#	ARTICLE	IF	CITATIONS
1	Variance in within-pair reproductive success influences the opportunity for selection annually and over the lifetimes of males in a multibrooded songbird*. <i>Evolution; International Journal of Organic Evolution</i> , 2021, 75, 915-930.	2.3	5
2	Common Field Data Limitations Can Substantially Bias Sexual Selection Metrics. <i>American Naturalist</i> , 2020, 196, 180-196.	2.1	8
3	Strong sexual selection despite spatial constraints on extrapair paternity. <i>Behavioral Ecology</i> , 2020, 31, 618-626.	2.2	6
4	Over-summering abundance, species composition, and habitat use patterns at a globally important site for migratory shorebirds. <i>Wilson Journal of Ornithology</i> , 2020, 132, 165.	0.2	15
5	Within-group relatedness and patterns of reproductive sharing and cooperation in the tropical chestnut-crested yuhina. <i>Animal Behaviour</i> , 2019, 158, 89-99.	1.9	5
6	Direct fitness benefits and kinship of social foraging groups in an Old World tropical babbler. <i>Behavioral Ecology</i> , 2018, 29, 468-478.	2.2	9
7	Variation in nest characteristics and brooding patterns of female Black-throated Blue Warblers is associated with thermal cues. <i>Auk</i> , 2018, 135, 733-747.	1.4	7
8	An experimental test of the effect of brood size on glucocorticoid responses, parental investment, and offspring phenotype. <i>General and Comparative Endocrinology</i> , 2017, 247, 97-106.	1.8	18
9	Ecological and Social Factors Constrain Spatial and Temporal Opportunities for Mating in a Migratory Songbird. <i>American Naturalist</i> , 2017, 189, 283-296.	2.1	20
10	Characterizing selection in black-throated blue warblers using a sexual network approach. <i>Journal of Evolutionary Biology</i> , 2017, 30, 2177-2188.	1.7	9
11	A comparative assessment of <scp>SNP</scp> and microsatellite markers for assigning parentage in a socially monogamous bird. <i>Molecular Ecology Resources</i> , 2017, 17, 183-193.	4.8	57
12	Identification and characterization of microsatellite loci in two socially complex old world tropical babblers (Family Timaliidae). <i>BMC Research Notes</i> , 2015, 8, 707.	1.4	2
13	Experimental food supplementation reveals habitat-dependent male reproductive investment in a migratory bird. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2015, 282, 20142523.	2.6	30
14	Phenotypic plasticity in hormonal and behavioural responses to changes in resource conditions in a migratory songbird. <i>Animal Behaviour</i> , 2014, 96, 19-29.	1.9	14
15	Warm Springs, Early Lay Dates, and Double Brooding in a North American Migratory Songbird, the Black-Throated Blue Warbler. <i>PLoS ONE</i> , 2013, 8, e59467.	2.5	60
16	Shifting threats faced by the San Clemente sage sparrow. <i>Journal of Wildlife Management</i> , 2011, 75, 1350-1360.	1.8	4
17	EFFECTS OF DISTANCE TO EDGE AND EDGE TYPE ON NESTLING GROWTH AND NEST SURVIVAL IN THE WOOD THRUSH. <i>Condor</i> , 2007, 109, 288.	1.6	13
18	EDGE RESPONSES OF TROPICAL AND TEMPERATE BIRDS. <i>Wilson Journal of Ornithology</i> , 2007, 119, 205-220.	0.2	55

#	ARTICLE	IF	CITATIONS
19	Effects of Distance to Edge and Edge Type on Nestling Growth and Nest Survival in the Wood Thrush. <i>Condor</i> , 2007, 109, 288-303.	1.6	18
20	Generalizability of neotropical bird abundance and richness models. <i>Animal Conservation</i> , 2006, 9, 445-455.	2.9	5
