citing authors

#	ARTICLE	IF	CITATIONS
1	From Agonist to Antagonist: Modulation of the Physiological Action of Angiotensins by Protein Conjugation—Hemodynamics and Behavior. <i>Frontiers in Pharmacology</i> , 2021, 12, 772217.	1.6	0
2	Cathepsin G—Not Only Inflammation: The Immune Protease Can Regulate Normal Physiological Processes. <i>Frontiers in Immunology</i> , 2020, 11, 411.	2.2	24
3	Behavioral and Hemodynamic Effects of Free and Protein-Bound Angiotensin IV in Rats in Experimental Hypo- and Hyperglycemia: Comparative Aspects. <i>Bulletin of Experimental Biology and Medicine</i> , 2015, 159, 297-301.	0.3	1
4	Comparative Study of the Effects of Free Bound and Carrier Protein Angiotensin II in Experimental Hypoglycemia and Hyperglycemia. <i>Bulletin of Experimental Biology and Medicine</i> , 2014, 156, 419-422.	0.3	1
5	Free and Protein-Bound Angiotensin III-7 in the Regulation of Drinking Behavior and Hemodynamics in Rats. <i>Bulletin of Experimental Biology and Medicine</i> , 2012, 153, 623-626.	0.3	1
6	Modification of Normal Activities of Angiotensin II and Angiotensin IV in Rats with Experimental Hypo- and Hyperglycemia. <i>Bulletin of Experimental Biology and Medicine</i> , 2012, 153, 667-670.	0.3	2
7	Complexes of Angiotensin IV with Functionally Different Proteins in the Regulation of Drinking Behavior and Hemodynamics in Rats. <i>Bulletin of Experimental Biology and Medicine</i> , 2009, 148, 738-741.	0.3	2
8	Physiological effects of complexes of angiotensins with functionally different carrier proteins. <i>Bulletin of Experimental Biology and Medicine</i> , 2008, 146, 172-175.	0.3	2
9	Protein-peptide complexes of angiotensins in the mechanisms of thirst motivation. <i>Neuroscience and Behavioral Physiology</i> , 2003, 33, 811-819.	0.2	3
10	Comparative analysis of effects from prolonged peripheral and intracerebral exposure to $\hat{1}^2$ -endorphin. <i>Bulletin of Experimental Biology and Medicine</i> , 1995, 120, 1079-1082.	0.3	0
11	Comparative analysis of effects from prolonged peripheral and intracerebral administrations of angiotensin II in rats. <i>Bulletin of Experimental Biology and Medicine</i> , 1994, 118, 1053-1055.	0.3	0
12	Physiological response in rats to protein conjugates of angiotensin II during long-term immunization. <i>Bulletin of Experimental Biology and Medicine</i> , 1990, 110, 1593-1596.	0.3	1
13	Biochemical and functional changes after immunization of rats with angiotensin II. <i>Bulletin of Experimental Biology and Medicine</i> , 1989, 108, 1120-1123.	0.3	1
14	Comparative analysis of the role of $\hat{1}$ -endorphin systems in mechanisms of different types of analgesia. <i>Bulletin of Experimental Biology and Medicine</i> , 1987, 104, 1337-1339.	0.3	0
15	Features of certain forms of goal-directed behavior after induced changes in the endogenous $\hat{1}$ -endorphin level in rats. <i>Bulletin of Experimental Biology and Medicine</i> , 1987, 104, 1493-1496.	0.3	0
16	Role of ACTH $\hat{5}$ ?8 and $\hat{1}$ -MSH $\hat{5}$ ?8 fragments in organization of the self-stimulation reaction. <i>Bulletin of Experimental Biology and Medicine</i> , 1986, 101, 561-564.	0.3	0
17	Effect of $\hat{1}^2$ -lipotropin derivatives on drinking and food behavior of rats. <i>Bulletin of Experimental Biology and Medicine</i> , 1984, 97, 233-236.	0.3	1
18	$\hat{1}$ -Lipotropin as a factor in food motivation. <i>Bulletin of Experimental Biology and Medicine</i> , 1981, 92, 1603-1605.	0.3	0

#	ARTICLE	IF	CITATIONS
19	Experimental simulation of neuropathological syndromes by creating pathologically enhanced excitation generators in the rabbit hypothalamus. Bulletin of Experimental Biology and Medicine, 1977, 84, 1397-1400.	0.3	2
