

Mark R Tanner

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/5513927/mark-r-tanner-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
16	Modulation of Lymphocyte Potassium Channel K1.3 by Membrane-Penetrating, Joint-Targeting Immunomodulatory Plant Defensin. <i>ACS Pharmacology and Translational Science</i> , 2020 , 3, 720-736	5.9	5
15	Antioxidant Carbon Nanoparticles Inhibit Fibroblast-Like Synoviocyte Invasiveness and Reduce Disease Severity in a Rat Model of Rheumatoid Arthritis. <i>Antioxidants</i> , 2020 , 9,	7.1	1
14	AAV-CRISPR Gene Editing Is Negated by Pre-existing Immunity to Cas9. <i>Molecular Therapy</i> , 2020 , 28, 1432-1441	11.7	72
13	KCa1.1 and Kv1.3 channels regulate the interactions between fibroblast-like synoviocytes and T lymphocytes during rheumatoid arthritis. <i>Arthritis Research and Therapy</i> , 2019 , 21, 6	5.7	11
12	Targeting KCa1.1 Channels with a Scorpion Venom Peptide for the Therapy of Rat Models of Rheumatoid Arthritis. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2018 , 365, 227-236	4.7	14
11	Differences in ion channel phenotype and function between humans and animal models. <i>Frontiers in Bioscience - Landmark</i> , 2018 , 23, 43-64	2.8	21
10	KCa1.1 channels regulate β Integrin function and cell adhesion in rheumatoid arthritis fibroblast-like synoviocytes. <i>FASEB Journal</i> , 2017 , 31, 3309-3320	0.9	20
9	Prolonged immunomodulation in inflammatory arthritis using the selective Kv1.3 channel blocker HsTX1[R14A] and its PEGylated analog. <i>Clinical Immunology</i> , 2017 , 180, 45-57	9	31
8	Changes in Gene Expression and Metabolism in the Testes of the Rat following Spinal Cord Injury. <i>Journal of Neurotrauma</i> , 2017 , 34, 1175-1186	5.4	7
7	Preferential uptake of antioxidant carbon nanoparticles by T lymphocytes for immunomodulation. <i>Scientific Reports</i> , 2016 , 6, 33808	4.9	24
6	Functional KCa1.1 channels are crucial for regulating the proliferation, migration and differentiation of human primary skeletal myoblasts. <i>Cell Death and Disease</i> , 2016 , 7, e2426	9.8	12
5	Different expression of β subunits of the KCa1.1 channel by invasive and non-invasive human fibroblast-like synoviocytes. <i>Arthritis Research and Therapy</i> , 2016 , 18, 103	5.7	13
4	The cation channel Trpv2 is a new suppressor of arthritis severity, joint damage, and synovial fibroblast invasion. <i>Clinical Immunology</i> , 2015 , 158, 183-92	9	23
3	KCa1.1 inhibition attenuates fibroblast-like synoviocyte invasiveness and ameliorates disease in rat models of rheumatoid arthritis. <i>Arthritis and Rheumatology</i> , 2015 , 67, 96-106	9.5	23
2	A potent and Kv1.3-selective analogue of the scorpion toxin HsTX1 as a potential therapeutic for autoimmune diseases. <i>Scientific Reports</i> , 2014 , 4, 4509	4.9	58
1	Structural plasticity of the coiled-coil domain of rotavirus NSP4. <i>Journal of Virology</i> , 2014 , 88, 13602-12	6.6	18
