| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | Local competitive environment and male condition influence within-bout calling patterns in tãngara frogs. <i>Bioacoustics</i> , 2023, 32, 121-142.   | 1.7 | 1         |
| 2  | Eavesdropping Micropredators as Dynamic Limiters of Sexual Signal Elaboration and Intrasexual Competition. <i>American Naturalist</i> , 2022, 199, 653-665.  | 2.1 | 6         |
| 3  | Dominance Can Increase Genetic Variance After a Population Bottleneck: A Synthesis of the Theoretical and Empirical Evidence. <i>Journal of Heredity</i> , 2022, 113, 257-271.   | 2.4 | 2         |
| 4  | Within host acoustic signal preference of frogâ€biting mosquitoes (Diptera: Culicidae) and midges (Diptera: Corethrellidae) on Iriomote Island, Japan. <i>Entomological Science</i> , 2021, 24, 116-122.                   | 0.6 | 8         |
| 5  | The dual benefits of synchronized mating signals in a Japanese treefrog: attracting mates and manipulating predators. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2021, 376, 20200340. | 4.0 | 9         |
| 6  | The challenge of detecting prey: Private and social information use in predatory bats. <i>Functional Ecology</i> , 2020, 34, 344-363.  | 3.6 | 20        |
| 7  | Prey Exploits the Auditory Illusions of Eavesdropping Predators. <i>American Naturalist</i> , 2020, 195, 927-933.  | 2.1 | 13        |
| 8  | Reply to Arora et al.: Concerns and considerations about using the CV as an equity tool. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 24033-24034.                  | 7.1 | 3         |
| 9  | In the wake of COVID-19, academia needs new solutions to ensure gender equity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 15378-15381.                            | 7.1 | 242       |
| 10 | Traffic noise differentially impacts call types in a Japanese treefrog ( <i>Buergeria japonica</i> ). <i>Ethology</i> , 2020, 126, 576-583.  | 1.1 | 6         |
| 11 | Feeding patterns revealed host partitioning inÂaÂcommunity of frogâ€biting mosquitoes. <i>Ecological Entomology</i> , 2020, 45, 988-996.   | 2.2 | 5         |
| 12 | Signal Synchrony and Alternation Among Neighbor Males in a Japanese Stream Breeding Treefrog, <i>Buergeria japonica</i> . <i>Current Herpetology</i> , 2020, 39, 80.   | 0.5 | 3         |
| 13 | The Cognitive Ecology of Stimulus Ambiguity: A Predatorâ€Prey Perspective. <i>Trends in Ecology and Evolution</i> , 2019, 34, 1048-1060.   | 8.7 | 30        |
| 14 | Synchronized mating signals in a communication network: the challenge of avoiding predators while attracting mates. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2019, 286, 20191067.                  | 2.6 | 21        |
| 15 | From forest to city: urbanization modulates relative abundance of anti-predator coloration. <i>Journal of Urban Ecology</i> , 2019, 5, .   | 1.5 | 3         |
| 16 | Laryngeal Demasculinization in Wild Cane Toads Varies with Land Use. <i>EcoHealth</i> , 2019, 16, 682-693.   | 2.0 | 3         |
| 17 | A new species of fossil <i>Corethrella</i> (Diptera, Corethrellidae) from mid-Cretaceous Burmese amber. <i>Cretaceous Research</i> , 2019, 101, 84-91.   | 1.4 | 2         |
| 18 | Nineteen Years of Consistently Positive and Strong Female Mate Preferences despite Individual Variation. <i>American Naturalist</i> , 2019, 194, 125-134.  | 2.1 | 29        |

| #  | ARTICLE  | IF   | CITATIONS |
|----|--|------|-----------|
| 19 | Empowering Latina scientists. <i>Science</i> , 2019, 363, 825-826.   | 12.6 | 7         |
| 20 | A new approach to improve acoustic trapping effectiveness for <i>Aedes aegypti</i> (Diptera: Culicidae). <i>Journal of Vector Ecology</i> , 2019, 44, 216-222.   | 1.0  | 6         |
| 21 | Adaptive changes in sexual signalling in response to urbanization. <i>Nature Ecology and Evolution</i> , 2019, 3, 374-380.   | 7.8  | 72        |
| 22 | Exploratory behavior of a native anuran species with high invasive potential. <i>Animal Cognition</i> , 2018, 21, 55-65.   | 1.8  | 7         |
| 23 | Seasonal variation in abundance and diversity of eavesdropping frog-biting midges (Diptera, C) <i>Tj ETQq1 1 0.784314 rgBT/Overlo</i>  | 2.2  | 30        |
| 24 | Anuran predators overcome visual illusion: dazzle coloration does not protect moving prey. <i>Animal Cognition</i> , 2018, 21, 729-733.  | 1.8  | 6         |
| 25 | A new species of frog-biting midge from Papua New Guinea with a key to the described Corethrellidae of the Australopapuan region (Diptera, Corethrellidae, Corethrella). <i>ZooKeys</i> , 2018, 795, 39-48.                  | 1.1  | 6         |
| 26 | Light and noise pollution interact to disrupt interspecific interactions. <i>Ecology</i> , 2017, 98, 1290-1299.  | 3.2  | 77        |
| 27 | Mixed Sex Effects on the Second to Fourth Digit Ratio of T <sup>ā</sup> ngara Frogs ( <i>ngystomops pustulosus</i> ) and Cane Toads ( <i>hinella</i> ) <i>Tj ETQq1 1 0.784314 rgBT/O</i>                                     | 1.1  | 20        |
| 28 | Acoustic Preference of Frog-biting Midges ( <i>Corethrella</i> spp) Attacking T <sup>ā</sup> ngara Frogs in their Natural Habitat. <i>Ethology</i> , 2016, 122, 105-113.   | 1.1  | 20        |
| 29 | Collateral damage or a shadow of safety? The effects of signalling heterospecific neighbours on the risks of parasitism and predation. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2016, 283, 20160343. | 2.6  | 30        |
| 30 | Sexual differences in prevalence of a new species of trypanosome infecting t <sup>ā</sup> ngara frogs. <i>International Journal for Parasitology: Parasites and Wildlife</i> , 2016, 5, 40-47.                               | 1.5  | 39        |
| 31 | Pyrazine emission by a tropical firefly: An example of chemical aposematism?. <i>Biotropica</i> , 2016, 48, 645-655.   | 1.6  | 14        |
| 32 | Female t <sup>ā</sup> ngara frogs do not experience the continuity illusion.. <i>Behavioral Neuroscience</i> , 2016, 130, 62-74.   | 1.2  | 5         |
| 33 | First report of mite parasitization in frog-biting midges ( <i>Corethrella</i> species). <i>International Journal of Acarology</i> , 2015, 41, 389-392.  | 0.7  | 0         |
| 34 | Use of acoustic signals in mating in an eavesdropping frog-biting midge. <i>Animal Behaviour</i> , 2015, 103, 45-51.   | 1.9  | 21        |
| 35 | Cues used in host-seeking behavior by frog-biting midges ( <i>Corethrella</i> spp. Coquillet). <i>Journal of Vector Ecology</i> , 2015, 40, 122-128.   | 1.0  | 32        |
| 36 | Differences in neophobia between cane toads from introduced and native populations. <i>Behavioral Ecology</i> , 2015, 26, 97-104.  | 2.2  | 41        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 37 | Danger Comes from All Fronts: Predator-Dependent Escape Tactics of T <sup>h</sup> ngara Frogs. PLoS ONE, 2015, 10, e0120546.   | 2.5 | 32        |
| 38 | Harmonic calls and indifferent females: no preference for human consonance in an anuran. Proceedings of the Royal Society B: Biological Sciences, 2014, 281, 20140986.   | 2.6 | 8         |
| 39 | Feeding Site Selection by Frog-Biting Midges (Diptera: Corethrellidae) on Anuran Hosts. Journal of Insect Behavior, 2014, 27, 302-316.   | 0.7 | 23        |
| 40 | First Report of the Mating Behavior of a Species of Frog-Biting Midge (Diptera: Corethrellidae). Florida Entomologist, 2013, 96, 1522-1529.  | 0.5 | 6         |
| 41 | A Review of Undergraduate Evolution Education in U.S. Universities: Building a Unifying Framework. Evolution: Education and Outreach, 2012, 5, 453-465.  | 0.8 | 14        |
| 42 | Sequential assessment of prey through the use of multiple sensory cues by an eavesdropping bat. Die Naturwissenschaften, 2012, 99, 505-509.  | 1.6 | 22        |
| 43 | Female mate choice and the potential for ornament evolution in t <sup>h</sup> ngara frogs <i>Physalaemus pustulosus</i> . Environmental Epigenetics, 2010, 56, 343-357.  | 1.8 | 19        |
| 44 | Acoustic radiation patterns of mating calls of the t <sup>h</sup> ngara frog ( <i>Physalaemus pustulosus</i> ): Implications for multiple receivers. Journal of the Acoustical Society of America, 2009, 126, 2757-2767. | 1.1 | 12        |
| 45 | Task differences confound sex differences in receiver permissiveness in t <sup>h</sup> ngara frogs. Proceedings of the Royal Society B: Biological Sciences, 2009, 276, 1323-1329.                                       | 2.6 | 22        |
| 46 | Female and male behavioral response to advertisement calls of graded complexity in t <sup>h</sup> ngara frogs, <i>Physalaemus pustulosus</i> . Behavioral Ecology and Sociobiology, 2009, 63, 1269-1279.                 | 1.4 | 58        |
| 47 | Visual sensitivity to a conspicuous male cue varies by reproductive state in <i>Physalaemus pustulosus</i> females. Journal of Experimental Biology, 2008, 211, 1203-1210.   | 1.7 | 69        |
| 48 | ISLAND POPULATIONS OF PHYSALAEMUS PUSTULOSUS: HISTORY INFLUENCES GENETIC DIVERSITY AND MORPHOLOGY. Herpetologica, 2007, 63, 311-319.   | 0.4 | 8         |
| 49 | Cues for Eavesdroppers: Do Frog Calls Indicate Prey Density and Quality?. American Naturalist, 2007, 169, 409-415.   | 2.1 | 85        |
| 50 | Sexual Differences in the Behavioral Response of T <sup>h</sup> ngara Frogs, <i>Physalaemus pustulosus</i> , to Cues Associated with Increased Predation Risk. Ethology, 2007, 113, 755-763.                             | 1.1 | 56        |
| 51 | Patterns of mating call preferences in t <sup>h</sup> ngara frogs, <i>Physalaemus pustulosus</i> . Journal of Evolutionary Biology, 2007, 20, 2235-2247.   | 1.7 | 20        |
| 52 | Sex differences in response to nonconspecific advertisement calls: receiver permissiveness in male and female t <sup>h</sup> ngara frogs. Animal Behaviour, 2007, 73, 955-964.   | 1.9 | 50        |
| 53 | Cues for Eavesdroppers: Do Frog Calls Indicate Prey Density and Quality?. American Naturalist, 2007, 169, 409.   | 2.1 | 4         |
| 54 | No evidence for female mate choice based on genetic similarity in the t <sup>h</sup> ngara frog <i>Physalaemus pustulosus</i> . Behavioral Ecology and Sociobiology, 2006, 59, 796-804.                                  | 1.4 | 15        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 55 | TÃºngara frogs. <i>Current Biology</i> , 2006, 16, R979-R980.  | 3.9 | 1         |
| 56 | The Vocal Sac Increases Call Rate in the TÃºngara Frog <i>Physalaemus pustulosus</i> . <i>Physiological and Biochemical Zoology</i> , 2006, 79, 708-719.                                   | 1.5 | 50        |
| 57 | Acoustic preferences and localization performance of blood-sucking flies ( <i>Corethrella</i> Coquillett) to tÃºngara frog calls. <i>Behavioral Ecology</i> , 2006, 17, 709-715.           | 2.2 | 148       |
| 58 | GEOGRAPHIC VARIATION IN ADVERTISEMENT CALL AND GENETIC STRUCTURE OF <i>COLOSTETHUS PALMATUS</i> (ANURA, DENDROBATIDAE) FROM THE COLOMBIAN ANDES. <i>Herpetologica</i> , 2005, 61, 395-408. | 0.4 | 45        |
| 59 | Partitioning of vocal activity in a Neotropical highland-frog community. <i>Studies on Neotropical Fauna and Environment</i> , 2000, 35, 185-194.  | 1.0 | 32        |
| 60 | Survival of the sickest: selective predation differentially modulates ecological and evolutionary disease dynamics. <i>Oikos</i> , 0, , .  | 2.7 | 1         |
