

Juan M Murias

List of Publications by Citations

Source: <https://exaly.com/author-pdf/5487598/juan-m-murias-publications-by-citations.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

138

#	Paper	IF	Citations
138	Arterial versus capillary blood gases: a meta-analysis. <i>Respiratory Physiology and Neurobiology</i> , 2007 , 155, 268-79	2.8	139
137	Exercise Intensity Thresholds: Identifying the Boundaries of Sustainable Performance. <i>Medicine and Science in Sports and Exercise</i> , 2015 , 47, 1932-40	1.2	112
136	Speeding of VO ₂ kinetics with endurance training in old and young men is associated with improved matching of local O ₂ delivery to muscle O ₂ utilization. <i>Journal of Applied Physiology</i> , 2010 , 108, 913-22	3.7	105
135	Time course and mechanisms of adaptations in cardiorespiratory fitness with endurance training in older and young men. <i>Journal of Applied Physiology</i> , 2010 , 108, 621-7	3.7	80
134	Influence of phase I duration on phase II VO ₂ kinetics parameter estimates in older and young adults. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2011 , 301, R218-24	3.2	67
133	Vascular responsiveness determined by near-infrared spectroscopy measures of oxygen saturation. <i>Experimental Physiology</i> , 2016 , 101, 34-40	2.4	62
132	Characterizing the profile of muscle deoxygenation during ramp incremental exercise in young men. <i>European Journal of Applied Physiology</i> , 2012 , 112, 3349-60	3.4	56
131	Metabolic and functional responses playing tennis on different surfaces. <i>Journal of Strength and Conditioning Research</i> , 2007 , 21, 112-7	3.2	53
130	Breath-by-breath pulmonary O ₂ uptake kinetics: effect of data processing on confidence in estimating model parameters. <i>Experimental Physiology</i> , 2014 , 99, 1511-22	2.4	52
129	A Critical Evaluation of Current Methods for Exercise Prescription in Women and Men. <i>Medicine and Science in Sports and Exercise</i> , 2020 , 52, 466-473	1.2	52
128	Speeding of VO ₂ kinetics in response to endurance-training in older and young women. <i>European Journal of Applied Physiology</i> , 2011 , 111, 235-43	3.4	51
127	Reference values of pulmonary diffusing capacity for nitric oxide in an adult population. <i>Nitric Oxide - Biology and Chemistry</i> , 2008 , 18, 70-9	5	50
126	Are the parameters of VO ₂ , heart rate and muscle deoxygenation kinetics affected by serial moderate-intensity exercise transitions in a single day?. <i>European Journal of Applied Physiology</i> , 2011 , 111, 591-600	3.4	49
125	Waist-to-hip ratio is associated with pulmonary gas exchange in the morbidly obese. <i>Chest</i> , 2007 , 131, 362-7	5.3	49
124	Using ramp-incremental V O responses for constant-intensity exercise selection. <i>Applied Physiology, Nutrition and Metabolism</i> , 2018 , 43, 882-892	3	48
123	Muscle deoxygenation to VO ₂ relationship differs in young subjects with varying $\dot{V}O_2$. <i>European Journal of Applied Physiology</i> , 2011 , 111, 3107-18	3.4	48
122	Repeatability of vascular responsiveness measures derived from near-infrared spectroscopy. <i>Physiological Reports</i> , 2016 , 4, e12772	2.6	48

121	Determination of respiratory point compensation in healthy adults: Can non-invasive near-infrared spectroscopy help?. <i>Journal of Science and Medicine in Sport</i> , 2015 , 18, 590-5	4.4	46
120	Can measures of critical power precisely estimate the maximal metabolic steady-state?. <i>Applied Physiology, Nutrition and Metabolism</i> , 2016 , 41, 1197-1203	3	42
119	The critical role of O ₂ provision in the dynamic adjustment of oxidative phosphorylation. <i>Exercise and Sport Sciences Reviews</i> , 2014 , 42, 4-11	6.7	41
118	Speeding of VO ₂ kinetics during moderate-intensity exercise subsequent to heavy-intensity exercise is associated with improved local O ₂ distribution. <i>Journal of Applied Physiology</i> , 2011 , 111, 1410-1417	3.7	39
117	Critical power: How different protocols and models affect its determination. <i>Journal of Science and Medicine in Sport</i> , 2018 , 21, 742-747	4.4	37
116	Sex-related differences in muscle deoxygenation during ramp incremental exercise. <i>Respiratory Physiology and Neurobiology</i> , 2013 , 189, 530-6	2.8	36
115	Systemic and vastus lateralis muscle blood flow and O ₂ extraction during ramp incremental cycle exercise. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2013 , 304, R720-5	3.2	36
114	Establishing the V _O versus constant-work-rate relationship from ramp-incremental exercise: simple strategies for an unsolved problem. <i>Journal of Applied Physiology</i> , 2019 , 127, 1519-1527	3.7	35
113	Metabolic and performance-related consequences of exercising at and slightly above MLSS. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2018 , 28, 2481-2493	4.6	34
112	Effects of age and long-term endurance training on VO ₂ kinetics. <i>Medicine and Science in Sports and Exercise</i> , 2015 , 47, 289-98	1.2	34
111	Adaptations in capillarization and citrate synthase activity in response to endurance training in older and young men. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2011 , 66, 957-64	6.4	34
110	A small amount of inhaled nitric oxide does not increase lung diffusing capacity. <i>European Respiratory Journal</i> , 2006 , 27, 1251-7	13.6	33
109	Regulation of VO ₂ kinetics by O ₂ delivery: insights from acute hypoxia and heavy-intensity priming exercise in young men. <i>Journal of Applied Physiology</i> , 2012 , 112, 1023-32	3.7	33
108	Mechanisms for increases in V _O max with endurance training in older and young women. <i>Medicine and Science in Sports and Exercise</i> , 2010 , 42, 1891-8	1.2	32
107	Vascular responsiveness measured by tissue oxygen saturation reperfusion slope is sensitive to different occlusion durations and training status. <i>Experimental Physiology</i> , 2016 , 101, 1309-1318	2.4	31
106	Menstrual and oral contraceptive cycle phases do not affect submaximal and maximal exercise responses. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020 , 30, 472-484	4.6	30
105	Measurement of a True [Formula: see text]O during a Ramp Incremental Test Is Not Confirmed by a Verification Phase. <i>Frontiers in Physiology</i> , 2018 , 9, 143	4.6	29
104	The Respiratory Compensation Point and the Deoxygenation Break Point Are Valid Surrogates for Critical Power and Maximum Lactate Steady State. <i>Medicine and Science in Sports and Exercise</i> , 2018 , 50, 2375-2378	1.2	28

103	Laboratory 20-km cycle time trial reproducibility. <i>International Journal of Sports Medicine</i> , 2007 , 28, 743-8.6		27
102	A Simple Method to Quantify the $\dot{V}O_2$ Mean Response Time of Ramp-Incremental Exercise. <i>Medicine and Science in Sports and Exercise</i> , 2019 , 51, 1080-1086	1.2	26
101	The plateau in the NIRS-derived [HHb] signal near the end of a ramp incremental test does not indicate the upper limit of O extraction in the vastus lateralis. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2017 , 313, R723-R729	3.2	25
100	Pulmonary O ₂ uptake and muscle deoxygenation kinetics are slowed in the upper compared with lower region of the moderate-intensity exercise domain in older men. <i>European Journal of Applied Physiology</i> , 2011 , 111, 2139-48	3.4	25
99	Noninvasive estimation of microvascular O ₂ provision during exercise on-transients in healthy young males. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2012 , 303, R815-23	3.2	23
98	Reliability of microvascular responsiveness measures derived from near-infrared spectroscopy across a variety of ischemic periods in young and older individuals. <i>Microvascular Research</i> , 2019 , 122, 117-124	3.7	23
97	The near-infrared spectroscopy-derived deoxygenated haemoglobin breaking-point is a repeatable measure that demarcates exercise intensity domains. <i>Journal of Science and Medicine in Sport</i> , 2017 , 20, 873-877	4.4	22
96	The relationship between oxygen uptake kinetics and neuromuscular fatigue in high-intensity cycling exercise. <i>European Journal of Applied Physiology</i> , 2017 , 117, 969-978	3.4	22
95	High-intensity endurance training results in faster vessel-specific rate of vasorelaxation in type 1 diabetic rats. <i>PLoS ONE</i> , 2013 , 8, e59678	3.7	22
94	Effects of prior heavy-intensity exercise on oxygen uptake and muscle deoxygenation kinetics of a subsequent heavy-intensity cycling and knee-extension exercise. <i>Applied Physiology, Nutrition and Metabolism</i> , 2012 , 37, 138-48	3	22
93	Changes in vascular responsiveness during a hyperglycemia challenge measured by near-infrared spectroscopy vascular occlusion test. <i>Microvascular Research</i> , 2017 , 111, 67-71	3.7	21
92	Quadriceps Muscles O ₂ Extraction and EMG Breakpoints during a Ramp Incremental Test. <i>Frontiers in Physiology</i> , 2017 , 8, 686	4.6	21
91	The association between near-infrared spectroscopy-derived and flow-mediated dilation assessment of vascular responsiveness in the arm. <i>Microvascular Research</i> , 2019 , 122, 41-44	3.7	21
90	Fitness Level and Not Aging , Determines the Oxygen Uptake Kinetics Response. <i>Frontiers in Physiology</i> , 2018 , 9, 277	4.6	20
89	A "Step-Ramp-Step" Protocol to Identify the Maximal Metabolic Steady State. <i>Medicine and Science in Sports and Exercise</i> , 2020 , 52, 2011-2019	1.2	20
88	An equation to predict the maximal lactate steady state from ramp-incremental exercise test data in cycling. <i>Journal of Science and Medicine in Sport</i> , 2018 , 21, 1274-1280	4.4	20
87	Differences in vascular function between trained and untrained limbs assessed by near-infrared spectroscopy. <i>European Journal of Applied Physiology</i> , 2018 , 118, 2241-2248	3.4	19
86	Adjustments of pulmonary O ₂ uptake and muscle deoxygenation during ramp incremental exercise and constant-load moderate-intensity exercise in young and older adults. <i>Journal of Applied Physiology</i> , 2012 , 113, 1466-75	3.7	19

85	Short-term variability of nitric oxide diffusing capacity and its components. <i>Respiratory Physiology and Neurobiology</i> , 2007 , 157, 316-25	2.8	19
84	Near-infrared spectroscopy assessment of microvasculature detects difference in lower limb vascular responsiveness in obese compared to lean individuals. <i>Microvascular Research</i> , 2018 , 118, 31-35	3.7	18
83	Slower V O ₂ Kinetics in Older Individuals: Is It Inevitable?. <i>Medicine and Science in Sports and Exercise</i> , 2015 , 47, 2308-18	1.2	17
82	Poor compensatory hyperventilation in morbidly obese women at peak exercise. <i>Respiratory Physiology and Neurobiology</i> , 2007 , 159, 187-95	2.8	16
81	Effects of short-term training and detraining on VO ₂ kinetics: Faster VO ₂ kinetics response after one training session. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2016 , 26, 620-9	4.6	15
80	Effect of moderate-intensity work rate increment on phase II $\dot{V}O_2$ functional gain and [HHb]. <i>European Journal of Applied Physiology</i> , 2013 , 113, 545-57	3.4	15
79	The effects of short recovery duration on VO ₂ and muscle deoxygenation during intermittent exercise. <i>European Journal of Applied Physiology</i> , 2012 , 112, 1907-15	3.4	14
78	Effects of the menstrual and oral contraceptive cycle phases on microvascular reperfusion. <i>Experimental Physiology</i> , 2020 , 105, 184-191	2.4	14
77	The association between near-infrared spectroscopy assessment of microvascular reactivity and flow-mediated dilation is disrupted in individuals at high risk for cardiovascular disease. <i>Microcirculation</i> , 2019 , 26, e12556	2.9	13
76	Blood flow occlusion-related O ₂ extraction "reserve" is present in different muscles of the quadriceps but greater in deeper regions after ramp-incremental test. <i>Journal of Applied Physiology</i> , 2018 , 125, 313-319	3.7	13
75	Effects of pre-induced fatigue vs. concurrent pain on exercise tolerance, neuromuscular performance and corticospinal responses of locomotor muscles. <i>Journal of Physiology</i> , 2020 , 598, 285-302	3.9	13
74	Validity of a Taekwondo-Specific Test to Measure VO ₂ peak and the Heart Rate Deflection Point. <i>Journal of Strength and Conditioning Research</i> , 2019 , 33, 2523-2529	3.2	13
73	Critical power testing or self-selected cycling: Which one is the best predictor of maximal metabolic steady-state?. <i>Journal of Science and Medicine in Sport</i> , 2017 , 20, 795-799	4.4	12
72	Oxygen uptake kinetics in endurance-trained and untrained postmenopausal women. <i>Applied Physiology, Nutrition and Metabolism</i> , 2013 , 38, 154-60	3	12
71	Pulmonary gas exchange does not worsen during repeat exercise in women. <i>Respiratory Physiology and Neurobiology</i> , 2006 , 153, 226-36	2.8	12
70	Near-infrared spectroscopy can detect differences in vascular responsiveness to a hyperglycaemic challenge in individuals with obesity compared to normal-weight individuals. <i>Diabetes and Vascular Disease Research</i> , 2018 , 15, 55-63	3.3	11
69	Evaluating the suitability of supra-PO verification trials after ramp-incremental exercise to confirm the attainment of maximum O ₂ uptake. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2020 , 319, R315-R322	3.2	11
68	Faster V O ₂ kinetics after priming exercises of different duration but same fatigue. <i>Journal of Sports Sciences</i> , 2018 , 36, 1095-1102	3.6	10

67	Acute endurance exercise induces changes in vasorelaxation responses that are vessel-specific. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2013 , 304, R574-80	3.2	10
66	Vessel-specific rate of vasorelaxation is slower in diabetic rats. <i>Diabetes and Vascular Disease Research</i> , 2013 , 10, 179-86	3.3	10
65	Similar pattern of change in $\dot{V}O_2$ kinetics, vascular function, and tissue oxygen provision following an endurance training stimulus in older and young adults. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2017 , 312, R467-R476	3.2	9
64	The effects of aging and cardiovascular risk factors on microvascular function assessed by near-infrared spectroscopy. <i>Microvascular Research</i> , 2019 , 126, 103911	3.7	9
63	Near-infrared spectroscopy-derived total haemoglobin as an indicator of changes in muscle blood flow during exercise-induced hyperaemia. <i>Journal of Sports Sciences</i> , 2020 , 38, 751-758	3.6	9
62	Noninvasive and in vivo assessment of upper and lower limb skeletal muscle oxidative metabolism activity and microvascular responses to glucose ingestion in humans. <i>Applied Physiology, Nutrition and Metabolism</i> , 2019 , 44, 1105-1111	3	9
61	Training-Induced Changes in the Respiratory Compensation Point, Deoxyhemoglobin Break Point, and Maximal Lactate Steady State: Evidence of Equivalence. <i>International Journal of Sports Physiology and Performance</i> , 2019 , 1-7	3.5	9
60	Differences in oxidative metabolism modulation induced by ischemia/reperfusion between trained and untrained individuals assessed by NIRS. <i>Physiological Reports</i> , 2017 , 5, e13384	2.6	8
59	Maximal Lactate Steady State Versus the 20-Minute Functional Threshold Power Test in Well-Trained Individuals: "Watts" the Big Deal?. <i>International Journal of Sports Physiology and Performance</i> , 2019 , 1-7	3.5	8
58	Reply to "Discussion of RCan measures of critical power precisely estimate the maximal metabolic steady-state?R Is it still necessary to compare critical power to maximal lactate steady state?" - When is it appropriate to compare critical power to maximal lactate steady-state?. <i>Applied Physiology, Nutrition and Metabolism</i> , 2018 , 43, 96-97	3	8
57	What Is Moderate to Vigorous Exercise Intensity?. <i>Frontiers in Physiology</i> , 2021 , 12, 682233	4.6	8
56	Effects of a rehabilitation program on microvascular function of CHD patients assessed by near-infrared spectroscopy. <i>Physiological Reports</i> , 2019 , 7, e14145	2.6	7
55	Interlimb differences in parameters of aerobic function and local profiles of deoxygenation during double-leg and counterweighted single-leg cycling. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2019 , 317, R840-R851	3.2	7
54	American ginseng acutely regulates contractile function of rat heart. <i>Frontiers in Pharmacology</i> , 2014 , 5, 43	5.6	7
53	The effects of the analysis strategy on the correlation between the NIRS reperfusion measures and the FMD response. <i>Microvascular Research</i> , 2020 , 127, 103922	3.7	7
52	Oxygen Uptake and Muscle Deoxygenation Kinetics During Skating: Comparison Between Slide-Board and Treadmill Skating. <i>International Journal of Sports Physiology and Performance</i> , 2018 , 13, 783-788	3.5	7
51	Evaluating the NIRS-derived microvascular O_2 extraction "reserve" in groups varying in sex and training status using leg blood flow occlusions. <i>PLoS ONE</i> , 2019 , 14, e0220192	3.7	6
50	Methodological Reconciliation of CP and MLSS and Their Agreement with the Maximal Metabolic Steady State. <i>Medicine and Science in Sports and Exercise</i> , 2021 ,	1.2	6

49	Individual cardiovascular responsiveness to work-matched exercise within the moderate- and severe-intensity domains. <i>European Journal of Applied Physiology</i> , 2021 , 121, 2039-2059	3.4	6
48	Validity of the Training-Load Concept.. <i>International Journal of Sports Physiology and Performance</i> , 2022 , 1-8	3.5	6
47	Metabolic inflexibility in individuals with obesity assessed by near-infrared spectroscopy. <i>Diabetes and Vascular Disease Research</i> , 2017 , 14, 502-509	3.3	5
46	Duration of "Phase I" VO ₂ p: a comparison of methods used in its estimation and the effects of varying moderate-intensity work rate. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2013 , 304, R238-47	3.2	5
45	Evaluating the Accuracy of Using Fixed Ranges of METs to Categorize Exertional Intensity in a Heterogeneous Group of Healthy Individuals: Implications for Cardiorespiratory Fitness and Health Outcomes. <i>Sports Medicine</i> , 2021 , 51, 2411-2421	10.6	5
44	Validation of a Maximal Incremental Skating Test Performed on a Slide Board: Comparison With Treadmill Skating. <i>International Journal of Sports Physiology and Performance</i> , 2017 , 12, 1363-1369	3.5	4
43	Near-infrared spectroscopy detects transient decrements and recovery of microvascular responsiveness following prolonged forearm ischemia. <i>Microvascular Research</i> , 2019 , 125, 103879	3.7	4
42	Response. <i>Medicine and Science in Sports and Exercise</i> , 2015 , 47, 1998-9	1.2	4
41	Prolonged moderate-intensity exercise oxygen uptake response following heavy-intensity priming exercise with short- and longer-term recovery. <i>Applied Physiology, Nutrition and Metabolism</i> , 2013 , 38, 566-73	3	4
40	Potassium kinetics and its relationship with ventilation during repeated bouts of exercise in women. <i>European Journal of Applied Physiology</i> , 2007 , 99, 173-81	3.4	4
39	Identification of Non-Invasive Exercise Thresholds: Methods, Strategies, and an Online App. <i>Sports Medicine</i> , 2021 , 1	10.6	4
38	The effect of the fraction of inspired oxygen on the NIRS-derived deoxygenated hemoglobin "breakpoint" during ramp-incremental test. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2020 , 318, R399-R409	3.2	4
37	Rolling massage acutely improves skeletal muscle oxygenation and parameters associated with microvascular reactivity: The first evidence-based study. <i>Microvascular Research</i> , 2020 , 132, 104063	3.7	4
36	Comment on: "Relative Proximity of Critical Power and Metabolic/Ventilatory Thresholds: Systematic Review and Meta-Analysis". <i>Sports Medicine</i> , 2021 , 51, 367-368	10.6	4
35	Allometric scaling of flow-mediated dilation: is it always helpful?. <i>Clinical Physiology and Functional Imaging</i> , 2018 , 38, 663-669	2.4	4
34	Prior exercise impairs subsequent performance in an intensity- and duration-dependent manner. <i>Applied Physiology, Nutrition and Metabolism</i> , 2021 , 46, 976-985	3	4
33	Identification of critical intensity from a single lactate measure during a 3-min, submaximal cycle-ergometer test. <i>Journal of Sports Sciences</i> , 2017 , 35, 2191-2197	3.6	3
32	Response to Letter from Tremblay & King: Near-infrared spectroscopy: can it measure conduit artery endothelial function?. <i>Experimental Physiology</i> , 2017 , 102, 128-129	2.4	3

- 31 Hypoxia equally reduces the respiratory compensation point and the NIRS-derived [HHb] breakpoint during a ramp-incremental test in young active males. *Physiological Reports*, **2020**, 8, e14478 2.6 3
- 30 Faster VO₂ kinetics after eccentric contractions is explained by better matching of O₂ delivery to O₂ utilization. *European Journal of Applied Physiology*, **2014**, 114, 2169-81 3.4 3
- 29 Effect of acute hypoxia on muscle blood flow, VO₂, and [HHb] kinetics during leg extension exercise in older men. *European Journal of Applied Physiology*, **2013**, 113, 1685-94 3.4 3
- 28 Control of V O₂ Kinetics: Not a Settled Issue. *Medicine and Science in Sports and Exercise*, **2015**, 47, 2480 1.2 3
- 27 Fitness Level- and Sex-related Differences in Macro- and Microvascular Responses during Reactive Hyperemia. *Medicine and Science in Sports and Exercise*, **2021**, 1.2 3
- 26 Association between [Formula: see text]O kinetics and [Formula: see text]O in groups differing in fitness status. *European Journal of Applied Physiology*, **2021**, 121, 1921-1931 3.4 3
- 25 The relationship between the time constant of [Formula: see text]O kinetics and [Formula: see text]O in humans. *European Journal of Applied Physiology*, **2021**, 121, 2655-2656 3.4 3
- 24 Slight power output manipulations around the maximal lactate steady state have a similar impact on fatigue in females and males. *Journal of Applied Physiology*, **2021**, 130, 1879-1892 3.7 3
- 23 Response. *Medicine and Science in Sports and Exercise*, **2019**, 51, 830 1.2 3
- 22 Effect of dietary nitrate ingestion on muscular performance: a systematic review and meta-analysis of randomized controlled trials. *Critical Reviews in Food Science and Nutrition*, **2021**, 1-23 11.5 3
- 21 Commentaries on Viewpoint: V o is an acceptable estimate of cardiorespiratory fitness but not V o. *Journal of Applied Physiology*, **2018**, 125, 966-967 3.7 3
- 20 Response. *Medicine and Science in Sports and Exercise*, **2019**, 51, 603 1.2 2
- 19 Differing six minute pacing strategies affect anaerobic contribution, oxygen uptake, muscle deoxygenation and cycle performance. *Journal of Sports Medicine and Physical Fitness*, **2018**, 58, 17-26 1.4 2
- 18 Dynamic Changes of Performance Fatigability and Muscular O₂ Saturation in a 4-km Cycling Time Trial. *Medicine and Science in Sports and Exercise*, **2021**, 53, 613-623 1.2 2
- 17 Acute application of a transdermal nitroglycerin patch protects against prolonged forearm ischemia-induced microvascular dysfunction. *Microcirculation*, **2020**, 27, e12599 2.9 2
- 16 Responders and non-responders to aerobic exercise training: beyond the evaluation of. *Physiological Reports*, **2021**, 9, e14951 2.6 2
- 15 Turmeric root extract supplementation improves pre-frontal cortex oxygenation and blood volume in older males and females: a randomised cross-over, placebo-controlled study. *International Journal of Food Sciences and Nutrition*, **2021**, 1-10 3.7 2
- 14 Commentaries on Viewpoint: Time to reconsider how ventilation is regulated above the respiratory compensation point during incremental exercise. *Journal of Applied Physiology*, **2020**, 128, 1450-1455 3.7 1
