#	ARTICLE	IF	CITATIONS
1	Nicholson's blowflies differential equations revisited: Main results and open problems. Applied Mathematical Modelling, 2010, 34, 1405-1417.	4.2	220
2	Nonoscillation Theory of Functional Differential Equations with Applications. , 2012, , .		137
3	Exponential Stability of Linear Delay Impulsive Differential Equations. Journal of Mathematical Analysis and Applications, 1995, 193, 923-941.	1.0	135
4	On Impulsive Beverton-Holt Difference Equations and their Applications. Journal of Difference Equations and Applications, 2004, 10, 851-868.	1.1	79
5	On oscillation of differential and difference equations with non-monotone delays. Applied Mathematics and Computation, 2011, 218, 3880-3887.	2.2	57
6	On stability of some linear and nonlinear delay differential equations. Journal of Mathematical Analysis and Applications, 2006, 314, 391-411.	1.0	53
7	On exponential dichotomy, Bohl-Perron type theorems and stability of difference equations. Journal of Mathematical Analysis and Applications, 2005, 304, 511-530.	1.0	51
8	On exponential stability of a linear delay differential equation with an oscillating coefficient. Applied Mathematics Letters, 2009, 22, 1833-1837.	2.7	50
9	A note on stability of Mackey-Glass equations with two delays. Journal of Mathematical Analysis and Applications, 2017, 450, 1208-1228.	1.0	45
10	A Fast 3D Poisson Solver of Arbitrary Order Accuracy. Journal of Computational Physics, 1998, 144, 109-136.	3.8	44
11	Mackey-Glass model of hematopoiesis with non-monotone feedback: Stability, oscillation and control. Applied Mathematics and Computation, 2013, 219, 6268-6283.	2.2	40
12	Mackey-glass equation with variable coefficients. Computers and Mathematics With Applications, 2006, 51, 1-16.	2.7	36
13	Continuous versus pulse harvesting for population models in constant and variable environment. Journal of Mathematical Biology, 2008, 57, 413-434.	1.9	35
14	Optimal harvesting of diffusive models in a nonhomogeneous environment. Nonlinear Analysis: Theory, Methods & Applications, 2009, 71, e2173-e2181.	1.1	34
15	New global exponential stability criteria for nonlinear delay differential systems with applications to BAM neural networks. Applied Mathematics and Computation, 2014, 243, 899-910.	2.2	34
16	On evolutionary stability of carrying capacity driven dispersal in competition with regularly diffusing populations. Journal of Mathematical Biology, 2014, 69, 1181-1206.	1.9	32
17	Sufficient conditions for the global stability of nonautonomous higher order difference equations. Journal of Difference Equations and Applications, 2005, 11, 785-798.	1.1	31
18	Linearized oscillation theory for a nonlinear delay impulsive equation. Journal of Computational and Applied Mathematics, 2003, 161, 477-495.	2.0	30

#	ARTICLE	IF	CITATIONS
19	On Oscillation of a Second Order Impulsive Linear Delay Differential Equation. Journal of Mathematical Analysis and Applications, 1999, 233, 276-300.	1.0	29
20	On exponential stability of linear differential equations with several delays. Journal of Mathematical Analysis and Applications, 2006, 324, 1336-1355.	1.0	29
21	Permanence, oscillation and attractivity of the discrete hematopoiesis model with variable coefficients. Nonlinear Analysis: Theory, Methods & Applications, 2007, 67, 2955-2965.	1.1	29
22	Persistence and extinction in spatial models with a carrying capacity driven diffusion and harvesting. Journal of Mathematical Analysis and Applications, 2013, 399, 352-368.	1.0	28
23	Iterative oscillation tests for differential equations with several non-monotone arguments. Advances in Difference Equations, 2016, 2016, .	3.5	26
24	Linearized oscillation theory for a nonlinear equation with a distributed delay. Mathematical and Computer Modelling, 2008, 48, 287-304.	2.0	25
25	Global stabilization of periodic orbits using a proportional feedback control with pulses. Nonlinear Dynamics, 2012, 67, 2467-2475.	5.2	24
26	Explicit exponential stability conditions for linear differential equations with several delays. Journal of Mathematical Analysis and Applications, 2007, 332, 246-264.	1.0	23
27	Explicit Conditions of Exponential Stability for a Linear Impulsive Delay Differential Equation. Journal of Mathematical Analysis and Applications, 1997, 214, 439-458.	1.0	22
28	Efficient Computation of Oscillatory Integrals via Adaptive Multiscale Local Fourier Bases. Applied and Computational Harmonic Analysis, 2000, 9, 19-53.	2.2	22
29	Stability of the second order delay differential equations with a damping term. Differential Equations and Dynamical Systems, 2008, 16, 185-205.	1.0	22
30	Stable recovery of analysis based approaches. Applied and Computational Harmonic Analysis, 2015, 39, 161-172.	2.2	22
31	Event-Triggered Control for Nonlinear Time-Delay Systems. IEEE Transactions on Automatic Control, 2022, 67, 1031-1037.	5.7	22
32	Some Oscillation Problems for a Second Order Linear Delay Differential Equation. Journal of Mathematical Analysis and Applications, 1998, 220, 719-740.	1.0	20
33	On logistic models with a carrying capacity dependent diffusion: Stability of equilibria and coexistence with a regularly diffusing population. Nonlinear Analysis: Real World Applications, 2012, 13, 2648-2658.	1.7	20
34	Iterative oscillation tests for difference equations with several non-monotone arguments. Journal of Difference Equations and Applications, 2015, 21, 854-874.	1.1	20
35	The Mackeyâ€Class model of respiratory dynamics: Review and new results. Nonlinear Analysis: Theory, Methods & Applications, 2012, 75, 6034-6052.	1.1	19
36	Mackeyâ€Class model of hematopoiesis with monotone feedback revisited. Applied Mathematics and Computation, 2013, 219, 4892-4907.	2.2	19

#	ARTICLE	IF	CITATIONS
37	Bohlâ€Perron-type stability theorems for linear difference equations with infinite delay. Journal of Difference Equations and Applications, 2012, 18, 909-939.	1.1	18
38	Stability of the elastic net estimator. Journal of Complexity, 2016, 32, 20-39.	1.3	18
39	Absolute and delay-dependent stability of equations with a distributed delay. Discrete and Continuous Dynamical Systems, 2012, 32, 2041-2061.	0.9	18
40	Exponential boundedness of solutions for impulsive delay differential equations. Applied Mathematics Letters, 1996, 9, 91-95.	2.7	17
41	Oscillation properties of a logistic equation with distributed delay. Nonlinear Analysis: Real World Applications, 2003, 4, 1-19.	1.7	17
42	Delay differential logistic equation with harvesting. Mathematical and Computer Modelling, 2004, 40, 1509-1525.	2.0	17
43	Boundedness and persistence of delay differential equations with mixed nonlinearity. Applied Mathematics and Computation, 2016, 279, 154-169.	2.2	17
44	Removal of Mixed Gaussian and Impulse Noise Using Directional Tensor Product Complex Tight Framelets. Journal of Mathematical Imaging and Vision, 2016, 54, 64-77.	1.3	17
45	A Fast Spectral Solver for a 3D Helmholtz Equation. SIAM Journal of Scientific Computing, 1999, 20, 2237-2260.	2.8	16
46	On oscillation of a logistic equation with several delays. Journal of Computational and Applied Mathematics, 2000, 113, 255-265.	2.0	16
47	On oscillation properties of delay differential equations with positive and negative coefficients. Journal of Mathematical Analysis and Applications, 2002, 274, 81-101.	1.0	16
48	Linearized oscillation theory for a nonlinear nonautonomous delay differential equation. Journal of Computational and Applied Mathematics, 2003, 151, 119-127.	2.0	16
49	On the Cushingâ€Henson conjecture, delay difference equations and attenuant cycles. Journal of Difference Equations and Applications, 2008, 14, 275-286.	1.1	16
50	On stabilization of equilibria using predictive control with and without pulses. Computers and Mathematics With Applications, 2012, 64, 2192-2201.	2.7	16
51	Stabilisation of difference equations with noisy prediction-based control. Physica D: Nonlinear Phenomena, 2016, 326, 21-31.	2.8	16
52	On Oscillation of Equations with Distributed Delay. Zeitschrift Fur Analysis Und Ihre Anwendung, 2001, 20, 489-504.	0.6	15
53	Delay differential equations with Hill's type growth rate and linear harvesting. Computers and Mathematics With Applications, 2005, 49, 549-563.	2.7	15
54	On linear perturbations of the Ricker model. Mathematical Biosciences, 2006, 202, 323-339.	1.9	15

#	ARTICLE	IF	CITATIONS
55	On nonoscillation of mixed advanced-delay differential equations with positive and negative coefficients. <i>Computers and Mathematics With Applications</i> , 2009, 58, 766-775.	2.7	15
56	Global linearized stability theory for delay differential equations. <i>Nonlinear Analysis: Theory, Methods & Applications</i> , 2009, 71, 2614-2624.	1.1	15
57	On some constants for oscillation and stability of delay equations. <i>Proceedings of the American Mathematical Society</i> , 2011, 139, 4017-4026.	0.8	15
58	New Stability Conditions for Linear Differential Equations with Several Delays. <i>Abstract and Applied Analysis</i> , 2011, 2011, 1-19.	0.7	15
59	Time-delay systems with delayed impulses: A unified criterion on asymptotic stability. <i>Automatica</i> , 2021, 125, 109470.	5.0	15
60	Competitive spatially distributed population dynamics models: Does diversity in diffusion strategies promote coexistence?. <i>Mathematical Biosciences</i> , 2015, 264, 63-73.	1.9	14
61	Lotka systems with directed dispersal dynamics: Competition and influence of diffusion strategies. <i>Mathematical Biosciences</i> , 2016, 279, 1-12.	1.9	14
62	Velocity-dependent cost function for the prediction of force sharing among synergistic muscles in a one degree of freedom model. <i>Journal of Biomechanics</i> , 2009, 42, 657-660.	2.1	13
63	Oscillation criteria for a linear neutral differential equation. <i>Journal of Mathematical Analysis and Applications</i> , 2003, 286, 601-617.	1.0	12
64	Oscillation and other properties of linear impulsive and nonimpulsive delay equations. <i>Applied Mathematics Letters</i> , 2003, 16, 1025-1030.	2.7	12
65	Competitive and cooperative models with various diffusion strategies. <i>Computers and Mathematics With Applications</i> , 2016, 72, 653-662.	2.7	11
66	The problem of a lazy tester, or exponential dichotomy for impulsive differential equations revisited. <i>Nonlinear Analysis: Hybrid Systems</i> , 2008, 2, 971-979.	3.5	10
67	Exponential Stability of Difference Equations with Several Delays: Recursive Approach. <i>Advances in Difference Equations</i> , 2009, 2009, 1-13.	3.5	10
68	Oscillation of equations with an infinite distributed delay. <i>Computers and Mathematics With Applications</i> , 2010, 60, 2583-2593.	2.7	10
69	Nonoscillation of First-Order Dynamic Equations with Several Delays. <i>Advances in Difference Equations</i> , 2010, 2010, 1-22.	3.5	10
70	Uniform exponential stability of first-order dynamic equations with several delays. <i>Applied Mathematics and Computation</i> , 2012, 218, 10468-10485.	2.2	10
71	Stability of equations with a distributed delay, monotone production and nonlinear mortality. <i>Nonlinearity</i> , 2013, 26, 2833-2849.	1.4	10
72	On oscillation of a food-limited population model with time delay. <i>Abstract and Applied Analysis</i> , 2003, 2003, 55-66.	0.7	9

#	ARTICLE	IF	CITATIONS
73	Delay differential logistic equations with harvesting. <i>Mathematical and Computer Modelling</i> , 2004, 39, 1243-1259.	2.0	9
74	Chaotic and stable perturbed maps: 2-cycles and spatial models. <i>Chaos</i> , 2010, 20, 023114.	2.5	9
75	On nonoscillation and stability for systems of differential equations with a distributed delay. <i>Automatica</i> , 2012, 48, 612-618.	5.0	9
76	Oscillation Properties of a Logistic Equation with Several Delays. <i>Journal of Mathematical Analysis and Applications</i> , 2000, 247, 110-125.	1.0	8
77	Parallel Adaptive Solution of a Poisson Equation with Multiwavelets. <i>SIAM Journal of Scientific Computing</i> , 2000, 22, 1053-1086.	2.8	8
78	Nonoscillation of Second-Order Dynamic Equations with Several Delays. <i>Abstract and Applied Analysis</i> , 2011, 2011, 1-34.	0.7	8
79	Stabilization of two cycles of difference equations with stochastic perturbations. <i>Journal of Difference Equations and Applications</i> , 2013, 19, 1192-1212.	1.1	8
80	Stabilization of prescribed values and periodic orbits with regular and pulse target oriented control. <i>Chaos</i> , 2014, 24, 013119.	2.5	8
81	Stabilization with target oriented control for higher order difference equations. <i>Physics Letters, Section A: General, Atomic and Solid State Physics</i> , 2015, 379, 1102-1109.	2.1	8
82	Adaptive frame-based color image denoising. <i>Applied and Computational Harmonic Analysis</i> , 2016, 41, 54-74.	2.2	8
83	Stochastic control stabilizing unstable or chaotic maps. <i>Journal of Difference Equations and Applications</i> , 2019, 25, 151-178.	1.1	8
84	Preservation of the Exponential Stability under Perturbations of Linear Delay Impulsive Differential Equations. <i>Zeitschrift Fur Analysis Und Ihre Anwendung</i> , 1995, 14, 157-174.	0.6	7
85	On efficient computation of multidimensional oscillatory integrals with local Fourier bases. <i>Nonlinear Analysis: Theory, Methods & Applications</i> , 2001, 47, 3491-3502.	1.1	7
86	Oscillation of a logistic difference equation with several delays. <i>Advances in Difference Equations</i> , 2006, 2006, 1-12.	3.5	7
87	Nonoscillation and Exponential Stability of Delay Differential Equations with Oscillating Coefficients. <i>Journal of Dynamical and Control Systems</i> , 2009, 15, 63-82.	0.8	7
88	Periodic solutions and global attractivity of a discrete delay host macroparasite model. <i>Journal of Difference Equations and Applications</i> , 2010, 16, 789-806.	1.1	7
89	On difference equations with asymptotically stable 2-cycles perturbed by a decaying noise. <i>Computers and Mathematics With Applications</i> , 2012, 64, 2224-2232.	2.7	7
90	Solution estimates for linear differential equations with delay. <i>Applied Mathematics and Computation</i> , 2020, 372, 124962.	2.2	7
