	CITATIONS
19	A consecutive modal pushover procedure for nonlinear static analysis of one-way unsymmetric-plan tall building structures. <i>Engineering Structures</i> , 2011, 33, 2417-2434.	5.3	52
20	Assessment of modal pushover analysis and conventional nonlinear static procedure with load distributions of federal emergency management agency for high-rise buildings. <i>Structural Design of Tall and Special Buildings</i> , 2010, 19, 291-308.	1.9	8
21	A consecutive modal pushover procedure for estimating the seismic demands of tall buildings. <i>Engineering Structures</i> , 2009, 31, 591-599.	5.3	125
