P DIM PAVEN

| #  | Article   | IF   | CITATIONS |
|----|---|------|-----------|
| 1  | Sustainability transitions: An emerging field of research and its prospects. Research Policy, 2012, 41, 955-967.  | 6.4  | 2,210     |
| 2  | An agenda for sustainability transitions research: State of the art and future directions.<br>Environmental Innovation and Societal Transitions, 2019, 31, 1-32.  | 5.5  | 1,305     |
| 3  | What is protective space? Reconsidering niches in transitions to sustainability. Research Policy, 2012, 41, 1025-1036.  | 6.4  | 1,141     |
| 4  | Sustainability transitions in the making: A closer look at actors, strategies and resources.<br>Technological Forecasting and Social Change, 2012, 79, 991-998.   | 11.6 | 487       |
| 5  | Non-linearity and Expectations in Niche-Development Trajectories: Ups and Downs in Dutch Biogas<br>Development (1973–2003). Technology Analysis and Strategic Management, 2006, 18, 375-392.  | 3.5  | 425       |
| 6  | Space and scale in socio-technical transitions. Environmental Innovation and Societal Transitions, 2012, 4, 63-78.  | 5.5  | 336       |
| 7  | Experimenting for sustainability transitions: A systematic literature review. Technological<br>Forecasting and Social Change, 2019, 145, 153-164.   | 11.6 | 280       |
| 8  | Biogas plants in Denmark: successes and setbacks. Renewable and Sustainable Energy Reviews, 2007, 11, 116-132.  | 16.4 | 205       |
| 9  | Sustainability experiments in Asia: innovations shaping alternative development pathways?.<br>Environmental Science and Policy, 2010, 13, 261-271.  | 4.9  | 189       |
| 10 | Urban greening through nature-based solutions – Key characteristics of an emerging concept.<br>Sustainable Cities and Society, 2019, 49, 101620.  | 10.4 | 186       |
| 11 | Niche construction and empowerment through socio-political work. A meta-analysis of six<br>low-carbon technology cases. Environmental Innovation and Societal Transitions, 2016, 18, 164-180.   | 5.5  | 178       |
| 12 | Transitions and strategic niche management: towards a competence kit for practitioners.<br>International Journal of Technology Management, 2010, 51, 57.  | 0.5  | 170       |
| 13 | Local niche experimentation in energy transitions: A theoretical and empirical exploration of proximity advantages and disadvantages. Technology in Society, 2010, 32, 295-302.   | 9.4  | 166       |
| 14 | Niche accumulation and hybridisation strategies in transition processes towards a sustainable energy system: An assessment of differences and pitfalls. Energy Policy, 2007, 35, 2390-2400.   | 8.8  | 164       |
| 15 | Socio-cognitive evolution in niche development: Comparative analysis of biogas development in<br>Denmark and the Netherlands (1973–2004). Technovation, 2010, 30, 87-99.  | 7.8  | 152       |
| 16 | Spaces for sustainable innovation: Solar photovoltaic electricity in the UK. Technological<br>Forecasting and Social Change, 2014, 81, 115-130.   | 11.6 | 150       |
| 17 | Multi-niche analysis of dynamics and policies in Dutch renewable energy innovation journeys<br>(1970–2006): hype-cycles, closed networks and technology-focused learning. Technology Analysis and<br>Strategic Management, 2008, 20, 555-573. | 3.5  | 143       |
| 18 | Technological learning in bioenergy systems. Energy Policy, 2006, 34, 4024-4041.  | 8.8  | 137       |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Multi-Regime Interactions in the Dutch Energy Sector: The Case of Combined Heat and Power<br>Technologies in the Netherlands 1970–2000. Technology Analysis and Strategic Management, 2007, 19,<br>491-507. | 3.5 | 132       |
| 20 | Strategic niche management for biofuels: Analysing past experiments for developing new biofuel policies. Energy Policy, 2007, 35, 3213-3225.  | 8.8 | 132       |
| 21 | Challenges in the acceleration of sustainability transitions. Environmental Research Letters, 2020, 15, 081001.   | 5.2 | 131       |
| 22 | Urban experimentation and institutional arrangements. European Planning Studies, 2019, 27, 258-281.   | 2.9 | 127       |
| 23 | Three is a crowd? Exploring the potential of crowdfunding for renewable energy in the Netherlands.<br>Journal of Cleaner Production, 2016, 128, 142-155.  | 9.3 | 117       |
| 24 | Toward a spatial perspective on niche development: The case of Bus Rapid Transit. Environmental<br>Innovation and Societal Transitions, 2015, 17, 166-182.  | 5.5 | 112       |
| 25 | Strategic niche management of social innovations: the case of social entrepreneurship. Technology<br>Analysis and Strategic Management, 2011, 23, 667-681.  | 3.5 | 108       |
| 26 | Co-evolution of waste and electricity regimes: Multi-regime dynamics in the Netherlands (1969–2003).<br>Energy Policy, 2007, 35, 2197-2208.   | 8.8 | 106       |
| 27 | Towards alternative trajectories? Reconfigurations in the Dutch electricity regime. Research Policy, 2006, 35, 581-595.   | 6.4 | 105       |
| 28 | From riches to rags: Biofuels, media discourses, and resistance to sustainable energy technologies.<br>Energy Policy, 2010, 38, 5013-5027.  | 8.8 | 105       |
| 29 | Scaling up sustainable energy innovations. Energy Policy, 2017, 110, 342-354.   | 8.8 | 104       |
| 30 | Achieving the Sustainable Development Goals Requires Transdisciplinary Innovation at the Local Scale. One Earth, 2020, 3, 300-313.  | 6.8 | 99        |
| 31 | Modelling the dynamics of technological innovation systems. Research Policy, 2016, 45, 1833-1844.   | 6.4 | 95        |
| 32 | Transnational linkages in sustainability experiments: A typology and the case of solar photovoltaic energy in India. Environmental Innovation and Societal Transitions, 2015, 17, 149-165.                  | 5.5 | 94        |
| 33 | Upscaling of business model experiments in off-grid PV solar energy in India. Sustainability Science, 2012, 7, 199-212.   | 4.9 | 87        |
| 34 | From laggard to leader: Explaining offshore wind developments in the UK. Energy Policy, 2014, 69, 635-646.  | 8.8 | 84        |
| 35 | Lock-in and change: Distributed generation in Denmark in a long-term perspective. Energy Policy, 2006,<br>34, 3739-3748.  | 8.8 | 83        |
| 36 | Towards a multi-level framework of household food waste and consumer behaviour: Untangling spaghetti soup. Appetite, 2021, 156, 104856.   | 3.7 | 82        |

| #  | Article   | IF   | CITATIONS |
|----|---|------|-----------|
| 37 | Modulating societal acceptance in new energy projects: Towards a toolkit methodology for project managers. Energy, 2009, 34, 564-574.   | 8.8  | 75        |
| 38 | Biofuel developments in Sweden and the Netherlands. Renewable and Sustainable Energy Reviews, 2009, 13, 1406-1417.  | 16.4 | 75        |
| 39 | Studying transitions: Past, present, and future. Research Policy, 2019, 48, 103788.   | 6.4  | 74        |
| 40 | Business model innovation and socio-technical transitions. A new prospective framework with an application to bike sharing. Journal of Cleaner Production, 2018, 195, 1300-1312.                      | 9.3  | 73        |
| 41 | Smart and sustainable cities? Pipedreams, practicalities and possibilities. Local Environment, 2019, 24, 557-564.   | 2.4  | 68        |
| 42 | Nature-based innovation systems. Environmental Innovation and Societal Transitions, 2020, 35, 202-216.  | 5.5  | 66        |
| 43 | Strategic Niche Management in an unstable regime: Biomass gasification in India. Environmental Science and Policy, 2010, 13, 272-281.   | 4.9  | 64        |
| 44 | The development of solar PV in The Netherlands: A case of survival in unfriendly contexts. Renewable and Sustainable Energy Reviews, 2013, 19, 275-289.   | 16.4 | 58        |
| 45 | Biomass energy experiments in rural India: Insights from learning-based development approaches and<br>lessons for Strategic Niche Management. Environmental Science and Policy, 2010, 13, 326-338.    | 4.9  | 53        |
| 46 | Towards environmentally sustainable food systems: decision-making factors in sustainable food production and consumption. Sustainable Production and Consumption, 2021, 26, 610-626.                  | 11.0 | 53        |
| 47 | Implementation of manure digestion and co-combustion in the Dutch electricity regime: a multi-level analysis of market implementation in the Netherlands. Energy Policy, 2004, 32, 29-39.             | 8.8  | 52        |
| 48 | Empowering sustainable niches: Comparing UK and Dutch offshore wind developments. Technological Forecasting and Social Change, 2015, 100, 344-355.  | 11.6 | 52        |
| 49 | Boundary crossing innovations: Case studies from the energy domain. Technology in Society, 2009, 31, 85-93.   | 9.4  | 50        |
| 50 | Collective institutional entrepreneurship and contestations in wind energy in India. Renewable and Sustainable Energy Reviews, 2015, 42, 999-1011.  | 16.4 | 46        |
| 51 | Institutional entrepreneurship in transforming energy systems towards sustainability: Wind energy in<br>Finland and India. Energy Research and Social Science, 2016, 17, 102-118.                     | 6.4  | 46        |
| 52 | Translation mechanisms in socio-technical niches: a case study of Dutch river management.<br>Technology Analysis and Strategic Management, 2011, 23, 1063-1078.                                       | 3.5  | 45        |
| 53 | Seedbeds, harbours, and battlegrounds: On the origins of favourable environments for urban experimentation with sustainability. Environmental Innovation and Societal Transitions, 2019, 31, 211-232. | 5.5  | 44        |
| 54 | Metering motorbike mobility: informal transport in transition?. Technology Analysis and Strategic<br>Management, 2014, 26, 453-468.   | 3.5  | 42        |

| #  | Article   | IF   | CITATIONS |
|----|---|------|-----------|
| 55 | Local Agenda 2030 for sustainable development. Lancet Planetary Health, The, 2019, 3, e240-e241.  | 11.4 | 42        |
| 56 | The politics of innovation spaces for low-carbon energy: Introduction to the special issue.<br>Environmental Innovation and Societal Transitions, 2016, 18, 101-110.  | 5.5  | 41        |
| 57 | Framing the sharing economy: A media analysis of ridesharing platforms in Indonesia and the<br>Philippines. Journal of Cleaner Production, 2019, 212, 1154-1165.  | 9.3  | 41        |
| 58 | Unpacking sustainabilities in diverse transition contexts: solar photovoltaic and urban mobility experiments in India and Thailand. Sustainability Science, 2017, 12, 579-596.  | 4.9  | 40        |
| 59 | ESTEEM: Managing societal acceptance in new energy projects. Technological Forecasting and Social Change, 2009, 76, 963-977.  | 11.6 | 39        |
| 60 | From Cowboys to Diplomats: Challenges for Social Entrepreneurship in The Netherlands. Voluntas, 2011, 22, 283-310.  | 1.7  | 39        |
| 61 | Rural energy transitions in developing countries: a case of the Uttam Urja initiative in India.<br>Environmental Science and Policy, 2010, 13, 303-311.   | 4.9  | 38        |
| 62 | The experimental city. , 2016, , 1-12.  |      | 38        |
| 63 | What's behind the barriers? Uncovering structural conditions working against urban nature-based solutions. Landscape and Urban Planning, 2022, 220, 104335.   | 7.5  | 36        |
| 64 | Overcoming transformational failures through policy mixes in the dynamics of technological innovation systems. Technological Forecasting and Social Change, 2020, 153, 119297.  | 11.6 | 33        |
| 65 | A dramaturgy of critical moments in transition: Understanding the dynamics of conflict in socio-political change. Environmental Innovation and Societal Transitions, 2020, 37, 156-170.                               | 5.5  | 32        |
| 66 | Socio-cognitive evolution and co-evolution in competing technical trajectories: Biogas development<br>in Denmark (1970–2002). International Journal of Sustainable Development and World Ecology, 2007,<br>14, 63-77. | 5.9  | 31        |
| 67 | Smart cycling futures: Charting a new terrain and moving towards a research agenda. Journal of<br>Transport Geography, 2019, 79, 102486.  | 5.0  | 31        |
| 68 | Nurturing nature: Exploring socio-spatial conditions for urban experimentation. Environmental<br>Innovation and Societal Transitions, 2020, 34, 7-25.   | 5.5  | 30        |
| 69 | A perspective on the future of sustainability transitions research. Environmental Innovation and Societal Transitions, 2022, 42, 331-339.   | 5.5  | 30        |
| 70 | Configurational innovation systems – Explaining the slow German heat transition. Energy Research<br>and Social Science, 2019, 52, 99-113.   | 6.4  | 29        |
| 71 | Transitions governance with a sense of direction: synchronization challenges in the case of the<br>dutch †Driverless Car' transition. Technological Forecasting and Social Change, 2020, 160, 120244.                 | 11.6 | 29        |
| 72 | The role of policy in shielding, nurturing and enabling offshore wind in The Netherlands (1973–2013).<br>Renewable and Sustainable Energy Reviews, 2015, 47, 816-829.   | 16.4 | 28        |

IF # ARTICLE CITATIONS Why do companies' institutional strategies differ across cities? A cross-case analysis of bike sharing in Shanghai & amp; Amsterdam. Environmental Innovation and Societal Transitions, 2020, 36, 151-163. Experimenting in the city., 2016, , 15-31. 74 27 Structural conditions for the wider uptake of urban nature-based solutions – A conceptual 5.6 24 framework. Cities, 2021, 116, 103283. Behaviour in sustainability transitions: A mixed methods literature review. Environmental Innovation 76 5.5 23 and Societal Transitions, 2021, 40, 586-608. Households in sustainability transitions: a systematic review and new research avenues. 5.5 Environmental Innovation and Societal Transitions, 2021, 40, 87-107. Institutional work in diverse niche contexts: The case of low-carbon housing in the Netherlands. 78 5.5 21 Environmental Innovation and Societal Transitions, 2020, 35, 116-134. The politics of smart expectations: Interrogating the knowledge claims of smart mobility. Futures, 79 2.5 2020, 122, 102604. The †purpose ecosystem': Emerging private sector actors in earth system governance. Earth System 80 3.4 20 Governance, 2020, 4, 100053. Systematic review: Landlords' willingness to retrofit energy efficiency improvements. Journal of 9.3 Cleaner Production, 2021, 303, 127041 Field configuring events shaping sustainability transitions? The case of solar PV in India. 82 11.6 19 Technological Forecasting and Social Change, 2016, 103, 324-333. Understanding the roles of universities for sustainable development transformations: A framing analysis of university models. Sustainable Development, 2022, 30, 525-538. Advancing urban transitions and transformations research. Environmental Innovation and Societal 84 5.5 17 Transitions, 2021, 41, 102-105. Urban Planning by Experiment at Precinct Scale: Embracing Complexity, Ambiguity, and Multiplicity. 1.3 Urban Planning, 2021, 6, 195-207. Influencing across multiple levels: The positive effect of a school-based intervention on food waste 86 7.8 15 and household behaviours. Journal of Environmental Management, 2022, 308, 114681. Scripts in transition: Protective spaces of Indonesian biofuel villages. Technological Forecasting and 11.6 Social Change, 2015, 99, 1-13. "Critical Agents of Change?†Opportunities and Limits to Children's Participation in Urban Planning. Journal of Planning Literature, 2021, 36, 170-186. 88 3.5 14 Interdisciplinary Research and Impact. Global Challenges, 2019, 3, 1900020. 3.6 Lessons learnt from previous local sustainability efforts to inform local action for the Sustainable 90 4.9 12 Development Goals. Environmental Science and Policy, 2022, 129, 45-55.
