#	Article	IF	CITATIONS
1	Ecological niche modeling as a cumulative environmental impact assessment tool for biodiversity assessment and conservation planning: A case study of critically endangered plant Lagerstroemia minuticarpa in the Indian Eastern Himalaya. Journal of Environmental Management, 2019, 243, 299-307.	7.8	41
2	Seed dormancy, germination and seedling characteristics of Elaeocarpus prunifolius Wall. ex Müll. Berol.: a threatened tree species of north-eastern India. New Zealand Journal of Forestry Science, 2018, 48, .	0.8	18
3	Dormancy, storability, and germination of seeds in <i>Magnolia punduana</i> (Magnoliaceae). Botany, 2016, 94, 967-973.	1.0	17
4	Tree diversity and community composition in sacred forests are superior than the other community forests in a human-dominated landscape of Meghalaya. Tropical Ecology, 2020, 61, 84-105.	1.2	14
5	Abundance and habitat-suitability relationship deteriorate in fragmented forest landscapes: a case of Adinandra griffithii Dyer, a threatened endemic tree from Meghalaya in northeast India. Ecological Processes, 2018, 7, .	3.9	13
6	Traditional bun shifting cultivation practice in Meghalaya, Northeast India. Energy, Ecology and Environment, 2020, 5, 34-46.	3.9	13
7	Effect of traditional management practices on woody species composition and structure in montane subtropical forests of Meghalaya, Northeast India. Journal of Mountain Science, 2017, 14, 1500-1512.	2.0	9
8	Magnolia lanuginosa (Wall.) Figlar & Noot. in West Khasi Hills of Meghalaya, northeastern India: re-collection and implications for conservation. Journal of Threatened Taxa, 2016, 8, 8398.	0.3	9
9	Reproductive Phenology and Germination Behavior of Some Important Tree Species of Northeast India. Proceedings of the National Academy of Sciences India Section B - Biological Sciences, 2018, 88, 1033-1041.	1.0	8
10	Ecology of seed germination in threatened trees: a review. Energy, Ecology and Environment, 2019, 4, 189-210.	3.9	8
11	Genetic diversity and population structure assessment using molecular markers and SPAR approach in Illicium griffithii, a medicinally important endangered species of Northeast India. Journal of Genetic Engineering and Biotechnology, 2021, 19, 118.	3.3	8
12	Structure and Floristic Composition of Subtropical Broad-Leaved Humid Forest of Cherapunjee in Meghalaya, Northeast India. Journal of Biodiversity Management & Forestry, 2015, 04, .	0.2	7
13	Rediscovery of Magnolia rabaniana (Magnoliaceae): A threatened tree species of Meghalaya, northeast India. Journal of Asia-Pacific Biodiversity, 2017, 10, 127-131.	0.4	5
14	Impact of disturbance on community structure, biomass and carbon stock in montane evergreen forests of Meghalaya, northeast India. Carbon Management, 2021, 12, 215-233.	2.4	5
15	Local edaphic factors influence leaf nutrient resorption efficiency of evergreen and deciduous trees: a case study from montane subtropical old-growth and regenerating forests of Meghalaya. Tropical Ecology, 2020, 61, 21-31.	1.2	4
16	Notes on Magnolia punduana Hk. F. & Th. (Magnoliopsida: Magnoliales: Magnoliaceae): an endemic and threatened tree species of northeastern India. Journal of Threatened Taxa, 2015, 7, 7573-7576.	0.3	4
17	An assessment of population structure and regeneration status of Magnolia punduana Hk. f. & Th. (Magnoliaceae) in fragmented forests of northeast India. Journal of Forestry Research, 2020, 31, 937-943.	3.6	3
18	A comprehensive checklist of threatened plants of Meghalaya, Northeast India. Journal of Asia-Pacific Biodiversity, 2022, 15, 435-441.	0.4	3

#	Article	IF	CITATIONS
19	Rediscovery, Distribution and Conservation Implications of Cleyera grandiflora Wall. ex Choisy (Pentaphylacaceae): An Endangered and Endemic Tree Species of Meghalaya, Northeast India. The National Academy of Sciences, India, 2017, 40, 205-209.	1.3	2
20	Dormancy, viability and germination of Magnolia lanuginosa (Wall.) Figlar & Noot. seeds: A threatened tree species of Northeast India. Acta Ecologica Sinica, 2021, , .	1.9	2
21	Assessing the effectiveness of community managed forests for plant diversity conservation in Meghalaya, Northeast India. Plant Diversity, 2022, 44, 243-254.	3.7	1
22	Lost and Found: Ecological Story of Recently Rediscovered Threatened Plant Species in Northeast India. , 2021, , .		0
23	Seasonal dynamics of soil microbial biomass in fragmented patches of subtropical humid forest of Jaintia hills in Meghalaya, Northeast India. Forest Systems, 2019, 28, e002.	0.3	Ο
