#	ARTICLE	IF	CITATIONS
1	Pressure injuries are common in children with myelomeningocele: Results from a <sc>Follow-up</sc> Program and Register. Acta Paediatrica, International Journal of Paediatrics, 2022, , .	1.5	1
2	Associations between antenatal and perinatal risk factors and cerebral palsy: a Swedish cohort study. BMJ Open, 2020, 10, e038453.	1.9	18
3	No support that early selective dorsal rhizotomy increase frequency of scoliosis and spinal pain – a longitudinal population-based register study from four to 25 years of age. BMC Musculoskeletal Disorders, 2020, 21, 782.	1.9	2
4	Diagnosis and management of individuals with Fetal Valproate Spectrum Disorder; a consensus statement from the European Reference Network for Congenital Malformations and Intellectual Disability. Orphanet Journal of Rare Diseases, 2019, 14, 180.	2.7	33
5	Improving the Health of Individuals With Cerebral Palsy: Protocol for the Multidisciplinary Research Program MOVING ON WITH CP. JMIR Research Protocols, 2019, 8, e13883.	1.0	1
6	The myelomeningocele follow-up program: the Swedish initiative to ensuring multidisciplinary healthcare for individuals with myelomeningocele. International Journal of Integrated Care, 2019, 19, 355.	0.2	0
7	Pain and health status in adults with myelomeningocele living in Sweden. Journal of Pediatric Rehabilitation Medicine, 2018, 11, 255-264.	0.5	13
8	Ultrasound in Prenatal Diagnostics and Its Impact on the Epidemiology of Spina Bifida in a National Cohort from Denmark with a Comparison to Sweden. BioMed Research International, 2018, 2018, 1-8.	1.9	18
9	Stability of the Gross Motor Function Classification System in children and adolescents with cerebral palsy: a retrospective cohort registry study. Developmental Medicine and Child Neurology, 2017, 59, 641-646.	2.1	49
10	A combined surveillance program and quality register improves management of childhood disability. Disability and Rehabilitation, 2017, 39, 830-836.	1.8	70
11	Assessments of pain in children and adolescents with cerebral palsy: a retrospective population-based registry study. Developmental Medicine and Child Neurology, 2017, 59, 858-863.	2.1	65
12	Participation in physical activities for children with cerebral palsy: feasibility and effectiveness of physical activity on prescription. Archives of Physiotherapy, 2017, 7, 13.	1.8	28
13	Mobility and joint range of motion in adults with cerebral palsy: A population-based study. European Journal of Physiotherapy, 2015, 17, 192-199.	1.3	3
14	Functional performance in self-care and mobility after selective dorsal rhizotomy: a 10-year practice-based follow-up study. Developmental Medicine and Child Neurology, 2015, 57, 286-293.	2.1	31
15	Follow-up of individuals with cerebral palsy through the transition years and description of adult life: The Swedish experience. Journal of Pediatric Rehabilitation Medicine, 2014, 7, 53-61.	0.5	22
16	Sex differences in cerebral palsy incidence and functional ability: a total population study. Acta Paediatrica, International Journal of Paediatrics, 2013, 102, 712-717.	1.5	57
17	Postural asymmetries in young adults with cerebral palsy. Developmental Medicine and Child Neurology, 2013, 55, 1009-1015.	2.1	44
18	Physical activity in a total population of children and adolescents with cerebral palsy. Research in Developmental Disabilities, 2013, 34, 157-167.	2.2	42

#	ARTICLE	IF	CITATIONS
19	Fractures in children with cerebral palsy: a total population study. <i>Developmental Medicine and Child Neurology</i> , 2013, 55, 821-826.	2.1	60
20	Scoliosis in a Total Population of Children With Cerebral Palsy. <i>Spine</i> , 2012, 37, E708-E713.	2.0	147
21	Motor function after selective dorsal rhizotomy: a 10-year practice-based follow-up study. <i>Developmental Medicine and Child Neurology</i> , 2012, 54, 429-435.	2.1	55
22	Survival at 19 years of age in a total population of children and young people with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2011, 53, 808-814.	2.1	86
23	Growth in Children with Cerebral Palsy during five years after Selective Dorsal Rhizotomy: a practice-based study. <i>BMC Neurology</i> , 2010, 10, 57.	1.8	10
24	Motor ability in children treated for idiopathic clubfoot. A controlled pilot study. <i>BMC Pediatrics</i> , 2009, 9, 78.	1.7	20
25	Development of lower limb range of motion from early childhood to adolescence in cerebral palsy: a population-based study. <i>BMC Medicine</i> , 2009, 7, 65.	5.5	102
26	Long-term outcomes five years after selective dorsal rhizotomy. <i>BMC Pediatrics</i> , 2008, 8, 54.	1.7	101
27	Cerebral palsy in a total population of 4-11 year olds in southern Sweden. Prevalence and distribution according to different CP classification systems. <i>BMC Pediatrics</i> , 2007, 7, 41.	1.7	139
28	Prevention of severe contractures might replace multilevel surgery in cerebral palsy: results of a population-based health care programme and new techniques to reduce spasticity. <i>Journal of Pediatric Orthopaedics Part B</i> , 2005, 14, 269-273.	0.6	117
29	Congenital malformations among infants whose mothers had gestational diabetes or preexisting diabetes. <i>Early Human Development</i> , 2001, 61, 85-95.	1.8	531
30	Impact of Chronic Illness in Children on Parental Living Conditions. A Population-based Study in a Swedish Primary Care District. <i>Scandinavian Journal of Primary Health Care</i> , 1992, 10, 83-90.	1.5	15
31	Parental Perceptions of Health Care for Children with Chronic Illness-A Population-based Study in a Swedish Primary Care District. <i>Scandinavian Journal of Primary Health Care</i> , 1991, 9, 285-291.	1.5	3
32	Chronic Illness among Children in a Total Population. <i>Scandinavian Journal of Public Health</i> , 1987, 15, 87-97.	0.6	28
