170 peer-reviewed articles	20,500 peer-reviewed citations	18989 63 peer-reviewed h-index	611554 3.98 score
195 documents	22420 doc citations	21347 66 h-index	30770 citing authors

#	Article	IF	Citations
1	Association Between Dietary Patterns and Subgingival Microbiota: Results From the Oral Infections, Glucose Intolerance, and Insulin Resistance Study (ORIGINS). Journal of Clinical Periodontology, 2025, 52, 2-15.	4.3	7
2	Periodontitis and brain magnetic resonance imaging markers of Alzheimer's disease and cognitive aging. Alzheimer's and Dementia, 2024, 20, 2191-2208.	0.8	41
3	Clinical attachment loss is cross-sectionally associated with elevated glucose among adults without diabetes. Journal of Clinical Periodontology, 2024, 51, 522-535.	4.3	5
4	ACES: A new framework for the application of the 2018 periodontal status classification scheme to epidemiological survey data. Journal of Clinical Periodontology, 2024, 51, 512-521.	4.3	52
5	Relevant domains, core outcome sets and measurements for implant dentistry clinical trials: The Implant Dentistry Core Outcome Set and Measurement (ID-COSM) international consensus report. Clinical Oral Implants Research, 2023, 34, 4-21.	3.7	95
6	Prevention and treatment of peri-implant diseases—The EFP S3 level clinical practice guideline. Journal of Clinical Periodontology, 2023, 50, 4-76.	4.3	462
7	Relevant domains, core outcome sets and measurements for implant dentistry clinical trials: The Implant Dentistry Core Outcome Set and Measurement (ID-COSM) international consensus report. Journal of Clinical Periodontology, 2023, 50, 5-21.	4.3	102
8	With Teeth, Broken, or Fixed: The Challenges of Linking Periodontitis, Neuroepidemiology, and Biomarkers of Disease. Journal of Alzheimer's Disease, 2023, 93, 991-994.	1.6	2
9	Replication of gene polymorphisms associated with periodontitis-related traits in an elderly cohort: the Washington Heights/Inwood Community Aging Project Ancillary Study of Oral Health. Journal of Clinical Periodontology, 2022, 49, 414-427.	4.3	8
10	Early microbial markers of periodontal and cardiometabolic diseases in ORIGINS. Npj Biofilms and Microbiomes, 2022, 8, .	6.0	28
11	Nitrite Generating and Depleting Capacity of the Oral Microbiome and Cardiometabolic Risk: Results from ORIGINS. Journal of the American Heart Association, 2022, 11, .	3.1	40
12	Treatment of stage IV periodontitis: The EFP S3 level clinical practice guideline. Journal of Clinical Periodontology, 2022, 49, 4-71.	4.3	381
13	Phenotype Harmonization in the GLIDE2 Oral Health Genomics Consortium. Journal of Dental Research, 2022, 101, 1408-1416.	3.8	8
14	Repeated delivery of chlorhexidine chips for the treatment of peri-implantitis: A multicenter, randomized, comparative clinical trial. Journal of Periodontology, 2021, 92, 11-20.	2.4	43
15	Cell Type–Specific Decomposition of Gingival Tissue Transcriptomes. Journal of Dental Research, 2021, 100, 549-556.	3.8	18
16	Diet quality and periodontal disease: Results from the oral infections, glucose intolerance and insulin resistance study (ORIGINS). Journal of Clinical Periodontology, 2021, 48, 638-647.	4.3	14
17	Fusobacterium nucleatum secretes amyloid-like FadA to enhance pathogenicity. EMBO Reports, 2021, 22, .	3.5	152
18	Differential DNA methylation and mRNA transcription in gingival tissues in periodontal health and disease. Journal of Clinical Periodontology, 2021, 48, 1152-1164.	4.3	43

#	Article	IF	Citations
19	Agreement among international periodontal experts using the 2017 World Workshop classification of periodontitis. Journal of Periodontology, 2021, 92, 1675-1686.	2.4	39
20	Age-Specific Predictive Models of the Upper Quintile of Periodontal Attachment Loss. Journal of Dental Research, 2020, 99, 44-50.	3.8	7
21	Clinical application of the new classification of periodontal diseases: Ground rules, clarifications and “gray zones”. Journal of Periodontology, 2020, 91, 352-360.	2.4	91
22	Immediate versus delayed temporization at posterior single implant sites: A randomized controlled trial. Journal of Clinical Periodontology, 2020, 47, 1281-1291.	4.3	22
23	Mechanisms underlying the association between periodontitis and atherosclerotic disease. Periodontology 2000, 2020, 83, 90-106.	10.1	390
24	Subgingival microbiome and clinical periodontal status in an elderly cohort: The WHICAP ancillary study of oral health. Journal of Periodontology, 2020, 91, .	2.4	49
25	Disruption of Monocyte and Macrophage Homeostasis in Periodontitis. Frontiers in Immunology, 2020, 11, .	3.3	198
26	Periodontal Medicine: 100 Years of Progress. Journal of Dental Research, 2019, 98, 1053-1062.	3.8	233
27	Subgingival Microbiota and Longitudinal Glucose Change: The Oral Infections, Glucose Intolerance and Insulin Resistance Study (ORIGINS). Journal of Dental Research, 2019, 98, 1488-1496.	3.8	28
28	Ricardo Teles: His Life and Contributions to Periodontology. Journal of Dental Research, 2019, 98, 734-738.	3.8	0
29	Soluble Forms of the Receptor for Advanced Glycation Endproducts (RAGE) in Periodontitis. Scientific Reports, 2019, 9, .	2.7	24
30	Peri-implantitis prevalence, incidence rate, and risk factors: A study of electronic health records at a U.S. dental school. Clinical Oral Implants Research, 2019, 30, 306-314.	3.7	176
31	Association Between Nitrate-Reducing Oral Bacteria and Cardiometabolic Outcomes: Results From ORIGINS. Journal of the American Heart Association, 2019, 8, .	3.1	77
32	History of periodontal treatment and risk for intrauterine growth restriction (IUGR). BMC Oral Health, 2018, 18, .	2.1	10
33	The severity of human peri-implantitis lesions correlates with the level of submucosal microbial dysbiosis. Journal of Clinical Periodontology, 2018, 45, 1498-1509.	4.3	91
34	Periodontal status among elderly inhabitants of northern Manhattan: The WHICAP ancillary study of oral health. Journal of Clinical Periodontology, 2018, 45, 909-919.	4.3	12
35	Age-dependent distribution of periodontitis in two countries: Findings from NHANES 2009 to 2014 and SHIP-TREND 2008 to 2012. Journal of Periodontology, 2018, 89, .	2.4	85
36	Periodontitis: Consensus report of workgroup 2 of the 2017 World Workshop on the Classification of Periodontal and Peri-Implant Diseases and Conditions. Journal of Periodontology, 2018, 89, .	2.4	2,117

#	Article	IF	Citations
37	A new classification scheme for periodontal and peri-implant diseases and conditions – Introduction and key changes from the 1999 classification. Journal of Periodontology, 2018, 89, .	2.4	1,013
38	A new classification scheme for periodontal and peri-implant diseases and conditions – Introduction and key changes from the 1999 classification. Journal of Clinical Periodontology, 2018, 45, .	4.3	1,129
39	Age-dependent distribution of periodontitis in two countries: Findings from NHANES 2009 to 2014 and SHIP-TREND 2008 to 2012. Journal of Clinical Periodontology, 2018, 45, .	4.3	103
40	Periodontitis: Consensus report of workgroup 2 of the 2017 World Workshop on the Classification of Periodontal and Peri-Implant Diseases and Conditions. Journal of Clinical Periodontology, 2018, 45, .	4.3	1,103
41	Assessment of arterial stiffness in periodontitis using a novel pulse wave imaging methodology. Journal of Clinical Periodontology, 2017, 44, 502-510.	4.3	6
42	Increased levels of soluble CD163 in periodontitis patients. Journal of Clinical Periodontology, 2017, 44, 585-590.	4.3	12
43	Periodontal diseases. Nature Reviews Disease Primers, 2017, 3, .	37.8	2,400
44	The subgingival microbiome, systemic inflammation and insulin resistance: The Oral Infections, Glucose Intolerance and Insulin Resistance Study. Journal of Clinical Periodontology, 2017, 44, 255-265.	4.3	113
45	Incidence and Determinants of Dental Implant Failure: A Review of Electronic Health Records in a U.S. Dental School. Journal of Dental Education, 2017, 81, 1233-1242.	0.8	33
46	Authors' reply: Predictive diagnostic tests in periodontal diseases. Nature Reviews Disease Primers, 2017, 3, .	37.8	20
47	Periodontitis epidemiology: is periodontitis under-recognized, over-diagnosed, or both?. Periodontology 2000, 2017, 75, 45-51.	10.1	192
48	Relationship Between Frequent Recreational Cannabis (Marijuana and Hashish) Use and Periodontitis in Adults in the United States: National Health and Nutrition Examination Survey 2011 to 2012. Journal of Periodontology, 2017, 88, 273-280.	2.4	48
49	Association Between Serum Antibodies to Periodontal Bacteria and Rheumatoid Factor in the Third National Health and Nutrition Examination Survey. Arthritis and Rheumatology, 2016, 68, 2384-2393.	4.5	36
50	MicroRNAs Regulate Cytokine Responses in Gingival Epithelial Cells. Infection and Immunity, 2016, 84, 3282-3289.	2.0	26
51	Immediate implant placement and provisionalization in the aesthetic zone using a flapless or a flap-involving approach: a randomized controlled trial. Journal of Clinical Periodontology, 2016, 43, 1171-1179.	4.3	37
52	Identification of Master Regulator Genes in Human Periodontitis. Journal of Dental Research, 2016, 95, 1010-1017.	3.8	37
53	Mini but mighty: microRNAs in the pathobiology of periodontal disease. Periodontology 2000, 2015, 69, 201-220.	10.1	70
54	Systemic effects of periodontitis: lessons learned from research on atherosclerotic vascular disease and adverse pregnancy outcomes. International Dental Journal, 2015, 65, 283-291.	0.6	97

#	Article	IF	Citations
55	Periodontal microbiota and phospholipases: The Oral Infections and Vascular Disease Epidemiology Study (INVEST). Atherosclerosis, 2015, 242, 418-423.	1.9	36
56	Periodontal Bacteria and Prediabetes Prevalence in ORIGINS. Journal of Dental Research, 2015, 94, 201S-211S.	3.8	122
57	Periodontal Infection and Cardiorespiratory Fitness in Younger Adults: Results from Continuous National Health and Nutrition Examination Survey 1999–2004. PLoS ONE, 2014, 9, e92441.	1.5	20
58	Peripheral venous congestion causes inflammation, neurohormonal, and endothelial cell activation. European Heart Journal, 2014, 35, 448-454.	2.6	151
59	Circulating Endothelial Progenitor Cells in Periodontitis. Journal of Periodontology, 2014, 85, 1739-1747.	2.4	11
60	Serum Antibody Responses to Periodontal Microbiota in Chronic and Aggressive Periodontitis: A Postulate Revisited. Journal of Periodontology, 2014, 85, 592-600.	2.4	34
61	Periodontal infection, impaired fasting glucose and impaired glucose tolerance: results from the Continuous National Health and Nutrition Examination Survey 2009–2010. Journal of Clinical Periodontology, 2014, 41, 643-652.	4.3	60
62	Gingival Tissue Transcriptomes Identify Distinct Periodontitis Phenotypes. Journal of Dental Research, 2014, 93, 459-468.	3.8	133
63	Serum IgG Antibody Levels to Periodontal Microbiota Are Associated with Incident Alzheimer Disease. PLoS ONE, 2014, 9, e114959.	1.5	195
64	Poor Oral Health as a Chronic, Potentially Modifiable Dementia Risk Factor: Review of the Literature. Current Neurology and Neuroscience Reports, 2013, 13, .	4.0	124
65	Molecular Differences between Chronic and Aggressive Periodontitis. Journal of Dental Research, 2013, 92, 1081-1088.	3.8	85
66	Label-Free Quantitative Proteomics Reveals Differentially Regulated Proteins in Experimental Gingivitis. Journal of Proteome Research, 2013, 12, 657-678.	2.2	62
67	Epidemiology of association between maternal periodontal disease and adverse pregnancy outcomes – systematic review. Journal of Clinical Periodontology, 2013, 40, .	4.3	190
68	Epidemiology of association between maternal periodontal disease and adverse pregnancy outcomes – systematic review. Journal of Periodontology, 2013, 84, .	2.4	149
69	Changes in Clinical and Microbiological Periodontal Profiles Relate to Progression of Carotid Intima-Media Thickness: The Oral Infections and Vascular Disease Epidemiology Study. Journal of the American Heart Association, 2013, 2, .	3.1	109
70	Role of the NK Cell-Activating Receptor CRACC in Periodontitis. Infection and Immunity, 2013, 81, 690-696.	2.0	33
71	Discovering medical conditions associated with periodontitis using linked electronic health records. Journal of Clinical Periodontology, 2013, 40, 474-482.	4.3	56
72	Periodontal Infection, Systemic Inflammation, and Insulin Resistance. Diabetes Care, 2012, 35, 2235-2242.	5.6	142

#	Article	IF	Citations
73	Periodontal Disease and Atherosclerotic Vascular Disease: Does the Evidence Support an Independent Association?. Circulation, 2012, 125, 2520-2544.	13.1	969
74	MicroRNAs and Their Target Genes in Gingival Tissues. Journal of Dental Research, 2012, 91, 934-940.	3.8	192
75	The Prevalence of Periodontitis in the US. Journal of Dental Research, 2012, 91, 907-908.	3.8	68
76	A comparison of periodontal status in the two regional, population-based studies of SHIP and INVEST. Journal of Clinical Periodontology, 2012, 39, 1115-1124.	4.3	22
77	Radiographic Periodontal Bone Loss in Chronic Kidney Disease. Journal of Periodontology, 2012, 83, 602-611.	2.4	19
78	Diabetes and oral disease: implications for health professionals. Annals of the New York Academy of Sciences, 2012, 1255, 1-15.	2.6	82
79	Diabetes mellitus and periodontitis: a tale of two common interrelated diseases. Nature Reviews Endocrinology, 2011, 7, 738-748.	20.1	945
80	An Examination of Periodontal Treatment, Dental Care, and Pregnancy Outcomes in an Insured Population in the United States. American Journal of Public Health, 2011, 101, 151-156.	1.5	28
81	Periodontal microbial complexes associated with specific cell and tissue responses. Journal of Clinical Periodontology, 2011, 38, 17-27.	4.3	59
82	Gingival tissue transcriptomes in experimental gingivitis. Journal of Clinical Periodontology, 2011, 38, 599-611.	4.3	52
83	Maternal Periodontitis Treatment and Child Neurodevelopment at 24 to 28 Months of Age. Pediatrics, 2011, 127, e1212-e1220.	2.9	10
84	Periodontal bacteria and hypertension: the oral infections and vascular disease epidemiology study (INVEST). Journal of Hypertension, 2010, 28, 1413-1421.	1.8	181
85	Evaluating clinical periodontal measures as surrogates for bacterial exposure: The Oral Infections and Vascular Disease Epidemiology Study (INVEST). BMC Medical Research Methodology, 2010, 10, .	1.7	30
86	Epidemiologic patterns of chronic and aggressive periodontitis. Periodontology 2000, 2010, 53, 28-44.	10.1	238
87	Determinants of serum IgG responses to periodontal bacteria in a nationally representative sample of US adults. Journal of Clinical Periodontology, 2010, 37, 685-696.	4.3	60
88	Enhanced monocyte migration and pro-inflammatory cytokine production byPorphyromonas gingivalisinfection. Journal of Periodontal Research, 2010, 45, 239-245.	2.9	42
89	“ Gum Bug, Leave My Heart Alone !”—Epidemiologic and Mechanistic Evidence Linking Periodontal Infections and Atherosclerosis. Journal of Dental Research, 2010, 89, 879-902.	3.8	418
90	Receptor for advanced glycation endproducts mediates pro-atherogenic responses to periodontal infection in vascular endothelial cells. Atherosclerosis, 2010, 212, 451-456.	1.9	41

#	Article	IF	Citations
91	Periodontitis is associated with cognitive impairment among older adults: analysis of NHANES-III. Journal of Neurology, Neurosurgery and Psychiatry, 2009, 80, 1206-1211.	4.2	288
92	Subgingival bacterial colonization profiles correlate with gingival tissue gene expression. BMC Microbiology, 2009, 9, 221.	2.9	99
93	Granulocyte chemotactic protein 2 (gcp-2/cxcl6) complements interleukin-8 in periodontal disease. Journal of Periodontal Research, 2009, 44, 465-471.	2.9	34
94	Heterogeneity of systemic inflammatory responses to periodontal therapy. Journal of Clinical Periodontology, 2009, 36, 287-294.	4.3	106
95	Change in periodontitis during pregnancy and the risk of pre-term birth and low birthweight. Journal of Clinical Periodontology, 2009, 36, 308-314.	4.3	50
96	Serum Antibodies to Periodontal Bacteria as Diagnostic Markers of Periodontitis. Journal of Periodontology, 2009, 80, 634-647.	2.4	89
97	Systemic Immune Responses in Pregnancy and Periodontitis: Relationship to Pregnancy Outcomes in the Obstetrics and Periodontal Therapy (OPT) Study. Journal of Periodontology, 2009, 80, 953-960.	2.4	53
98	Porphyromonas gingivalis infection and prothrombotic effects in human aortic smooth muscle cells. Thrombosis Research, 2009, 123, 780-784.	1.6	30
99	Serum Inflammatory Mediators in Pregnancy: Changes After Periodontal Treatment and Association With Pregnancy Outcomes. Journal of Periodontology, 2009, 80, 1731-1741.	2.4	54
100	Transcriptomes in Healthy and Diseased Gingival Tissues. Journal of Periodontology, 2008, 79, 2112-2124.	2.4	192
101	Bleeding on probing differentially relates to bacterial profiles: the Oral Infections and Vascular Disease Epidemiology Study. Journal of Clinical Periodontology, 2008, 35, 479-486.	4.3	46
102	Periodontal Bacterial Profiles in Pregnant Women: Response to Treatment and Associations With Birth Outcomes in the Obstetrics and Periodontal Therapy (OPT) Study. Journal of Periodontology, 2008, 79, 1870-1879.	2.4	68
103	Clinical and Serologic Markers of Periodontal Infection and Chronic Kidney Disease. Journal of Periodontology, 2008, 79, 1670-1678.	2.4	75
104	The Relationship of Periodontal Disease to Diseases and Disorders at Distant Sites. Journal of the American Dental Association, 2008, 139, 1389-1397.	1.5	25
105	Oral Disease Burden in Northern Manhattan Patients With Diabetes Mellitus. American Journal of Public Health, 2008, 98, S91-S94.	1.5	12
106	Treatment of Periodontal Disease and the Risk of Preterm Birth. Obstetrical and Gynecological Survey, 2007, 62, 167-168.	0.4	6
107	Infection with a periodontal pathogen increases mononuclear cell adhesion to human aortic endothelial cells. Atherosclerosis, 2007, 190, 271-281.	1.9	102
108	Effects of periodontal therapy on serum C-reactive protein, sE-selectin, and tumor necrosis factor-? secretion by peripheral blood-derived macrophages in diabetes. A pilot study. Journal of Periodontal Research, 2007, 42, 274-282.	2.9	65

#	Article	IF	Citations
109	Porphyromonas gingivalisinfection and cell death in human aortic endothelial cells. FEMS Microbiology Letters, 2007, 272, 106-113.	1.1	55
110	Prevotella bivia can invade human cervix epithelial (HeLa) cells. Apmis, 2007, 115, 241-251.	1.2	23
111	Periodontal therapy alters gene expression of peripheral blood monocytes. Journal of Clinical Periodontology, 2007, 34, 736-747.	4.3	47
112	Periodontal infections and atherosclerotic vascular disease: an update. International Dental Journal, 2006, 56, 256-262.	0.6	34
113	Treatment of Periodontal Disease and the Risk of Preterm Birth. New England Journal of Medicine, 2006, 355, 1885-1894.	26.4	495
114	Infection with a periodontal pathogen induces procoagulant effects in human aortic endothelial cells. Journal of Thrombosis and Haemostasis, 2006, 4, 2256-2261.	2.9	62
115	Fc? receptor polymorphisms and periodontal status: a prospective follow-up study. Journal of Clinical Periodontology, 2006, 33, 691-698.	4.3	25
116	Periodontal infection profiles in type 1 diabetes. Journal of Clinical Periodontology, 2006, 33, 855-862.	4.3	81
117	Markers of periodontal infection and preterm birth. American Journal of Obstetrics and Gynecology, 2005, 192, 513-519.	1.9	127
118	Analytical epidemiology of periodontitis. Journal of Clinical Periodontology, 2005, 32, 132-158.	4.3	312
119	Infection patterns in chronic and aggressive periodontitis. Journal of Clinical Periodontology, 2005, 32, 1055-1061.	4.3	39
120	Serum antibodies to periodontal pathogens and markers of systemic inflammation. Journal of Clinical Periodontology, 2005, 32, 1189-1199.	4.3	99
121	Periodontal Microbiota and Carotid Intima-Media Thickness. Circulation, 2005, 111, 576-582.	13.1	451
122	Radiographic Measures of Chronic Periodontitis and Carotid Artery Plaque. Stroke, 2005, 36, 561-566.	4.4	86
123	Longitudinal stability of serum immunoglobulin G responses to periodontal bacteria. Journal of Clinical Periodontology, 2004, 31, 985-990.	4.3	76
124	Gene expression signatures in chronic and aggressive periodontitis: a pilot study. European Journal of Oral Sciences, 2004, 112, 216-223.	1.2	35
125	Porphyromonas gingivalisinduces its uptake by human macrophages and promotes foam cell formation in vitro. FEMS Microbiology Letters, 2004, 241, 95-101.	1.1	83
126	A Multicenter Study Evaluating the Sensitization Potential of Enamel Matrix Derivative After Treatment of Two Infrabony Defects. Journal of Periodontology, 2004, 75, 1001-1008.	2.4	26
