#	ARTICLE	IF	CITATIONS
1	Long-Lasting Effects of Spironolactone after its Withdrawal in Patients with Hyperandrogenic Skin Disorders. <i>Endocrine, Metabolic and Immune Disorders - Drug Targets</i> , 2023, 23, 188-195.	0.6	2
2	Unilateral primary aldosteronism considerations about the diagnostic criteria, adrenalectomy, and short and long time biochemical and clinical evaluation. <i>Journal of Clinical Hypertension</i> , 2022, 24, 116-118.	1.0	1
3	Controversies in the Pathogenesis, Diagnosis and Treatment of PCOS: Focus on Insulin Resistance, Inflammation, and Hyperandrogenism. <i>International Journal of Molecular Sciences</i> , 2022, 23, 4110.	1.8	73
4	Can the treatment of polycystic ovary syndrome with spironolactone prevent severe COVID infection?. <i>European Journal of Endocrinology</i> , 2022, 186, L11-L13.	1.9	0
5	Primary aldosteronism: considerations about the evaluation of the aldosterone to renin ratio during canrenone treatment. <i>Journal of Endocrinological Investigation</i> , 2021, 44, 2009-2010.	1.8	0
6	Idiopathic inflammatory myopathies and hypertension: Possible involvement of hormonal factors. <i>Journal of Clinical Hypertension</i> , 2021, 23, 1567-1569.	1.0	1
7	A multidisciplinary approach to the management of adrenal incidentaloma. <i>Expert Review of Endocrinology and Metabolism</i> , 2021, 16, 201-212.	1.2	15
8	Endometriosis Susceptibility to Dapsone-Hydroxylamine-Induced Alterations Can Be Prevented by Licorice Intake: In Vivo and In Vitro Study. <i>International Journal of Molecular Sciences</i> , 2021, 22, 8476.	1.8	0
9	Primary aldosteronism: Involvement of sympathetic system in the persistence of hypertension after surgery. <i>Journal of Clinical Hypertension</i> , 2020, 22, 1616-1617.	1.0	1
10	Coronavirus-19: Possible Therapeutic Implications of Spironolactone and Dry Extract of <i>Glycyrrhiza glabra</i> L. (Licorice). <i>Frontiers in Pharmacology</i> , 2020, 11, 558418.	1.6	10
11	Plant natural products with anti-thyroid cancer activity. <i>Farmacologia</i> , 2020, 146, 104640.	1.1	16
12	Human Sperm Capacitation Involves the Regulation of the Tyr-Phosphorylation Level of the Anion Exchanger 1 (AE1). <i>International Journal of Molecular Sciences</i> , 2020, 21, 4063.	1.8	9
13	Is sodium excretion a reliable marker of sodium intake?. <i>Journal of Clinical Hypertension</i> , 2020, 22, 306-306.	1.0	1
14	Licorice: From Pseudohyperaldosteronism to Therapeutic Uses. <i>Frontiers in Endocrinology</i> , 2019, 10, 484.	1.5	38
15	Evaluation and implications of salt intake and excretion. <i>Journal of Clinical Hypertension</i> , 2019, 21, 950-952.	1.0	3
16	Pitfalls in urinary sodium excretion. <i>Journal of Clinical Hypertension</i> , 2019, 21, 1635-1636.	1.0	3
17	Enigma of the Origin of Primary Aldosteronism. <i>Hypertension</i> , 2019, 74, 745-746.	1.3	4
18	Aldosterone in Gynecology and Its Involvement on the Risk of Hypertension in Pregnancy. <i>Frontiers in Endocrinology</i> , 2019, 10, 575.	1.5	16

#	ARTICLE	IF	CITATIONS
19	Biological Effects of EF24, a Curcumin Derivative, Alone or Combined with Mitotane in Adrenocortical Tumor Cell Lines. <i>Molecules</i> , 2019, 24, 2202.	1.7	22
20	Is corifollitropin alfa effective in controlled ovarian stimulation among all poor ovarian responders? A retrospective comparative study. <i>Gynecological Endocrinology</i> , 2019, 35, 894-898.	0.7	4
21	Hypertension in pregnancy: Role of body mass index, insulin resistance, aldosterone, and calcium homeostasis. <i>Journal of Clinical Hypertension</i> , 2019, 21, 624-626.	1.0	2
22	Licorice and 11 β -Hydroxysteroid Dehydrogenase. , 2019, , 644-651.		0
23	Proinflammatory/profibrotic effects of aldosterone in Gitelman TM s syndrome, a human model opposite to hypertension. <i>Journal of Endocrinological Investigation</i> , 2019, 42, 521-526.	1.8	2
24	Crude extract of <i>Origanum vulgare</i> L. induced cell death and suppressed MAPK and PI3/Akt signaling pathways in SW13 and H295R cell lines. <i>Natural Product Research</i> , 2019, 33, 1646-1649.	1.0	19
25	Anticancer Effects of Wild Mountain <i>Mentha longifolia</i> Extract in Adrenocortical Tumor Cell Models. <i>Frontiers in Pharmacology</i> , 2019, 10, 1647.	1.6	14
26	The influence of thyroid autoimmunity on embryo quality in women undergoing assisted reproductive technology. <i>Gynecological Endocrinology</i> , 2018, 34, 752-755.	0.7	36
27	Uterine fibroids and risk of hypertension: Implication of inflammation and a possible role of the renin-angiotensin-aldosterone system. <i>Journal of Clinical Hypertension</i> , 2018, 20, 727-729.	1.0	10
28	Ameliorative effect of myo-inositol on red blood cell alterations in polycystic ovary syndrome: <i>in vitro</i> study. <i>Gynecological Endocrinology</i> , 2018, 34, 233-237.	0.7	3
29	Astaxanthin Prevents Human Papillomavirus L1 Protein Binding in Human Sperm Membranes. <i>Marine Drugs</i> , 2018, 16, 427.	2.2	12
30	Relationship between water and salt intake, osmolality, vasopressin, and aldosterone in the regulation of blood pressure. <i>Journal of Clinical Hypertension</i> , 2018, 20, 1455-1457.	1.0	7
31	Relationship between sodium, pentraxin β and aldosterone in inflammation and cardiovascular risk. <i>Journal of Clinical Hypertension</i> , 2018, 20, 932-934.	1.0	0
32	Evaluation of angiotensin type β 1 receptor antibodies in primary aldosteronism and further considerations about their possible pathogenetic role. <i>Journal of Clinical Hypertension</i> , 2018, 20, 1313-1318.	1.0	15
33	Association of primary aldosteronism with chronic thyroiditis. <i>Endocrine</i> , 2017, 55, 303-306.	1.1	9
34	Role of adrenocorticotrophic hormone in essential hypertension and primary aldosteronism. <i>Journal of Clinical Hypertension</i> , 2017, 19, 287-289.	1.0	3
35	Persistent amenorrhea and decreased DHEAS to cortisol ratio after recovery from anorexia nervosa. <i>Gynecological Endocrinology</i> , 2017, 33, 311-314.	0.7	6
36	Dapsone hydroxylamine-mediated alterations in human red blood cells from endometriotic patients. <i>Gynecological Endocrinology</i> , 2017, 33, 928-932.	0.7	2

#	ARTICLE	IF	CITATIONS
37	Hypothesis on a relationship between hyperaldosteronism, inflammation, somatic mutations, and autoimmunity. <i>Journal of Clinical Hypertension</i> , 2017, 19, 1060-1062.	1.0	14
38	Sodium intake, sodium excretion, and cardiovascular risk: involvement of genetic, hormonal, and epigenetic factors. <i>Journal of Clinical Hypertension</i> , 2017, 19, 650-652.	1.0	6
39	In vitro effects of glycyrrhetic acid and hyaluronic acid on the growth of vulvovaginal <i>Candida albicans</i> and other yeasts. <i>Microbiologia Medica</i> , 2017, 32, .	0.3	3
40	Spironolactone and intermenstrual bleeding in polycystic ovary syndrome with normal BMI. <i>Journal of Endocrinological Investigation</i> , 2016, 39, 1015-1021.	1.8	16
41	Spironolactone in the treatment of polycystic ovary syndrome. <i>Expert Opinion on Pharmacotherapy</i> , 2016, 17, 1713-1715.	0.9	27
42	Interrelationship Between Vitamin D Insufficiency, Calcium Homeostasis, Hyperaldosteronism, and Autoimmunity. <i>Journal of Clinical Hypertension</i> , 2016, 18, 614-616.	1.0	8
43	Considerations for the Assessment of Salt Intake by Urinary Sodium Excretion in Hypertensive Patients. <i>Journal of Clinical Hypertension</i> , 2016, 18, 1143-1145.	1.0	13
44	Some Considerations About Primary Aldosteronism and Its Follow-up. <i>Journal of Clinical Hypertension</i> , 2016, 18, 1213-1215.	1.0	2
45	Syndromes that Mimic an Excess of Mineralocorticoids. <i>High Blood Pressure and Cardiovascular Prevention</i> , 2016, 23, 231-235.	1.0	19
46	Mineralocorticoid receptor is involved in the aldosterone pathway in human red blood cells. <i>American Journal of Translational Research (discontinued)</i> , 2016, 8, 314-28.	0.0	10
47	The story of spironolactones from 1957 to now: from sodium balance to inflammation. <i>Giornale Italiano Di Nefrologia: Organo Ufficiale Della Societa&#x0300; Italiana Di Nefrologia</i> , 2016, 33 Suppl 66, 33.S66.12.	0.3	9
48	Astaxanthin Improves Human Sperm Capacitation by Inducing Lyn Displacement and Activation. <i>Marine Drugs</i> , 2015, 13, 5533-5551.	2.2	32
49	Transient hypercortisolism and symptomatic hyperthyroidism associated to primary hyperparathyroidism in an elderly patient: case report and literature review. <i>BMC Endocrine Disorders</i> , 2015, 15, 4.	0.9	2
50	Maternal and Fetal Outcomes in Preeclampsia: Interrelations Between Insulin Resistance, Aldosterone, Metabolic Syndrome, and Polycystic Ovary Syndrome. <i>Journal of Clinical Hypertension</i> , 2015, 17, 783-785.	1.0	8
51	Heart Failure Due to Adrenergic Myocardial Toxicity From a Pheochromocytoma. <i>Circulation: Heart Failure</i> , 2015, 8, 646-648.	1.6	6
52	Menstrual cycle length: a surrogate measure of reproductive health capable of improving the accuracy of biochemical/sonographical ovarian reserve test in estimating the reproductive chances of women referred to ART. <i>Reproductive Biology and Endocrinology</i> , 2015, 13, 28.	1.4	27
53	Aldosterone receptor blockers spironolactone and canrenone: two multivalent drugs. <i>Expert Opinion on Pharmacotherapy</i> , 2014, 15, 909-912.	0.9	31
54	Increased oxidation-related glutathionylation and carbonic anhydrase activity in endometriosis. <i>Reproductive BioMedicine Online</i> , 2014, 28, 773-779.	1.1	22

#	ARTICLE	IF	CITATIONS
55	Effect of various commercial buffers on sperm viability and capacitation. <i>Systems Biology in Reproductive Medicine</i> , 2014, 60, 239-244.	1.0	5
56	Human Red Blood Cells Alterations in Primary Aldosteronism. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2013, 98, 2494-2501.	1.8	19
57	High prevalence of chronic thyroiditis in patients with polycystic ovary syndrome. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2013, 169, 248-251.	0.5	58
58	Microalbuminuria and Hypertension in Pregnancy: Role of Aldosterone and Inflammation. <i>Journal of Clinical Hypertension</i> , 2013, 15, 612-614.	1.0	8
59	Effect of Astaxanthin on Human Sperm Capacitation. <i>Marine Drugs</i> , 2013, 11, 1909-1919.	2.2	38
60	Resolution of hypertension and secondary aldosteronism after surgical treatment of primary hyperparathyroidism. <i>Journal of Endocrinological Investigation</i> , 2013, 36, 665-6.	1.8	3
61	Serum Potassium, Thiazides, Aldosterone, and Mineralocorticoid Receptors. <i>Hypertension</i> , 2012, 60, e9.	1.3	5
62	Inositol administration reduces oxidative stress in erythrocytes of patients with polycystic ovary syndrome. <i>European Journal of Endocrinology</i> , 2012, 166, 703-710.	1.9	61
63	Salt and aldosterone do not get along with each other: implication of mineralocorticoid receptors in the profibrotic action of aldosterone. <i>Kidney International</i> , 2012, 81, 118.	2.6	2
64	Polycystic ovary syndrome: Implications of measurement of plasma aldosterone, renin activity and progesterone. <i>Steroids</i> , 2012, 77, 655-658.	0.8	36
65	Preeclampsia. <i>Hypertension</i> , 2012, 59, 1099-1100.	1.3	5
66	Authors'™ Response: Anti-Helicobacter pylori antibodies, autoimmunity, aldosterone and infertility: causal or casual association with polycystic ovary syndrome?. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2012, 163, 243-244.	0.5	0
67	Anti-Helicobacter pylori antibodies in cervical mucus: a new cause of infertility. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2011, 155, 157-160.	0.5	29
68	Editorial Comment to Receptor dependent immobilization of spermatozoa by sperm immobilization factor isolated from <i>Escherichia coli</i> : Proof of evidence. <i>International Journal of Urology</i> , 2011, 18, 603-604.	0.5	1
69	Endogenous reactive oxygen species content and modulation of tyrosine phosphorylation during sperm capacitation. <i>Journal of Developmental and Physical Disabilities</i> , 2011, 34, 411-419.	3.6	36
70	Evaluation of correct endogenous reactive oxygen species content for human sperm capacitation and involvement of the NADPH oxidase system. <i>Human Reproduction</i> , 2011, 26, 3264-3273.	0.4	42
71	Choice of Diuretic Therapy and Reconsideration for Aldosterone Receptors Blockers. <i>Hypertension</i> , 2010, 55, e5.	1.3	7
72	Oxidative stress-related proteins in a Conn's adenoma tissue. Relevance for aldosterone's prooxidative and proinflammatory activity. <i>Journal of Endocrinological Investigation</i> , 2010, 33, 48-53.	1.8	21

#	ARTICLE	IF	CITATIONS
73	Evaluation of erythrocyte band 3 phosphotyrosine level, glutathione content, CA-125, and human epididymal secretory protein E4 as combined parameters in endometriosis. <i>Fertility and Sterility</i> , 2010, 94, 1616-1621.	0.5	34
74	Licorice. , 2010, , 479-486.		1
75	Identification of the 11 β -hydroxysteroid Dehydrogenase Type 1 mRNA and Protein in Human Mononuclear Leukocytes. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2009, 117, 514-518.	0.6	4
76	<i>In vitro</i> effects of glycyrrhetic acid on the growth of clinical isolates of <i>Candida albicans</i> . <i>Phytotherapy Research</i> , 2009, 23, 572-574.	2.8	35
77	Effect of canrenone and amiloride on the prooxidative effect induced by aldosterone in human mononuclear leukocytes in vitro. <i>Journal of Endocrinological Investigation</i> , 2009, 32, 895-898.	1.8	4
78	Some considerations about evolution of idiopathic primary aldosteronism. <i>Journal of Endocrinological Investigation</i> , 2009, 32, 623-625.	1.8	7
79	Antiviral effects of <i>Glycyrrhiza</i> species. <i>Phytotherapy Research</i> , 2008, 22, 141-148.	2.8	392
80	Effect of glycyrrhetic acid on membrane band 3 in human erythrocytes. <i>Archives of Biochemistry and Biophysics</i> , 2008, 479, 46-51.	1.4	13
81	Genital tract infections and infertility. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2008, 140, 3-11.	0.5	262
82	Glycyrrhetic acid as inhibitor or amplifier of permeability transition in rat heart mitochondria. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2008, 1778, 313-323.	1.4	19
83	A hypothesis on the death of the Greek philosopher Heraclitus. <i>Journal of Endocrinological Investigation</i> , 2008, 31, 742-743.	1.8	2
84	Polycystic Ovary Syndrome: Implications of Corticotropin in the Regulation of Blood Pressure, Aldosterone, and Androgen Secretion. <i>Hypertension</i> , 2007, 50, e24; author reply e25.	1.3	2
85	Spontaneous Resolution of Idiopathic Aldosteronism After Long-Term Treatment With Potassium Canrenoate. <i>Hypertension</i> , 2007, 50, e69-70.	1.3	24
86	Treatment of polycystic ovary syndrome with spironolactone plus licorice. <i>European Journal of Obstetrics, Gynecology and Reproductive Biology</i> , 2007, 131, 61-67.	0.5	61
87	The expression of the human steroid sulfatase-encoding gene is driven by alternative first exons. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2007, 107, 22-29.	1.2	20
88	Antialdosteronici vecchi e nuovi nel trattamento dell'ipertensione e dello scompenso cardiaco. <i>L'Endocrinologo</i> , 2007, 8, 177-183.	0.0	0
89	Aldosterone and thrombosis formation: Implications for ischemic and atherosclerotic heart disease. <i>Journal of Endocrinological Investigation</i> , 2006, 29, 675-676.	1.8	4
90	Effect of licorice on PTH levels in healthy women. <i>Steroids</i> , 2006, 71, 403-408.	0.8	23

#	ARTICLE	IF	CITATIONS
91	Identification of the mineralocorticoid receptor in human spermatozoa. <i>International Journal of Molecular Medicine</i> , 2006, 18, 649.	1.8	1
92	Mononuclear Leukocyte Mineralocorticoid Receptors. <i>Hypertension</i> , 2006, 47, e4; author reply e4-5.	1.3	5
93	Aldosterone-mediated endothelial remodeling and oxidative stress. <i>Kidney International</i> , 2005, 68, 1899.	2.6	2
94	Long-Term Results of Adrenalectomy in Patients with Aldosterone-Producing Adenomas: Multivariate Analysis of Factors Affecting Unresolved Hypertension and Review of the Literature. <i>American Surgeon</i> , 2005, 71, 864-869.	0.4	121
95	Aldosterone, Inflammation, and Preeclampsia. <i>Hypertension</i> , 2005, 45, e10.	1.3	4
96	Carbenoxolone Induces Oxidative Stress in Liver Mitochondria, Which Is Responsible for Transition Pore Opening. <i>Endocrinology</i> , 2005, 146, 2306-2312.	1.4	30
97	Idiopathic primary hyperaldosteronism: Normalization of plasma aldosterone after one month withdrawal of long-term therapy with aldosterone-receptor antagonist potassium canrenoate. <i>Journal of Endocrinological Investigation</i> , 2005, 28, 236-240.	1.8	16
98	Spirolactone in the treatment of polycystic ovary syndrome: Effects on clinical features, insulin sensitivity and lipid profile. <i>Journal of Endocrinological Investigation</i> , 2005, 28, 49-53.	1.8	88
99	A history of the therapeutic use of liquorice in Europe. <i>Journal of Ethnopharmacology</i> , 2005, 99, 317-324.	2.0	310
100	Glycyrrhetic acid, the active principle of licorice, can reduce the thickness of subcutaneous thigh fat through topical application. <i>Steroids</i> , 2005, 70, 538-542.	0.8	53
101	Oxidative stress and profibrotic action of aldosterone. <i>American Journal of Hypertension</i> , 2005, 18, 441-441.	1.0	0
102	Aldosterone-mediated endothelial remodeling and oxidative stress. <i>Kidney International</i> , 2005, 68, 1899-1899.	2.6	0
103	Effect of Aldosterone and Glycyrrhetic Acid on the Protein Expression of PAI-1 and p22phox in Human Mononuclear Leukocytes. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2004, 89, 1973-1976.	1.8	110
104	A Particular Phenotype in a Girl with Aldosterone Synthase Deficiency. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2004, 89, 3168-3172.	1.8	8
105	On the mechanism of mitochondrial permeability transition induction by glycyrrhetic acid. <i>Biochimica Et Biophysica Acta - Bioenergetics</i> , 2004, 1658, 195-201.	0.5	59
106	Licorice reduces serum testosterone in healthy women. <i>Steroids</i> , 2004, 69, 763-766.	0.8	84
107	Inactivating mutations of the mineralocorticoid receptor in Type I pseudohypoaldosteronism. <i>Molecular and Cellular Endocrinology</i> , 2004, 217, 119-125.	1.6	61
108	Alzheimer's Disease: Pathophysiological Implications of Measurement of Plasma Cortisol, Plasma Dehydroepiandrosterone Sulfate, and Lymphocytic Corticosteroid Receptors. <i>Endocrine</i> , 2003, 22, 113-118.	2.2	39

#	ARTICLE	IF	CITATIONS
109	High Prevalence of Thyroid Ultrasonographic Abnormalities in Primary Aldosteronism. <i>Endocrine</i> , 2003, 22, 155-160.	2.2	10
110	Glycyrrhetic acid-induced permeability transition in rat liver mitochondria. <i>Biochemical Pharmacology</i> , 2003, 66, 2375-2379.	2.0	62
111	Grapefruit juice inhibits 11 β -hydroxysteroid dehydrogenase in vivo , in man. <i>Clinical Endocrinology</i> , 2003, 59, 143-144.	1.2	14
112	Effect of licorice on the reduction of body fat mass in healthy subjects. <i>Journal of Endocrinological Investigation</i> , 2003, 26, 646-650.	1.8	54
113	Pseudohyperaldosteronism: Pathogenetic Mechanisms. <i>Critical Reviews in Clinical Laboratory Sciences</i> , 2003, 40, 295-335.	2.7	27
114	Unilateral Adrenal Tumor, Erectile Dysfunction and Infertility in a Patient with 21-Hydroxylase Deficiency: Effects of Glucocorticoid Treatment and Surgery. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2003, 111, 41-43.	0.6	12
115	Licorice Consumption and Serum Testosterone in Healthy Man. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2003, 111, 341-343.	0.6	32
116	Different Inactivating Mutations of the Mineralocorticoid Receptor in Fourteen Families Affected by Type I Pseudohypoaldosteronism. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2003, 88, 2508-2517.	1.8	81
117	Growth hormone and insulin-like growth factor I in a Sydney Olympic gold medallist. <i>British Journal of Sports Medicine</i> , 2002, 36, 148-149.	3.1	12
118	History of The Endocrine Effects of Licorice. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2002, 110, 257-261.	0.6	148
119	Furosemide and 11 β -hydroxysteroid dehydrogenase activity, in man. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2002, 110, 272-276.	0.6	8
120	Reduction of Serum Testosterone in Men by Licorice. <i>New England Journal of Medicine</i> , 1999, 341, 1158-1158.	13.9	73
121	Transient pseudo-hypoaldosteronism following resection of the ileum: Normal level of lymphocytic aldosterone receptors outside the acute phase. <i>Journal of Endocrinological Investigation</i> , 1999, 22, 122-127.	1.8	25
122	Regulation of corticosteroid receptors in patients with anorexia nervosa and Cushing's syndrome. <i>Journal of Endocrinology</i> , 1998, 158, 435-439.	1.2	14
123	Corticosteroid receptors in mononuclear leucocytes of obese subjects. <i>Journal of Endocrinology</i> , 1998, 156, 187-194.	1.2	8
124	Hypertensive cardiomegaly caused by an aldosterone-secreting adenoma in a newborn. <i>Journal of Endocrinological Investigation</i> , 1997, 20, 86-89.	1.8	15
125	Dexamethasone suppression test: Corticosteroid receptors regulation in mononuclear leukocytes of young and aged subjects. <i>Aging Clinical and Experimental Research</i> , 1996, 8, 360-364.	1.4	6
126	Further studies on the mechanism of the mineralocorticoid action of licorice in humans. <i>Journal of Endocrinological Investigation</i> , 1996, 19, 624-629.	1.8	59

#	ARTICLE	IF	CITATIONS
127	Flutamide in the treatment of hirsutism: long-term clinical effects, endocrine changes, and androgen receptor behavior. <i>Fertility and Sterility</i> , 1995, 64, 511-517.	0.5	72
128	Pseudohypoaldosteronism: Evaluation of type I receptors by radioreceptor assay and by antireceptor antibodies. <i>Steroids</i> , 1995, 60, 161-163.	0.8	5
129	Long-term treatment of mineralocorticoid excess syndromes. <i>Steroids</i> , 1995, 60, 81-86.	0.8	45
130	Molecular characterization of the mineralocorticoid receptor in pseudohypoaldosteronism. <i>Steroids</i> , 1995, 60, 164-167.	0.8	12
131	Clinical and hormonal effects of the 5 alpha-reductase inhibitor finasteride in idiopathic hirsutism.. <i>Journal of Clinical Endocrinology and Metabolism</i> , 1994, 79, 1115-1121.	1.8	56
132	No alteration in the primary structure of the mineralocorticoid receptor in a family with pseudohypoaldosteronism.. <i>Journal of Clinical Endocrinology and Metabolism</i> , 1994, 79, 32-38.	1.8	57
133	Immunofluorescence of mineralocorticoid receptors in peripheral lymphocytes: Presence of receptor-like activity in patients with the autosomal dominant form of pseudohypoaldosteronism, and its absence in the recessive form. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 1994, 51, 267-273.	1.2	13
