#	ARTICLE	IF	CITATIONS
1	Contact angle hysteresis: A new paradigm?. <i>Advances in Water Resources</i> , 2022, 161, 104138.	1.7	5
2	Comparison of thresholding techniques for quantifying portland cement hydrates using synchrotron microtomography. <i>Construction and Building Materials</i> , 2021, 266, 121109.	3.2	6
3	Predicting the Effect of Relaxation on Interfacial Area Development in Multiphase Flow. <i>Water Resources Research</i> , 2021, 57, e2020WR028770.	1.7	1
4	On the relationship between capillary pressure, saturation, and interfacial area for three-phase flow in water-wet porous media. <i>Advances in Water Resources</i> , 2021, 151, 103905.	1.7	8
5	Exploring the effect of flow condition on the constitutive relationships for two-phase flow. <i>Advances in Water Resources</i> , 2020, 137, 103506.	1.7	15
6	Characterization of wetting using topological principles. <i>Journal of Colloid and Interface Science</i> , 2020, 578, 106-115.	5.0	45
7	A proximity-based image-processing algorithm for colloid assignment in segmented multiphase flow datasets. <i>Journal of Microscopy</i> , 2020, 277, 118-129.	0.8	3
8	Optimizing pink-beam fast X-ray microtomography for multiphase flow in 3D porous media. <i>Journal of Microscopy</i> , 2020, 277, 100-106.	0.8	7
9	Use of iodine for improving phase quantification using x-ray tomography. <i>Cement and Concrete Research</i> , 2019, 116, 102-112.	4.6	7
10	Lime application effects on soil aggregate properties: Use of the mean weight diameter and synchrotron-based X-ray μ CT techniques. <i>Geoderma</i> , 2019, 338, 585-596.	2.3	33
11	An improved method for estimating capillary pressure from 3D microtomography images and its application to the study of disconnected nonwetting phase. <i>Advances in Water Resources</i> , 2018, 114, 249-260.	1.7	33
12	X-ray microtomography analysis of lime application effects on soil porous system. <i>Geoderma</i> , 2018, 324, 119-130.	2.3	34
13	Defining a novel pore-body to pore-throat "Morphological Aspect Ratio" that scales with residual non-wetting phase capillary trapping in porous media. <i>Advances in Water Resources</i> , 2018, 122, 251-262.	1.7	27
14	Investigating the influence of flow rate on biofilm growth in three dimensions using microimaging. <i>Advances in Water Resources</i> , 2018, 117, 1-13.	1.7	16
15	Time scales of relaxation dynamics during transient conditions in two-phase flow. <i>Water Resources Research</i> , 2017, 53, 4709-4724.	1.7	50
16	Quantification of synthesized hydration products using synchrotron microtomography and spectral analysis. <i>Construction and Building Materials</i> , 2017, 157, 476-488.	3.2	9
17	Impact of wettability alteration on 3D nonwetting phase trapping and transport. <i>International Journal of Greenhouse Gas Control</i> , 2016, 46, 175-186.	2.3	54
18	Enhancing residual trapping of supercritical CO ₂ via cyclic injections. <i>Geophysical Research Letters</i> , 2016, 43, 9677-9685.	1.5	57

#	ARTICLE	IF	CITATIONS
19	Pore-scale displacement mechanisms as a source of hysteresis for two-phase flow in porous media. <i>Water Resources Research</i> , 2016, 52, 2194-2205.	1.7	145
20	Biofilm growth in porous media: Experiments, computational modeling at the porescale, and upscaling. <i>Advances in Water Resources</i> , 2016, 95, 288-301.	1.7	72
21	The effect of pore morphology on microbial enhanced oil recovery. <i>Journal of Petroleum Science and Engineering</i> , 2015, 130, 16-25.	2.1	33
22	Efficiently engineering pore-scale processes: The role of force dominance and topology during nonwetting phase trapping in porous media. <i>Advances in Water Resources</i> , 2015, 79, 91-102.	1.7	84
23	Experimental characterization of nonwetting phase trapping and implications for geologic CO ₂ sequestration. <i>International Journal of Greenhouse Gas Control</i> , 2015, 42, 1-15.	2.3	32
24	Linking air and water transport in intact soils to macropore characteristics inferred from X-ray computed tomography. <i>Geoderma</i> , 2015, 237-238, 9-20.	2.3	140
25	Pore-scale observations of supercritical CO ₂ drainage in Bentheimer sandstone by synchrotron x-ray imaging. <i>International Journal of Greenhouse Gas Control</i> , 2014, 25, 93-101.	2.3	42
26	On the challenges of measuring interfacial characteristics of three-phase fluid flow with x-ray microtomography. <i>Journal of Microscopy</i> , 2014, 253, 171-182.	0.8	38
27	Impact of long-term fertilization practice on soil structure evolution. <i>Geoderma</i> , 2014, 217-218, 181-189.	2.3	83
28	Image processing of multiphase images obtained via X-ray microtomography: A review. <i>Water Resources Research</i> , 2014, 50, 3615-3639.	1.7	472
29	Effect of fluid topology on residual nonwetting phase trapping: Implications for geologic CO ₂ sequestration. <i>Advances in Water Resources</i> , 2013, 62, 47-58.	1.7	185
30	X-ray imaging and analysis techniques for quantifying pore-scale structure and processes in subsurface porous medium systems. <i>Advances in Water Resources</i> , 2013, 51, 217-246.	1.7	939
31	Trapping and hysteresis in two-phase flow in porous media: A pore-network study. <i>Water Resources Research</i> , 2013, 49, 4244-4256.	1.7	77
32	X-ray CT and Laboratory Measurements on Glacial Till Subsoil Cores. <i>Soil Science</i> , 2013, 178, 359-368.	0.9	35
33	Correlating Gas Transport Parameters and X-Ray Computed Tomography Measurements in Porous Media. <i>Soil Science</i> , 2013, 178, 60-68.	0.9	23
34	Revealing Soil Structure and Functional Macroporosity along a Clay Gradient Using X-ray Computed Tomography. <i>Soil Science Society of America Journal</i> , 2013, 77, 403-411.	1.2	71
35	Soil Architecture and Physicochemical Functions: An Introduction. <i>Vadose Zone Journal</i> , 2012, 11, .	1.3	7
36	Three-Dimensional Multiphase Segmentation of X-Ray CT Data of Porous Materials Using a Bayesian Markov Random Field Framework. <i>Vadose Zone Journal</i> , 2012, 11, .	1.3	36

#	ARTICLE	IF	CITATIONS
37	Linking pore-scale interfacial curvature to column-scale capillary pressure. <i>Advances in Water Resources</i> , 2012, 46, 55-62.	1.7	169
38	Investigating the pore-scale mechanisms of microbial enhanced oil recovery. <i>Journal of Petroleum Science and Engineering</i> , 2012, 94-95, 155-164.	2.1	55
39	Microbial Enhanced Oil Recovery in Fractional-Wet Systems: A Pore-Scale Investigation. <i>Transport in Porous Media</i> , 2012, 92, 819-835.	1.2	37
40	Imaging biofilm architecture within porous media using synchrotron-based X-ray computed microtomography. <i>Water Resources Research</i> , 2011, 47, .	1.7	68
41	Flow Processes in the Dry Regime: The Effect on Capillary Barrier Performance. <i>Vadose Zone Journal</i> , 2011, 10, 1173-1184.	1.3	6
42	Imaging biofilm in porous media using X-ray computed microtomography. <i>Journal of Microscopy</i> , 2011, 242, 15-25.	0.8	72
43	Exploring capillary trapping efficiency as a function of interfacial tension, viscosity, and flow rate. <i>Energy Procedia</i> , 2011, 4, 4945-4952.	1.8	67
44	Decoupling the Mechanisms of Microbial Enhanced Oil Recovery. , 2011, , .		1
45	Image analysis algorithms for estimating porous media multiphase flow variables from computed microtomography data: a validation study. <i>Computational Geosciences</i> , 2010, 14, 15-30.	1.2	82
46	Measurement and prediction of the relationship between capillary pressure, saturation, and interfacial area in a NAPL-water-glass bead system. <i>Water Resources Research</i> , 2010, 46, .	1.7	114
47	Network model investigation of interfacial area, capillary pressure and saturation relationships in granular porous media. <i>Water Resources Research</i> , 2010, 46, .	1.7	105
48	Lattice-Boltzmann simulations of the capillary pressure-saturation-interfacial area relationship for porous media. <i>Advances in Water Resources</i> , 2009, 32, 1632-1640.	1.7	187
49	Comparison of pressure-saturation characteristics derived from computed tomography and lattice Boltzmann simulations. <i>Water Resources Research</i> , 2007, 43, .	1.7	112
50	Pore-scale characteristics of multiphase flow in porous media: A comparison of air-water and oil-water experiments. <i>Advances in Water Resources</i> , 2006, 29, 227-238.	1.7	171
51	Quantitative Analysis of Flow Processes in a Sand Using Synchrotron-Based X-ray Microtomography. <i>Vadose Zone Journal</i> , 2005, 4, 112-126.	1.3	117
52	Interfacial area measurements for unsaturated flow through a porous medium. <i>Water Resources Research</i> , 2004, 40, .	1.7	187
53	Application of x-ray microtomography to environmental fluid flow problems. , 2004, , .		15
54	Electrical Properties of Sand-Clay Mixtures Containing Trichloroethylene and Ethanol. <i>Journal of Environmental and Engineering Geophysics</i> , 2004, 9, 1-10.	1.0	5

#	ARTICLE	IF	CITATIONS
55	Electrolyte Management for Effective Long-Term Electro-Osmotic Transport in Low-Permeability Soils. Environmental Science & Technology, 2003, 37, 3024-3030.	4.6	25
56	Soil Water Retention Measurements Using a Combined Tensiometer&Coiled Time Domain Reflectometry Probe. Soil Science Society of America Journal, 2002, 66, 1752-1759.	1.2	25
57	Using X-ray computed tomography in hydrology: systems, resolutions, and limitations. Journal of Hydrology, 2002, 267, 285-297.	2.3	450
58	Flow Rate Dependence of Soil Hydraulic Characteristics. Soil Science Society of America Journal, 2001, 65, 35-48.	1.2	156
59	Compressional and shear wave velocities for artificial granular media under simulated near surface conditions. , 2001, , .		6
60	Experimental Tests of Enhancement of Vapor Diffusion in Topopah Spring Tuff. Journal of Porous Media, 2001, 4, 13.	1.0	8
61	Linear and Nonlinear Ultrasonic Properties of Granular Soils. Materials Research Society Symposia Proceedings, 2000, 627, 1.	0.1	0
62	On the relationship between microstructure and electrical and hydraulic properties of sand-clay mixtures. Geophysical Research Letters, 2000, 27, 3085-3088.	1.5	57
63	Numerical modeling of observed effective flow behavior in unsaturated heterogeneous sands. Water Resources Research, 1999, 35, 29-42.	1.7	43
64	Comparing Geophysical Measurements to Theoretical Estimates for Soil Mixtures at Low Pressures. , 1999, , .		2
65	Laboratory investigations of effective flow behavior in unsaturated heterogeneous sands. Water Resources Research, 1999, 35, 17-27.	1.7	65
66	Influence Of Microstructural Properties On Geophysical Measurements In Sand-Clay Mixtures. , 1999, , .		0
67	A Two&Stage Procedure for Determining Unsaturated Hydraulic Characteristics using a Syringe Pump and Outflow Observations. Soil Science Society of America Journal, 1997, 61, 347-359.	1.2	49
68	A Laboratory Analysis of the Effect of Macropores on Solute Transport. Ground Water, 1994, 32, 381-389.	0.7	58
69	Using Synchrotron-Based X-Ray Microtomography and Functional Contrast Agents in Environmental Applications. SSSA Special Publication Series, 0, , 1-22.	0.2	3
