

Rikard Landberg

List of Publications by Citations

Source: <https://exaly.com/author-pdf/5458517/rikard-landberg-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
116	Dietary polyphenol intake in Europe: the European Prospective Investigation into Cancer and Nutrition (EPIC) study. <i>European Journal of Nutrition</i> , 2016 , 55, 1359-75	5.2	238
115	Whole grain-rich diet reduces body weight and systemic low-grade inflammation without inducing major changes of the gut microbiome: a randomised cross-over trial. <i>Gut</i> , 2019 , 68, 83-93	19.2	162
114	Indolepropionic acid and novel lipid metabolites are associated with a lower risk of type 2 diabetes in the Finnish Diabetes Prevention Study. <i>Scientific Reports</i> , 2017 , 7, 46337	4.9	137
113	Alkylresorcinols as biomarkers of whole-grain wheat and rye intake: plasma concentration and intake estimated from dietary records. <i>American Journal of Clinical Nutrition</i> , 2008 , 87, 832-8	7	131
112	Addressing the inter-individual variation in response to consumption of plant food bioactives: Towards a better understanding of their role in healthy aging and cardiometabolic risk reduction. <i>Molecular Nutrition and Food Research</i> , 2017 , 61, 1600557	5.9	127
111	Yellow Mealworm Protein for Food Purposes - Extraction and Functional Properties. <i>PLoS ONE</i> , 2016 , 11, e0147791	3.7	110
110	Large-scale untargeted LC-MS metabolomics data correction using between-batch feature alignment and cluster-based within-batch signal intensity drift correction. <i>Metabolomics</i> , 2016 , 12, 173	4.7	82
109	Selected dietary flavonoids are associated with markers of inflammation and endothelial dysfunction in U.S. women. <i>Journal of Nutrition</i> , 2011 , 141, 618-25	4.1	78
108	Identification of Robust Metabotypes Associated With Increased Cardiometabolic Disease Risk- an Approach for Improved Prevention Through Precision Nutrition. <i>Current Developments in Nutrition</i> , 2021 , 5, 604-604	0.4	78
107	Benzoxazinoids Are Inversely Associated With Prostate-Specific Antigen Levels- a Whole Grain Rye vs Refined Wheat Randomized Cross-Over Trial in Men With Prostate Cancer. <i>Current Developments in Nutrition</i> , 2021 , 5, 482-482	0.4	78
106	FODMAPs, but Not Gluten, Affect Symptoms and the Fecal Environment in Subjects With Irritable Bowel Syndrome. A Double Blinded-Randomized Three-Way Crossover Study. <i>Current Developments in Nutrition</i> , 2021 , 5, 601-601	0.4	78
105	Combining traditional dietary assessment methods with novel metabolomics techniques: present efforts by the Food Biomarker Alliance. <i>Proceedings of the Nutrition Society</i> , 2017 , 76, 619-627	2.9	62
104	Plasma alkylresorcinols, biomarkers of whole-grain wheat and rye intake, and incidence of colorectal cancer. <i>Journal of the National Cancer Institute</i> , 2014 , 106, djt352	9.7	55
103	Whole-grain products and whole-grain types are associated with lower all-cause and cause-specific mortality in the Scandinavian HELGA cohort. <i>British Journal of Nutrition</i> , 2015 , 114, 608-23	3.6	48
102	Higher Whole-Grain Intake Is Associated with Lower Risk of Type 2 Diabetes among Middle-Aged Men and Women: The Danish Diet, Cancer, and Health Cohort. <i>Journal of Nutrition</i> , 2018 , 148, 1434-1444 ^{4.1}	4.1	42
101	Plasma alkylresorcinols, biomarkers of whole-grain wheat and rye intake, and risk of type 2 diabetes in Scandinavian men and women. <i>American Journal of Clinical Nutrition</i> , 2016 , 104, 88-96	7	38
100	Diet and endothelial function: from individual components to dietary patterns. <i>Current Opinion in Lipidology</i> , 2012 , 23, 147-55	4.4	35

99	Discovery of urinary biomarkers of whole grain rye intake in free-living subjects using nontargeted LC-MS metabolite profiling. <i>Molecular Nutrition and Food Research</i> , 2015 , 59, 2315-25	5.9	33
98	A dietary biomarker approach captures compliance and cardiometabolic effects of a healthy Nordic diet in individuals with metabolic syndrome. <i>Journal of Nutrition</i> , 2014 , 144, 1642-9	4.1	33
97	Effects of unfermented and fermented whole grain rye crisp breads served as part of a standardized breakfast, on appetite and postprandial glucose and insulin responses: a randomized cross-over trial. <i>PLoS ONE</i> , 2015 , 10, e0122241	3.7	31
96	Plasma alkylresorcinol concentrations, biomarkers of whole-grain wheat and rye intake, in the European Prospective Investigation into Cancer and Nutrition (EPIC) cohort. <i>British Journal of Nutrition</i> , 2014 , 111, 1881-90	3.6	29
95	Alkylresorcinol metabolite concentrations in spot urine samples correlated with whole grain and cereal fiber intake but showed low to modest reproducibility over one to three years in U.S. women. <i>Journal of Nutrition</i> , 2012 , 142, 872-7	4.1	26
94	Determination of alkylresorcinols and their metabolites in biological samples by gas chromatography-mass spectrometry. <i>Journal of Chromatography B: Analytical Technologies in the Biomedical and Life Sciences</i> , 2015 , 1000, 120-9	3.2	25
93	Whole grain rye intake, reflected by a biomarker, is associated with favorable blood lipid outcomes in subjects with the metabolic syndrome—a randomized study. <i>PLoS ONE</i> , 2014 , 9, e110827	3.7	25
92	Whole-Grain Intake, Reflected by Dietary Records and Biomarkers, Is Inversely Associated with Circulating Insulin and Other Cardiometabolic Markers in 8- to 11-Year-Old Children. <i>Journal of Nutrition</i> , 2017 , 147, 816-824	4.1	22
91	Perspective: Metabotyping-A Potential Personalized Nutrition Strategy for Precision Prevention of Cardiometabolic Disease. <i>Advances in Nutrition</i> , 2020 , 11, 524-532	10	22
90	Effects of whole-grain rye porridge with added inulin and wheat gluten on appetite, gut fermentation and postprandial glucose metabolism: a randomised, cross-over, breakfast study. <i>British Journal of Nutrition</i> , 2016 , 116, 2139-2149	3.6	22
89	Factors Explaining Interpersonal Variation in Plasma Enterolactone Concentrations in Humans. <i>Molecular Nutrition and Food Research</i> , 2019 , 63, e1801159	5.9	21
88	Freeze-dried bilberry (<i>Vaccinium myrtillus</i>) dietary supplement improves walking distance and lipids after myocardial infarction: an open-label randomized clinical trial. <i>Nutrition Research</i> , 2019 , 62, 13-22	4	20
87	Effects of whole-grain wheat, rye, and lignan supplementation on cardiometabolic risk factors in men with metabolic syndrome: a randomized crossover trial. <i>American Journal of Clinical Nutrition</i> , 2020 , 111, 864-876	7	19
86	Future prospects for dissecting inter-individual variability in the absorption, distribution and elimination of plant bioactives of relevance for cardiometabolic endpoints. <i>European Journal of Nutrition</i> , 2019 , 58, 21-36	5.2	19
85	Biomarkers of cereal food intake. <i>Genes and Nutrition</i> , 2019 , 14, 28	4.3	19
84	Effects of whole grain rye crisp bread for breakfast on appetite and energy intake in a subsequent meal: two randomised controlled trails with different amounts of test foods and breakfast energy content. <i>Nutrition Journal</i> , 2014 , 13, 26	4.3	18
83	Interlaboratory Coverage Test on Plant Food Bioactive Compounds and their Metabolites by Mass Spectrometry-Based Untargeted Metabolomics. <i>Metabolites</i> , 2018 , 8,	5.6	17
82	Why interindividual variation in response to consumption of plant food bioactives matters for future personalised nutrition. <i>Proceedings of the Nutrition Society</i> , 2020 , 79, 225-235	2.9	16

81	Carotenoids and alkylresorcinols as objective biomarkers of diet quality when assessing the validity of a web-based food record tool and a food frequency questionnaire in a middle-aged population. <i>BMC Nutrition</i> , 2016 , 2,	2.5	16
80	Targeted metabolomics reveals differences in the extended postprandial plasma metabolome of healthy subjects after intake of whole-grain rye porridges versus refined wheat bread. <i>Molecular Nutrition and Food Research</i> , 2017 , 61, 1600924	5.9	14
79	Simultaneous pharmacokinetic modeling of alkylresorcinols and their main metabolites indicates dual absorption mechanisms and enterohepatic elimination in humans. <i>Journal of Nutrition</i> , 2014 , 144, 1674-80	4.1	13
78	Use of a Web-Based Dietary Assessment Tool (RiksmatenFlex) in Swedish Adolescents: Comparison and Validation Study. <i>Journal of Medical Internet Research</i> , 2019 , 21, e12572	7.6	13
77	Circulating isoflavone and lignan concentrations and prostate cancer risk: a meta-analysis of individual participant data from seven prospective studies including 2,828 cases and 5,593 controls. <i>International Journal of Cancer</i> , 2018 , 143, 2677-2686	7.5	13
76	Effects of a long-term lifestyle intervention on metabolically healthy women with obesity: Metabolite profiles according to weight loss response. <i>Clinical Nutrition</i> , 2020 , 39, 215-224	5.9	12
75	A lifestyle intervention among elderly men on active surveillance for non-aggressive prostate cancer: a randomised feasibility study with whole-grain rye and exercise. <i>Trials</i> , 2017 , 18, 20	2.8	11
74	Whey Protein Combined with Low Dietary Fiber Improves Lipid Profile in Subjects with Abdominal Obesity: A Randomized, Controlled Trial. <i>Nutrients</i> , 2019 , 11,	6.7	11
73	An LC-QToF MS based method for untargeted metabolomics of human fecal samples. <i>Metabolomics</i> , 2020 , 16, 46	4.7	11
72	Validation of Reported Whole-Grain Intake from a Web-Based Dietary Record against Plasma Alkylresorcinol Concentrations in 8- to 11-Year-Olds Participating in a Randomized Controlled Trial. <i>Journal of Nutrition</i> , 2016 , 146, 377-83	4.1	11
71	Prediction and modeling of pre-analytical sampling errors as a strategy to improve plasma NMR metabolomics data. <i>Bioinformatics</i> , 2017 , 33, 3567-3574	7.2	11
70	High-fiber rye diet increases ileal excretion of energy and macronutrients compared with low-fiber wheat diet independent of meal frequency in ileostomy subjects. <i>Food and Nutrition Research</i> , 2013 , 57,	3.1	11
69	Associations between school meal-induced dietary changes and metabolic syndrome markers in 8-11-year-old Danish children. <i>European Journal of Nutrition</i> , 2016 , 55, 1973-84	5.2	11
68	Plasma metabolites associated with exposure to perfluoroalkyl substances and risk of type 2 diabetes - A nested case-control study. <i>Environment International</i> , 2021 , 146, 106180	12.9	11
67	Impact in Plasma Metabolome as Effect of Lifestyle Intervention for Weight-Loss Reveals Metabolic Benefits in Metabolically Healthy Obese Women. <i>Journal of Proteome Research</i> , 2018 , 17, 2600-2610	5.6	10
66	Grains - a major source of sustainable protein for health. <i>Nutrition Reviews</i> , 2021 ,	6.4	10
65	New alkylresorcinol metabolites in spot urine as biomarkers of whole grain wheat and rye intake in a Swedish middle-aged population. <i>European Journal of Clinical Nutrition</i> , 2018 , 72, 1439-1446	5.2	9
64	Joint Analysis of Metabolite Markers of Fish Intake and Persistent Organic Pollutants in Relation to Type 2 Diabetes Risk in Swedish Adults. <i>Journal of Nutrition</i> , 2019 , 149, 1413-1423	4.1	8

63	Avenanthramides as lipoxygenase inhibitors. <i>Heliyon</i> , 2020 , 6, e04304	3.6	8
62	Plasma alkylresorcinols, biomarkers of whole-grain intake, are not associated with progression of coronary artery atherosclerosis in postmenopausal women with coronary artery disease. <i>Public Health Nutrition</i> , 2016 , 19, 326-31	3.3	8
61	Mineral analysis reveals extreme manganese concentrations in wild harvested and commercially available edible termites. <i>Scientific Reports</i> , 2020 , 10, 6146	4.9	7
60	Targeting the delivery of dietary plant bioactives to those who would benefit most: from science to practical applications. <i>European Journal of Nutrition</i> , 2019 , 58, 65-73	5.2	6
59	Biomarkers of a Healthy Nordic Diet-From Dietary Exposure Biomarkers to Microbiota Signatures in the Metabolome. <i>Nutrients</i> , 2019 , 12,	6.7	6
58	Effects of a Lacto-Ovo-Vegetarian Diet on the Plasma Lipidome and Its Association with Atherosclerotic Burden in Patients with Coronary Artery Disease-A Randomized, Open-Label, Cross-over Study. <i>Nutrients</i> , 2020 , 12,	6.7	6
57	Consumption of whole grain/bran rye instead of refined wheat decrease concentrations of TNF-R2, e-selectin, and endostatin in an exploratory study in men with prostate cancer. <i>Clinical Nutrition</i> , 2020 , 39, 159-165	5.9	6
56	Impact of a Fermented High-Fiber Rye Diet on and Cardio-Metabolic Risk Factors: A Randomized Controlled Trial Among -Positive Chinese Adults. <i>Frontiers in Nutrition</i> , 2020 , 7, 608623	6.2	6
55	Metabolomics for Improved Understanding and Prediction of Cardiometabolic DiseasesRecent Findings from Human Studies. <i>Current Nutrition Reports</i> , 2015 , 4, 348-364	6	5
54	Pre-diagnostic plasma enterolactone concentrations are associated with lower mortality among individuals with type 2 diabetes: a case-cohort study in the Danish Diet, Cancer and Health cohort. <i>Diabetologia</i> , 2019 , 62, 959-969	10.3	4
53	Long-Term Whole Grain Wheat and Rye Intake Reflected by Adipose Tissue Alkylresorcinols and Breast Cancer: A Case-Cohort Study. <i>Nutrients</i> , 2019 , 11,	6.7	4
52	Visualization and Interpretation of Multivariate Associations with Disease Risk Markers and Disease Risk-The Triplot. <i>Metabolites</i> , 2019 , 9,	5.6	4
51	Higher Alkylresorcinol Concentrations, a Consequence of Whole-Grain Intake, are Inversely Associated with Gestational Diabetes Mellitus in Iceland. <i>Journal of Nutrition</i> , 2021 , 151, 1159-1166	4.1	3
50	The gut microbiota and microbial metabolites are associated with tail biting in pigs. <i>Scientific Reports</i> , 2021 , 11, 20547	4.9	2
49	Effects of Bilberry and Oat intake on lipids, inflammation and exercise capacity after Acute Myocardial Infarction (BIOAMI): study protocol for a randomized, double-blind, placebo-controlled trial. <i>Trials</i> , 2021 , 22, 338	2.8	2
48	Brain foods - the role of diet in brain performance and health. <i>Nutrition Reviews</i> , 2021 , 79, 693-708	6.4	2
47	The effects of fermented rye products on gut microbiota and their association with metabolic factors in Chinese adults - an explorative study. <i>Food and Function</i> , 2021 , 12, 9141-9150	6.1	2
46	Effects of High Intakes of Fructose and Galactose, with or without Added Fructooligosaccharides, on Metabolic Factors, Inflammation, and Gut Integrity in a Rat Model. <i>Molecular Nutrition and Food Research</i> , 2021 , 65, e2001133	5.9	2

45	Appetite and Subsequent Food Intake Were Unaffected by the Amount of Sourdough and Rye in Soft Bread-A Randomized Cross-Over Breakfast Study. <i>Nutrients</i> , 2018 , 10,	6.7	2
44	Prediction and evaluation of the effect of pre-centrifugation sample management on the measurable untargeted LC-MS plasma metabolome. <i>Analytica Chimica Acta</i> , 2021 , 1182, 338968	6.6	2
43	Pregnancy outcomes with differences in grain consumption: a randomized controlled trial.. <i>Journal of Perinatal Medicine</i> , 2022 ,	2.7	1
42	Evaluating an Intervention to Increase Cereal Fiber Intake in Children: A Randomized Controlled Feasibility Trial. <i>Journal of Nutrition</i> , 2021 , 151, 379-386	4.1	1
41	The Structure of Cereal Grains and Their Products 2021 , 1-20		1
40	Development and Validation of a Mobile Phone Application Developed for Measuring Dietary Fiber Intake. <i>Nutrients</i> , 2021 , 13,	6.7	1
39	Identifying Metabotypes From Complex Biological Data Using PARAFAC. <i>Current Developments in Nutrition</i> , 2021 , 5, 882-882	0.4	1
38	Long-term whole-grain rye and wheat consumption and their associations with selected biomarkers of inflammation, endothelial function, and cardiovascular disease. <i>European Journal of Clinical Nutrition</i> , 2021 , 75, 123-132	5.2	1
37	Whole Grains, Gut Microbiota, and Health-Time to Get Personal?. <i>Journal of Nutrition</i> , 2021 , 151, 459-464	4.1	1
36	A hypocaloric diet rich in high fiber rye foods causes greater reduction in body weight and body fat than a diet rich in refined wheat: A parallel randomized controlled trial in adults with overweight and obesity (the RyeWeight study). <i>Clinical Nutrition ESPEN</i> , 2021 , 45, 155-169	1.3	1
35	Comparison of Flavonoid Intake Assessment Methods Using USDA and Phenol Explorer Databases: Subcohort Diet, Cancer and Health-Next Generations-MAX Study.. <i>Frontiers in Nutrition</i> , 2022 , 9, 873774	6.2	1
34	LongITools: Dynamic longitudinal exposome trajectories in cardiovascular and metabolic noncommunicable diseases.. <i>Environmental Epidemiology</i> , 2022 , 6, e184	0.2	1
33	The MEDGICarb-Study: Design of a multi-center randomized controlled trial to determine the differential health-promoting effects of low- and high-glycemic index Mediterranean-style eating patterns. <i>Contemporary Clinical Trials Communications</i> , 2020 , 19, 100640	1.8	0
32	A Preparatory Study for a Randomized Controlled Trial of Dietary Fiber Intake During Adult Pelvic Radiotherapy.. <i>Frontiers in Nutrition</i> , 2021 , 8, 756485	6.2	0
31	Vegan Diet Is Associated With Favorable Effects on the Metabolic Performance of Intestinal Microbiota: A Cross-Sectional Multi-Omics Study.. <i>Frontiers in Nutrition</i> , 2021 , 8, 783302	6.2	0
30	Effects of substitution dietary guidelines targeted at prevention of IHD on dietary intake and risk factors in middle-aged Danish adults: the Diet and Prevention of Ischemic Heart Disease: a Translational Approach (DIPI) randomised controlled trial. <i>British Journal of Nutrition</i> , 2021 , 126, 1179-1193	3.6	0
29	Whole grain Carbohydrates 2021 , 55-69		0
28	Whole Grains and Type 2 Diabetes 2021 , 167-193		0

27	Bioactive Compounds in Whole Grains and Their Implications for Health 2021 , 301-336		o
26	The CRCbiome study: a large prospective cohort study examining the role of lifestyle and the gut microbiome in colorectal cancer screening participants. <i>BMC Cancer</i> , 2021 , 21, 930	4.8	o
25	A randomized controlled trial of the effects of whole grains versus refined grains diets on the microbiome in pregnancy.. <i>Scientific Reports</i> , 2022 , 12, 7509	4.9	o
24	Can Urinary Ethyl Glucuronide Be Used as a Biomarker of Habitual Alcohol Consumption?. <i>Journal of Nutrition</i> , 2019 , 149, 2077-2078	4.1	
23	Plasma alkylresorcinols as a biomarker for whole grain intake and predictor of metabolic syndrome risk. <i>FASEB Journal</i> , 2015 , 29, 606.8	0.9	
22	Does Simplified Estimation of Total Fruit and Vegetable Intake Pave the Way for Accurate Biomarkers of the Same?. <i>Journal of Nutrition</i> , 2021 , 151, 751-752	4.1	
21	Body Composition and Weight Management 2021 , 137-165		
20	Application of Metabolomics for the Assessment of Health Effects of Whole grain Foods 2021 , 375-388		
19	Whole Grains and Cardiovascular Disease 2021 , 195-203		
18	Whole grain Fractions and Their Utilization in Foods 2021 , 31-53		
17	Whole Grain Intake and Mortality 2021 , 221-239		
16	Whole Grains and Cancer Risk 2021 , 205-219		
15	Whole Grains from an Industry Perspective 2021 , 393-408		
14	Whole Grains, Cereal Fibre and the Gut Function 2021 , 289-299		
13	Whole grain consumption and associated lifestyle and sociodemographic factors 2021 , 83-98		
12	Application of Metabolomics for the Assessment of Process-induced Changes in Whole Grain Foods 2021 , 351-374		
11	Alkylresorcinols and Their Metabolites as Biomarkers for Whole grain Wheat and Rye 2021 , 99-136		
10	Whole grain Content of Cereal Products 2021 , 71-82		

- 9 Modulating Glycaemia with Cereal Products **2021**, 275-288
- 8 Whole Grains and Appetite **2021**, 241-274
- 7 Global Regulation and Labeling, Claims and Communication with Consumers **2021**, 409-432
- 6 Potential Negative Effects of Whole grain Consumption **2021**, 337-350
