#	ARTICLE	IF	CITATIONS
1	Cathepsin Gâ€™Not Only Inflammation: The Immune Protease Can Regulate Normal Physiological Processes. <i>Frontiers in Immunology</i> , 2020, 11, 411.	2.2	24
2	Protein-peptide complexes of angiotensins in the mechanisms of thirst motivation. <i>Neuroscience and Behavioral Physiology</i> , 2003, 33, 811-819.	0.2	3
3	Experimental simulation of neuropathological syndromes by creating pathologically enhanced excitation generators in the rabbit hypothalamus. <i>Bulletin of Experimental Biology and Medicine</i> , 1977, 84, 1397-1400.	0.3	2
4	Physiological effects of complexes of angiotensins with functionally different carrier proteins. <i>Bulletin of Experimental Biology and Medicine</i> , 2008, 146, 172-175.	0.3	2
5	Complexes of Angiotensin IV with Functionally Different Proteins in the Regulation of Drinking Behavior and Hemodynamics in Rats. <i>Bulletin of Experimental Biology and Medicine</i> , 2009, 148, 738-741.	0.3	2
6	Modification of Normal Activities of Angiotensin II and Angiotensin IV in Rats with Experimental Hypo- and Hyperglycemia. <i>Bulletin of Experimental Biology and Medicine</i> , 2012, 153, 667-670.	0.3	2
7	Effect of Î²-lipotropin derivatives on drinking and food behavior of rats. <i>Bulletin of Experimental Biology and Medicine</i> , 1984, 97, 233-236.	0.3	1
8	Biochemical and functional changes after immunization of rats with angiotensin II. <i>Bulletin of Experimental Biology and Medicine</i> , 1989, 108, 1120-1123.	0.3	1
9	Physiological response in rats to protein conjugates of angiotensin II during long-term immunization. <i>Bulletin of Experimental Biology and Medicine</i> , 1990, 110, 1593-1596.	0.3	1
10	Free and Protein-Bound Angiotensin III-7 in the Regulation of Drinking Behavior and Hemodynamics in Rats. <i>Bulletin of Experimental Biology and Medicine</i> , 2012, 153, 623-626.	0.3	1
11	Comparative Study of the Effects of Free Bound and Carrier Protein Angiotensin II in Experimental Hypoglycemia and Hyperglycemia. <i>Bulletin of Experimental Biology and Medicine</i> , 2014, 156, 419-422.	0.3	1
12	Behavioral and Hemodynamic Effects of Free and Protein-Bound Angiotensin IV in Rats in Experimental Hypo- and Hyperglycemia: Comparative Aspects. <i>Bulletin of Experimental Biology and Medicine</i> , 2015, 159, 297-301.	0.3	1
13	?-Lipotropin as a factor in food motivation. <i>Bulletin of Experimental Biology and Medicine</i> , 1981, 92, 1603-1605.	0.3	0
14	Role of ACTH5?8 and ?-MSH5?8 fragments in organization of the self-stimulation reaction. <i>Bulletin of Experimental Biology and Medicine</i> , 1986, 101, 561-564.	0.3	0
15	Comparative analysis of the role of ?-endorphin systems in mechanisms of different types of analgesia. <i>Bulletin of Experimental Biology and Medicine</i> , 1987, 104, 1337-1339.	0.3	0
16	Features of certain forms of goal-directed behavior after induced changes in the endogenous ?-endorphin level in rats. <i>Bulletin of Experimental Biology and Medicine</i> , 1987, 104, 1493-1496.	0.3	0
17	Comparative analysis of effects from prolonged peripheral and intracerebral administrations of angiotensin II in rats. <i>Bulletin of Experimental Biology and Medicine</i> , 1994, 118, 1053-1055.	0.3	0
18	Comparative analysis of effects from prolonged peripheral and intracerebral exposure to Î²-endorphin. <i>Bulletin of Experimental Biology and Medicine</i> , 1995, 120, 1079-1082.	0.3	0

#	ARTICLE	IF	CITATIONS
19	From Agonist to Antagonist: Modulation of the Physiological Action of Angiotensins by Protein Conjugation—Hemodynamics and Behavior. <i>Frontiers in Pharmacology</i> , 2021, 12, 772217.	1.6	0
