YUN-HUI MEI

#	Article	IF	CITATIONS
1	High thermal conductivity diamond-doped silver paste for power electronics packaging. Materials Letters, 2022, 311, 131603.	2.6	14
2	Packaging Design of 15 kV SiC Power Devices With High-Voltage Encapsulation. IEEE Transactions on Dielectrics and Electrical Insulation, 2022, 29, 47-53.	2.9	9
3	Pressureless Sintered-Silver as Die Attachment for bonding Si and SiC Chips on Silver, Gold, Copper, and Nickel Metallization for Power Electronics Packaging: The Practice and Science. IEEE Journal of Emerging and Selected Topics in Power Electronics, 2022, 10, 2645-2655.	5.4	8
4	Design and Analysis of a Self-Circulated Oil Cooling System Enclosed in Hollow Shafts for Axial-Flux PMSMs. IEEE Transactions on Vehicular Technology, 2022, 71, 4879-4888.	6.3	14
5	Large-Area Bonding by Sintering of a Resin-Free Nanosilver Paste at Ultralow Temperature of 180 °C. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2022, 12, 707-710.	2.5	6
6	Reliable Aluminum Wire-Bonded SiC/Si Diodes With Laminated Al/Cu Stress Buffers. IEEE Transactions on Power Electronics, 2022, 37, 10149-10153.	7.9	3
7	A Reliable Way to Improve Electrochemical Migration (ECM) Resistance of Nanosilver Paste as a Bonding Material. Applied Sciences (Switzerland), 2022, 12, 4748.	2.5	3
8	A Way to Reduce Leakage Current and Improve Reliability of Wire-Bonds for 300-A Multichip SiC Hybrid Modules. IEEE Journal of Emerging and Selected Topics in Power Electronics, 2021, 9, 4887-4896.	5.4	2
9	A Novel Hermetic Sealing Method for the Metal Package Based on Electric-Current-Assisted Sintering of Silver Paste. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2021, 11, 872-874.	2.5	4
10	Ratcheting Behavior of Sintered Copper Joints for Electronic Packaging. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2021, 11, 983-989.	2.5	0
11	A Double-Sided Bidirectional Power Module With Low Heat Concentration and Low Thermomechanical Stress. IEEE Transactions on Power Electronics, 2021, 36, 9763-9766.	7.9	10
12	A 200°C curable soft magnetic composite with high permeability and low core loss for power applications at >1ÂMHz. Journal of Magnetism and Magnetic Materials, 2021, 535, 168061.	2.3	8
13	Pressureless Sintered-Silver Die-Attach at 180 °C for Power Electronics Packaging. IEEE Transactions on Power Electronics, 2021, 36, 12141-12145.	7.9	23
14	Large-Area Substrate Bonding With Single-Printing Silver Paste Sintering for Power Modules. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2021, 11, 11-18.	2.5	6
15	High-Temperature Characterizations of a Half-Bridge Wire-Bondless SiC MOSFET Module. IEEE Journal of the Electron Devices Society, 2021, 9, 966-971.	2.1	10
16	A SVPWM algorithm based on four-switch three-phase inverter for PMSM under the imbalance of bus capacitor voltage. Journal of Power Electronics, 2021, 21, 1812-1822.	1.5	3
17	Continuously Variable Multi-Permeability Inductor for Improving the Efficiency of High-Frequency DC–DC Converter. IEEE Transactions on Power Electronics, 2020, 35, 826-834.	7.9	12
18	Additive Manufacturing of Spiral Windings for a Pot-Core Constant-Flux Inductor. IEEE Journal of Emerging and Selected Topics in Power Electronics, 2020, 8, 618-625.	5.4	7

#	Article	IF	CITATIONS
19	A Method for Improving the Thermal Shock Fatigue Failure Resistance of IGBT Modules. IEEE Transactions on Power Electronics, 2020, 35, 8532-8539.	7.9	15
20	Efficient layout design automation for multi hip SiC modules targeting small footprint and low parasitic. IET Power Electronics, 2020, 13, 2069-2076.	2.1	5
21	Heteromagnetic Swinging Inductor and Its Application for Power Factor Correction Converters. IEEE Transactions on Industry Applications, 2020, 56, 5292-5298.	4.9	1
22	Brief review of silver sinter-bonding processing for packaging high-temperature power devices. Chinese Journal of Electrical Engineering, 2020, 6, 25-34.	3.4	15
23	Reducing Migration of Sintered Ag for Power Devices Operating at High Temperature. IEEE Transactions on Power Electronics, 2020, 35, 12646-12650.	7.9	13
24	Doping low-cost SiOx (1.2 <x<1.6) 154587.<="" 2020,="" 830,="" alloys="" and="" at="" compounds,="" electrochemical="" high="" inhibit="" journal="" migration="" nanoparticles="" of="" silver="" sintered="" td="" temperatures.="" to=""><td>5.5</td><td>3</td></x<1.6)>	5.5	3
25	Modeling of Intergranular Mechanical Fatigue of a Sintered Nanosilver Die Attachment for Power Electronics. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2020, 10, 982-989.	2.5	7
26	Reliability Improvement of a Double-Sided IGBT Module by Lowering Stress Gradient Using Molybdenum Buffers. IEEE Journal of Emerging and Selected Topics in Power Electronics, 2019, 7, 1637-1648.	5.4	33
27	Processing and Characterization of Die-attach on Uncoated Copper by Pressure-less Silver Sintering and Low-pressure-assisted Copper Sintering. , 2019, , .		3
28	A (Permalloy + NiZn Ferrite) Moldable Magnetic Composite for Heterogeneous Integration of Power Electronics. Materials, 2019, 12, 1999.	2.9	5
29	Bonding performance of sintered nanosilver joints on bare copper substrates with different grain structures. Journal of Materials Science: Materials in Electronics, 2019, 30, 12860-12868.	2.2	5
30	Die-attach on Copper by Pressureless Silver Sintering in Formic Acid. , 2019, , .		2
31	Low-temperature Silver Sintering for Bonding 3D Power Modules. , 2019, , .		4
32	Pressureless Silver Sintering on Nickel for Power Module Packaging. IEEE Transactions on Power Electronics, 2019, 34, 7121-7125.	7.9	22
33	An explanation of sintered silver bonding formation on bare copper substrate in air. Applied Surface Science, 2019, 490, 403-410.	6.1	17
34	Die-attach on nickel substrate by pressureless sintering a trimodal silver paste. Materials Letters, 2019, 253, 131-135.	2.6	8
35	Hetero-Magnetic Coupled Inductor (HMCI) for High Frequency Interleaved Multiphase DC/DC Converters. , 2019, , .		9
36	Design and Characterizations of a Planar Multichip Half-Bridge Power Module by Pressureless Sintering of Nanosilver Paste. IEEE Journal of Emerging and Selected Topics in Power Electronics, 2019, 7, 1627-1636.	5.4	13

#	Article	IF	CITATIONS
37	Tailoring a Silver Paste for Additive Manufacturing of Co-Fired Ferrite Magnetic Components. Materials, 2019, 12, 817.	2.9	3
38	Pressureless sintering multi-scale Ag paste by a commercial vacuum reflowing furnace for massive production of power modules. Journal of Materials Science: Materials in Electronics, 2019, 30, 9634-9641.	2.2	11
39	Electromigration behavior of Cu/Sn3.0Ag0.5Cu/Cu ball grid array solder joints. Journal of Materials Science: Materials in Electronics, 2019, 30, 6224-6233.	2.2	12
40	How to pressureless sinter-bond power chips with bare copper substrates using nanosilver paste?. , 2019, , .		0
41	Pressureless sintering of nanosilver paste as die attachment on substrates with ENIG finish for semiconductor applications. Journal of Alloys and Compounds, 2019, 777, 578-585.	5.5	38
42	Rapid sintering of nano-Ag paste at low current to bond large area (>100 mm2) power chips for electronics packaging. Journal of Materials Processing Technology, 2018, 255, 644-649.	6.3	41
43	Ferrite Paste Cured With Ultraviolet Light for Additive Manufacturing of Magnetic Components for Power Electronics. IEEE Magnetics Letters, 2018, 9, 1-5.	1.1	29
44	Effects of sintering temperature on properties of toroid cores using NiZnCu ferrites for power applications at >1†MHz. Journal of Magnetism and Magnetic Materials, 2018, 454, 6-12.	2.3	17
45	Design and Additive Manufacturing of Multipermeability Magnetic Cores. IEEE Transactions on Industry Applications, 2018, 54, 3541-3547.	4.9	30
46	Characterizations of a Proposed 3300-V Press-Pack IGBT Module Using Nanosilver Paste for High-Voltage Applications. IEEE Journal of Emerging and Selected Topics in Power Electronics, 2018, 6, 2245-2253.	5.4	17
47	Low-Pressure-Assisted Large-Area (>800 mm ²) Sintered-Silver Bonding for High-Power Electronic Packaging. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2018, 8, 202-209.	2.5	18
48	A novel multiscale silver paste for die bonding on bare copper by low-temperature pressure-free sintering in air. Materials and Design, 2018, 140, 64-72.	7.0	70
49	A Reliable Double-Sided 1200-V/600-A Multichip Half-bridge Insulated Gate Bipolar Transistor (IGBT) Module with High Power Density. , 2018, , .		2
50	A Reliable Double-Sided 1200-V/600-A Multichip Half-bridge Insulated Gate Bipolar Transistor (IGBT) Module with High Power Density. , 2018, , .		0
51	Effects of MnZn ferrite doping on magnetic and electrical properties of NiZnCu ferrite toroid cores for power applications. , 2018, , .		0
52	A Multichip Phase-Leg IGBT Module Using Nanosilver Paste by Pressureless Sintering in Formic Acid Atmosphere. IEEE Transactions on Electron Devices, 2018, 65, 4499-4505.	3.0	17
53	An online-sintering approach for bonding high-power devices using nanosilver paste. , 2018, , .		0
54	Study on Bonding Strength of Sintered Nano-silver Joints on Bare Copper Substrates with Different Grain Sizes. , 2018, , .		0

Yun-Hui Mei

#	Article	IF	CITATIONS
55	Design and development of power module co-packaged with SiC GTO and SiC PiN. , 2018, , .		1
56	Magnetic paste as feedstock for additive manufacturing of power magnetics. , 2018, , .		15
57	Top die surface reprocessing for planar package with double sided cooling. , 2018, , .		2
58	How to determine surface roughness of copper substrate for robust pressureless sintered silver in air. Materials Letters, 2018, 228, 327-330.	2.6	23
59	In situ X-ray observation and simulation of ratcheting-fatigue interactions in solder joints. Electronic Materials Letters, 2017, 13, 97-106.	2.2	9
60	Electric-current-assisted sintering of nanosilver paste for copper bonding. Journal of Materials Science: Materials in Electronics, 2017, 28, 9155-9166.	2.2	15
61	Roles of palladium particles in enhancing the electrochemical migration resistance of sintered nano-silver paste as a bonding material. Materials Letters, 2017, 206, 1-4.	2.6	12
62	A phase-leg IGBT module using DBC substrate without Ag finish by pressureless sintering of nanosilver paste. , 2017, , .		2
63	Packaging IGBT modules by rapid sintering of nanosilver paste in a current way. , 2017, , .		1
64	A Multichip Phase-Leg IGBT Module Bonded by Pressureless Sintering of Nanosilver Paste. IEEE Transactions on Device and Materials Reliability, 2017, 17, 146-156.	2.0	7
65	Additive Manufacturing of Magnetic Components for Heterogeneous Integration. , 2017, , .		8
66	Additive Manufacturing of Toroid Inductor for Power Electronics Applications. IEEE Transactions on Industry Applications, 2017, 53, 5709-5714.	4.9	39
67	Magnetic properties of FeNi ₃ /NiZn-ferrite nanocomposite prepared by hydrothermal method for application in high frequency. Ferroelectrics, 2017, 521, 116-125.	0.6	2
68	Reliability Evaluation of Multichip Phase-Leg IGBT Modules Using Pressureless Sintering of Nanosilver Paste by Power Cycling Tests. IEEE Transactions on Power Electronics, 2017, 32, 6049-6058.	7.9	41
69	A high power density multichip phase-leg IGBT module with void-free die attachment using nanosilver paste. , 2017, , .		Ο
70	Low temperature sintering of nanosilver paste for super-large-area substrate bonding. , 2017, , .		1
71	A hybrid genetic algorithm for automatic layout design of power module. , 2017, , .		5
72	Characterizations of Rapid Sintered Nanosilver Joint for Attaching Power Chips. Materials, 2016, 9, 564.	2.9	21

#	Article	IF	CITATIONS
73	Temperature-Dependent Dwell-Fatigue Behavior of Nanosilver Sintered Lap Shear Joint. Journal of Electronic Packaging, Transactions of the ASME, 2016, 138, .	1.8	7
74	Additive manufacturing of toroid inductor for power electronics applications. , 2016, , .		10
75	Effect of as-pinted bondline thickness on assembling high power laser diodes by sintering of nanosilver paste. , 2016, , .		2
76	Correlation between interfacial microstructure and bonding strength of sintered nanosilver on ENIG and electroplated Ni/Au direct-bond-copper (DBC) substrates. Journal of Alloys and Compounds, 2016, 675, 317-324.	5.5	53
77	Enhanced pressureless bonding by Tin Doped Silver Paste at low sintering temperature. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 2016, 660, 71-76.	5.6	29
78	Novel interface material used in high power electronic die-attaching on bare Cu substrates. Journal of Materials Science: Materials in Electronics, 2016, 27, 10941-10950.	2.2	23
79	Effect of Silver Flakes in Silver Paste on the Joining Process and Properties of Sandwich Power Modules (IGBTs Chip/Silver Paste/Bare Cu). Journal of Electronic Materials, 2016, 45, 5789-5799.	2.2	14
80	Application of Nano Silver sintering technique on the chip bonding for flip-chip and vertical light emitting diodes. , 2016, , .		1
81	Double-sided joining IGBT devices by pressureless sintering of nanosilver paste. , 2016, , .		0
82	Reliability of pressureless sintered nanosilver for attaching IGBT devices. , 2016, , .		2
83	A fast universal power module layout method. , 2015, , .		8
84	Multiaxial ratcheting-fatigue interaction on acrylonitrile-butadiene-styrene terpolymer. Polymer Engineering and Science, 2015, 55, 664-671.	3.1	15
85	Effects of Die-Attach Material and Ambient Temperature on Properties of High-Power COB Blue LED Module. IEEE Transactions on Electron Devices, 2015, 62, 2251-2256.	3.0	20
86	Study on high temperature bonding reliability of sintered nano-silver joint on bare copper plate. Microelectronics Reliability, 2015, 55, 2524-2531.	1.7	58
87	Parametric Study on Pressureless Sintering of Nanosilver Paste to Bond Large-Area (≥100Âmm2) Power Chips at Low Temperatures for Electronic Packaging. Journal of Electronic Materials, 2015, 44, 3973-3984.	2.2	34
88	Electrochemical migration of sintered nanosilver under chloride-containing thin electrolyte layer for power electronic packaging. Corrosion, 2015, , .	1.1	0
89	Degradation of high power single emitter laser modules using nanosilver paste in continuous pulse conditions. Microelectronics Reliability, 2015, 55, 2532-2541.	1.7	10
90	Silver paste pressureless sintering on bare copper substrates for large area chip bonding in high		1

power electronic packaging. , 2015, , .
