citing authors

#	ARTICLE	IF	CITATIONS
1	Sex differences in the physical performance, physiological, and psycho-cognitive responses to military operational stress. <i>European Journal of Sport Science</i> , 2022, 22, 99-111.	2.7	13
2	A trait of mind: stability and robustness of sleep across sleep opportunity manipulations during simulated military operational stress. <i>Sleep</i> , 2022, 45, .	1.1	2
3	Circulating biomarkers associated with performance and resilience during military operational stress. <i>European Journal of Sport Science</i> , 2022, 22, 72-86.	2.7	22
4	Use-dependent corticospinal excitability is associated with resilience and physical performance during simulated military operational stress. <i>Journal of Applied Physiology</i> , 2022, 132, 187-198.	2.5	0
5	Men and women display distinct extracellular vesicle biomarker signatures in response to military operational stress. <i>Journal of Applied Physiology</i> , 2022, 132, 1125-1136.	2.5	7
6	Utility of extracellular vesicles as a potential biological indicator of physiological resilience during military operational stress. <i>Physiological Reports</i> , 2022, 10, e15219.	1.7	3
7	Neuromuscular Performance and Hormonal Responses to Military Operational Stress in Men and Women. <i>Journal of Strength and Conditioning Research</i> , 2021, 35, 1296-1305.	2.1	14
8	Reliability of corticospinal excitability estimates for the vastus lateralis: Practical considerations for lower limb TMS task selection. <i>Brain Research</i> , 2021, 1761, 147395.	2.2	7
9	Impact of simulated military operational stress on executive function relative to trait resilience, aerobic fitness, and neuroendocrine biomarkers. <i>Physiology and Behavior</i> , 2021, 236, 113413.	2.1	19
10	Psychological and Physiological Predictors of Resilience in Navy SEAL Training. <i>Behavioral Medicine</i> , 2020, 46, 290-301.	1.9	26
11	Effects of Multi-ingredient Preworkout Supplements on Physical Performance, Cognitive Performance, Mood State, and Hormone Concentrations in Recreationally Active Men and Women. <i>Journal of Strength and Conditioning Research</i> , 2020, Publish Ahead of Print, .	2.1	3
12	Prediction of exertional lower extremity musculoskeletal injury in tactical populations: protocol for a systematic review and planned meta-analysis of prospective studies from 1955 to 2018. <i>Systematic Reviews</i> , 2018, 7, 244.	5.3	1
13	Prevention of exertional lower body musculoskeletal injury in tactical populations: protocol for a systematic review and planned meta-analysis of prospective studies from 1955 to 2018. <i>Systematic Reviews</i> , 2018, 7, 73.	5.3	5
14	Perspectives on resilience for military readiness and preparedness: Report of an international military physiology roundtable. <i>Journal of Science and Medicine in Sport</i> , 2018, 21, 1116-1124.	1.3	85
15	Effects of the Insulin-like Growth Factor Axis and its Relationship in Nonsurgical Treatments in Patients with Lumbar Spinal Stenosis. <i>FASEB Journal</i> , 2018, 32, 588.24.	0.5	0
16	Neuroendocrine, Inflammatory, and Extracellular Vesicle Responses During the Navy Special Warfare Screener Selection Course. <i>Physiological Genomics</i> , 0, , .	2.3	0
