

Sandra Sanchez-roige

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/544364/sandra-sanchez-roige-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
46	Evaluation of delay discounting as a transdiagnostic research domain criteria indicator in 1388 general community adults.. <i>Psychological Medicine</i> , 2022 , 1-9	6.9	2
45	A mutant allele of glycoprotein M6-B (Gpm6b) facilitates behavioral flexibility but increases delay discounting.. <i>Genes, Brain and Behavior</i> , 2022 , e12800	3.6	
44	Two data-driven approaches to identifying the spectrum of problematic opioid use: A pilot study within a chronic pain cohort. <i>International Journal of Medical Informatics</i> , 2021 , 156, 104621	5.3	1
43	Alcohol and cigarette smoking consumption as genetic proxies for alcohol misuse and nicotine dependence. <i>Drug and Alcohol Dependence</i> , 2021 , 221, 108612	4.9	4
42	Item-Level Genome-Wide Association Study of the Alcohol Use Disorders Identification Test in Three Population-Based Cohorts. <i>American Journal of Psychiatry</i> , 2021 , appiajp202020091390	11.9	7
41	Integration of evidence across human and model organism studies: A meeting report. <i>Genes, Brain and Behavior</i> , 2021 , 20, e12738	3.6	1
40	Mapping Pathways by Which Genetic Risk Influences Adolescent Externalizing Behavior: The Interplay Between Externalizing Polygenic Risk Scores, Parental Knowledge, and Peer Substance Use. <i>Behavior Genetics</i> , 2021 , 51, 543-558	3.2	1
39	Genetic risk for major depressive disorder and loneliness in sex-specific associations with coronary artery disease. <i>Molecular Psychiatry</i> , 2021 , 26, 4254-4264	15.1	9
38	Polygenic contributions to alcohol use and alcohol use disorders across population-based and clinically ascertained samples. <i>Psychological Medicine</i> , 2021 , 51, 1147-1156	6.9	5
37	Shared genetic risk between eating disorder- and substance-use-related phenotypes: Evidence from genome-wide association studies. <i>Addiction Biology</i> , 2021 , 26, e12880	4.6	12
36	Multivariate analysis of 1.5 million people identifies genetic associations with traits related to self-regulation and addiction. <i>Nature Neuroscience</i> , 2021 , 24, 1367-1376	25.5	10
35	Emerging phenotyping strategies will advance our understanding of psychiatric genetics. <i>Nature Neuroscience</i> , 2020 , 23, 475-480	25.5	14
34	Steep Discounting of Future Rewards as an Impulsivity Phenotype: A Concise Review. <i>Current Topics in Behavioral Neurosciences</i> , 2020 , 47, 113-138	3.4	7
33	Genome-wide meta-analysis of problematic alcohol use in 435,563 individuals yields insights into biology and relationships with other traits. <i>Nature Neuroscience</i> , 2020 , 23, 809-818	25.5	69
32	A large-scale genome-wide association study meta-analysis of cannabis use disorder. <i>Lancet Psychiatry</i> , 2020 , 7, 1032-1045	23.3	43
31	The Latent Genetic Structure of Impulsivity and Its Relation to Internalizing Psychopathology. <i>Psychological Science</i> , 2020 , 31, 1025-1035	7.9	7
30	Recent Efforts to Dissect the Genetic Basis of Alcohol Use and Abuse. <i>Biological Psychiatry</i> , 2020 , 87, 609-618	7.9	28

29	Phenome-wide investigation of health outcomes associated with genetic predisposition to loneliness. <i>Human Molecular Genetics</i> , 2019 , 28, 3853-3865	5.6	29
28	Genome-Wide Association Studies of Impulsive Personality Traits (BIS-11 and UPPS-P) and Drug Experimentation in up to 22,861 Adult Research Participants Identify Loci in the and genes. <i>Journal of Neuroscience</i> , 2019 , 39, 2562-2572	6.6	77
27	Genomic basis of delayed reward discounting. <i>Behavioural Processes</i> , 2019 , 162, 157-161	1.6	6
26	Electronic Health Records Are the Next Frontier for the Genetics of Substance Use Disorders. <i>Trends in Genetics</i> , 2019 , 35, 317-318	8.5	5
25	Genetic influences on delayed reward discounting: A genome-wide prioritized subset approach. <i>Experimental and Clinical Psychopharmacology</i> , 2019 , 27, 29-37	3.2	6
24	Genome-wide association analyses of risk tolerance and risky behaviors in over 1 million individuals identify hundreds of loci and shared genetic influences. <i>Nature Genetics</i> , 2019 , 51, 245-257	36.3	259
23	Genome-Wide Association Study Meta-Analysis of the Alcohol Use Disorders Identification Test (AUDIT) in Two Population-Based Cohorts. <i>American Journal of Psychiatry</i> , 2019 , 176, 107-118	11.9	156
22	Genome-wide association study of alcohol use disorder identification test (AUDIT) scores in 201328 research participants of European ancestry. <i>Addiction Biology</i> , 2019 , 24, 121-131	4.6	49
21	GWAS of lifetime cannabis use reveals new risk loci, genetic overlap with psychiatric traits, and a causal influence of schizophrenia. <i>Nature Neuroscience</i> , 2018 , 21, 1161-1170	25.5	270
20	Genome-wide association study of delay discounting in 23,217 adult research participants of European ancestry. <i>Nature Neuroscience</i> , 2018 , 21, 16-18	25.5	56
19	The genetics of human personality. <i>Genes, Brain and Behavior</i> , 2018 , 17, e12439	3.6	88
18	Transancestral GWAS of alcohol dependence reveals common genetic underpinnings with psychiatric disorders. <i>Nature Neuroscience</i> , 2018 , 21, 1656-1669	25.5	257
17	Genome-Wide Association Study of Loneliness Demonstrates a Role for Common Variation. <i>Neuropsychopharmacology</i> , 2017 , 42, 811-821	8.7	53
16	Mouse and Human Genetic Analyses Associate Kalirin with Ventral Striatal Activation during Impulsivity and with Alcohol Misuse. <i>Frontiers in Genetics</i> , 2016 , 7, 52	4.5	16
15	Heightened Impulsivity: Associated with Family History of Alcohol Misuse, and a Consequence of Alcohol Intake. <i>Alcoholism: Clinical and Experimental Research</i> , 2016 , 40, 2208-2217	3.7	25
14	Alleviating waiting impulsivity and perseverative responding by Opioid receptor antagonism in two inbred mouse strains. <i>Psychopharmacology</i> , 2015 , 232, 1483-92	4.7	12
13	Long-term wheel running changes on sensorimotor activity and skeletal muscle in male and female mice of accelerated senescence. <i>Age</i> , 2014 , 36, 9697		7
12	Exaggerated waiting impulsivity associated with human binge drinking, and high alcohol consumption in mice. <i>Neuropsychopharmacology</i> , 2014 , 39, 2919-27	8.7	75

11	Repeated ethanol exposure during early and late adolescence: double dissociation of effects on waiting and choice impulsivity. <i>Alcoholism: Clinical and Experimental Research</i> , 2014 , 38, 2579-89	3-7	30
10	Alpha-synuclein deletion decreases motor impulsivity but does not affect risky decision making in a mouse Gambling Task. <i>Psychopharmacology</i> , 2014 , 231, 2493-506	4-7	22
9	Measuring impulsivity in mice: the five-choice serial reaction time task. <i>Psychopharmacology</i> , 2012 , 219, 253-70	4-7	46
8	Genome-wide association study of Alcohol Use Disorder Identification Test (AUDIT) scores in 20,328 research participants of European ancestry		4
7	Multivariate GWAS elucidates the genetic architecture of alcohol consumption and misuse, corrects biases, and reveals novel associations with disease		1
6	Multivariate genomic analysis of 1.5 million people identifies genes related to addiction, antisocial behavior, and health		6
5	Trans-ancestral GWAS of alcohol dependence reveals common genetic underpinnings with psychiatric disorders		7
4	Genome-wide association study meta-analysis of the Alcohol Use Disorder Identification Test (AUDIT) in two population-based cohorts (N=141,932)		9
3	Phenome-wide Investigation of Health Outcomes Associated with Genetic Predisposition to Loneliness		4
2	Multivariate GWAS of psychiatric disorders and their cardinal symptoms reveal two dimensions of cross-cutting genetic liabilities		15
1	Meta-analysis of problematic alcohol use in 435,563 individuals identifies 29 risk variants and yields insights into biology, pleiotropy and causality		6
