#	ARTICLE	IF	CITATIONS
1	Psychosocial working conditions and the risk of diagnosed depression: a Swedish register-based study. <i>Psychological Medicine</i> , 2022, 52, 3730-3738.	4.5	21
2	Under-reporting of non-fatal occupational injuries among precarious and non-precarious workers in Sweden. <i>Occupational and Environmental Medicine</i> , 2022, 79, 3-9.	2.8	6
3	The impact of musculoskeletal pain and strenuous work on self-reported physical work ability: a cohort study of Swedish men and women. <i>International Archives of Occupational and Environmental Health</i> , 2022, 95, 939-952.	2.3	1
4	Trajectories of precarious employment and the risk of myocardial infarction and stroke among middle-aged workers in Sweden: A register-based cohort study. <i>Lancet Regional Health - Europe</i> , The, 2022, 15, 100314.	5.6	8
5	Psychosocial workplace factors and alcohol-related morbidity: a prospective study of 3 million Swedish workers. <i>European Journal of Public Health</i> , 2022, 32, 366-371.	0.3	5
6	Fathers' alcohol consumption and risk of substance-related disorders in offspring. <i>Drug and Alcohol Dependence</i> , 2022, 233, 109354.	3.2	8
7	Business performance and occupational injuries trajectories in the construction sector in Sweden. <i>Safety Science</i> , 2022, 152, 105772.	4.9	1
8	Long-term sick leave for back pain, exposure to physical workload and psychosocial factors at work, and risk of disability and early-age retirement among aged Swedish workers. <i>International Archives of Occupational and Environmental Health</i> , 2022, 95, 1521-1535.	2.3	9
9	Educational qualification differences and early labor market exit among men: the contribution of labor market marginalization—measured across the working life. <i>BMC Public Health</i> , 2022, 22, 1015.	2.9	3
10	Death of a Parent and the Risk of Ischemic Heart Disease and Stroke in Denmark and Sweden. <i>JAMA Network Open</i> , 2022, 5, e2218178.	5.9	5
11	Further evidence that the worst performance rule is a special case of the correlation of sorted scores rule. <i>Intelligence</i> , 2021, 84, 101516.	3.0	2
12	Physical workload and increased frequency of musculoskeletal pain: a cohort study of employed men and women with baseline occasional pain. <i>Occupational and Environmental Medicine</i> , 2021, 78, 558-566.	2.8	12
13	Organisational factors and under-reporting of occupational injuries in Sweden: a population-based study using capture-recapture methodology. <i>Occupational and Environmental Medicine</i> , 2021, 78, 745-752.	2.8	12
14	Disability pensions related to heavy physical workload: a cohort study of middle-aged and older workers in Sweden. <i>International Archives of Occupational and Environmental Health</i> , 2021, 94, 1851-1861.	2.3	14
15	Labour market position of young people and premature mortality in adult life: A 26-year follow-up of 569 528 Swedish 18 year-olds. <i>Lancet Regional Health - Europe</i> , The, 2021, 3, 100048.	5.6	4
16	Death of a parent during childhood and blood pressure in youth: a population-based cohort study of Swedish men. <i>BMJ Open</i> , 2021, 11, e043657.	1.9	4
17	Occupational exposure to particles and increased risk of developing chronic obstructive pulmonary disease (COPD): A population-based cohort study in Stockholm, Sweden. <i>Environmental Research</i> , 2021, 200, 111739.	7.5	24
18	COVID-19 and Precarious Employment: Consequences of the Evolving Crisis. <i>International Journal of Health Services</i> , 2021, 51, 226-228.	2.5	53

#	ARTICLE	IF	CITATIONS
19	Intelligence, consistency, and Emerson's dilemma. <i>Personality and Individual Differences</i> , 2020, 160, 109943.	2.9	2
20	Educational differences in labor market marginalization among mature-aged working men: the contribution of early health behaviors, previous employment histories, and poor mental health. <i>BMC Public Health</i> , 2020, 20, 1784.	2.9	5
21	Death of a Parent During Childhood and the Risk of Ischemic Heart Disease and Stroke in Adult Men. <i>Psychosomatic Medicine</i> , 2020, 82, 810-816.	2.0	7
22	What is precarious employment? A systematic review of definitions and operationalizations from quantitative and qualitative studies. <i>Scandinavian Journal of Work, Environment and Health</i> , 2020, 46, 235-247.	3.4	139
23	Fathers' alcohol use and suicidal behaviour in offspring during youth and young adulthood. <i>Acta Psychiatrica Scandinavica</i> , 2019, 140, 563-573.	4.5	10
24	Precarious employment, business performance and occupational injuries: a study protocol of a register-based Swedish project. <i>BMJ Open</i> , 2019, 9, e026091.	1.9	6
25	Risk Behaviors Associated with Alcohol Consumption Predict Future Severe Liver Disease. <i>Digestive Diseases and Sciences</i> , 2019, 64, 2014-2023.	2.3	10
26	Social relations in late adolescence and incident coronary heart disease: a 38-year follow-up of the Swedish 1969-1970 Conscription Cohort. <i>BMJ Open</i> , 2019, 9, e030880.	1.9	0
27	Lifestyle Factors in Late Adolescence Associate With Later Development of Diverticular Disease Requiring Hospitalization. <i>Clinical Gastroenterology and Hepatology</i> , 2018, 16, 1474-1480.e1.	4.4	8
28	Reply to: "A measure of alcohol consumption in late adolescence associated with liver disease after 39 years of follow-up is insufficient to guide alcohol safe limits", <i>Journal of Hepatology</i> , 2018, 69, 252-253.	3.7	1
29	Alcohol consumption in late adolescence is associated with an increased risk of severe liver disease later in life. <i>Journal of Hepatology</i> , 2018, 68, 505-510.	3.7	52
30	1098...A population based longitudinal study of risk for chronic obstructive pulmonary disease and occupational exposure to organic and inorganic dust. , 2018, , .		0
31	Psychological Symptoms in Late Adolescence and Long-Term Risk of Suicide and Suicide Attempt. <i>Suicide and Life-Threatening Behavior</i> , 2018, 48, 315-327.	1.9	9
32	Early life predictors of high alcohol consumption in middle age. <i>Drugs: Education, Prevention and Policy</i> , 2018, 25, 273-279.	1.3	1
33	Fathers' Alcohol Consumption and Long-Term Risk for Mortality in Offspring. <i>Alcohol and Alcoholism</i> , 2018, 53, 753-759.	1.6	14
34	Childhood IQ and mortality during 53 years' follow-up of Swedish men and women. <i>Journal of Epidemiology and Community Health</i> , 2018, 72, 926-932.	3.7	9
35	Fathers' alcohol consumption and risk of alcohol-related hospitalization in offspring before 60 years of age. <i>Drugs: Education, Prevention and Policy</i> , 2017, 24, 3-8.	1.3	8
36	Effects of increased alcohol availability during adolescence on the risk of all-cause and cause-specific disability pension: a natural experiment. <i>Addiction</i> , 2017, 112, 1004-1012.	3.3	6

#	ARTICLE	IF	CITATIONS
37	The evolving relationship between premorbid intelligence and serious depression across the lifespan â€” A longitudinal study of 43,540 Swedish men. <i>Journal of Affective Disorders</i> , 2017, 211, 37-43.	4.1	9
38	Long-term effects of youth unemployment on mental health: does an economic crisis make a difference?. <i>Journal of Epidemiology and Community Health</i> , 2017, 71, 344-349.	3.7	50
39	Refractive state, intelligence, education, and Lord's paradox. <i>Intelligence</i> , 2017, 61, 115-119.	3.0	3
40	Occupational lifting and rhegmatogenous retinal detachment: a follow-up study of Swedish conscripts. <i>Occupational and Environmental Medicine</i> , 2017, 74, 489-495.	2.8	5
41	Cannabis, Tobacco, Alcohol Use, and the Risk of Early Stroke. <i>Stroke</i> , 2017, 48, 265-270.	2.0	59
42	Childhood IQ and mortality during 53 years of follow up among Swedish men and women. <i>European Journal of Public Health</i> , 2016, 26, .	0.3	0
43	Vascular risk factors and rhegmatogenous retinal detachment: a follow-up of a national cohort of Swedish men. <i>British Journal of Ophthalmology</i> , 2016, 100, 907-913.	3.9	11
44	Long-term physical workload in middle age and disability pension in men and women: a follow-up study of Swedish cohorts. <i>International Archives of Occupational and Environmental Health</i> , 2016, 89, 1239-1250.	2.3	28
45	Is poor self-rated health associated with low-grade inflammation in 43â€¦110 late adolescent men of the general population? A cross-sectional study. <i>BMJ Open</i> , 2016, 6, e009440.	1.9	34
46	S09-2â€¦Respondent-driven sampling in sampling hard-to-reach precarious workers. , 2016, , .		1
47	Fathersâ€™ intelligence measured at age 18â€¦20â€¦years is associated with offspring smoking: linking the Swedish 1969 conscription cohort to the Swedish Survey of Living Conditions. <i>Journal of Epidemiology and Community Health</i> , 2016, 70, 396-401.	3.7	1
48	Overweight in late adolescence predicts development of severe liver disease later in life: A 39years follow-up study. <i>Journal of Hepatology</i> , 2016, 65, 363-368.	3.7	68
49	The Association Between Self-Assessed Future Work Ability and Long-Term Sickness Absence, Disability Pension and Unemployment in a General Working Population: A 7-Year Follow-Up Study. <i>Journal of Occupational Rehabilitation</i> , 2016, 26, 195-203.	2.2	34
50	Cannabis use among Swedish men in adolescence and the risk of adverse life course outcomes: results from a 20 yearâ€¦followâ€¦up study. <i>Addiction</i> , 2015, 110, 1794-1802.	3.3	30
51	IQ and alcohol-related morbidity and mortality among Swedish men and women: the importance of socioeconomic position. <i>Journal of Epidemiology and Community Health</i> , 2015, 69, 858-864.	3.7	20
52	Intelligence and Disability Pension in Swedish Men and Women Followed from Childhood to Late Middle Age. <i>PLoS ONE</i> , 2015, 10, e0128834.	2.5	4
53	IQ and Level of Alcohol Consumptionâ€”Findings from a National Survey of Swedish Conscripts. <i>Alcoholism: Clinical and Experimental Research</i> , 2015, 39, 548-555.	2.4	28
54	Does high intelligence improve prognosis? The association of intelligence with recurrence and mortality among Swedish men with coronary heart disease. <i>Journal of Epidemiology and Community Health</i> , 2015, 69, 347-353.	3.7	4

#	ARTICLE	IF	CITATIONS
55	Mediation of the gravitational influence of intelligence on socio-economic outcomes. <i>Intelligence</i> , 2015, 53, 8-15.	3.0	9
56	Sickness absence in workplaces: Does it reflect a healthy hire effect?. <i>International Journal of Occupational Medicine and Environmental Health</i> , 2015, 29, 315-330.	1.3	10
57	Body Mass Index in Young Adulthood and Suicidal Behavior up to Age 59 in a Cohort of Swedish Men. <i>PLoS ONE</i> , 2014, 9, e101213.	2.5	18
58	Unemployment and coronary heart disease among middle-aged men in Sweden: 39 243 men followed for 8â€¦years. <i>Occupational and Environmental Medicine</i> , 2014, 71, 183-188.	2.8	43
59	Prognosis of schizophrenia in persons with and without a history of cannabis use. <i>Psychological Medicine</i> , 2014, 44, 2513-2521.	4.5	62
60	Cannabis use in adolescence and risk of future disability pension: A 39-year longitudinal cohort study. <i>Drug and Alcohol Dependence</i> , 2014, 143, 239-243.	3.2	11
61	Sick leave and the impact of job-to-job mobility on the likelihood of remaining on the labour market - a longitudinal Swedish register study. <i>BMC Public Health</i> , 2014, 14, 305.	2.9	7
62	IQ and somatic health in late adolescence. <i>Intelligence</i> , 2014, 44, 155-162.	3.0	7
63	Do working conditions explain the increased risks of disability pension among men and women with low education? A follow-up of Swedish cohorts. <i>Scandinavian Journal of Work, Environment and Health</i> , 2014, 40, 483-492.	3.4	29
64	Intelligence moderates how education mediates the effect of social background on own attained occupational position. <i>Intelligence</i> , 2013, 41, 529-536.	3.0	3
65	The effect of childhood socioeconomic position on alcohol-related disorders later in life: a Swedish national cohort study. <i>Journal of Epidemiology and Community Health</i> , 2013, 67, 932-938.	3.7	37
66	Cognitive ability in early adulthood is associated with later suicide and suicide attempt: the role of risk factors over the life course. <i>Psychological Medicine</i> , 2013, 43, 49-60.	4.5	41
67	Psychosocial Functioning and Intelligence Both Partly Explain Socioeconomic Inequalities in Premature Death. A Population-Based Male Cohort Study. <i>PLoS ONE</i> , 2013, 8, e82031.	2.5	14
68	IQ and alcohol consumption. <i>European Journal of Public Health</i> , 2013, 23, .	0.3	0
69	IQ and somatic health in early adulthood - a cross-sectional analysis of associations. <i>European Journal of Public Health</i> , 2013, 23, .	0.3	0
70	Alcohol use in adolescence and risk of disability pension 20-40 years later in Sweden: What role does socioeconomic position play?. <i>European Journal of Public Health</i> , 2013, 23, .	0.3	0
71	Explaining associations between shorter education and future disability retirement among men and women in Sweden. <i>European Journal of Public Health</i> , 2013, 23, .	0.3	0
72	Characteristics of schizophrenia in persons with and without a history of cannabis use. <i>European Journal of Public Health</i> , 2013, 23, .	0.3	0

#	ARTICLE	IF	CITATIONS
73	Cognitive Ability in Late Adolescence and Disability Pension in Middle Age: Follow-Up of a National Cohort of Swedish Males. PLoS ONE, 2013, 8, e78268.	2.5	18
74	Educational differences in disability pension among Swedish middle-aged men: role of factors in late adolescence and work characteristics in adulthood. Journal of Epidemiology and Community Health, 2012, 66, 901-907.	3.7	33
75	Cannabis, schizophrenia and other non-affective psychoses: 35 years of follow-up of a population-based cohort. Psychological Medicine, 2012, 42, 1321-1328.	4.5	120
76	Unemployment and mental health—“who is (not) affected?”. European Journal of Public Health, 2012, 22, 429-433.	0.3	73
77	Unemployment and suicide in the Stockholm population: A register-based study on 771,068 men and women. Public Health, 2012, 126, 371-377.	2.9	45
78	Intelligence, socioeconomic background, emotional capacity, and level of education as predictors of attained socioeconomic position in a cohort of Swedish men. Intelligence, 2012, 40, 269-277.	3.0	24
79	Binge Drinking—“A Predictor for or a Consequence of Unemployment?”. Alcoholism: Clinical and Experimental Research, 2012, 36, 1983-1990.	2.4	16
80	Cannabis use and depression: a longitudinal study of a national cohort of Swedish conscripts. BMC Psychiatry, 2012, 12, 112.	2.6	54
81	Alcohol Use in Adolescence and Risk of Disability Pension: A 39 Year Follow-up of a Population-Based Conscript Survey. PLoS ONE, 2012, 7, e42083.	2.5	36
82	Intelligence quotient (IQ) in adolescence and later risk of alcohol—related hospital admissions and deaths—“37—year follow—up of Swedish conscripts. Addiction, 2012, 107, 89-97.	3.3	28
83	Unemployment and Hospitalization Owing to an Alcohol—Related Diagnosis Among Middle—Aged Men in Sweden. Alcoholism: Clinical and Experimental Research, 2012, 36, 663-669.	2.4	17
84	Educational Level and Coronary Heart Disease: A Study of Potential Confounding from Factors in Childhood and Adolescence Based on the Swedish 1969 Conscript Cohort. Annals of Epidemiology, 2011, 21, 336-342.	1.9	12
85	Childhood Socioeconomic Position and Objectively Measured Physical Capability Levels in Adulthood: A Systematic Review and Meta-Analysis. PLoS ONE, 2011, 6, e15564.	2.5	121
86	Childhood socio-economic position and risk of coronary heart disease in middle age: a study of 49 321 male conscripts. European Journal of Public Health, 2011, 21, 713-718.	0.3	16
87	How social position of origin relates to intelligence and level of education when adjusting for attained social position. Scandinavian Journal of Psychology, 2011, 52, 277-281.	1.5	6
88	Psychiatric diagnosis in late adolescence and long—term risk of suicide and suicide attempt. Acta Psychiatrica Scandinavica, 2011, 124, 454-461.	4.5	18
89	Unemployment and mortality—a longitudinal prospective study on selection and causation in 49321 Swedish middle-aged men. Journal of Epidemiology and Community Health, 2010, 64, 22-28.	3.7	126
90	Early-Onset Depression, Anxiety, and Risk of Subsequent Coronary Heart Disease. Journal of the American College of Cardiology, 2010, 56, 31-37.	2.8	226

#	ARTICLE	IF	CITATIONS
91	Association between erythrocyte sedimentation rate and IQ in Swedish males aged 18â€“20. <i>Brain, Behavior, and Immunity</i> , 2010, 24, 868-873.	4.1	29
92	The association between masculinity rank and mortality patterns: a prospective study based on the Swedish 1969 conscript cohort. <i>Journal of Epidemiology and Community Health</i> , 2009, 63, 408-413.	3.7	25
93	Cognitive ability in adolescence and mortality in middle age: a prospective life course study. <i>Journal of Epidemiology and Community Health</i> , 2009, 63, 697-702.	3.7	25
94	Unemployment and suicide. <i>Lancet, The</i> , 2009, 374, 270-271.	13.7	42
95	Cannabis and suicide: longitudinal study. <i>British Journal of Psychiatry</i> , 2009, 195, 492-497.	2.8	76
96	Obesity in Young Adulthood Is Related to Social Mobility Among Swedish Men. <i>Obesity</i> , 2008, 16, 654-658.	3.0	15
97	Adolescent mental health predicts quitting smoking in adulthood: a longitudinal analysis. <i>European Journal of Public Health</i> , 2008, 18, 66-70.	0.3	15
98	Mortality, morbidity and occupational exposure to airway-irritating agents among men with a respiratory diagnosis in adolescence. <i>Occupational and Environmental Medicine</i> , 2008, 65, 120-125.	2.8	25
99	Blood pressure in late adolescence and early incidence of coronary heart disease and stroke in the Swedish 1969 conscription cohort. <i>Journal of Hypertension</i> , 2008, 26, 1313-1320.	0.5	45
100	How Does IQ Affect Onset of Smoking and Cessation of Smoking? Linking the Swedish 1969 Conscription Cohort to the Swedish Survey of Living Conditions. <i>Psychosomatic Medicine</i> , 2008, 70, 805-810.	2.0	39
101	Body mass index in late adolescence and its association with coronary heart disease and stroke in middle age among Swedish men. <i>International Journal of Obesity</i> , 2007, 31, 777-783.	3.4	60
102	The association between cognitive ability measured at ages 18â€“20 and coronary heart disease in middle age among men: A prospective study using the Swedish 1969 conscription cohort. <i>Social Science and Medicine</i> , 2007, 65, 1410-1419.	3.8	64
103	To what extent may the association between immigrant status and mental illness be explained by socioeconomic factors?. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2007, 42, 990-996.	3.1	99
104	Obesity and Attained Education: Cohort Study of More Than 700,000 Swedish Men. <i>Obesity</i> , 2006, 14, 1421-1428.	3.0	69
105	The association between cognitive ability measured at ages 18â€“20 and mortality during 30 years of follow-upâ€”a prospective observational study among Swedish males born 1949â€“51. <i>International Journal of Epidemiology</i> , 2006, 35, 665-670.	1.9	114
106	Is the association between low job control and coronary heart disease confounded by risk factors measured in childhood and adolescence among Swedish males 40â€“53 years of age?. <i>International Journal of Epidemiology</i> , 2006, 35, 616-622.	1.9	32
107	How far are socioeconomic differences in coronary heart disease hospitalization, all-cause mortality and cardiovascular mortality among adult Swedish males attributable to negative childhood circumstances and behaviour in adolescence?. <i>International Journal of Epidemiology</i> , 2005, 34, 260-267.	1.9	56
108	Can large relative mortality differences between socio-economic groups among Swedish men be explained by risk indicator-associated social mobility?. <i>European Journal of Public Health</i> , 2005, 15, 518-522.	0.3	14
