| #  | ARTICLE                                                                                                                                                                                                          | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Anatomical variations of the biceps brachii insertion: a proposal for a new classification. <i>Folia Morphologica</i> , 2023, 82, 359-367.                                                                       | 0.4 | 1         |
| 2  | Morphometric profile in fetuses and evolution of Achilles tendon. <i>Folia Morphologica</i> , 2022, 81, 144-149.                                                                                                 | 0.4 | 1         |
| 3  | Ligaments stabilizing the sacrum and sacroiliac joint: a comprehensive review. <i>Neurosurgical Review</i> , 2022, 45, 357-364.                                                                                  | 1.2 | 8         |
| 4  | Assessment of the incidence of accessory hepatic arteries: a literature review. <i>Folia Morphologica</i> , 2022, 81, 533-543.                                                                                   | 0.4 | 2         |
| 5  | Clinical importance of variability in the branching pattern of the internal iliac artery – An updated and comprehensive review with a new classification proposal. <i>Annals of Anatomy</i> , 2022, 239, 151837. | 1.0 | 3         |
| 6  | Morphological variability of the plantaris muscle origin in human fetuses. <i>Annals of Anatomy</i> , 2022, 239, 151794.                                                                                         | 1.0 | 6         |
| 7  | A proposal for a new classification of the Coracobrachialis longus: A rare case or a new, distinct muscle?. <i>Annals of Anatomy</i> , 2022, 239, 151825.                                                        | 1.0 | 5         |
| 8  | Possible points of compression of the ulnar nerve: Tricks and traps that await clinicians from an anatomical point of view. <i>Clinical Anatomy</i> , 2022, 35, 155-173.                                         | 1.5 | 1         |
| 9  | A previously unreported variant of the auriculotemporal nerve. <i>Morphologie</i> , 2022, 106, 310-313.                                                                                                          | 0.5 | 2         |
| 10 | Classification of the superior mesenteric artery. <i>Clinical Anatomy</i> , 2022, 35, 501-511.                                                                                                                   | 1.5 | 3         |
| 11 | A new variety of chondrocoracoideus muscle, or an additional head of pectoralis major muscle. <i>Surgical and Radiologic Anatomy</i> , 2022, 44, 233-237.                                                        | 0.6 | 1         |
| 12 | The novel epiligament theory: differences in healing failure between the medial collateral and anterior cruciate ligaments. <i>Journal of Experimental Orthopaedics</i> , 2022, 9, 10.                           | 0.8 | 4         |
| 13 | Are the nerves supplying the anterior sacroiliac joint nociceptive?. <i>Folia Morphologica</i> , 2022, , .                                                                                                       | 0.4 | 0         |
| 14 | Previously unreported variant of the rectus femoris muscle: case report. <i>Folia Morphologica</i> , 2022, , .                                                                                                   | 0.4 | 0         |
| 15 | Classification of the popliteofibular ligament. <i>Clinical Anatomy</i> , 2022, , .                                                                                                                              | 1.5 | 1         |
| 16 | Atavistic muscles in human anatomy: Evolutionary origins and clinical implications. <i>Journal of Veterinary Medicine Series C: Anatomia Histologia Embryologia</i> , 2022, , .                                  | 0.3 | 1         |
| 17 | The relationship between additional heads of the quadriceps femoris, the vasti muscles, and the patellar ligament. <i>BioMed Research International</i> , 2022, 2022, 1-11.                                      | 0.9 | 3         |
| 18 | Case report of the double headed extensor hallucis longus. <i>Folia Morphologica</i> , 2022, , .                                                                                                                 | 0.4 | 1         |

| #  | ARTICLE                                                                                                                                                                                                          | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | A new type of the coracobrachialis muscle. <i>Folia Morphologica</i> , 2022, , .                                                                                                                                 | 0.4 | 3         |
| 20 | Previously Unreported Case of Variant Posterior Tibial Vein Forming a Loop Adjacent to the Posterior Tibial Artery. <i>Cureus</i> , 2022, 14, e22248.                                                            | 0.2 | 1         |
| 21 | Case report of unusual insertion of the fibularis brevis muscle. <i>Surgical and Radiologic Anatomy</i> , 2022, 44, 485-489.                                                                                     | 0.6 | 2         |
| 22 | Prevalence of Petrooccipital Fissure Fusion: Osteological Study with Application to Approaches to the Skull Base and Imaging Interpretation. <i>World Neurosurgery</i> , 2022, , .                               | 0.7 | 1         |
| 23 | Duplication of the foramen rotundum: A rare case report. <i>Morphologie</i> , 2022, , .                                                                                                                          | 0.5 | 0         |
| 24 | Connection between V2 and V3 parts of the trigeminal nerve at the internal cranial base. <i>Folia Morphologica</i> , 2022, , .                                                                                   | 0.4 | 0         |
| 25 | Three ipsilateral paracondylar processes with other skull base variations: case report. <i>Anatomy and Cell Biology</i> , 2022, , .                                                                              | 0.5 | 0         |
| 26 | A newly reported muscle: an accessory infraspinatus or a deep layer of the latissimus dorsi?. <i>Surgical and Radiologic Anatomy</i> , 2022, 44, 617-620.                                                        | 0.6 | 4         |
| 27 | C6 and not C5 nerve fibers more commonly contribute most to deltoid muscle innervation: anatomical study with application to better diagnosing cervical nerve injuries. <i>Neurosurgical Review</i> , 2022, , 1. | 1.2 | 0         |
| 28 | The Anterolateral Cervical Atlanto-Occipital Plexus: A Novel Finding with Application to Skull Base and Spine Surgery and Pain Disorders of the Head and Neck. <i>World Neurosurgery</i> , 2022, 159, e84-e90.   | 0.7 | 1         |
| 29 | Relationships among Coracobrachialis, Biceps Brachii, and Pectoralis Minor Muscles and Their Correlation with Bifurcated Coracoid Process. <i>BioMed Research International</i> , 2022, 2022, 1-9.               | 0.9 | 3         |
| 30 | The effect of morphological variability of Dorello's canal on surgical procedures - a review. <i>Annals of Anatomy</i> , 2022, , 151939.                                                                         | 1.0 | 2         |
| 31 | Variations and Classification of Bony Septations of the Jugular Foramen: An Anatomical and Histological Study with Application to Imaging and Surgery of the Skull base. <i>World Neurosurgery</i> , 2022, , .   | 0.7 | 1         |
| 32 | The morphological variability of fibularis tertius origin in human fetuses. <i>Annals of Anatomy</i> , 2022, 243, 151920.                                                                                        | 1.0 | 1         |
| 33 | Duplication of the ovarian vein: comprehensive review and case illustration. <i>Anatomy and Cell Biology</i> , 2022, , .                                                                                         | 0.5 | 1         |
| 34 | Additional head of the rectus femoris muscle: a case report. <i>Surgical and Radiologic Anatomy</i> , 2022, , .                                                                                                  | 0.6 | 0         |
| 35 | Bihemispheric posterior inferior cerebellar artery in a cadaver with Chiari I malformation. <i>Folia Morphologica</i> , 2022, , .                                                                                | 0.4 | 0         |
| 36 | The interosseus crural nerve: An anatomical study of a rarely described structure. <i>Clinical Anatomy</i> , 2022, , .                                                                                           | 1.5 | 1         |

| #  | ARTICLE                                                                                                                                                                                                                                                          | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | A Proposal for a New Classification of the Supernumerary Heads of the Biceps Brachii Muscle. <i>BioMed Research International</i> , 2022, 2022, 1-9.                                                                                                             | 0.9 | 3         |
| 38 | The function of the tensor tympani muscle: a comprehensive review of the literature. <i>Anatomy and Cell Biology</i> , 2022, 55, 113-117.                                                                                                                        | 0.5 | 2         |
| 39 | Let's Play the fMRI Advantages of Gamified Paradigm in Examining the Motor Cortex of Young Children. <i>Journal of Clinical Medicine</i> , 2022, 11, 2929.                                                                                                       | 1.0 | 0         |
| 40 | Morphology of the groove of the inferior petrosal sinus: application to better understanding variations and surgery of the skull base. <i>Anatomy and Cell Biology</i> , 2022, 55, 135-141.                                                                      | 0.5 | 2         |
| 41 | Embryological approach to the morphology of the ligamentum mucosum of the human knee joint. <i>Annals of Anatomy</i> , 2022, 244, 151983.                                                                                                                        | 1.0 | 2         |
| 42 | A proposal for a new classification of the long head of the biceps brachii. <i>Surgical and Radiologic Anatomy</i> , 2022, 44, 963-970.                                                                                                                          | 0.6 | 1         |
| 43 | Sacral fractures: An updated and comprehensive review. <i>Injury</i> , 2021, 52, 366-375.                                                                                                                                                                        | 0.7 | 10        |
| 44 | Morphological variability of the extensor hallucis longus in human fetuses. <i>Annals of Anatomy</i> , 2021, 234, 151627.                                                                                                                                        | 1.0 | 7         |
| 45 | Anatomical variations of the tibialis anterior tendon. <i>Clinical Anatomy</i> , 2021, 34, 397-404.                                                                                                                                                              | 1.5 | 13        |
| 46 | A very rare case of an accessory subscapularis muscle and its potential clinical significance. <i>Surgical and Radiologic Anatomy</i> , 2021, 43, 19-25.                                                                                                         | 0.6 | 12        |
| 47 | Quadriceps or multiceps femoris? Cadaveric study. <i>Clinical Anatomy</i> , 2021, 34, 71-81.                                                                                                                                                                     | 1.5 | 14        |
| 48 | The co-occurrence of a four-headed coracobrachialis muscle, split coracoid process and tunnel for the median and musculocutaneous nerves: the potential clinical relevance of a very rare variation. <i>Surgical and Radiologic Anatomy</i> , 2021, 43, 661-669. | 0.6 | 16        |
| 49 | The subscapularis tendon: A proposed classification system. <i>Annals of Anatomy</i> , 2021, 233, 151615.                                                                                                                                                        | 1.0 | 11        |
